Replying to "X. Y. Z.," I have not experimented with cuttings of begonias with the object in view of determining if it made any difference whether cuttings were cut just below a joint, feeling contented that it makes no essential difference to the future plant where the cut is made. In the tuberous section it may possibly make some difference, though about this I am not at all certain. My impression is, without positively knowing what the result would be, that it is safer to cut just below a joint in the preparation of slips to increase the stock of an especially good variety among the tuberous rooted kinds, because it is a generally accepted belief among the fraternity that there is more likelihood of the formation of a crown of living eyes when a cutting of a tuberous rooted plant is cut at or immediately beneath an eye than at any other point on the shoot. In the semperflorens section of begonias, of which perhaps the hybrid Erfordii (Vernon × Schmidtiana) is one of the best examples, the selection of cuttings must be made with some discrimination, that is to say, a growth bud at the base of the cutting at the axil of the leaf should be at all times in sight if we would desire the very best results, otherwise the plant, so far as I have been able to observe, will go on growing and blooming, making only one spindling shoot and maturing nothing from which to continue the plant if the warning advised is unheeded, for we cannot hope to perpetuate this valuable hybrid from seed from its own flowers, as it rarely or never comes true from seed produced in that way. At this moment I cannot recall any other species or varieties of begonia which require the same precaution in propagation. This may not be in the nature of a reply to the question asked, nor yet germane to the subject under consideration, but it may be of some interest to at least a few of your readers. E. L.

[The replies to this question are, respectively, the opinions of an experiment station horticulturist, a private gardener and a commercial grower.—ED.]

A Gigantic Bay Tree.

The bay tree, or Laurus nobilis, has become quite a popular decorative plant in America. It has been grown in Belgium in enormous quantities for a considerable period by the nurserymen there, but only within the past few years have the exportations increased to such an extent that every prominent florist in the States uses them for decorative purposes. In the early spring quantities now find their way to this country and are used most extensively for exterior decorative purposes.

Standards are especially in demand. Pyramids do not seem to sell so well. The reason for this may be that this is a great water loving tree and the pyramids are more apt to suffer from lack of attention in this regard, as the lower branches surrounding the tub prevent rain or water from overhead from reaching the soil, consequently many of them have been lost from this cause. During the hot summer season they should be watered thoroughly twice a day and a rainstorm should not interfere with this rule. Wherever possible the tubs should be plunged in the soil during the summer. The rays of the hot sun on the side of the tub are very injurious to the roots.

The majority of the bays that are shipped to this country are cultivated in Belgium. Although Ghent is a familiar name to most of the nurserymen here as the great horticultural center of Belgium, nevertheless the bay is not grown there in such enormous quantities as at Bruges, which is some thirty-five minutes' ride from Ghent. There the bay tree finds its home, thriving in all stages of development, and there are seen trees of gigantic proportions that cannot be found elsewhere in all Europe.

The bay tree here illustrated is one of the numerous gigantic specimens grown in Sander's nursery at Bruges. It is sixteen feet high, seven feet through the

A GIANT BAY TREE.

crown and is one of the finest specimens in cultivation. In this nursery will be found some hundred thousand trees in all stages of growth. In winter they are transferred from the open to a huge shed, 500 feet long, 40 feet wide and of great height. Two or three rows of pipe run the entire length on either side, enough to protect them from the frost. It is well known that the trees will not suffer if subjected to several degrees of frost, but it is always considered best not to expose them even to that.

Most of our readers will recognize the gentleman in the picture as Mr. Alfred Dimmock, the enthusiastic representative in America of the Sander establishment.

New York.

AN INTERESTING CLUB MEETING.—MR. HALLOCK'S IMPRESSIONS.—A BOWLING TEAM TO BE FORMED.—REGULATING THE STEAMER TRADE.—PLANT TRANSPORTATION.—STATE OF TRADE.—DULL BUSINESS.—THE NEW RED ROSE.—GRAFTED STOCK AT WEST HOBOKEN.—A VALUABLE CATTLEYA.—NOTES OF THE WHOLESALERS.—MANY NEW ESTABLISHMENTS AND LOCAL BUSINESS CHANGES.—VISITORS.

Mr. E. V. Hallock entertained the Florists' Club on Monday evening with an account of some of his experiences and impressions during a recent trip to Europe. Mr. Hallock's easy manner and pleasant ways captivated his audience at once and their enjoyment of his many pertinent allusions was manifested in frequent bursts of applause. A summary of his observations was that a young man of ability and pluck going into business has a much better chance for success in this country than in Europe. He spoke in high praise of the Botanical Gardens of Belfast and Dublin, also the horticultural work about the hotel where he stopped at the Lakes of Killarney. Kew Gardens and Covent Garden Market were graphically described, also some of the English parks which, however, he said did not compare in his estimation with our own. He noted a striking difference in taste in and about the flower marts of London and Paris and compared them greatly to the disadvantage of the former. An enthusiastic vote of thanks was given Mr. Hallock at the conclusion of his remarks and an animated discussion of some of the points brought out, followed, during which Mr. J. N. May called attention to the great disproportion between wholesale and retail prices on flowers and fruit in this country and asserted that the consumption of these goods might be enormously increased if the retailer could be induced to accept a smaller percentage of profit and thus place these things within the reach of the masses.

Previous to the lecture considerable discussion was created by the recommendation from the trustees in favor of a weekly bowling meeting as an adjunct to the club. The question was debated by Alderman Morris, Messrs. O'Mara, Burns, Stewart and others, Mr. Morris taking the stand that the club could not consistently appropriate money for bowling without also doing so for bicycling, boxing or any other athletic exercise which certain members might prefer, but the matter was finally settled to the satisfaction of everybody and New York will have a bowling team. Another matter considered was that of an arrangement whereby the steamship companies would give receipts for all flowers delivered to their care by florists for passengers, and a committee was authorized to take the subject in hand. Mr. O'Mara also called attention to the clogging of the wheels of plant transportation through the enforcement of the laws regarding the inspection of nursery stock, whereby shippers of florists' plants are frequently embarrassed, although their goods are by law exempt. He advised that all shippers of florists' stock should have this fact plainly designated on their labels as much delay and loss might thus be avoided. On the exhibition table was a vase of Ernst Asmus' new rose Liberty and a splendid Cattleya labiata from the Rosary, which has been named Mrs. Clarence H. Mackey.

The flower trade as viewed from the standpoint of the grower or wholesaler is exceedingly poor this week. Last week it was bad, however viewed. Roses are just beginning to recover slightly from the enervating effects of last week's heat and rain. Mildew is seen more or less and American Beauty shows here and there the ravages of thrips. But the lightness of the demand is the most disquieting feature and it is plain that if a heavy crop were on just now, conditions would be as discouraging as at the corresponding date last year and the year previous, which were record breakers in this line. Violets are getting quite abundant and chrysanthemums are also beginning to assert themselves. Carnations are on the increase daily. Cattleyas have come in so heavily recently as to break down prices nearly one-half. There is entirely too much lily of the valley in the market at present.

The coming sensation in the rose line is Ernst Asmus' Liberty. This rose Mr. Asmus pronounces the finest introduction of the century, of its color. The color is lighter and brighter than Meteor, both form and color rivalling Jacqueminot at its best. Mr. Asmus has three houses of Liberty and will introduce it in 1900. Its appearance growing leaves nothing to be desired, its capacity for blooming being really phenomenal. If it keeps up its present gait, the Meteor is doomed. Mr. Asmus is trying a house of second year Beauties. They are apparently a success, for a heavy crop of long stemmed flowers is now coming on although the plants have borne steadily all summer. His success with grafted Brides and Bridesmaids is not especially marked, the own root plants looking as well as those grafted and the latter showing considerable small wood, which is directly the reverse of Mr. Montgomery's experience. Evidently it is partly a question of soil. One house of chrysanthemums is the extent of Mr. Asmus' investment this year.

Probably the first pure white Cattleya labiata ever flowered in this country bloomed recently among a lot of imported plants at Julius Roehrs'. This valuable find was quickly secured for the Roebling collection at Trenton and Mr. Roehrs, bank account is noticeably swelled in consequence. There may be seen now at Mr. Roehrs' as many as a thousand cattleya blooms at once almost any day.

James Hart, New York's oldest commission man, is dissatisfied with present conditions. He says he had money to burn last year but "is poorer now than he has been for twenty-five years." There is a bit of a twinkle in the corner of J. H.'s eye as he tells this.

Dards had one of the biggest decorations on Wednesday that New York has seen for many a day, for the wedding of Miss Wetherbee, daughter of the proprietor of the Buckingham Hotel.

John Young is receiving some unusually fine lily of the valley from Carl Jurgens which sells for more than double the price of the ordinary brand; the latter, in fact, is hard to sell at any price. With lily of the vally, as with everything else, there is always room at the top.

M. A. Hart has the windows of his wholesale flower store filled with geraniums and jardiniere ferns for which there is a ready sale, even when the flower trade languishes.

Benj. Dorrance is sending to Thos. Young, Jr., from Dorranceton, Pa., heavy consignments of roses in several varieties which are of unexcelled quality for the season. Meteors are especially fine.

Sherry's magnificent restaurant and assembly rooms were opened on Monday, October 10. The plant decorations by A. Wadley are grand. W. Lee has charge of the floral department.

George Schubert has devoted his entire establishment at West Hoboken to small ferns for jardiniere planting. This small fern business has assumed enormous proproportions within a very few years.

At J. K. Allen's chrysanthemums are gradually pushing the dahlias back into the corners and it will be but a few days when the chrysanthemums will be in full control.

On Monday, October 17, Decker & Blauvelt will open their new wholesale and commission cut flower establishment at 42 West Twenty-eighth street.

Mrs. Keyser, daughter of President Plumb, of the New York Florists' Club, returns to her home in Chicago on Thursday after a six weeks' visit to New York.

G. W. Hillman, of the John Henderson Co., is acting as manager of the New York Cut Flower Co.'s wholesale rooms on West Twenty-third street.

Chas. Haberman has opened a new flower store on the northwest corner of One Hundred and First street and W. Boulevard.

J. J. Perkins & Co. now occupy a portion of Koffman's store at 52 W. Twenty-ninth street as a cut flower commission house.

H. A. Hoffman, who was formerly in the commission business, has taken a position with J. K. Allen.

Fleishman is advertising his recently acquired and gorgeously equipped branch at the Empire Building Arcade for sale.

John I. Raynor celebrated the tenth anniversary of his wedding on Monday evening, October 10.

John S. Nicholas has opened a handsome flower store at 37 E. Forty-second street.

Visitors in town: W. A. Houck, representing Ellwanger & Barry, Rochester, N. Y.; Thos. A. Galvin, Frank Haughton and Thos. Clark, Boston; Carl Jurgens, Newport, R. I.; Wm. Griffin, Lenox, Mass.

Philadelphia.

CHRYSANTHEMUMS ARE SLOW IN PUTTING IN AN APPEARANCE.—MARKET CONDITIONS.—NEXT TUESDAY'S SHOW.—MRS. HEACOCK MEETS A FALL.—NOTES.

Every day this week the early chrysanthemums have been expected but up to Wednesday Lady Fitzwygram and Montmort are about the only varieties in sight. The latter are very good and come from Jacob Becker. The vacancy, if any existed, is more than filled with cosmos, which is being carted around in wagon loads. Beauties are becoming more plentiful but there are comparatively few thoroughly good flowers. Teas are still improving. Carnations are coming on a

little too fast and much of the stock offered remains unsold. Flora Hill makes the best showing but a defect is noticed in this variety when left to open too far. The stamens become covered with a brown pollen which makes them very noticeable and gives a vase of flowers a brownish cast or faded appearance. Victors look well but are still as light as good Daybreaks, which, in turn, are a soiled white. Double violets are coming in from all directions and are improving with every shipment. The first southern stock was offered by Ed. Reid, and was very good. George Moss was first with mignonette, and the spikes are good for the season. Asparagus Sprengerii is now in stock at all times, several of the growers having it in quantity.

S. S. Pennock has his new addition under roof and the new refrigerating plant will soon be completed. Mr. Pennock's stock is wonderful in quantity and variety. He is handling the best Beauties that come to the city.

The exhibition of the Chrysanthemum Society of America next Tuesday will no doubt bring out all the early new varieties. Those intending to exhibit should send the flowers to David Rust, Horticultural Hall, Broad street, Philadelphia, where every facility for handling and caring for them will be afforded.

C. H. Rooney, late manager for James Boyd, Harrisburg, Pa., and later with Robert Craig & Son, has accepted the position of superintendent for A. L. Thrall, Jamestown, N. Y., who has just erected a fine plant.

Mrs. Joseph Heacock met with a painful accident last week in which her right arm and a small bone above the ankle were broken. Mrs. Heacock lost control of her bicycle while going down hill.

H. Bayersdorfer & Co. have had their entire force working until ten or eleven o'clock at night for the past three weeks to keep up with their orders; their shipping trade is the best they have ever had.

K.

Chicago.

THIS IS THE DAY OF THE CHRYSANTHEMUM.— STOCK CONDITIONS.— FLORISTS' CLUB MEETING.— BUILDING NOT YET SECURED FOR THE FALL SHOW.—W. N. RUDD TO SUPERINTEND.—EDGAR SANDERS' ANNIVERSARY.—WHAT WITTBOLD IS DOING.—A BUSINESS CHANGE.—BRIEFS.

This is the season of the chrysanthemum and such early varieties as Fitzwygram, Robinson and Merula were this week reinforced by blooms of Mme. Bergmann, Mrs. Whilldin, De Montmort, Midge and Glory of Pacific. Some splendid flowers were in and sold as high as $3 per dozen although most of the stock went for half that. Poehlman Brothers had twelve houses of chrysanthemums, one of which has already been emptied and is being replanted with violets. Next week will see a great increase in the cut, which is this year something like two weeks later than last.

Roses have not been over abundant and fine flowers are scarce. First-class flowers have brought first-class prices and the prospects are that next week's Peace Jubilee will see very brisk demand for good stock of Beauty, Bride, Bridesmaid, Perle, Meteor and Kaiserin. There will be a large supply but too many flowers which can command only second grade prices.

Carnations have deluged the market but no good flowers have been sacrificed. Some growers get $2 a hundred for their entire cut while the crop of others does not average 50 cents.

At the last meeting of the Florists' Club C. Cropp and Jos. Stanford were elected to membership. The evening was made memorable by E. Buettner's account of the things floricultural which he observed upon his recent tour of Germany and the discussion which followed his remarks. Mr. Buettner made a strong point of the fact that Germans make a greater use of outdoor flowers than do we and that they show in their stores many tasteful bunches and baskets ready for sale. He pointed out that Europeans employ a greater variety of flowers and devote more attention to window display than do Americans and suggested several points which were commented upon by Messrs. Wienhoeber, Hauswirth, Swenson and others as being of value to our retailers. New officers will be elected at the next meeting of the club, October 21.

The quarterly meeting of the Horticultural Society was held October 8. The treasurer reported $2,500 on hand and the executive committee formulated plans for the approaching chrysanthemum show. The Edson Keith building at the corner of Wabash avenue and Monroe street was considered for the show and is admirably located and suited for the purpose. It is now occupied and at this date it is doubtful whether the society will be able to secure it. W. N. Rudd will be superintendent of the show and E. G. Uihlein, J. C. Vaughan and Phil. Hauswirth have been delegated to secure special premiums.

On Monday evening last Edgar Sanders, Chicago's pioneer florist, entertained a dozen of his friends in the trade at a dinner at the residence of his daughter, Mrs. H. P. Victor, 1639 Belmont avenue. The rooms and hallways were very beautifully decorated with American Beauties, palms and ferns. While at table the guests were very pleasantly surprised to learn that the occasion was the celebration of Mr. Sanders' seventy-first birthday. The bountiful spread having been thoroughly enjoyed, congratulations on the happy occasion were in order and recollections of early days in the retail plant trade, cut flower and decorative work were indulged in. Messrs. Sanders, Wienhoeber, Dressel and Hanswirth all contributed entertaining reminiscences. A very interesting half hour was spent in Mr. Sanders' library, where he has as good a collection of horticultural literature as can be found in America, and a very complete record of the early history of horticulture and floriculture in Chicago. Later Mr. Sanders' granddaughters, Mr. McKellar and others entertained the company with musical selections, while Mr. S. himself showed how lightly he carried his three score and ten years by songs and recitations. A little song of his composition, adapted to the tune of an old English jingle, "The Old Musician and His Harp," was much enjoyed. We give a stanza with chorus:

THE FLORIST AND HIS SPADE.

Years have come and passed away,
Silver locks have turned to grey,
Time has changed since boyhood days
When youth and hope swayed all my ways.
Now my work is on the wane,
You all can see it very plain—
Soon I'll be where good florists roam,
Dear old friends I'm going home.

Chorus—

Bring me back my spade once more,
Let me try its magic power;
Soon I'll be where good florists roam,
Dear old friends I'm going home.

One can partially realize Mr. Sanders' long career in floriculture by reading an ancient printed poster which was shown announcing a lecture by him in his English home town in 1850. Since then what a marvelous growth he has seen in floriculture in the west, and what a long, honorable and active experience has been his through these many changes! Although for a season, half a dozen years since, he was practically out of it, his more recent active newspaper work in the trade has apparently renewed his horticultural youth, and his friends as they bade him good night could well and hopefully wish him another twenty years of up-to-date work.

George Wittbold has just completed a very fine conservatory 36x95 and another palm house 19x100. In the larger structure there are no benches and the floor is of cement. It affords an excellent opportunity to display tropical plants. Mr. Wittbold has just received a large importation of araucarias, kentias, arecas, latanias and other stock from Belgium. He is at present adding to his heating equipment a large hot water boiler built upon plans originated by Henry Wittbold and patented some years ago.

In Mr. E. G. Uihlein's collection at 34 Ewing Place there is now flowering freely a plant of Acalypha Sanderi, a novelty which certainly merits all that has been said in its favor of late.

Frank Oechslin & Bro. have bought from August Decker the old Garfield Park establishment at 1688 West Madison street and will continue the business at that number. Mr. Oechslin and brother were formerly growers for J. F. Kidwell, Frank having been foreman at this place since its establishment.

Commissioner McGann on Wednesday barred State street to all fakirs and now the curb-stone gentry are either out of business or operating in less populous neighborhoods.

The new houses of the Chicago Carnation Company are now well along toward completion, and all the plants look well, most of them being benched.

Charles H. Allen, of Floral Park, N. Y., called on his usual fall trip and left for Detroit Thursday night.

The Lincoln Park commissioners have asked for $20,000 with which to rebuild the propagating house.

A. G. Boehringer, of Boehringer Bros., Bay City, Mich., was a visitor on Wednesday.

Baltimore.

TRADE IS BRISK.—STOCK INCREASES IN QUANTITY.—MR. VINCENT TELLS OF HIS WESTERN TRIP.—NOTES.

Several weddings in the early part of the month have given a decided impetus to business, and the retailers are once more quite busy. The Autumn Queen and airy cosmos are again seen in the store windows. Beauties, Brides, Bridemaids and Perles, are offered in increased quantities and are bringing fair prices. Violets made their first appearance this week and sold well.

The Gardeners' Club held its regular meeting on October 10 with a fair attendance. Richard Vincent, Jr., gave a very entertaining description of his visit to the Omaha convention. His second exhibit of dahlias was especially fine.

W. Paul Binder has been very ill of heart trouble, but his condition is much improved. The affable M. Rice, of Philadelphia, visited our city this week.

A. R. J.

LONDON, ONT.—Andrew Wildasin has arrived home from Santa Fe, N. M., where he has been for several months for his health.

Address THE AMERICAN FLORIST CO., Chicago.

THE florist who has lost any valuable stock this autumn by frost can have no excuse, for never in recent years has the frost held off so late as this season.

IT seems a strong argument in their favor that the flowers of carnations grown constantly under glass now bring $2 per 100 where those of plants grown part of the season outdoors bring only 50 cents, and most of the growers who have tried it are of the opinion that the former is the more economical method of cultivation.

Henry F. Michell.

H. F. Michell was the hero of the occasion at the last monthly meeting of the Florists' Club of Philadelphia. His side remarks during the reading of his essay on his European trip were the most enjoyable part of it. His naive contrasting of the way Hyde Park in London and all the other public parks in Europe are patronized by the highest society and the low estimate our elite have of, say Fairmount Park in Philadelphia, a much grander pleasure ground, brought down the house. Harry was surprised to learn that it was not considered good form in polite society to go to Fairmount Park! It was a pleasure to hear this bright young business man so well spoken of after the meeting was over and the members got to chatting in groups. That he has built up a fine business in the seed trade under the conditions prevailing in recent years and the fierce competition of the old established firms in Philadelphia is no mean accomplishment, and the achievement is heartily recognized.

Philadelphia Club Room Echoes.

Robert Craig: "Yes, sir! Herbert Spencer is the greatest intellectual force of the age. He believes in sentiment and enthusiasm, but also believes that mankind is admirable only when the emotions are kept subservient to the intellect."

Paul Huebner: "Vat voud Spencer do if he met ze most beautiful laydee?"

Craig: "That's just like you, Paul; your emotions control you intellectual faculties. Now, Spencer, in a case like that, would consider."

Huebner: "So do I, Mr. Graig, so do I! I consider, too; but I loose mine head aftervords!"

Craig: "You're an example of Huxley's dictum that a sound stomach and a fair intellect is better equipment for this world than a great head and dyspepsia."

Huebner: "Yes, I can eat and I can drink mine beer, and I can get up in der morning feeling elligant."

John Burton: "That's what I say makes the Ango-Saxon the leader to-day; he can eat—and what gave him that capacity? Outdoor sports, of course. Craig swears by Spencer and Huxley and Tyndall and the emotions under your thumb, but I say give us enthusiasm; that's the wonder worker—nothing great was ever accomplished without it."

Craig: "Speaking of eating, I have seen some wonders in the halls of Congress. You go down to Chamberlain's and see those brainy and brawny congressmen and senators eating; it's a sight. Now there was Senator Beck, for instance ——" But just then the door shut with a bang.

COOPER.

Boston.

IMPROVED QUALITY OF STOCK.—ABOUT VIOLETS. — CHRYSANTHEMUMS LATE.—FUNERAL OF AN ACTRESS.—LOCAL IMPROVEMENTS.—NOTES AND VISITORS.

A general improvement in the quality of flowers coming to this market is noted all along the line. Roses still show to a considerable degree the effects of the roasting they had to suffer in the hot last week of September, but they are getting better every day and with continued seasonable weather should soon approach the winter grades of quality. Carnations are rapidly improving and the departure of the competing asters leaves them an undisputed field. Violets are still far from the desired size and color but are as good as previous experience has led us to expect so early in the season. There are more of the single variety in evidence this year than heretofore. The doubles are well divided between Campbell and Marie Louise. Campbell enjoys a better relative sale in this market than elsewhere, not because the color is preferred by buyers but because—making a virtue of necessity—a number of growers have come to the conclusion that it is the only violet they can put in with a reasonable certainty of making a success with it. The Farquhar, as to the identity of which one hears varying opinions, is grown by quite a few and with better results than Marie Louise gives. Chrysanthemums make little impression as yet. They are unusually late this year with most of the growers in this neighborhood who attribute this fact to the late hot weather in part.

The funeral of the late Caroline Miskel Hoyt called for a great many flowers from this city and numerous handsome floral designs were made by the various local artists, the majority of which were, as usual, wreaths either simple or in some sort of an appropriate setting. A cover of smilax thickly strewn with cattleyas, violets and roses was spread over the casket.

At Horticultural Hall, on October 8, E. J. Mitton showed two well flowered specimens of Cattleya labiata and J. E. Rothwell had a handsome variety of Cattleya aurea, named Rothwelliana.

A large oblong water lily pond or tank is being constructed at J. L. Gardiner's. A rustic bridge will span it. Only the choicest varieties of aquatic flowers will be grown.

Extensive improvements are being made in the grounds at the Oakes Ames place. Mr. Ames is getting together a fine collection of botanical orchids, which is the only one of any extent is this part of the country.

Visitors in town: Alfred Dimmock, representing Sander & Co., London; H. S. Anderson, representing H. T. Jones, Elizabeth, N. J.; G. Sykes representing Lord & Burnham Co., New York.

Henry Penn has opened a new retail flower store in Chapman Place.

Toronto.

A QUIET SEASON.—CHRYSANTHEMUMS ARE NEARLY READY.—TESTIMONIAL TO A. H. EWING.—OTHER MATTERS OF INTEREST.

As is usual at this season of the year there has been a slack time in the cut flower trade, a dearth both of business and of flowers. Dahlias in small quantities have been found useful but the sales were limited. Charles Tidy showed the first chrysanthemums of the season October 11, principally Madame Bergmann, grown by Harry Dale, of Brampton. He asked $2.50 per dozen, but the demand was not great. The blooms in the various greenhouses are rapidly maturing and as the plants everywhere appear to be in excellent condition a few days of sunshine will bring in chrysanthemums in abundance.

I noticed a fine Washington navel orange tree in Tidy's conservatory, bearing many large oranges in various stages of ripening and a number of flowers and buds at the same time. There are some excellent early cyclamen on the market with a dozen or more flowers each.

Arthur H. Ewing, who has been for many years head gardener at the Normal School, and who has taken a prominent part in all movements in this section for the advancement of floriculture, being about to venture on his own account at Berlin, Ont., was made the recipient of a very handsome oak roll-top writing desk and an illuminated address, by his numerous friends in the Toronto Horticultural Society and the Toronto Gardeners' and Florists' Association. Among the speakers who testified to their appreciation of

Mr. Ewing's many kindnesses and good services were Capt. McMaster, Thomas Manton, J. McP. Ross, Henry Lucas, Ed. Tyrrel, Geo. Vair, H. Simmer, E. F. Collins, A. J. M. Watkins, George Mills and Edwin Utley. The address read as follows:

MR. A. H. EWING, DEAR SIR:—There are many ties in our ordinary life it grieves us to break, those of family affection or social intercourse. Circumstances have occurred which we regret to say will change our pleasant intercourse with you, being about to leave this part of the country in which you have been so long and favorably known and that more particularly among your confreres in the profession.

You are about to establish yourself in another part of the country, making a new home. We all hope you may be eminently successful. The universal urbanity of your manner has endeared you very much to all who have come in contact with you. Pray accept our heartfelt wishes for your future prosperity. Be also pleased to accept of this token of our esteem and best wishes, which when you look upon may remind you of the many friends you have left in Toronto.

GEO. VAIR, J. McP. ROSS,
THOS. MANTON, H. LUCAS,
HERMAN SIMMERS, THOS. McQUEEN,
Committee.

The regular monthly meeting of the Toronto Horticultural Society, which was rather sparsely attended, was devoted to "Bulbs for fall growing" and Herman Simmers gave a practical and useful address to amateurs upon that subject. S. P.

Detroit.

FLORISTS' CLUB DISCUSSES LIVE TOPICS.—PROMISE OF A PROFUSION OF METEORS.—HOLZNAGLE'S WM. SCOTT CARNATIONS.

The Florists' Club is progressing nicely and very interesting meetings are being held. At the last session a topic of importance was called up by J. F. Sullivan's report of the difficulty which he experienced in securing a shipment of palms from the east, the railroad having declined to move them without a certificate of inspection, claiming that palms come under the provisions of the New York legislation against San Jose scale. As several club members are anticipating importations of palms through New York the secretary was instructed to write the authorities and try to prevent trouble of similar character. At the next meeting of the club there will be an exhibit by the Detroit Microscopical Club of insect pests with which florists contend and the methods of combating them will be explained.

Everyone is anticipating a good season's business and preparing for it. From all indications Meteor roses are to be very abundant here this winter. Among the many who have good stock of this are Bruno Schroeter, J. E. Carey, of Mt. Clemens, and the Pontiac Floral Co.

Carnations are all doing well and among the many fine lots none are better than the house of Scotts grown by Frank Holznagle at Highland Park. R. F.

Buffalo.

STOCK AND THE MARKET.—MILLATT SELLS TO CHARLES PORTER.—SHOW PROSPECTS.—PERSONALITIES.

Carnations are coming in very fast and in various sizes. Roses are very good and quite plentiful. Asters have gone and dahlias look sad. Violets are becoming more plentiful and show a slight improvement in quality. Chrysanthemums will soon be in with a rush.

H. J. Millatt, whom we welcomed last fall, has sold out to Charles Porter, who has been chief clerk for S. A. Anderson for several years.

Everything points now to a more successful show than was ever given in Buffalo, and with the co-operation of all the florists, both growers and retailers, if for no other purpose than to advertise the business, we shall win a great success.

W. F. Kasting is now in his new office which he has handsomely decorated in red. Mons. Stokes, his able bookkeeper, can now talk to you from either side of a sliding window and in five different languages.

Will Palmer, in his alterations, has got an electric bell on Jakey Boeller. All he has to do is to push the button and Jakey will do the rest, and he don't have to come down stairs to do it. W.

St. Louis.

CUT FLOWER SITUATION.—CHRYSANTHEMUMS TAKE WELL.—VISITORS.—A BUSINESS CHANGE.

There has been very little change in the cut flower situation the past week as stock has been abundant enough to keep prices down to their regular figure. Chrysanthemums are coming in, principally Bergmann and Glory of Pacific and are taking quite well.

The irrepressible Joe Rolker and A. F. Ford, representing Aug. Rolker & Sons, and A. Herrmann, were in town during the past week.

The Krebs Floral Co., doing a retail trade at Sixth and Olive streets has decided to go out of business after a year's experience. R. F. T.

NORTHAMPTON, MASS.—Walter Harris started in the flower business here on October 3.

CLAYTON, ILL. — A chrysanthemum show will be given here during the third week in November.

ORANGE, N. J.—Robert MacArthur has disposed of his seed and flower store at 186 Main street to Popken & Collens.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ONION sets are advancing briskly.

C. C. MORSE, of Santa Clara, California, is on his eastern trip.

THE COX Plant and Seed Company has opened an eastern office at 11 Broadway, New York City.

ROBT. POMMER, of D. I. Bushnell & Co., St. Louis, was a visitor at Chicago this week, interested in the onion set market.

W. ATLEE BURPEE & Co., are moving from their temporary quarters on Fairmount avenue to the new Burpee Building, 475–477 N. Fifth street, Philadelphia.

NEW YORK CITY.—Friends in the trade were very glad to see Jerome B. Rice, of Cambridge, N. Y., in the city last week. Other visitors: W. C. Langbridge, Cambridge, N. Y.; Geo. C. Watson, Philadelphia.

THE Secretary of Agriculture advises the AMERICAN FLORIST through its representative that the matter of seed contract is still under consideration and not finally settled. It may be several days before definite information can be had.

ST. PAUL.—L. L. May & Co., who have a large force of travellers now on the road in all sections of the country, report excellent trade, especially in packets. The onion set crop in this section has been an average one of excellent quality. The dry season has been very favorable for the harvesting and curing of this crop.

Flower Seed Novelties.

We hear of the following as likely to be introduced the coming season:

Chrysanthemum carinatum Chameleon.—A very large flowering kind, light bronze when the flower opens, with a dark purple ring. The petals are a dark purplish black, with a bright yellow ring which changes into a light yellow when the flower fades.

Coleus, Dwarf, Large Leaved.—A distinct dwarf kind having large leaves and growing from six to eight inches high. Leaves dark purple, marbled red.

Eschscholtzia Douglasi.—The flowers of this are of medium size and bright yellow color. The plant blooms two weeks earlier than all other kinds.

Delphinium Caucasicum.—A perennial with sky blue flowers, the plant growing to about the same height as D. elatum.

Gaillardia grandiflora compacta.—A dwarf, compact, erect form of the large flowering species.

Geranium grandiflorum.—A hardy perennial which blooms through May and June. The flowers, produced in pairs, are large and of a bright ultramarine blue shade; very showy.

Gerardia hybrida.—This is said to be a cross between a Gerardia and a pentstemon. It is very free flowering, the blooms varying in color from pale rose to red and purple. If sown in January or February and treated like a pentstemon, it flowers from July till late in autumn.

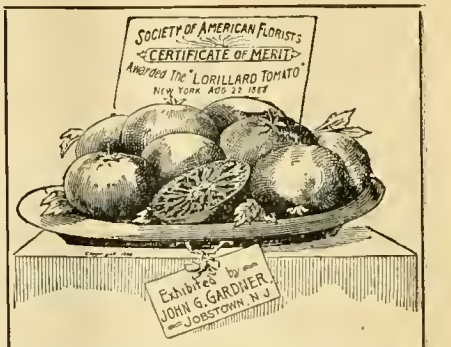
Pelargonium hybridum nanum grandiflorum.—A new race of very vigorous growth. Seeds sown in August will produce fine flowering plants the following May.

The list also includes a dwarf candytuft and a petunia of much merit.

Forcing Strawberries in the Open Ground.

The main requisite is a bed of well-rooted plants which are not too old. The plants should be cleaned of all decayed leaves in the fall, and then the bed should be covered with short manure, or leaves and straw to prevent the frost from penetrating too deep. Frames should then be placed over the beds. In February, as soon as the weather permits, the forcing can be commenced by removing the straw or litter, giving the plants another careful cleaning, loosening the surface of the soil and placing the sash on the frame. Fresh horse manure, which should be renewed several times during the season, is then placed around the frame. During the night the sash are covered with mats and boards, which should remain until the sun is warm enough the next morning to create sufficient heat in the frame. The air space in the frame should not be less than one foot in depth. The plants are sprayed until they commence to bloom, and the plants should be fully exposed to the sun without ventilation. An occasional application of liquid manure on dull days is necessary. The spraying should be done with lukewarm water, and only on bright days. The surface of the soil must be kept moist regularly. When the plants are in bloom care should be taken that no water is applied to the flowers, and from that time onward it is necessary that the frame be ventilated on bright days, but always in such a manner that the plants are protected from draughts. When the plants cease blooming and commence to set fruit the ventilation should be reduced so as to provide sufficient heat to mature the fruit. In this manner ripe strawberries have been obtained from four to six weeks before those in the open ground were ready, and at a comparatively small expense. Sharpless, Royal Sovereign, Laxton's Noble, La Grosse, Sucree and Wallut have proven good sorts for forcing in this way, Laxton's Noble having the preference.—*Mollers' Deutsche Gartner Zeitung.*

SPRINGFIELD, MASS.—Aitken & Son are making a number of improvements in their store.



HAVERHILL, MISS.—Fred. A. Luce was married on October 5 to Miss T. F. Leighton, at Grace church parsonage.

WESTBURY, N. Y.—Thos. Evans, who has been gardener at the Rosary Nursery for some time, has taken a position with the Oasis Nurscry Co.

A Profitable Side Crop.
The tomato is one of the profitable side crops for the florist if properly handled. An important item in proper handling is to start right by getting proper seed. Experience has proven the "Lorillard" the best forcing variety so far; but much of the seed now on the market is not carefully selected as to type. I have taken pains to find something free from this objection, and have pleasure in offering
Lorillard Forcing Tomato...
Specially saved for my trade by the originator Mr. Jno. Gardner.. Pkts., 25c, 50c and $1.00, free by mail. Bulk price on application.
Sutton's Best of All Forcing Tomato
Has done remarkably well with those who tried it the past season. I do not know how it is for outside, but it's a dandy for forcing; large, round, deep scarlet, very prolific. Pkt. 40c, mailed free. (No bulk of this to offer at present). Give this new sort a trial. Stamps accepted for small amounts.

ATTENTION, SECRETARIES! OF CHRYSANTHEMUM CLUBS AND EXHIBITIONS.

The season of Chrysanthemum Exhibitions being close at hand, we have, as in seasons past, placed ourselves in position to supply your Club with our beautiful CHRYSANTHEMUM LITHOGRAPHS. We have just issued, at a very great expense, two new lithographs (a full sheet and a half sheet), which we believe are the handsomest yet offered. They are entirely new in design, and, being highly illuminated are admirably fitted for advertising your coming exhibition.

We respectfully solicit your patronage, and will be pleased to send samples and prices on application. ☞ORDERS WILL BE PROMPTLY FILLED.

THE

Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The "GARDENERS' CHRONICLE" has been FOR OVER FIFTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, much of the information furnished is of such general and permanent value, that the "GARDENERS' CHRONICLE" is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, $4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

MÖLLER'S **Deutsche Gärtner-Zeitung**

The most widely circulated German gardening journal, treating of all departments of horticulture and floriculture. Numerous eminent correspondents in all parts of the world. An advertising medium of the highest class.

Moller's Deutsche Gartner Zeitung is published weekly and richly illustrated. Subscription $3.00 per annum, including postage. Sample copies free.

Ludwig Möller-Erfurt. (GERMANY)

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

J. J. TIBBETTS is now general agent for the Creston Nursery Company at Ottumwa, Iowa.

THE Jewell Nursery Company, of Lake City, Minn., has been making a large display of apples at the county fair at Grundy Center, Ia.

LOUISIANA, Mo.—Stark Brothers have removed their office from the Lewis building to the excellent structure adjoining their nurseries, which they have just completed.

J. W. DEAL, of Missouri Valley, Iowa, has purchased of G. E. Tamisiea, representing the Des Moines Nursery, the largest stock of fruit trees ever sold in Harrison county.

O. O. WIRICK, of Mendota, Ill., who was for some years in the nursery trade, died recently at Alma, Mich., where he was being treated for consumption. He was 36 years of age.

THE growth of horticulture in America is well demonstrated by the fact that in 1866 there were but ten acres planted with grapes in Chautauqua county, New York, where 15,000 acres are now devoted to this fruit.

Select Hardy Roses.

ED. AM. FLORIST:—You will oblige by giving a list of about a dozen hardy roses as free in flowering as Mrs. John Laing, with their colors. State also whether such varieties bloom better budded than on their own roots. J. F.
Iowa.

Replying to the above, would say that I do not know of any rose as free flowering as Mrs. John Laing or one which lasts so well the entire season. The following with Mrs. John Laing form a good collection: Anne de Diesbach, carmine; Alfred Colomb, crimson; Earl of Dufferin, crimson; Gen. Jacqueminot, crimson; Jean Liabaud, crimson maroon; John Hopper, bright rose and carmine; Mabel Morrison, blush white; Magna Charta, pink and carmine; Margaret Dickson, rose white, shaded with yellow; Marshall P. Wilder, cherry carmine; Paul Neyron, deep rose; Ulrich Brunner, brilliant red. I find the budded roses do the best; the colors are clearer, although many sorts do very well on their own roots. EDWIN A. KANST.

Euphorbia Corollata.

The large and branching panicles of this excellent perennial are very useful as a cut flower and should be everywhere grown extensively for that purpose. The accompanying illustration representing a few sprays of the flowers, is from a photograph taken late in September, the plants being now in bloom a second time this season. This second growth is not as tall, nor are the panicles as large and spreading as the first, but they are equally serviceable for all purposes and can be used in a variety of ways.

For vases they are unsurpassed and in connection with almost any other flower they are vastly superior to the gypsophila as the individual flowers are considerably larger, plainly discernible from a distance, still retaining their light and airy character, and are of a much purer white. We have kept them in an ordinary living room for over a week and I do not know for how much longer they would keep fresh in a cooler place. Great quantities of bloom may be gathered from a few well grown clumps as they flower and branch out very freely and hold their own for a long time, but we cannot rely on a second flowering so abundant as that of this season for the weather conditions are not always so favorable for the free development of after-growth. Still, even if we could get but one main crop, in July and August, we would not like to be without it.

The plants improve with age and should be left undisturbed for many years if possible. Young plants are neither as tall nor as branchy as the older ones and look weak and spindly compared with the

EUPHORBIA COROLLATA.

dense, thick mass of growth of well established clumps. They divide very readily or may be multiplied by root cuttings in early spring as every small piece of root will in time make a good plant, but from small stock grown in this manner we can not reasonably expect a very large amount of bloom for a year or two.
J. B. KELLER.

Phlox Decussata.

Following are descriptions of a few more varieties of Phlox decussata, and we hope before long to give a list of those among our new and old sorts which have been most admired this season:

Bacchante.—Dense spike; flowers large, deep carmine rose, veined purple, purple eye.

Esperence.—Pyramidal spike; flowers of fine form, rose-lilac with large, lighter center.

Montagnard.—Rounded spikes; large flowers, dark red with purple eye.

Suffrage.—Dwarf; spike: much branched; flowers finely formed, dark, clear rose; very continuous and bright.

Hofgaertner Starke.—Pyramidal spike; large flowers, dark purple-red.

Huxley.—Dense spike; flowers large, white with broad margin of rosy-lilac; very distinct.

Laniboire.—Flowers large, bright rose with violet and purple center.

Le Cygne—Pyramidal spike; flowers large, pure white; very good.

Wm. Muhl.—Flowers large, shining rose and white with crimson red eye.

Argon.—Dwarf; spikes much branched; flowers large, delicate rose, shaded salmon

Gnignol.—Dwarf; spikes branched; flowers delicate lilac-mauve with large white center, veined lilac.

Jungfrau.—Dwarf; branched spikes; flowers large, well formed, white veined and shaded clear pink.

Torpilleur.—Dwarf; branched spike; flowers large, dark bright rose.

Massachusetts. R. N.

Indianapolis.

BUSINESS GOOD.—EXHIBITS AT THE STATE FAIR.—JOHN HARTJE READS AN ESSAY.—PLANS FOR THE CHRYSANTHEMUM SHOW.—INDIANAPOLIS FLORISTS VISIT ANDERSON.—PERSONAL MENTION.

September brought pretty fair business to our flower stores. Roses and carnations were scarce and brought good prices. The floral exhibit at our state fair was very creditable in quality, but there was not enough of it to fill over half of Floral Hall, which consequently presented a somewhat bare appearance. Premiums were awarded to the Berterman Floral Co., A. Wiegand & Son, John Rieman & Co, and W. W. Coles.

On October 6 twenty-one Indianapolis florists, the largest party which ever participated in a similar excursion, accepted the invitation of J. S. Stuart to visit Anderson, Ind., as the guests of Stuart & Haugh, whose well ordered establishment furnished much pleasure to the visitors. From the greenhouses the guests were escorted through several of Anderson's busy factories and were then served with an elaborate dinner at the home of Mr. Stuart. The afternoon was spent in bowling.

At the September meeting of the Florists' Club John Hartje read one of his papers, short and interesting as usual. His subject was: Beds and vases; how they are and how they should be planted.

The State Florists' Association held a special meeting here September 15 to complete arrangements for the chrysanthemum show. Committees were appointed, and on motion of Mr. Langstaff the admission fee was fixed at 15 cents for the forenoon and 25 cents for afternoon and evening. Much to the pleasure of his numerous friends, the meeting brought J. D. Carmody to this city.

By the death of E. A. Parker the Florists' Club lost one of its oldest and most popular members. Mr. Parker, who was a well known lawyer, took a great interest in flowers and had one of the best equipped private greenhouses in the city.

W. A. Lilly is now a partner in the Meridian Street Conservatory Company. The firm of Lilly Brothers dissolved partnership.

W. G. Berterman, who has been sick for some time is now feeling better. He left last week for a recreation trip through Arizona and California and will be gone until next spring. H. JUNGE.

Nashville, Tenn.

During the past week there was a very marked improvement in the floral trade and the general call for flowers was better than for some time past.

Roses are showing some improvement, though not up to strictly high grade. In quantity they are abundant. The florists' windows are full to overflowing with American Beauty, Meteor, La France, Bridesmaid and Perle. Violets are blooming, but are very small. Chrysanthemums are promising and will come in earlier than usual. M. C. DORRIS.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

W. HOBOKEN, N. J.—Ernst Asmus is getting ready to go for a brief shooting trip. No moose this year, only small game.

PORTLAND, ME.—The veteran fisherman, J. A. Dirwanger, took his last trout for the season on October 7, his seventy-first birthday.

FLATBUSH.—The silver cigar holder has been won by Tom Brennan with a score of 209, but Mr. Brennan has put up the trophy for another month's competition and offers to buy it back from the winner for $10.

NEW YORK.—The Florists' Club committee has secured the Immen alleys at Fourth avenue and Thirty-second street and bowling will begin Monday evening, October 17. A challenge is expected from Woodside.

Chicago Bowlers Organize.

After the Florists' Club meeting, October 7, a dozen members met to organize a bowling club. Phil. Hauswirth presided and J. S. Wilson acted as secretary. The membership is limited to twenty-four by the by-laws adopted. Only Florists' Club members are eligible. Membership fee is $1 and monthly dues 25 cents. Officers will be elected and rules adopted October 21.

With Quaker City Shooters.

The University of Pennsylvania gun club will open its grounds at Fernwood on Saturday, October 15, with the Florists' Club team.

At the recent shoot with the Westchester Club the Florists' Club team won by thirty-four points with nine men teams, twenty-five birds each. W. K. Harris made twenty-three out of twenty-five, but says that he supposes that those who did not see him do it will scarcely believe it. K.

St. Louis Bowlers.

The champions have voted to play a match game with a star team of those outside the trade. The score last Monday night was:

Name.	1st	2d	3d	4th	Av.
C. A. Kuhn	132	158	174	174	159
D. Finlayson		134	200	110	148
J. Kunz	134	121	137	174	141
C. Sanders	127	136	182	112	139
R. F. Tesson		154	121	128	134
F. J. Fillmore	91	165	155	104	128
J. J. Beneke	104	128	116	120	117
E. Schray	82	126	104	131	110

Buffalo Bowlers.

Our committee has not yet reported a plan to extend the usefulness of the interest in bowling, but it is time they awaken, for Philadelphia is no longer somnolent and Buffalo sports certainly should not sleep over a matter which Philadelphia does not. It is useless to expatiate upon the merits of our bowlers, but wait till next August. We will have more bowlers at Detroit than the other fellows can take care of. At the last meeting on our alleys the champion of Omaha was taken down by his boy Phil. Following is the score for three games rolled on strange alleys on October 7:

Name.	1st	2d	3d	Av.
Wm. Scott	190	213	240	214
S. A. Anderson	196	191	201	196
Geo. McClure	190	175	214	193

H. J. Millatt	84	83	82	83

W.

The "Actives" Win the First.

The bowling match between the active and associate members of the Philadelphia Florists' Club on last Wednesday evening was a most enjoyable affair. Mr. Melle, of the associate team, is a rooter of the first degree, and "Eat 'em up" Charlie will have to look to his laurels. Rennear believes that if he can talk a man out of a spare it is as good as if he makes one himself. The game was full of exciting moments, and even in the last frame it looked as if the associates would pull out ahead, but the actives took a brace and won by twenty-five pins. Dr. Goebel in the last game made 207, his first 200 score. The return game will be played on Wednesday, October 26. The score follows:

Associates.		Actives.	
Archer	425	Brown	431
Rennear	356	Connor	432
Moore	453	Westcott	411
Melle	314	Watson	389
Palms	426	Longinette	433
Goebel	508	Kift	451
	2482		2507

K.

Philadelphia Sporting News.

One by one the old timers are dropping into the club room of an evening, now that the nights are cool and a turn at the wooden sphere an enjoyable pastime. It looks like "Auld lang syne" once more, and the season just opening promises to be as lively as any of its predecessors, not even excepting these halcyon days of the early nineties when "Mose" Rice and George Campbell and others laid out the bills of fare. We seldom see George Campbell any more, although he was an interested onlooker at last Tuesday evening's game. We hope to see him around again as usual. "Mose," too! They're a great pair for

"Quips and cranks and wanton wiles,
Nods and becks and wreathed in smiles."

and other laughter producing antics when in the proper vein.

We even had John Burton with us last week. He used to be one of our war horses on the alleys but has fallen into a sadly rusty condition of late, too deeply engrossed in shooting and cricket to keep his bowling up to par. "J. B." takes the right view of the pastime end of our life. He says, "Go it boys, go it hearty, you'll work all the better for it when it comes to working, eat better, sleep better, live longer, and be better men every way and a credit to the Anglo-Celtic race."

John K. Starr has returned from the war; he didn't go far—only about half way; but far enough to catch typhoid lying out in the mud down south. He's putting up a rattling game for a convalescent. His 192 held the record of the alleys nearly all last week. Captain Archer is kicking himself that he didn't know about Starr in time to get him on his aggregation of "associates."

Another new face seen on the alleys this week was Bart Cartledge, who has just returned from a trip down east among the Canucks and Blue Noses. Bart says it is the finest trip he ever had and he feels a thousandfold better for it. His score on the alleys did not quite bear this out but he is to be excused as it can't be expected that a man can shoot all day and bowl a good game at night at the same time. But the mere fact that he comes bowling at all is a hopeful sign of surplus energy. And, by the same token, there are dozens of others among the absentees who are missing lots of fun. Let them come down of an evening and enjoy themselves. There's always plenty of company. It's seldom you can drop in without seeing Baker or Rust or Kienle or Kahlert, or some other of the stand-by's, and above all the din the hearty "ha! ha!!" of your old friend John Walker. Don't be backward. All welcome. G. C. W.

GREAT SALE
OF

TRADE AND FLOWERS ARE IMPROVING.—FLORISTS' CLUB PLANS SHOWS.—NOTES.

Trade during the past week has been fair. The market is abundantly supplied with roses, and chrysanthemums are coming in more freely. Violets are very poor as yet, but carnations are improving rapidly.

On October 8 the regular monthly meeting of the Florists' Club was held with Pres. Witterstaetter in the chair. The secretary read the special report of the revised show schedule, which was accepted, and a vote of thanks was tendered to the board of directors for efficient work. James B. Allen was proposed for membership. The new schedules with special prizes for each month will make our shows quite interesting. The schedule will be ready for mailing to all members and contributors by November 1. Anyone wishing a copy will please apply to H. Schwarz, secretary, Price Hill, Cincinnati.

Peter Barr, of London, was a visitor here last week and we were much pleased at his compliments upon our flower growing. H. SCHWARZ.

Some Advice on Exhibition Management.

Much has been written about the management of exhibitions and there is really little that is practical which can be added to what has been written or said before. The experiences of each succeeding year, however, as recorded from various localities, show us more and more conclusively that the most difficult point in exhibition management is to "make it pay." There being a fair assurance of financial success in advance, the rest of the work should come easily to men whose lives are spent in studying floral decorative effect.

Florists are notoriously poor "showmen." The vocation is one for which they are not fitted, but there are in all populous communities men who have talents and experience especially adapted to this kind of work—men who have shown that they can promote and carry through to a successful outcome a theatrical venture, a fair or a concert—men who are forceful advertisers, good organizers and well equipped with tact and a thorough knowledge of human nature. The first step toward possible financial success for a flower show is a deal with such a party or with some established institution commanding the services of such men with an agreed mutual participation in the risks and the prospective profits.

It is indispensable in making arrangements for an artistic, well displayed exhibition that the superintendent or chairman of the arrangement committee should know in advance what exhibits to expect. Many contributors fail for one reason or another to make entries beforehand. This neglect is an injustice to everyone concerned and especially to the superintendent, and to its prevalence is due much of the "unfinishedness" of most of our competitive flower shows—a defect seldom seen in exhibitions made by a single firm or individual.

Nothing contributes more to the tidiness and general attractive appearance of a flower show than a proper selection of vases and dishes in uniform sizes for the different classes. A display of gladioli stuck in wide-mouthed, green glass bottles and pickle jars, each spike pointing in a different direction, is not calculated to increase the beholder's appreciation or admiration for gladioli, and a row of short-stemmed dahlias, each squatting in the top of a tall blue hyacinth glass, is enough to turn one's stomach. These are not fanciful or exaggerated examples, but have been seen on more than one occasion by the writer, and yet the public were blamed because they did not support the "show."

Overcrowding is a very common defect in our flower shows. Give each individual plant or flower plenty of room that it may have an atmosphere of its own about it and be free from the discordant effect of inharmonious forms and colors in contiguous exhibits.

All tables and platforms should be neatly covered with paper or cloth of an unobtrusive color—white, as a rule, being the best. Old soap boxes do not make desirable stands on which to elevate specimen plants, but if nothing better is at your disposal, then cover them carefully with something appropriate.

Insist that your exhibitors shall keep all cut flower displays or design work in a fresh or presentable condition; otherwise, clean them out on the morning of the second day or as soon as they begin to wilt. "Their room is better than their company." EXHIBITOR.

ROMAN HYACINTH BULBS

E. B. JENNINGS, L. B. 254, **Southport, Conn.**
Grower of the Finest Pansies.

Grand Rapids, Mich.

Roses are looking well, with a good many more planted than last year and American Beauties are in better shape this year than ever. Violets promise a big crop of fine flowers and several of the growers will commence to ship next week. Carnations are all housed and looking fine. Flora Hill seems to be the favorite white and Jubilee the best red. Most of the growers are trying some of the new kinds. Evelina has made an excellent growth in the field and is very promising, as are also Genesee, White Cloud, Mrs. McBurney, and Armazindy. Mayor Pingree is looking well where it was field grown. Some of our growers planted some of this variety inside this year, but all pronounce it a failure.

The parks are still looking fine, as we have had no frost to injure even the most tender plants and the bedding shows as well now as at any time during the summer. Greenhouse building is about completed and there has been more of it this summer than in several years past. We are all looking for a prosperous winter season.

Crabb & Hunter exhibited some fine blooms of Bergmann chrysanthemum and a vase of fine roses at the last Florists' Club meeting and Henry Smith showed a vase of American Beauties. Frank Paine, of Traverse City, was a visiting member. He reports trade very satisfactory in his section.

Paul Gobel, Crabb & Hunter, the City Greenhouse and Henry Smith have each added a new boiler.

The State Fair was a success both as to exhibits, which were large and fine, and attendance, which was the largest we have had in years. Wm. Cunningham, James Schols, Crabb & Hunter and Henry Smith competed for the prizes, with honors well distributed. Wencil Cukerski, the park superintendent, acted as judge.

HENRY SMITH.

BURLINGTON, IA.—John Nordean is erecting a new residence on his lots on Foster street.

Fine Strong **WILLOW HOOPS**

VAUGHAN'S "ROSE GROWER" BONE MEAL.

This is a special brand we have put up for our trade. It is ground fine, hence acts quickly. Free from acid, very light in appearance, and a superb article. It is made from bone accumulated in large slaughter houses and should not be compared with the Bone Meal made from cattle heads and feet gathered up on the Western prairies. Such Bone Meal, which is dark in color, is flinty in character, slower to act and not nearly so desirable as our "Rose Grower" bone. Furthermore, the bones of many diseased animals are used in the manufacture of that dark Bone Meal and it is therefore a little dangerous. Our "Rose Grower" bone has been slightly steamed to soften it so it can be ground fine and is thus quicker in its action. The finer bone is ground the quicker the mild acid thrown out by the tiny roots of the plant can dissolve the bone and make use of it as food. A finely ground bone can also be more evenly distributed through the soil. ANALYSIS:—Ammonia, 4½ to 5½ per cent; total phosphoric acid, 22 to 25 per cent; total bone phosphate, 48 to 54 per cent.

Price, 5 lbs., 25c.; 10 lbs., 40c.; 25 lbs., 60c.; 50 lbs., $1.00; 100 lbs., $2.00; 200 lbs., $3.50; 500 lbs., $8.00; 1000 lbs., $15.50, 2000 lbs., $30.00.

VAUGHAN'S SEED STORE, 84-86 Randolph St., CHICAGO. 14 Barclay St., NEW YORK.

THE HARRISH DISEASE can be prevented by immersing the bulbs for ten hours in a half solution of 99 per cent.

KRAFT'S PLANT TONIC

THIS has been conclusively proven by experiments at Lincoln Park, Chicago. The Tonic also kills Hard Shelled Scale, Mealy Bug, and other insect pests without injury to the plant. A trial of a 25 cent bottle will convince you that a really remarkable insecticide has been discovered. Send for circular.

The MODEL Extension Carnation Support

QUEENS, N. Y., Feb. 16, '97.
MR. THERON PARKER, Brooklyn, N. Y., Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention.
Very truly yours,
C. W. WARD.

FLATBUSH, BROOKLYN, N. Y., Feb. 18, '97
MR. THERON PARKER, Dear Sir:—Your wire stake is certainly a gem. Without hesitating we indorse it as an up-to-date carnation support. Yours truly,
DAILLEDOUZE BROS.

W. HOBOKEN, N. J., Feb. 18, 97.
MR. THERON PARKER, Brooklyn, N. Y., Dear Sir:—It gives me much pleasure to congratulate you upon your success in getting up carnation supports. I think that those I have had from you are about as perfect as anybody will be able to make them. They certainly fill my bill for an ideal carnation support, a thing I have been looking for for a long time. Wishing you every success in the sale of them, I am

Helpful Reminders.

All seedlings of perennials should be transplanted now, including pansies. Make a bed as wide as you can conveniently reach over and plant the seedlings in rows, the distance of course to be governed by the variety; but make the bed deep and rich, also light enough to allow the plants to be easily lifted without breaking roots. The perennials are very much sought after nowadays and it is necessary to have a good well grown stock. Nice plants sell for as much as geraniums in the spring and do not require greenhouse room. Those who do a cut flower or decoration business will find that the flowers cut from the unsold plants yield as much as the plants would have brought had they been sold. By arranging a long bed so as to have compartments for each variety, one soon becomes thoroughly acquainted with their colors and general character. A bed of useful perennials may be maintained without any considerable expense beyond a little labor and an occasional application of manure, and for this trifling outlay it will add to the receipts one or two dollars a day from earliest spring to late in fall. C. B. W.

FALMOUTH, MASS.—The Falmouth horticultural exhibition was a success as a show, but not so financially, as it is doubtful if the receipts will pay expenses and premiums.

LINCOLN, ILL.—W. H. Gullett & Sons have sold their retail store at Decatur, Ill., to N. Bommersbach. The branch is about one year old and has been doing a prosperous business.

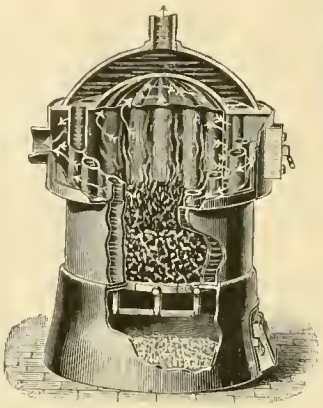
Notes and Comments.

For a number of years there have been advocates for a flower market for the benefit of the growers who largely cater to the floricultural wants of the cut flower dealers in the Quaker City, but so far the grower with much perseverence, apparently, persistently refuses to see wherein such arrangement would be any improvement upon that now in practice.

In talking about a flower market a day or two ago, the idea was advanced that it would sometimes embarrass a grower when his favorite customers were behind time in arriving at the market, and a casual caller and a customer not so desirable wanted just the flowers he had for sale and wanted them immediately and in larger quantity than the grower felt justified in selling on account of the possible needs of a more desirable customer who did not happen to be on hand early enough to make his usual purchases.

It is well known in all business circles that there is a following which it is desirable to cultivate, and a laudable endeavor is put forward to satisfy the same. The best customers are those who are fair and not too unreasonable in their demands, and who do not too long defer payment of their bills. The present plan mostly in vogue in Philadelphia is that where the growers or their salesmen deliver daily orders to the dealers, which has the advantage of allowing the man who has the expense and anxiety of the production of the commodities for sale of discriminating between dealers who exercise judgment in their purchase and are just in their dealings, paying their bills promptly, and those who have not those prime requisites. The latter are not entitled to the same consideration from a business point of view, or from any other, as the former.

If it were advisable to establish a rule to the effect that everything bought at the market be paid for spot cash, everybody would then be on an equal footing, and all growers will join hands if a reasonable guarantee is promised that collections will be made more promptly if a flower market is established. E. L.



Worcester, Mass.

We are experiencing seasonable weather at present and the mercury drops low enough nights to make firing a necessity. We are now getting an adequate supply of good stock. Chrysanthemums are a week later than last year. Carnations are coming along nicely but the fancy varieties are a bit slow, as most growers keep the fancies till after the chrysanthemum season is past. Roses are plentiful and are fast losing the slight trace of mildew that was noticeable earlier in the season. We are getting plenty of single violets and a few fairly good double ones. Trade remains steady and the sales of the Boston fern show that it has not lost its popularity and is probably the most satisfactory house plant offered to the public.

A. H. L.

Springfield, Ill.

At the State Fair the exhibit of cut flowers was unusually fine. The South Side Floral Company, H. P. Buckley manager, made a very large display and captured all the first premiums for both roses and carnations except one in each and were second in those. Their showing of fringed double petunias and their splendid collection of mammoth verbenas attracted more attention than even the roses and Mr. Buckley writes that on these flowers they are able this season to challenge the world.

Poughkeepsie, N. Y.

The Dutchess County Horticultural Society met at Poughkeepsie, October 5. There was a large attendance and one new member was elected. It was reported by the exhibition committee that on account of the Millbrook chrysanthemum exhibition being held on November 10, 11 and 12, the Dutchess County Horticultural Society's exhibition will be held November 2, 3 and 4. Several special prizes were reported offered, a list of which will be printed at once. Among them are $10 for three varieties of pink chrysanthemums, Viviand Morel excluded; $10 for twelve new varieties introduced in 1897 and 1898; $10 offered on each day for table decorations, first day, roses, dinner; second day, chrysanthemums, luncheon; third day, any variety of flowers, luncheon. Ladies of the Annandale Rose Society will act as judges of these tables. A fine collection of dahlias was exhibited by I. L. Powell, of Millbrook. A paper was read by Arthur A. Loughren, Poughkeepsie, entitled, "How Parks Should be Managed." W. G. G.

ISHPEMING, MICH.—The Ishpeming Floral Company, with the addition to their establishment built this summer, has the largest range of glass in the upper peninsula of Michigan and enjoys a fine trade.

Simplicity in Greenhouse Construction.

During our long experience we have not only made many improvements in greenhouses, but we have so simplified the construction that building a greenhouse is no longer a matter so full of complications as to tax the patience and the ingenuity of even the most intelligent mechanic. Our

Clear Cypress Building Material

is worked out in the best manner ready to be put up, and we furnish our customers such complete detail drawings that any workman of only ordinary capabilities can put it up correctly.

SALEM, MASS.—The firm of T. W. Head & Co. has been dissolved. The business will be continued by H. T. Conant.

Studies in Stiff Flowers.

He is a florist of limited experience who has never been met with a customer's objection to the use of many flowers such as callas, gladioli, tulips, etc., in over-aesthetic language something like this: "O, they are too stiff and coarse; I don't admire those stiff flowers and leaves!" How to refute such statements has led to a closer study of the facts in the case. With the accompanying illustration of an arrangement of gladioli, which are as good examples of the so-called stiff flowers as can be had, perhaps it can be discovered how near to the truth our friends have drifted. In the most correct and strict use of the term, what does the word stiff mean? Mr. Webster says that it signifies rigid, unbending, pertinacious, constrained, formal qualities, and we think of stubborn and ungraceful things as their first cousins. Now, apply the test. Is there a leaf, bud or bloom stalk that is in the least unbending, rigid, constrained, formal, stubborn or ungraceful? Is there a single vein in one of the leaves that even pretends to be straight, letting alone all the rest? Most of the stalks in the picture bend perceptibly, all of the leaves twist, and the veins appear and disappear. There is in the grouping no mathematical balance except the comfortable and easy air of freedom. It is a sturdy but not a starchy grace that we so much admire in this class of heavy stemmed flowers. Therefore if our word-study is correct and our description accurate, it must follow that we are safe in assuming that our model is not a stiff flower in any sense.

How am I to convince a customer to her satisfaction and my profit, that my statement is true? I must be able to demonstrate my theory on the spot. To show to the best advantage such flowers, neither a rose bowl nor a straight receptacle is the better. Something with a compound curved outline to emphasize that same tendency in the general trend of the flower stalk is preferable. The principle from which this rule is derived will be discussed farther on. Let a few stalks drop into the dish and fall as they please. They will never all point out or in monotonously, but will form little neighborly groups, one inclined towards another, while another clique takes another direction, and a solitary stalk bends over lonesomely. This natural grouping, which occurs whenever a fair chance is given, is exceedingly interesting and suggestive, the flowers never failing to assume a more graceful and easy position than one's hand could direct. The same is true with regard to flat bunches. Some heavy, sturdy stalks fully open seem to belong to the lower part while the half-open smaller spikes top the cluster, and those crooked stems find their places at the sides or across the other stems. A perspective or depth is another necessity to an upright bunch. Some side views, some backs, some profiles, and some extending far out behind, as well as full front views are necessary. Yet with all this diversity of position it is also essential that the lines of projection have a common source, thus indicating the unity in design. This principle is a broad one and cannot be elaborated upon at present.

In the illustration no leaf or stem is bent from its natural line of growth. Much of the natural grace of form and curvature is due to the buds which top nearly all of the spikes, and which give a distinct point effect. Here is a very important fact. One who is interested in the study of design as a whole, in its widest sense, is constantly impressed with the frequent occurance of points. It seems as though every unit of form tends to points, points everywhere, whether singly or in complex shape. Even apparently round or elliptical leaves and petals end in smooth or ragged points. Mostly in general form and almost invariably in detail or subordinate terminals there is the everlasting point tendency looming up, or down, or out—trees, as the elm, pine, hemlock, tree fern, willow, being conspicuous examples, as well as flowers or parts of flowers, as petals and foliage of the rose and of the carnation, noticeably fringed or not fringed, also lilies, violets, bouvardias, stevia, smilax blooms and their tiny relatives in blooming vines. In mosses and ferns from the lowest forms through the most intricate, there they are, round, blunt, long, slender, tapering, complete or interrupted it seems to be the universal tendency. Now, of what practical use is this fact to a worker in cut flowers? Just this, at least: Where the tendency to points is very marked in individual flowers or inflorescence, it should be respected and adopted in bunching or grouping the same, as in the examples quoted above in gladioli. If roses to be used are Brides or Bridesmaids, being distinctly long buds, they appear best in a pointed cluster, not necessarily confined to one point, however.

It is largely the fault of professionals that any flowers are called stiff. They do not receive the proper setting and grouping. For summer decorations we have used gladioli more than ever this year and are more than satisfied with results. We think we have gained for them a better place in the estimation of a good class of customers, not only on account of their reasonable price, but because they are

better appreciated for their superb decorative qualities. To be sure, they cannot be used anywhere and everywhere. Their surroundings must be in keeping with their characteristics. In large apartments, halls and churches, where richness and grandeur prevail, they are at home. They mingle sulkily with other flowers, being sufficient of themselves. For funerals of elderly people their richness and dignity are fitting tributes to completed attainments. Like all other flowers their graceful proportions and lengths are seriously interfered with on being cut short and stuck in a design frame, and their beauty deteriorates to second class.

Now, mere suggestions are useful and easy to adopt, but to discern, to originate, to study, where one discovers principles and laws which govern natural arrangements is more difficult, but far better. For instance, I have spread out before me a number of Roman hyacinths or lilies of the valley, and I desire, of course, to produce the most artistic and attractive bouquet possible. I must from the start, have some idea how to proceed. Suppose I look to the flower itself for some hints; I can see at once that its prominent characteristic in form is a long slender point, and this gives me the key to the shape of a cluster which would be most natural and happy in its effect. I use the natural foliage only, because its form is in perfect accord with the principle which governs the form of the flower clusters. I also use narrow ribbon to complete the harmony. The whole is one large raceme as is also any one of its factors, and it may be graceful and beautiful like the pattern.

To pass intelligent judgment upon floral arrangements, to defend our own opinions, are not the only desirable attainments for us. We should not rest satisfied until we can recognize the principles underlying our own work and those governing ornament of other kinds. Through our frequent use of natural objects it ought to be easier to do substantial thinking and investigating along the line of art in general. G. B.

AN ARRANGEMENT OF GLADIOLI.

CARNATIONS.

INDOOR CARNATIONS.

Our indoor grown carnations are making great strides just now and as far as size of plant, color and health are concerned we fail to see how anyone could wish for better. One thing which impresses us very favorably and which goes a long way toward compensating for the extra care we have bestowed on plants grown under glass is the absence of stem rot.

This has always been a very serious matter with us, the mortality among the plants in the field being sometimes considerably over fifteen per cent, especially through a wet season like the one just passed, but this year we have lost only eleven plants.

We have the plants all staked and tied up now and are giving the beds a mulching of well rotted manure, arranging matters so as to have the beds in such a condition that after the mulch is put on they can have a good watering to settle it in its place. The mulch should be made as fine as possible and spread evenly over the bed, care being taken not to have it too thick at the base of the plant. We always aim to leave a little space directly around the stem to guard against rot. The weather has been such that no fire heat has yet been necessary, but should the outside temperature fall a little steam will be put on without delay and the ventilators left open a trifle so as to maintain the proper temperature.

A close watch must be maintained for red spider which will sometimes put in an appearance in spite of guarding against it by giving ample ventilation and keeping an even temperature. Now that the plants are throwing up young, soft growths the greenfly should be attended to by frequent fumigating. As soon as the steam can be used give one of the pipes a painting of lime and sulphur, which helps to keep down red spider and puts a check on other diseases.

For some time we have been cutting fine blooms with long stems from Mrs. McBurney, the flowers being uniformly even and of good color, although slightly penciled with deeper pink, which we find will leave it as the season advances. This variety has gained greatly in vigor since last season and plants with yellow or spotted foliage are very scarce, due principally to the selection of good cuttings for propagation and to another weeding out at planting time. Flora Hill is also in full crop, fully equal to what we had last January, although the stems are not quite as long, and with the young growths that are pushing up this variety bids fair to beat its last year's work. Jubilee is also throwing a great many early blooms, although, like most of the reds at this time of the year, a great many of them are mottled with white. We find Jubilee to be a cold weather carnation; it does not like heat at all, that is, so far as the flower is concerned.

Mayor Pingree is somewhat later than the others sorts but it gives every promise of doing what is expected of it through the winter. The plants are throwing up a big crop of young shoots. Cerise Queen made better growth than we thought it would early in the season but it resembles Tidal Wave in that it throws very short stems so we have not allowed it to bloom early, but we notice an improvement in this respect right along and build our hopes for better things later on. C. W. JOHNSON.

CULTURAL NOTES.

October 22.—A few weeks ago I met a successful grower of carnations who told me that he had all of his stock in 4-inch pots during the summer. Three years ago he tried about 500 in this manner and the results were so satisfactory that the following year he potted up about half his stock and as the results continued satisfactory, this year he potted them all and is well pleased with the results.

Being deeply interested in any method of growing carnations that will give better results, I visited this gentleman's establishment last week. The plants were growing nicely, clean and healthy from the top to the last leaf next the soil, but in size they were woefully lacking.

They were, in comparison to what I am accustomed to call good sized plants, not second or third but about fifth size. This fall I sent a small shipment of carnation plants from the field that were fully three times the size of these pot plants. In place of the check expected in return for them, a letter was received in which I was called anything but a gentleman and the stock everything but good. This stock I considered fairly good, although the party receiving it classed it as decidedly "bum," yet here was a good and successful grower who would consider the plants fine in every respect.

All this goes to show how little one can judge a man's stock from a conversation, an article, or another's opinion of the same, for standards seem to be about as wide apart as the Pacific and the Atlantic between San Francisco and New York. This grower I know was perfectly sincere in his statements, yet, taking my standard, I expected to find plants of good size and such plants as would produce a crop of flowers for the holidays. Instead of this, still judging from my own standard, these plants will not produce their proper ratio of flowers per month before the middle of January or the first of February.

Right here I will add that I have yet to see the house of indoor grown carnations or carnations grown otherwise than by the good, old fashioned, outdoor method, which will bear their proper ratio of bloom per month beginning with December and ending with May or June. All of these improved-cultural-method-grown carnations that it has been my good fortune to have seen, and I have traveled just a few thousand miles to see them, are in such shape that it takes them until February 1 to be in what, judging from my standard, I call December 1 condition.

Do not, however, imagine that I always have my own stock up to the standard; it is often many degrees away, but I have always been able to get closer to it by field culture than by any other method I have seen or tried. Our Mr. Rudd, of Mt. Greenwood, Ill., has, from what I can learn, ideal plants grown under glass all summer and as the American Carnation Society is to have a paper at its next meeting descriptive of Mr. Rudd's methods we will perhaps get some new ideas regarding the culture of the carnation.

Getting back to the establishment under discussion; it is an all around place in which nearly everything is grown and the stock and cut of which is all sold by the proprietor in a retail way. The place shows prosperity and good management in everything and I was told the proprietor is the most successful grower in that section. Judging from this his carnations were paying him and were just in the condition he wanted them. They were producing some fine flowers, better than he could be cutting now from field grown stock and as he had quite a large number of plants I suppose the crop was heavy enough for present demands.

One can write and read and visit growers and exchange ideas and yet, when it is all sifted down, each must adapt his methods to his market and soil and climatic conditions. A grower who is producing nothing but carnations and for a wholesale market has to adopt very different methods from the one who retails his own cut and it sometimes seems that if the retailer were to carefully estimate the cost per hundred of his carnations he would buy from the exclusive carnation grower and be money in pocket by the transaction.

ALBERT M. HERR.

HICORIA OVATA.

Hicoria Ovata.

This is the hickory or shagbark of the northern United States, well known among the boys and girls of New England, where the sweet meated nut is sold extensively in the market. The hickory is one of the grandest of American trees. It is effective in woodland or as a specimen and there is nothing more beautiful than a solid grove of hickories. Its only fault is its lateness in leafing out in spring and earliness in dropping its foliage in fall. It is particularly handsome in spring when the leaf buds, half unfolded, resemble large tulips.

The finest variety known is Hale's Paper Shell hickory, which originated in Ridgewood, N. J. It bears a very fine fruit and the shell is as its name signifies very delicate and easily crushed. If a ready method of propagation were known this tree would no doubt be largely planted for its fruit, but grafting, which is the only mode of propagating a variety, is not easy with the hickory and the grafts start into growth very reluctantly. The best stock, according to Jackson Dawson, is Carya amara, the bitter nut. Mr. Dawson procured twenty-five scions of Hale's variety last spring and on May 30, grafted them on young hickories in the woods, six to eight feet high. Four out of the twenty-five are growing nicely and he considers this a good return, although under different conditions with grafts in just the right state he thinks he could double this record.

The specimen illustrated is growing in the Botanic Gardens, Bronx Park, New York, near the Station, and is probably about fifty years of age. H. ovata is also known as Carya alba.

CHRYSANTHEMUMS.

WORK OF THE COMMITTEES.

There were two seedlings submitted to the committees October 15, which scored as follows:

PHILADELPHIA, PA.—Wm. Paul Binder, Rider, Md., exhibited Willowbrook, Japanese; white, slightly tinged lemon; scored commercial scale 85, exhibition scale 81 points.

CINCINNATI, O.—Nathan Smith & Son, Adrian, Mich., exhibited Kuno, Japanese; white, scored commercial scale 87 points.

ELMER D. SMITH, Sec'y.

SEEDLING AT PHILADELPHIA.

One seedling chrysanthemum only came to Philadelphia for examination by the

committee appointed for that purpose by the Chrysanthemum Society of America to act in the Quaker City during the year 1898. It proved to be Japanese in type, creamy white in color, and Willowbrook by name. It appeared to be better suited for commercial purposes than for exhibition, being somewhat small, but taking the earliness of the season into consideration, it is fairly good in size. As it appeared to the undersigned it partakes somewhat of the form of Domination or Mrs. Geo. Bullock; the florets are similar, so also is the color. PHIL. A. DELPHIA.

An Iowa Establishment.

When C. G. Anderson and Charles Olson purchased, a year ago, their place at Atlantic, Iowa, they had but two houses. They have since built three structures each seventy-five feet long and have created the thoroughly modern establishment shown in the accompanying illustration. They produce both cut flowers and bedding and decorative plants. Anderson & Co. are able to report a prosperous business not only in Atlantic, but in the surrounding towns and see ahead of them an exceptionally bright prospect.

More About Watering.

The "Notes on Watering," by Frederic Cranefield, published in the AMERICAN FLORIST of October 1, 1898, prove to be very interesting, although somewhat lacking in detail. And it may be also said that two or three photographs taken at intervals would have given a much better idea of the results obtained from this peculiar treatment than can be had from the article in question.

The period of these experiments is also rather indefinitely stated by Mr. Cranefield as being "continued in the same manner for several weeks." It is, however, news to the writer that coleus will endure drenching frequently with water at a temperature of 35°, both overhead and at the roots, without at least dropping its leaves or otherwise showing the severe check to which it has thus been subjected, and the fact thus stated seems the more strange when we know that an exposure to a temperature of 35° even for a few hours usually results in a very dingy appearance and loss of color in a bed of coleus outdoors.

Mr. Cranefield also states that "all grew well, but that the 50° and 86° lots were growing taller than the others, and that between the 35° and 65° lots there was but a slight difference in favor of the 65° lot." Also "it was remarked during the course of the experiment that these (the cold water lots) were as large as the warm water plants, and at the close this was found to be true when the plants were all weighed and the results showed a slight gain in favor of the 50° lot."

From these two sentences it would appear that the evidence was in favor of moderation; namely, in the use of water at a temperature between 50° and 65°, but it seems that the "intangible evidence" that Mr. Cranefield refers to must have more weight than the facts published in order to influence him to the opiuion "that the temperature of water as applied to plants under glass had but little if any influence on growth if between the limits of 35° and 100° Fahrenheit."

The matter of watering being of so much importance in our business I feel sure that the additional details promised by Mr. Cranefield at a later date will be welcomed, for I take it there are many who, like the writer, are quite ready to absorb and utilize new ideas, even though some of them may at first sight appear contrary to the experience of twenty-five or more years. And in this connection an instance may be cited where the use of very cold water did prove injurious, the plants injured being Kentia Belmoreana. On two occasions I have noted in a house filled with Kentia Belmoreana more or less injury done by a heavy syringing with water at 36° to 38°, the injury being in the form of semi-transparent spots formed on the young leaves, these spots being precisely the same as those produced by a slight exposure to frost, and while all the spots did not result in a permanent mark on the leaf, yet some of them did, and thus detracted from their value. The water used in this case was hydrant water, and it is only occasionally after a severe cold snap in the winter that so low a temperature is experienced. W. H. TAPLIN.

American Seed Growing.

DEVELOPMENT OF NEW VARIETIES.

A requisite for successful seed growing, indeed, the one which comes first in logical sequence, is a familiarity with the natural character, the possible uses and the desirable qualities of that particular vegetable or flower. But writers seldom touch on these points, it being assumed, either that as questions of quality and beauty they are matters of individual taste and so not to be discussed, or that the reader knows what is really good and does not need to be told.

I doubt, however, if there is a large proportion of the readers of the AMERICAN FLORIST who could state, or who have very clear ideas of just what, in every respect, are desirable qualities, say of a bean to be used as a snap or butter bean, or what are the most important points of merit in a sweet pea. Much less could they tell why they are so. Even seedsmen do not always know and because of their ignorance on these points, and that of their customers, a great deal of horticultural energy is annually wasted in developing, selling and cultivating new varieties, "novelties," the distinguishing characteristic of which, that which makes them new, is of no practical value, the improvement being no real improvement but often even an actual deterioration.

Whether the reader believes, as I do, in a personal Creator, and that every single flower that opens in field or forest is there because of His personal sentient care, or that they are simply the outcome of impersonal and unchanging natural law, he must feel, in proportion as he has carefully studied nature, that in its adjustments and the adaptation of every living organism, of every inorganic element, to its particular place and work, nature is far beyond his or any man's improvement; that in its natural environment, and to fill its place in the making up of the whole, the wild bean is better than our most improved varieties; the original sweet pea better than a Stella Morse or Cupid.

Man cannot improve or make better for its place and work in the natural world, a single plant. What he can and what he should strive to do is to change and modify them so that they may better meet new conditions of life and use, may fit better into an artificial world of his own creation. To do this intelligently he must not only know his plant and recognize the place in the natural world which it was created to fill; must, like Prof. Bailey, see something more than a a weed in a burdock, but must have a clear conception of just the place in his artificial world into which he would fit it.

Looking at the wild sweet pea he must feel its graceful and delicate beauty and recognize that these are the qualities which give it its charm and not attempt to develop in it the brilliant intensity and contrast of color which give the canna, dahlia and coreopsis their value. It is the graceful poise and the delicate and often blended, but not contrasted, colors which make the sweet pea so useful and popular. One with the markings and brilliant intensity of color of a Florence Vaughan or Chas. Henderson canna would be a novelty but of little value. Try substituting for the bunch of Blanche Ferry, which gives such life and beauty to your dress, one of Scarlet Runner bean and you will be convinced that it is not intensity of color which is wanted.

It may be said that in Blanche Ferry, the most popular of sweet peas, we have a contrast of color but it is because there is not contrast, at least not the sort of contrast one admires in Madam Crozy canna, that the sort is so beautiful. The wings are called white, but they are not white, but shaded red in such a way as to present a sharp contrast of color. Paint, or make of wax, a bunch of Blanche Ferry having wings like the standard of Emily Henderson and you will see how inferior in beauty it is to the normal flower. Yet I have often heard florists wish they could get a Blanche Ferry with clear white wings, but nature is kind and sometimes will not let men make blunders.

The same principle of usefulness being essential to value holds in all vegetable variation from lilies to turnips. A sweet corn with red or yellow grains might be more beautiful and as good in quality as one with white, and find a place in a few gardens, but the canner who used it would be likely to lose money. A certain

ESTABLISMENT OF C. G. ANDERSON & CO., ATLANTIC, IOWA.

variety of culinary peas has disappeared from our gardens because, though hardy, very productive and of the finest quality, it was more work to get the peas out of the pod than in most sorts. I think these illustrations show that to be really valuable a variation must not only be distinct and of good quality, but must be adapted to some especial use.

WILL W. TRACY.

New York.

WHOLESALE PRICES VERY LOW.—RETAILERS DOING SATISFACTORY BUSINESS.—OVERSTOCK IN ALL LINES.—JAPANESE CURIOS.—THIRTY-FOURTH STREET MARKET BUSY.—A PEEP INTO WEIR'S.—CATTLEYAS PLENTY.

Wholesale returns on all kinds of flowers are very low, but no lower than in past years at same season. The cause is overproduction and the lesson is easy to commit to memory for next year if those most interested care to do it. Improvement can scarcely be looked for until after chrysanthemum time has gone and from the growers' point of view it is not at all sure that satisfactory conditions will be reached at all. In the meantime business may be called good as judged from amount of sales and profit on same in retailers' domain. All the stores seem to be doing a fair business for the date and they do not complain, there being evidently no cause. They can buy anything and everything at their own price at present and can also afford to be very fastidious as to quality.

A collection of Japanese floral and arboreal rarities is on exhibition at Bridgeman's. They are fine examples of the peculiar stunting and distorting processes in which the Japanese delight and astonishing prices were paid for them by one of Mr. Bridgeman's patrons.

The Thirty-fourth street flower market has assumed its fall activity and a visit to this busy mart in early morning is well worth the trouble. The frequenters of this place live in a world of their own and it is a busy one.

In these days of plenty John Weir's big Brooklyn store is a flower exhibition in itself. One wonders how he finds sale for such an avalanche every day. Possibly the array of pretty clerks furnishes the explanation.

Harry A. Bunyard has opened a sample room in part of the store at 53 West Twenty-eighth street where he will display a line of florists' requisites and plants.

The Broadway florists' windows are gay with cattleyas, which have never been so plenty or so good before.

Dahlias linger still but they do not pay for cutting and freight.

Chicago.

JUBILEE WEEK SAW A BRACE IN PRICES.—GOOD STOCK IN DEMAND.—KEITH BUILDING SECURED FOR THE SHOW.—TWO NEW RETAIL STORES.—NOTES AND COMMENTS.—MANY VISITORS.

Jubilee week was preceded by two or three cold days and opened with a sharply advancing market. There was no oversupply of flowers and good stock, particularly of roses, was somewhat scarce. Carnations which the week before had gone begging at 50 cents sold readily at $1 and 2 cent flowers were not uncommon. The best fancy stock sold well above that figure. Toward the end of the week the several days of dark weather operated to considerably reduce the cut so that there has been only slight reaction.

American Beauties were of poorer quality than for some time past because of the unpropitious weather, but the blooms sold readily and at good prices. Bride, Bridesmaid, Kaiserin, Perle and Meteor all advanced on a short market, good flowers selling at $5 and $6 a hundred, with poorer qualities ranging down to $2.

Many buyers were surprised at the change in the market but overlooked the fact that the weather restricted the supply while the jubilee increased the demand. Had not the inclemency also operated against social activity, prices would have gone still higher and would have staid up.

The supply of chrysanthemums is rapidly increasing and sharp, frosty weather is in demand to make them sell as of yore.

The Chicago Horticultural Society has at length made a satisfactory lease of the Edson Keith building at the corner of Wabash avenue and Monroe street. It is the best location possible for the show, November 8–12, far better than the old armory, and is a good beginning for a good exhibit.

The Bay State Floral Company, O. W. Frese and Charles Praps, proprietors, opened at 74 State street on Wednesday. The store was not in readiness for the new firm, but they desired to take advantage of the presence of the jubilee crowds and will thoroughly refit and remodel the room at their convenience. Until this opportunity offered Mr. Frese had been with W. E. Lynch.

J. N. Anderson this week opened the most elaborate retail cut flower store in Chicago on Madison street next to the corner of Wabash avenue. Henry C. Rowe, formerly with Schubert & Co., is in charge and has as his assistant Arthur W. Schenk.

This was O. J. Friedman's bad week. He was the jubilee committee's representative in the matter of decorations, and the gale on Monday destroyed six of the triumphal arches upon which Mr. Friedman had put so much time and money.

Some of Bassett & Washburn's best American Beauties found their way to the residence of Lafayette McWilliams where President and Mrs. McKinley have been staying this week.

The first heavy frost of the season occurred on the night of October 14, blackening the foliage and flowers of dahlias, cannas and other similarly tender stock.

J. Austin Shaw, having disposed of all the stock recently put in at 114–116 Wabash avenue by Siebrecht & Son, leaves to-day for Omaha.

Twelve hundred letter carriers participated in Wednesday's big parade, each one wearing a red or pink carnation in his button hole.

Wietor Brothers celebrated jubilee week by bringing in some of the best Jubilee carnations that have grown hereabout.

Eli Hobbs has returned to his Indiana avenue home and business after a summer's visit in England.

The South Park Floral Company is sending two-cent Jubilee, Armazindy and White Cloud to E. C. Amling.

Anton Then is now sending some very well grown chrysanthemums to J. A. Budlong.

E. E. Pieser, of the Kennicott Bros. Co., reports a splendid shipping trade this week.

Mrs. J. B. Deamud and Mrs. J. T. Anthony are each quite ill.

Jubilee visitors were: H. V. Hunkel, of Holton & Hunkel, Milwaukee; Mrs. Ben Moss, Mendota, Ill.; C. C. Pollworth, of Ellis & Pollworth, Milwaukee; F. C. Edwards, Fort Atkinson, Wis.; Samuel Murray, Kansas City; James Hayes, Topeka; Victor Wayman, Madison, Wis.; C. W. Weaver, Bloomsburg, Pa.; Geo. Kranz, Muscatine, Iowa; E. C. Keck, Washington, Iowa; Louis Dreher, Sibley, Ill.; Walter Mott, representing H. A. Dreer; Mrs. W. B. Vander Lip, Elkhart, Ind.; James C. Murray, Peoria, Ill.; Peter Moorscheiser, La Salle, Ill.

Philadelphia.

EARLY PROMISES UNFULFILLED.—EIGHT HUNDRED BEAUTIES IN ONE ORDER.—PRICES LOW.—CHRYSANTHEMUMS ARE PLENTIFUL.—CAMPBELL THE ONLY CUP EXHIBITOR.—VARIOUS ITEMS.

In the early fall the prospects were rosy; there was a scarcity of good flowers and a demand that ofttimes left the market bare, but now it would seem as if it was never to be cleared up again. The growers are doing what they can to hold the stock back, but in spite of all their efforts there is at least twice as much coming in as can be handled at anything like a fair price. S. S. Pennock gave the market a lift last Wednesday, sending 800 best grade Beauties out of town in one lot. Such an order would have exhausted the market completely a few years ago, if indeed it could have been filled from local growers only. Teas are getting better with longer and stiffer stems but one of the commission men says that the growers will be lucky to have their average on teas reach $1.50 or $1.75.

Carnations are also very plentiful, but the quality is not up to the mark and probably not over ten per cent get into the first division. The highest price is $1.50. Double violets are quite plentiful at from 35 to 50 cents per hundred but the quality is only fair. Dumont is receiving some good lily of the valley and will handle the stock of a good grower all winter. Chrysanthemums are getting down to be regular stock and the windows are full of them. Merry Monarch, Yellow Monarch, Lady Fitzwygram, Glory of Pacific, Montmort and Mme. Bergmann are the varieties. The price varies from $1 to $2 per dozen. An order of Geo. Moss for Graham cousumed eight hundred bunches of cosmos and cut out most of the locals.

The meeting of the Pennsylvania Horticultural Society last Tuesday evening brought out quite a few members but not much of interest transpired. There was a lot of fine cosmos on exhibition, which gave the judges quite a lot of trouble, as the best was difficult to select. Dahlias from W. P. Peacock, of Atco, N. J., were very fine. H. A. Dreer exhibited some fine tuberous begonia blooms.

Geo. Campbell was the only exhibitor for the Chrysanthemum Society's sterling silver cup, a little beauty. His flowers, which were very good, were six each of Merry Monarch, Yellow Monarch, Mrs. J. T. Anthony, Lady Fitzwygram, Geo. S. Kalb and Harry A. Parr, a new yellow on the order of Whilldin, not quite so large but earlier. A plant of Acalypha Sanderi exhibited by Mr. Clinkaberry was awarded a certificate of merit. A bloom from the new plant of the pure white cattleya was also shown by him.

Miss E. M. Wood will open her new store, 237 South Fifteenth street, on October 24.

E. Leuly, of West Hoboken, paid us a visit last week.

Robt. Craig & Son have been busy removing the Bogan houses purchased by them last week. It certainly was bargain day for the Messrs. Craig as they obtained $100 worth of pots, seven good sized greenhouses, most of them in fair condition, all for $170, which also included the stock of plants. K.

Boston.

MARKET STAGNANT. — CHRYSANTHEMUMS THE PARTIAL CAUSE.—PRICES LOW.—A GROWING PLANT INDUSTRY.— BEGONIA GLOIRE DE LORRAINE.—RARE ORCHIDS.—VISITORS.

When the October frost strikes us and outdoor flowers are no longer available it is natural that we should look for a quickened demand and increased activity in the florists' trade and when it does not so respond to such conditions it is equally natural that questioning and grumbling should follow. That is "where we are at" just now. Severe frosts have made the gardens desolate and the outdoor product is no longer found in the market. Yet the price of carnations is not much more than half what it was one week ago and roses are piled up in wholesalers hands in a most discouraging fashion. The first answer that suggests itself to a query as to the cause is "chrysanthemums." No doubt the explanation is correct. Chrysanthemums are now with us, but not in the proud way of former seasons for they have already dropped from $20 and $25 a hundred to $5 and $6 a hundred and even at that there is no enthusiasm. The varieties most in evidence are Merry Monarch, Bergmann and Glory of Pacific. Yellows are conspicuous by their absence as yet.

As before mentioned roses are very abundant. They must be good, indeed, to realize regular quotations. American Beauty if extra fine brings $3 a dozen but the sales at this price are limited. As to the balance, Kaiserin brings the best price. Bridesmaids, Brides and Meteors are all in the dumps. Carnations suffer equally, rarely bringing over $1 per hundred. Violets are in the same fix.

It has been often commented upon, of late years, that Boston, with her recognized horticultural prominence in many lines, yet has been obliged to depend upon distant sources of supply for the palms, ferns and general decorative material that the business now-a-days demands. The first systematic attempt to fill this long felt want is being made by Wm. Edgar, at Waverly, where the houses once devoted to cut flower stock are now almost entirely turned over to plant production and if the present rate of progress is kept up a local supply house of considerable magnitude is assured. The most interesting and unique thing to be seen here now is that finest of all winter flowering plants, Begonia Gloire de Lorraine. For one who knows a good thing when he sees it, a view of these plants is well worth a trip of many miles. Either as a hanging plant or table decoration, alone or associated with small ferns, it is simply perfect and the tiniest plants are full of bloom. Mr. Edgar gets a good place for small ferns underneath the board benches by coating the benches with about a quarter inch of cement, thus making them perfectly tight and preventing all drip. A fern which he is growing extensively for cutting is Adiantum tenerum, which may be described as a giant cuneatum, the fronds of which are excellent for large work such as combinations with American Beauties or chrysanthemums.

There were two rarities on exhibition at Horticultural Hall on Saturday, Oct. 15, both from C. G. Roebling. One was a pure white Dendrobium Phalænopsis, the only one in America, and the other was the white Cattleya labiata which bloomed recently among a lot imported by Julius Roehrs, also said to be unique. R. & J. Farquhar showed a new salvia, deep blue in color, flowers very large and showy. W. C. Winter staged an extensive collection of named dahlias.

Visitors in town: S. Hamburger, Philadelphia, Pa., Wm. Appleton, George Johnson, Alex. Rennie, Providence, R. I.

W. A. Twombly is sick with typhoid fever.

Cleveland.

BUSINESS SHOWS A SLIGHT IMPROVEMENT. —WINTER FLOWERS IN SUPPLY.—EARLY CHRYSANTHEMUMS LATE. — SMITH & FETTERS' OPENING.—NOTES.

Business is improving slightly although the general trade is continuing about as previous reports have indicated. There will probably not be any very noticeable betterment in this branch of the business until we get a frost to kill off the outside flowers which have been offered rather freely of late. The frost can hardly arrive too soon as chrysanthemums, carnations and roses are in supply now.

Chrysanthemums are increasing in number and improving in quality every day. The early sorts are quite a good deal later than last year. Bergmann, Glory of Pacific, and Marquis de Montmort are the principal offerings, with some few Marion Henderson for yellow. These are retailing at about $3 a dozen, varying from that figure according to quality. One grower, in speaking of seasons, claims a lateness of three weeks in the earliest sorts, while another lot that came under the writer's eye, shows little if any difference in respect to comparative earliness. Various other reports are between these extremes.

We have been having a great deal of cloudy, rainy and generally disagreeable weather of late and many roses are showing the effects in the form of more or less mildew.

Smith & Fetters gave an autumn opening and special display of mantel and table decorations at 148 Euclid avenue, October 20 and 21 to which a large number of artistic invitations were sent out.

J. Austin Shaw, of Siebrecht & Son, and Walter Mott, of Henry A. Dreer, have been in town during the last few days.

A.

Pittsburg.

CONCLAVE WEEK TRADE DISAPPOINTED CUT FLOWER MEN.—MANY PLANT DECORATIONS.—MRS. WILLIAMS' GOOD WORK. —A BUSINESS CHANGE.—BOTANICAL SOCIETY ELECTS OFFICERS.—OTHER HAPPENINGS.

The Triennial Knights Templar conclave held here last week did not prove nearly as great a business maker for the florists in the cut flower branch as many anticipated, the demand being mainly for foliage decorations which called into requisition all the stock of palms and foliage plants of the two cities. A conservative estimate of the total cost of these numerous decorations would be $10,000. For cut flowers the demand was very light indeed, the supply far exceeding it.

Mrs. E. A. Williams' decoration of the headquarters of Pittsburg Commandery No. 1, was the most elaborate and finest of the floral decorations, walls and ceilings being completely covered with wild smilax, asparagus and laurel. Palms, ferns, roses and other flowers were also used to a considerable extent. Mrs. Williams, when bidding on this work, submitted a color sketch by an artist showing how the rooms would look, and surpassed the sketch in the actual work. The commandery kept open house all week and the thousands of visitors were loud in their praise of the decorations.

Chrysanthemums are coming in very freely now but are not bringing as good prices as in former years. They are selling wholesale at from 60 cents to $1.50 per dozen, with not at all brisk demand.

J. F. Gibbs & Son have resumed charge of their place on Fifth avenue, E. E., recently sold to Mr. Poland, who retires. They will continue the stand in Allegheny Market and the greenhouses at Woodville, Pa.

At the last meeting of the Western Pennsylvania Botanical Society officers were elected as follows: President, Henry H. Negley; vice-president, T. S. Brown; treasurer, James Horner; recording secretary, T. W. McConnell; corresponding secretary, John A. Shafer; trustees and executive committee, Prof. B. H. Patterson, Wm. Falconer, James J. Booth and Dr. T. D. Davis. The society is increasing in membership and the committee will soon announce a programme for the winter's monthly meetings.

John Murchie & Son, of Sharon, are visitors this week.

REGIA.

Baltimore.

CHRYSANTHEMUMS SCARCE BUT IN DEMAND. —MR. COOK'S NEW ROSE.—W. P. BINDER EXHIBITS WILLOWBROOK.—NOTES.

Cold, blustering weather has made firing a necessity this week. Business has been rather slow. Chrysanthemums are the only scarce article in demand. Plenty of early whites are to be had, though yellows are still a novelty and Glory of Pacific is the only pink seen in our stores. Carnations are in better condition, but violets are yet too poor to be in great demand. Roses of all kinds are plentiful.

Jno. Cook's latest rose seedling success is a shell pink, much on the shade of Carnot. Short bud and very double bloom, with stem and foliage almost equal in strength to Beauty. As yet it is unnamed, although soon to be on the market.

W. Paul Binder has on exhibition at several of our stores his new seedling chrysanthemum Willowbrook, a Japanese, pure white, and an early bloomer. The writer is glad to report Mr. Binder in much better health and able to be about once more.

Isaac H. Moss, of Govanstown, has just completed two large carnation houses, each 200 feet in length.

S. S. Pennock, of Philadelphia, was in our city last week and in company with Wm. Feast visited Washington.

W. J. Halliday has returned from a pleasant visit to Pittsburg with the Knights Templar.

A. R. J.

ELGIN, ILL.—Mr. Geo. Souster has leased the greenhouses of H. Schlaack and will use them to grow cut flowers.

ALBANY, N. Y.—The contents of the greenhouses belonging to the estate of Thos. W. Davidson were sold at auction on October 3. The stock of decorative plants and orchids was large, the former bringing good prices but the latter moving with such difficulty that most of them were left for private sale.

BROCKTON, MASS.—The floral display at the Brockton Fair was very large this year, but was not considered fully up to that of past seasons as to quality. The outdoor displays were very extensive and very fine but of the choicer indoor flowers the entries were not as numerous as in the past. It is expected that more liberal premiums will be offered in the latter department next year. Dahlias from H. F. Bird and Lothrop & Higgins were exceedingly fine

Address THE AMERICAN FLORIST CO., Chicago.

W. A. McFADDEN, of Cincinnati, reports a first-class trade in orchid blooms.

T. T. LYON is about to retire from the directorship of the Lansing, Mich., Experiment Station. He is 85 years of age.

FLOWER spikes of Gloire de Lorraine begonia laid loosely on and among Asparagus Sprengerii make a lovely table decoration.

ONE of our correspondents would like to hear from any reader of the AMERICAN FLORIST who has had experience in growing Ficus elastica from seed.

MR. VESEY, of the Florists' Mutual Fire Insurance Association, states that the outlook for this institution is now decidedly brighter in every respect.

A CUSTOMER (it was a lady, of course!) called on a florist recently for a "gum-shoe plant," and after considerable inquiry it was discovered that she meant a rubber plant, otherwise, Ficus elastica. Of course she was all right!

THERE is, we find, an increased demand for pot plants of all kinds. It may be that this condition has been brought about by the short crop and high price of bulbs; but, whatever the cause, the prospect is encouraging to the plantsman.

ONE of the most graceful of orchids for cut flower work is Dendrobium Phalænopsis and its price brings it within the reach of the everyday florist. Some one having suggested recently that, although long lived on the plant, this flower is not a good keeper, an expert advises that the spikes should be cut toward evening and thrown into a tank of cold water to remain there till morning, after which they may be kept in good condition for a long time.

BUNCHING violets for market is an item on which it pays to take trouble. Good flowers frequently fail of a good sale through unskillful bunching. Two methods are in use—one with the flowers all of uniform height and the other with the flowers of varying heights in the bunch, but in either case each individual bloom must show for its full value and an abundant edging of good hard violet leaves should surround each bunch. Rose geranium leaves are hardly appropriate and suggest that the violets are lacking in fragrance. We recently saw a bunch of fifty violets untied; when entirely unwound the string measured over ten feet! The grower who put them up must have been a rich find for the twine man.

THE final premium list for the twelfth annual Floral Festival to be given by the State Florists' Association of Indiana at Indianapolis, November 8 to 12, has just been issued and lists seventy-seven classes for which $1593.50 is offered in premiums. Chrysanthemums will be the leading feature of the show, but the largest premiums, $50, $35 and $20, are offered in class 58, a special display of not less than 300 nor more than 400 cut roses. J. D. Carmody, of Evansville, is president of the society and R. A. McKeand, Indianapolis, secretary. Theodore Bock, Hamilton, Ohio, has been chosen to judge the exhibits.

Lambert, Trier, Germany, roses: Bunting & Sons, Colchester, England, bulbs.

Burnt Turf.

ED. AM. FLORIST:—This is mentioned in some recent numbers and I would much like to have further particulars as to its preparation. How deep should the soil be taken to be used for burnt turf? Should the soil remain outdoors over winter? What do you consider would be a fair price per carload? M. C. B.

Take up the soil a trifle below the roots that penetrate it; this will be found to vary some but it is a valuable guide as the existence of roots proves its ability to sustain plant life. Some places where soil is irrigated and sweet, roots run quite deep; other places they are shallow. It is best over a clay sub-soil, where the intermediate substance between the pure clay and loam is a gray color; an inch or more of that is very good. More clay can be incorporated in burnt soil with benefit than in the usual method of preparing soil. It is not at all necessary to remain over winter. As soon as the fire and heat are out it is ready for use. I think it would sell fast at $30 a car and pay.

C. B. W.

Violets at Poughkeepsie.

Our great and somewhat versatile friend, Mr. William Scott, does the undersigned the honor to question, in the columns of a contemporary, the facts of the methods of violet culture at Poughkeepsie, as described by the undersigned in a recent number of the AMERICAN FLORIST. Mr. Scott is hereby informed that it was not "near the Fourth of July" when deponent "found the glass covered with a thick coat of whitewash," but on September 26, 1898. The writer further rises to assure his esteemed critic that he did not "forget that many of the (Poughkeepsie) growers remove the sash or glass entirely during the months of June, July and August" for they do nothing of the kind. Guess again, Brother Scott. WM. J. STEWART.

Coming Exhibitions.

[*Secretaries are requested to supply any omissions from this list.*]

Return Pipes.

ED. AM. FLORIST:—In cases where several return pipes are employed underneath the benches, I wish to know whether they will enter the main re-return together with as good results as where each minor return enters the main direct and separate, the latter being one or two sizes larger? R. D. B.

Ordinarily it will make but little differ-

ence, so far as the circulation goes, whether the return pipes are united before entering the main return or not, although if the distance to the main return is great there will be less friction if the returns are brought together into one pipe. So far as the labor and cost of material for putting in the piping are concerned, it will be cheaper to unite the returns, and as a rule it will make a better looking job and will make the labor of repairing or changing the system less, should this ever be necessary. The size or capacity of the pipe used to connect the coils with the main returns should be the same as that of the pipe or pipes that run from the main flow pipe to the coils.

L. R. TAFT.

Boiler Power.

ED. AM. FLORIST:—I would be pleased to learn through your paper how to ascertain the heating power of a tubular boiler, and also if there is anything lost by the use of a boiler that is twice as large as necessary? H. T. C.

The heating power of a boiler depends upon the area of its grate and fire surfaces. As a rule, boilers of medium size are rated at one horse-power for each fifteen feet, while in the larger ones only twelve feet of fire surface are allowed, estimating the area of the tubes and other parts of the boiler exposed to the fire. The area of the grate required for a horse-power will depend even more upon the size of the boiler and its relative area must be greater in small boilers. Under ten horse-power there should be about three-fourths of a square foot of grate surface for each horse-power, but for the larger sizes one-half of one square foot will be ample. The size of the grate should also be modified according to the attention the fires are likely to have, as where there is a regular fireman, night and day, a much smaller grate and fire surface will suffice than when the fires are left for a number of hours. In determining the size of a steam boiler that is required for heating a greenhouse, or in fact any other structure, it is customary to estimate that one horse-power will suffice for 100 square feet of radiating surface.

Ordinarily the use of a boiler twenty-five per cent larger than will be required, results in economy of fuel, if it is properly handled, but, when the boiler is twice as large as required, it will necessitate very careful stoking to keep down the fuel consumption. This, however, can be in a measure controlled by the use of a grate of the size that would be required. If the grate can not readily be changed, the fire area can be reduced by covering a part of the grate with fire brick. L. R. TAFT.

Milwaukee.

STOCK AND TRADE CONDITIONS.—JOTTINGS PERSONAL AND OTHERWISE.

Flowers are becoming quite scarce but they are of good quality and prices are stiffening, particularly of carnations. Chrysanthemums are coming in plentifully and violets are very good. Trade is excellent.

Alex. Klokner has improved his store by repainting and putting in new fixtures.

Volk & Stewart's new corner is very handsome.

Miss Ryan has again taken the reins at the flower department at Fox's.

Walter Mott, of Philadelphia, was in town recently and spoke of the eastern florists' talk of conducting the convention of the S. A. F. for 1900 on an ocean steamer bound for the Paris Exposition. It was the first we have heard of it out here.

The Civil Service Commission is conducting examinations of applicants for the position of Superintendent of Conservatories of Mitchell Park, a $20,000 structure. The superintendent's salary is $60 per month and he must have lived in Milwaukee for three years.

Currie Brothers are advertising special sales daily and are open until eight o'clock each evening. C. B. W.

GREENBUSH, WIS.—Frank Ovenden has gone to Milwaukee to clerk in a florists' store.

LOWELL, MASS.—C. F. Miles, formerly with Jno. Oliver, has opened a retail store.

SHEBOYGAN, WIS.—J. E. Matthewson now has as clerks Misses Ella and Hulda Myer.

BRATTLEBORO, VT.—D. McGillivray is rejoicing over the arrival of a new daughter.

YPSILANTI, MICH.—Charles Krzysske was called to Waltz, Mich., recently by the death of his father.

POTTSVILLE, PA.—Carl E. Taube has taken charge of the Park Nurseries and will manage them hereafter.

NORTH TURNER, ME.—G. T. Browne is closing out his greenhouse stock and will spend the winter in the south.

COUNCIL BLUFFS, IA.—J. T. Temple, the Davenport, Iowa, florist was installed as Grand Patriarch of the I. O. O. F. of the state. The ceremony was performed here October 14.

SPRINGFIELD, MASS.—The Hampden Horticultural Society has decided to have no chrysanthemum show this year. Reason, lack of support last year, whereby a loss of over $200 was sustained.

DORRANCETON, PA.—Benj. Dorrance is engaged in preparations for some twenty new rose houses, which are to be built for next year's planting. This will add about 100,000 square feet of glass to his present area.

HOLYOKE, MASS.—The Holyoke Horticultural Society has elected Geo. A. Sinclair as secretary to fill the unexpired term of the late C. M. Hartzell. At the meeting of November 4, it is expected that Matthew Alexander will address the society on chrysanthemums.

BEATRICE, NEB.—S. H. Dole & Son have this summer taken down all their houses and rebuilt them upon land where they obtain a better level for their heating plant. They have put up two houses each 20x100, two each 10x100, with a potting shed and work room 8x63 and a boiler room. They anticipate an excellent business in the next year.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

A NEW PLACE TO BUY YOUR WIRE WORK

Finding it necessary to go into the manufacture of wire work on account of the numerous calls for same, I take pleasure in announcing that it is my aim to make this new departure a success. To do this I have reduced prices wherever possible, and will cheerfully prove to the trade that my prices and workmanship cannot be duplicated any where. As a special inducement to introduce my work I will give a special discount on all orders sent to me by November 10, 1898.

On Orders of $50.00 30 per cent. off.
On Orders of 25.00 25 " "
On Orders of 10.00 20 " "
On Orders of 5.00 15 " "

Write for my price list. Just out.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

NEW YORK.—W. J. Mandeville was a recent caller.

LONDON reports demand for Wisconsin green peas; canary seed harder in value, hemp higher, trifolium exhausted.

UNFAVORABLE weather and low prices consequent on over-production the past two years may reduce the output of bouquet green in northern Wisconsin.

TELEGRAPH advice is received that the government seed contract has finally been awarded to the New York Market Gardeners' Association (A. C. Nellis).

KANSAS CITY, MO.—A fire broke out October 11 on the fifth floor of the Trumbull Seed Company, destroying the entire stock on that floor while the water damaged stock in the rest of the building. The insurance is $18,000 which nearly covers the loss.

S. H. CHURCH, of Indianapolis, and Frank T. Emerson, of Omaha, were Chicago visitors this week. Max Wilhelmi, of F. Bartelides & Co., Denver, and H. T. Hopkins, of the John H. Allan Seed Co., Cape Vincent, N. Y., enroute home from the Wisconsin pea district, were in Chicago October 15; Chas. P. Braslan arrived from Southern California October 21; E. H. Vick, Rochester.

The Selection of Fertilizers.

The following, from a recent bulletin of the Kentucky Agricultural Experiment Station, while especially directed to farmers is equally applicable to the growing of plants under glass:

"In regard to the proper selection of fertilizers we can only say briefly that their profitable use will depend upon a knowledge of the needs of the particular soil to which they are to be applied, and the requirements of the crop to be grown. The latter knowledge has been gained once for all for most farm crops by a scientific study of these crops, but the needs of the soil must in most cases be learned by the farmer himself, either from systematic field experiments, or by observation and experience. If it is necessary for a farmer to use commercial fertilizers, and he is working upon a kind of soil that has not already been tested, we believe it will pay him to learn its needs by carrying out systematic experiments with fertilizers. The experiments made at the station amply illustrate this. It would be very unprofitable to buy phosphates for use on soil like that of the station farm, but potash salts could be profitably used there with most crops. This is because the soil is already rich in phosphates. But if it were deficient in phosphates, as is the case with many soils in this state, it would be unprofitable to use potash salts alone, and one would have to supply phosphates. It is therefore necessary in purchasing a commercial fertilizer to consider, first, what our soil needs for the crop to be raised, and then to look for that fertilizer containing most of those substances, in an available form, as shown by its chemical analysis and guaranteed by the manufacturer, at the least cost. It is well to bear in mind, also, that nitrogen compound, are the most expensive constituents of commercial fertilizers, and if we can keep up our nitrogen supply by means of clover, cow peas, or other leguminous plants, or by barnyard manure, and purchase only such phosphates and potash as may be needed, we will have accomplished a great saving."

St. Paul.

WEATHER AFFECTS STOCK.—CARNATIONS BRING BIG PRICES.—CHRYSANTHEMUMS.—TRADE IS GOOD.—STORE NEWS.

Damp, dark weather has had a deteriorating effect on stock, curtailing the cut and injuring the quality. Carnations are becoming scarce and are held quite uniformly at $2 per hundred. Roses are fairly plentiful. Chrysanthemums are showing their heads in most stores but do not sell very rapidly. Fitzwygrams are all gone; Bergmann is in its prime; Yellow Monarch and Merry Monarch, a noble pair are arriving in limited quantities; Glory of Pacific made its initial bow October 16 and is disappointing on account of poor color. Elvena, another new pink, made its first appearance the same date. Violets, which were doing nicely, are held in check by the dark weather, so that very few good blooms have been seen as yet.

Shipping trade is reported as excellent by those firms who do a country business. Society is just beginning to resume its usual round of gaiety so that business promises a nice increase.

Holm & Olson have doubled the size of their store, put in a large refrigerator and now have one of the finest places in the city.

A. S. Swanson had a very large decoration in Minneapolis a few days since. It amounted to several hundred dollars.

Mr. Ekstrand has abandoned the old houses he formerly rented and has leased H. H. Schulte's place on Grand avenue.

FELIX.

ASHTABULA, O.—Mrs. S. A. Carpenter recently lost a considerable sum, a burglar breaking into her residence.

PORTLAND, ME.—Joseph A. Dirwanger has secured quarters in the Cunningham block where he will open a branch store.

MINNEAPOLIS, MINN.—H. H. Miller, known to the trade as a dealer in green and holly, died recently in Santiago, of yellow fever. He had taken a car load of merchandise there and expected to make a fortune.

HOW TO ...GROW... Mushrooms

ATTENTION, SECRETARIES!

OF CHRYSANTHEMUM CLUBS AND EXHIBITIONS.

The season of Chrysanthemum Exhibitions being close at hand, we have, as in seasons past, placed ourselves in position to supply your Club with our beautiful CHRYSANTHEMUM LITHOGRAPHS. We have just issued, at a very great expense, two new lithographs (a full sheet and a half sheet), which we believe are the handsomest yet offered. They are entirely new in design, and, being highly illuminated are admirably fitted for advertising your coming exhibition.

We respectfully solicit your patronage, and will be pleased to send samples and prices on application. ORDERS WILL BE PROMPTLY FILLED.

THE COURIER LITHOGRAPHING COMPANY, Buffalo, N. Y.

Have you received our NEW CATALOGUE of FLORISTS' SUPPLIES WIRE WORK, etc.? If not, drop us a postal and same will be mailed to you. Please inspect it before buying elsewhere.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

A. L. BROOKE, Pres.; E. ALBERTSON Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

OSCAR LAMAR has purchased the McQuigg farm near Waco, Tenn., for the purpose of establishing a large nursery.

B. B. JORDAN, McCune, Pa., has an apple orchard of 160 acres of trees from four to sixteen years old from which he has thus far picked and marketed 1600 barrels at an average price of $3 per barrel.

C. H. PERKINS, of Jackson & Perkins Co., has just purchased a farm of 338 acres located about two miles southeast of the village of Lyons, N. Y., consideration $13,000. The place is known as the Moses Mirick farm and was once sold for $25,000.

Enforcing a Nursery Contract.

Eight years ago a western nurseryman was awarded a contract to set out a large number of trees along the streets of Garden City, Kas., upon the understanding that he was to be paid for such of them as might be found to be growing and thrifty at the end of two years. The two years rolled around and the contractor called for an inspection and counting of the saplings.

Under the advice of the city attorney the municipal authorities refused either to conduct the inspection or to pay for the trees, claiming that the whole contract was illegal.

The nurseryman carried his case to court, and has just been awarded a verdict for $33,133, representing the contract price of every tree which on his own testimony was in good condition at the stipulated time.—*Nazareth, Pa., Item.*

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

ORANGE, N. J.—The New Jersey Floricultural Society has organized a bowling club and practice games are indulged in every Friday evening.

Sport at St. Louis.

Several of the best bowlers are on the sick list, which accounts for the small attendance at the last game. Here is the score:

Name.	1st	2d	3d	4th	5th	Av
J. J. Beneke	129	163	121	216	145	154
C. A. Kuehn	137	162	99	126	171	139
C. C. Sanders	111	122	116	134	146	125
F. J. Fillmore	67	116	127	130	118	111
R. F. Tesson	107	118	92	89		101

With Chicago Bowlers.

Honors were easy at the last meeting. While John Zech made the high average J. S. Wilson rolled 182, which was the best record made. Following is the score:

Name.	1st	2nd	3d	4th	Av
John Zech	144	163	174	123	151
J. S. Wilson	182	110	145	122	139
Jno. Degnan	141	142	143	102	132
P. J. Hauswirth	131	136	128	131	131
C. Hughes	113	125	97	140	118
Alex Henderson	147	108	103	107	116
A Lange	108	129	105		114
Henry Rowe	84	90	145	78	99
J. C. Vaughan	82	93	93		89

Indianapolis Pastimes.

John Hartje has built a large basin under one of his carnation benches and there he keeps his minnows for bass fishing.

The organization of the Florists' Bowling Club is postponed till after the show.

The monotony of the flower hall in Market was recently broken by a boxing match between two florists. The contestants were not evenly matched in weight and showed a deplorable tendency to disregard scientific rules and flower vases. H. JUNGE.

Bowling at Flatbush.

Four new balls, two sets of new pins, a coat of paint on the walls and of oil on the floors, makes the alleys very fresh and attractive looking, and the bowlers are eager for visitors, so that they may show how nicely the Flatbush boys are provided for. At the last meeting, October 13, Riley, who is one of the strongholds of the club, couldn't roll 100, but Louis Schmutz made an average of 165 in three games, a feat which he duly celebrated by performing a series of somersaults. J. H. Troy and J. I. Donlan, of New York City, were visitors. Prosser won the "pot."

New York Bowling.

The New York Florists' Club will bowl at Immen's alleys, corner Thirty-second street and Fourth avenue, every Monday evening except the second Monday in each month when the bowling will take place in the afternoon, that being the evening for the regular club meeting. The first trial of the alleys was on Monday evening, October 17. The scores made were so large that, by request, we refrain from publishing them lest this might frighten away other clubs and thus make a match game impossible. It will do no harm, however, to say that J. H. Troy made highest score, even Alex. Burns and Theo. Roehrs having to succumb to this new champion. By-laws will be adopted on Monday evening, October 24, and every member of the New York Florists' Club should be present.

With Cleveland Bowlers.

That which was intimated some time ago as likely to occur, has taken place, and the bowling club as a separate organization no longer exists. Formal action has been taken and all members of the Florists' Club are now entitled and welcome to the use of the alleys upon equal terms with the bowling contingent. Bowling will be the pastime hereafter at the conclusion of the Florists' Club meeting upon the second and fourth Monday evenings of each month, and on all the other Monday evenings of the year all members of the Florists' Club who are in good standing are at liberty to disport themselves upon the alleys to their heart's content. Heretofore pretty much all the fun going has been the exclusive property of the bowling club, but these new arrangements give everybody a chance. A.

FITCHBURG, MASS.—Joseph Fuller had his first flower opening for the season on the afternoon and evening of Thursday, September 29. A gratifying attendance of the public was secured and the establishment looked exceedingly well in its holiday dress.

EDWARDSVILLE, ILL.—J. F. Ammann will send 700 pot plants to the show at St. Jacob early in November.

THE
Gardeners' Chronicle.
A Weekly Illustrated Journal.
ESTABLISHED 1841.
The "GARDENERS' CHRONICLE" has been FOR OVER FIFTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, much of the information furnished is of such general and permanent value, that the "GARDENERS' CHRONICLE" is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.
Subscription to the United States, $4.20 per year. Remittances to be made payable to H. G. COVE.
OFFICE:—
41 Wellington St., Covent Garden, London, England.

MÖLLER'S
Deutsche Gärtner-Zeitung
The most widely circulated German gardening journal, treating of all departments of horticulture and floriculture. Numerous eminent correspondents in all parts of the world. An advertising medium of the highest class.
Moller's Deutsche Gartner Zeitung is published weekly and richly illustrated. Subscription $3.00 per annum, including postage. Sample copies free.

STEADY DEMAND FOR GOOD STOCK.—OUTDOOR BLOOMS AT THEIR BEST.—HOFFMEISTER'S NEW ROSE.—CHRYSANTHEMUM COMMITTEE'S FIRST MEETING.

Trade in cutflowers has been fairly good the past week with a steady demand for good stock. Roses and carnations are improving daily in quality. As yet we have had no frost and outdoor flowers such as cosmos and dahlias are at their best at present. The Sixth street flower market has been overloaded with these flowers and prices realized are accordingly low.

Last week I visited the Hoffmeister Floral Company's place and found genial Aug. Hoffmeister busy tying up a house of his new rose, a sport of the old Catherine Mermet. This house is worth seeing. Planted the latter part of June out of 2-inch pots, the benches are crowded now with a robust growth covering every inch of space. The color is a shade darker than Bridesmaid and Mr. Hoffmeister claims it as a better keeper. This sport originated with them three years ago and several prominent rose growers predict a future for it. All of their rose houses are in excellent condition.

Nathan Smith & Son, Adrian, Mich., had a seedling chrysanthemum before the A. C. S. committee here October 15. The flower is white with a slight cast of cream, of good size and strong stem. No doubt this is an improvement over existing varieties owing to its earliness.

John Evans, of Quaker City Ventilator fame, was a caller Saturday. John had his usual smile upon his countenance and sold two machines during his stay.

H. SCHWARZ.

HEADQUARTERS FOR "FANCY" BULB STOCK.

Butte, Mont.

Law Bros. & Day suffered a severe loss by fire in their greenhouses on October 9. Previous to that they had found the demand for cut flowers far beyond the supply and were shipping in stock from Chicago, Milwaukee and Denver. They had 15,000 square feet of glass, under which they grew roses, carnations, chrysanthemums and smilax, and prided themselves on having the largest retail business, according to the amount of glass, west of the Missouri river. They will force more bulbs this season than have ever been forced in the state and their stock in general was in fine condition for the winter, especially in the new houses which were planted to roses and smilax. It is expected that they will at once repair the damage to their houses.

The State Nursery Co., of Helena, reports a good retail business at their Butte branch.

L. A. Brouillard met with a serious loss by fire October 7. The fire started in the living rooms, which were attached to the greenhouses, and the dwelling rooms, including all furniture and personal effects, were consumed and about two-thirds of the greenhouses were destroyed. Mr. Brouillard, wife and five small children barely escaped with their lives; loss about $3000, insured for $1500. L.

Worcester, Mass.

Chrysanthemums are in, very good blooms of Bergmann, Glory of Pacific and Marion Henderson, and are selling well, averaging $3 per dozen at retail. Trade is very satisfactory and has about struck its winter gait. Good flowers are available in quantity, with no over abundance.

Write for prices.

FIELD-GROWN MARIE LOUISE VIOLETS, $4 per 100. A1 stock, from pots, $8 per 100; $25 per 1000.

A few hundred BRIDES and MAIDS at a bargain, from 3-inch pots.

CRABB & HUNTER, Grand Rapids, Mich.

Buffalo.

STOCK IS MORE PLENTIFUL, BUT THE CARNATION CUT IS SHORT.—NOTES AND COMMENTS.

Carnations are not as plentiful as they were a week ago. Dahlias are still to be had but they look lonesome. Chrysanthemums are with us, Bergmann and Mrs. Morrison being most plentiful. A few pink and yellow are to be had. Violets are increasing in number but not so fast in quality. Beauties are fine and find ready sale. Scott shows a handsome window this week of palms and orchids.

Charles Porter is now nicely settled in his new store. Harry Millatt, the former proprietor, departed from Buffalo last Saturday for Kansas City.

The flower show will be held in the new Glensey building and a better place could not have been selected. We are pleased to announce that Adam Graham, of Cleveland, will be the judge on palms and decorative plants.

Recent visitors: Geo. L. Graham and Mr. Valentine, Bradford, Pa.; F. Shoenfelt, Westfield, N. Y.; F. B. Lewis, Lockport, N. Y. W.

POLO, ILL.—M. E. Miller has agreed to supply a chrysanthemum show for the ladies of the Methodist church at Mt. Morris. Mr. Miller took ten premiums at the recent Rochelle fair.

Richards Patent

XL

All Vaporizing

FUMIGATOR.

I have imported from London a sample invoice of this Apparatus, and would recommend same for trial to our customers. It is strongly endorsed by the leading horticulturists abroad, and it is worthy of being tested here. If it does all that is claimed for it, it is indeed a boon to the owners of greenhouses.

THE FUMICATOR

is made in two sizes and will last for years. It consists of three parts—the copper cup, cylinder and lamp.

Small size, for 2000 cubic feet, $0.90 each.
Large " " 5000 " 1.00 "

When the lamp is lit and the compound poured into the cup, the person should leave the house and need not re-enter it, as the lamp will die out soon after the compound is all evaporated

THE COMPOUND.

This is supplied in stoppered bottles, capsuled over, as follows:

Sufficient for 5000 cubic ft., $1.25 per bottle.

RICHARDS XL ALL MILDEW WASH (for syringing). A clear wash which does not stain foliage flowers or fruit. Easier to apply and more effectual than sulphur. **Per bottle, $1.25.**

RICHAROS XL ALL LIQUID INSECTICIDE (for syringing). Claimed to be the safest and most effectual Insecticide yet discovered. Full directions on each bottle. **Per bottle, $1.00.**

VAUGHAN'S "ROSE GROWER" BONE MEAL.

This is a special brand we have put up for our trade. It is ground fine, hence acts quickly. Free from acid, very light in appearance, and a superb article. It is made from bone accumulated in large slaughter houses and should not be compared with the Bone Meal made from cattle heads and feet gathered up on the Western prairies. Such Bone Meal, which is dark in color, is fluffy in character, slower to act and not nearly so desirable as our "Rose Grower" bone. Furthermore, the bones of many diseased animals are used in the manufacture of that dark Bone Meal. Our "Rose Grower" bone has been slightly steamed to soften it so it can be ground fine and is thus quicker in its action. A finely ground bone can also be more evenly distributed through the soil.

ANALYSIS:—Ammonia, 4½ to 5½ per cent; total phosphoric acid, 22 to 25 per cent; total bone phosphate, 48 to 54 per cent.

Price, 5 lbs., 25c.; 10 lbs., 40c.; 25 lbs., 60c.; 50 lbs., $1.00; 100 lbs., $2.00; 200 lbs., $3.50; 500 lbs., $8.00; 1000 lbs., $15.50; 2000 lbs., $30.00.

VAUGHAN'S SEED STORE, 84-86 Randolph St., CHICAGO.
14 Barclay St., NEW YORK.

THE HARRISH DISEASE can be prevented by immersing the bulbs for ten hours in a half solution of 99 per cent.

KRAFT'S PLANT TONIC

THIS has been conclusively proven by experiments at Lincoln Park, Chicago. The Tonic also kills Hard Shelled Scale, Mealy Bug, and other insect pests without injury to the plant. A trial of a 25 cent bottle will convince you that a really remarkable insecticide has been discovered. Send for circular.

THIS INSECTICIDE IS NON-POISONOUS.

The MODEL Extension Carnation Support

QUEENS N. Y., Feb. 16, '97.
MR. THERON PARKER,
Brooklyn, N. Y., Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention.
Very truly yours,
C. W. WARD.

FLATBUSH, BROOKLYN, N. Y., Feb. 18, '97
MR. THERON PARKER,
Dear Sir:—Your wire stake is certainly a gem. Without hesitating we indorse it as an up-to-date carnation support. Yours truly,
DAILLEDOUZE BROS.

W. HOBOKEN, N. J., Feb. 18, 97
MR. THERON PARKER,
Brooklyn, N. Y., Dear Sir:—It gives me much pleasure to congratulate you upon your success in getting up carnation supports. I think that those I have had from you are about as perfect as anybody will be able to make them. They certainly fill my bill for an ideal carnation support, a thing I have been looking for for a long time. Wishing you every success in the sale of them, I am
Yours truly, E. ASMUS.

ROSES AND CARNATIONS SCARCE.—CHRYSANTHEMUMS IN LITTLE DEMAND.—A VIOLET EXPERIENCE.—SHOW PLANS.—NOTES.

The Columbia Place Floral Company has had chrysanthemums in bloom for some time, but they report very little demand and low prices. Roses and carnations are still scarce but as the plants are in healthy condition good crops of both may be expected in the next two months. Violets are very little grown in this vicinity. Sonnenschmidt & Junge, who for several years past gave one of their houses to this flower, with pretty fair success, are less fortunate this year owing to gallfly.

Huntington & Pages' retail department is now located at 150 E. Market street. To accommodate their growing trade they have added a warehouse to their business located at 225 E. Maryland street.

The October meeting of the Florists' Club was held at Garfield Park Greenhouses and John Heidenreich's paper on market plants was listened to with more than usual interest. He handled his subject as well as only a man of his experience and success in this line of the business could have done.

The show committee met at the residence of John Bertermann October 17 to make the final arrangements. There is on hand about $1700 for premiums and prospects for more. The Merchants Association is co-operating with the florists to make the show a success. The ladies of the free Kindergarten Society will have charge of the cutflower and plant booths. November 8 is the date of opening. After transaction of business everyone enjoyed the hospitality of Mr. Bertermann.

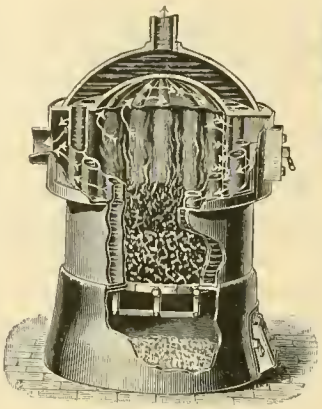
Wm. Langstaff, of the Deaf and Dumb institution, is highly pleased since the state granted him a new greenhouse.

H. JUNGE.

Wheeling, W. Va.

The activity, the hustle and bustle noticeable on all sides leaves no doubt in one's mind as to the advent of a prosperous season. All look forward to the recurrence of the memorable season of 1892.

L. A. Smith has his eye on a fine and commodious store, located on the main business street. Mr. Smith's palms and decorative plants are of the sort to command sales at good figures. His Araucaria excelsa and Ficus elastica are particularly fine, better than one sees at the average florist s establishment. Palms, bedding stock and bulbous plants are Mr. Smith's specialties.



Max L. Hess reports a good all around trade, decorative work being more and more in demand. There is nothing that pleases Max more than to be master of ceremonies at a swell wedding or reception. His artistic skill asserts itself in no small degree when given a carte blanche order.

The genial Franz Laupp has no complaints to make; business has been brisk with him all along.

Chas. Huscroft, of Huscroft Bros., has been confined to his bed the past two weeks. It is a case of appendicitis. The Huscroft Bros. are enjoying a fine trade.

HOMO.

BRISTOLVILLE, O.—The Gaskill greenhouse has again been sold by Sheriff Caldwell to satisfy a claim of Kirk, Christy & Co.

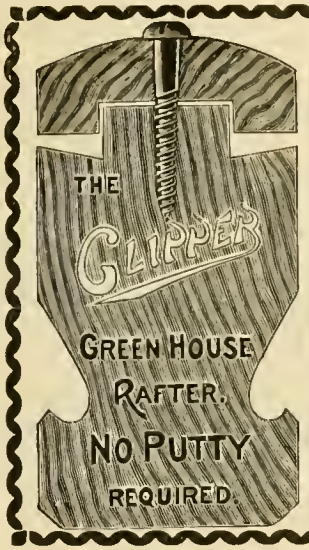
Helpful Reminders.

The great danger just now is the penny wise and pound foolish practice of saving fuel to the injury of stock that will take months in recovery. If it will not pay to keep your stock at the temperature requisite for its perfection, throw it out.

Special care should be taken in watering. There is less evaporation by the sun's heat, but firing causes benches to dry from below much sooner than before and you must be on the alert to discover the new points of danger.

In late planting outside cover thickly but not too compactly with leaves, straw or hay to exclude the frost. It will make a wonderful difference in the outcome next spring.



Do not overdo the matter of sword ferns, Asparagus Sprengerii and Kentia Belmoreana. You need a variety of plants and when specialists get to cutting prices you cannot afford to compete.

For decorating, Kentia Forsteriana is best for tall or high effects. The fern Alsophila Australis is extremely valuable. It goes right to pieces if allowed to wilt but, phœnix like, comes up again very soon. The most beautiful of all is Cibotium Schiedii, a tree fern as easily grown as nephrolepis. Its light color is very desirable. The yellow lantana, the Akebia Japonica, Euonymus variegata, tall grown echeveria, the Kenilworth ivy and Maurandya vines are doubly useful for decorations because they are not seen in every florists' window. For grouping plants in decorations an olive green cambric is useful for covering boxes and pots and stands.

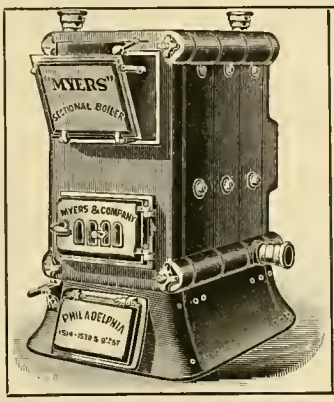
Two of the flowers most sought after last spring were iris and Bride gladiolus. The bulbs are very cheap and now is the time to prepare them for spring bloom.

Lay cabbage leaves over your fern benches and go around early in the morning to pick snails from the under side.

The Oreodoxa regia is useful when something tall, graceful and slender is wanted. Calceolarias, cinerarias, cyclamens and primroses must not be allowed to become pot bound. C. B. W.

Butted Glass.

This is no longer an experiment, it has come to stay. There are various ways of making Butted Roofs, but the best way is with the



Clipper Bar.

With this bar you can make a roof that is absolutely free from drip, and glass cannot be torn out by the wind. Butted glass makes a tight roof, a warm house and saves fuel. It lasts longer, looks better and costs less than the old-fashioned roof. But do not think that this is the only bar we sell, for it is not; we furnish what people want and there is nothing in greenhouse material that you cannot get from us, and all of open-air-dried Cypress clear of bright sap, stained sap, knots and all other defects.

Cement Paths in Greenhouses.

ED. AM. FLORIST:—What are the objections, if any, to the use of cement for greenhouse paths? What are the advantages attending its use and the best surface shape of path? W. S. J.

ROSES.

CHANGES IN CULTURAL METHODS.

At the recent first annual convention of the Canadian Horticultural Association at Toronto, H. Dale, of Brampton, Ont., presented the following paper upon rose culture:

At the outset I will say that my experience in rose growing has been gained entirely under glass, I never having had anything to do with outdoor culture of this flower. Looking back ten years I see many changes both in the varieties grown, the methods of culture and the handling of the product and I am pleased to be able to say that these changes are all for the better, excepting probably in one particular and that is an important one, the price obtained for our goods. This point I will touch upon later.

First I will speak of the varieties grown. Ten years ago we were growing fully as many or more kinds than now. We had Bride, Mermet, Perle, Sunset, Bennett, La France, Niphetos, Gontier, Bon Silene, Cornelia Cook and a few of the old and well known Marechal Niel. Contrast the foregoing with the favorites of to-day; Bride, Perle and Sunset are about the only ones remaining on the list. A number of new ones have been brought forward for trial during the past decade, most of them only to be discarded as worthless. We can remember the grand flourish with which Puritan, Bell Siebrecht and some others were heralded. Their introducers doubtless admire the very gentle way in which they have slipped out again, along with Waban, Dutchess of Albany, Christine de Noue and several others. A few good ones have been sifted from the chaff and we have Bridesmaid, Mme. Hoste, Wootton, Mrs. Morgan, Mme. Cusin and American Beauty, and none will gainsay that the list of to-day is a great improvement on that of ten years ago.

The tendency now seems to be toward cutting down the list. The call is for Bride and Bridesmaid and each year we have to grow more of these and less of other varieties, so that by far the greater proportion of the bench room is now planted with these two. I fear this continued sameness will be hurtful to the reign of the queen of flowers. She holds sway at present and I believe will continue to do so if new and desirable kinds are brought forward to give us more variety and keep pace with other flowers, for it cannot be denied that great advances are being made in some flowers which are in competition with the rose. This, I know, is not a new idea. Others have felt the same thing and have spoken of it, but I mention it again as I think it is very important. It would be a great boon to rose growers if just at this time, we could get one or two new sorts possessing the good qualities of Bridesmaid and be of some different color or form that would make them acceptable to the flower buying public.

Very little has been done heretofore in America in the way of raising new varieties for, although some of the best are of American origin, they have been sports and the introducers should put forward no claim for honor as originators; Dame Nature deserves all the credit. But, mind you, I do not blame anyone who, seeing a good thing, reaches out and grasps it. Like Micawber, I have been waiting for "something to turn up" in this line myself for the past ten or fifteen years.

In methods of growing I see many changes as compared with ten years ago. At that time solid beds were used to some extent and such beds were solid, with no humbug about it. The earth was spaded over and enriched with manure, the roses planted and allowed to remain from year to year, with a severe pruning back in summer, generally about August. So-called solid beds are still used but they are prepared in quite a different and more elaborate manner with ample drainage and means for admitting air and the introduction of heating pipes under the beds.

Bench roses were grown on inclined benches, each bench or table having a slope to the south of several inches, but of late all benches that I know of are built level and are much easier to manage. I find six feet the most convenient width with walks on either side and would not recommend the use of side benches as I find the main demand is for long stemmed stock which cannot be grown on side benches near the glass. Late planting was the general practice ten years ago, July and August being looked upon as the proper time, but we have been planting earlier each year until May 1 is now considered none too early to make the first planting and all should be finished in July.

The merits and demerits of grafting tea roses for winter flowering have been a question at issue for the past ten years or more. I remember that in 1887 there was considerable controversy among some of the prominent growers in the United States as to whether own root or grafted roses were the most suitable for forcing. It is still an open question. John N. May at that time championed own root stock and I note that he still sticks to his colors. On the other hand there are many who speak highly of grafted plants, and I must be allowed to enroll myself among the number, my ex-

perience going to show that there is a great advantage gained by grafting Bridesmaid and Bride on Manetti. I have had no experience in grafting other varieties, but probably there are other kinds which would be benefited by using the Manetti on some other stock.

In regard to handling our output there is not any great change from methods followed a half-score years ago. Then, as now, the product was sold direct to the retailer, there not being to my knowledge any flowers handled on commission in Canada. But there is a great change in the amount grown, there being fully ten and probably fifteen times as much glass devoted to rose growing as there was at the early period of which I speak. The trade may be said to have been in its infancy then. I shall never forget the time I had an order for fifty white roses and I supplied fifty Niphetos. This was the first time I had been able to supply fifty roses all of one kind at one cutting and I felt very proud and confident that the business surely had a good bottom to it. Our vice-president, F. G. Foster, was the gentleman who favored me with that order. I think that when we look back on such small beginnings only ten short years ago and compare them with the extensive trade now carried on all over the Dominion it is very encouraging and a good proof that rose growing is a substantial business. But I will say that although trade has extended vastly and, from every indication, will continue to expand, prices have gradually declined. They have decreased in this way. Ten years ago it was not necessary to grade the stock; a rose was a rose, be it large or small, long-stemmed or short, all brought the same price and that the top one. Now stock has to be graded and the select blooms will command no better price to-day than the mixture did ten years ago; the second qualities and culls have to be sold at half price, which makes sad inroads on the net income. To counterbalance this we must be on the alert to cut down expense in every way possible, build cheaply yet permanently, use cheap fuel and study to employ the best and most economical methods of growing and handling our stock to the end that we may prosper in our chosen calling.

ROSES AT WABAN CONSERVATORIES.

The discussion at Omaha on the merits of grafted roses for winter forcing stimulated a deep interest throughout the country in this pertinent question. At Waban conservatories, where grafted stock has been grown for a number of years, in increased proportion each year as its advantages become apparent, nothing has transpired to change Mr. Montgomery's faith in the superiority of grafted stock over that grown on its own roots. Brides and Bridesmaids which have been planted but three months out of three and one-half inch pots, are now five feet and more in height and from some plants in this lot there have already been cut in the first crop as many as fourteen good flowers. Every stem is long and wiry, even if the flower is not fully up to size. The only attention given now is to keep them tied in and to secure as hardy and sturdy a growth as possible, which is not an easy accomplishment during the excessively warm weather recently experienced.

All the houses were given a light mulch about September 1. No other fertilizer is applied until midwinter, excepting where the foliage or stem seems to show a lack of nourishment, in which case a very little nitrate of soda is given. In the houses where Bridesmaids are in the second year constant feeding is necessary, as these old established plants are very voracious. Fertilizer is given weekly; that is, nitrate of soda and cow manure every alternate week. A bench of Mrs. Morgans planted in July is composed of one-half own root and one-half grafted stock. The grafted plants are fully four times as large as the own root plants at the present time. With American Beauty no advantage appears as yet in the grafted stock as compared with the own root stock.

Speaking of the tendency of grafted roses to die off at the graft, as referred to at the Omaha convention, Mr. Montgomery says that this trouble comes from the fact that the benches are shallow and it is difficult to get sufficient depth of soil to cover the graft as should be done. When shallow benches are used, he mounds up the soil about the plants slightly so that the graft is two inches under ground. With this treatment the plants are on their own roots three months after planting. He admits that it is useless to plant grafted stock unless this can be accomplished.

President Carnot is throwing a light crop at present but will be kept working until December when it will be allowed to take a rest for about six weeks. The excessive heat recently experienced has been very trying to roses of this character. An effort has been made to keep the night temperature as low as possible, but it has been, under recent conditions, impossible to prevent its going too high. With Meteor no attempt has been made as yet to put the temperature higher than that given to other varieties. The days have been so warm that it keeps its color and opens well and when this is assured a further advance in temperature is neither necessary nor prudent. When the flowers begin to come black, then an increase in the temperature cannot be avoided.

Mr. Montgomery attaches much importance to the manner in which roses are cut and regards as indispensable for this work an observant, careful and experienced man, as when carelessly done it is very easy to spoil the next crop entirely. In cutting teas his rule is to make the cut about the second or third leaf from the base of the stem. This leaves the best eyes for a new growth. Cut a leaf or two higher up than above indicated the next flowers would come more quickly but would not be so good. On American Beauty it is not desirable to cut so far back, especially on the strong canes, as the check is too severe for the plant.

ROSE TROUBLES.

ED. AM. FLORIST:—You will oblige by advising as to the best course to pursue with my roses. I have a glass plant 75x85 feet devoted to 1200 Bridesmaids, 700 American Beauties, 200 Brides, 200 Kaiserins, etc. The stock was planted in 1897. Since last spring the Bridesmaids have been gradually failing. If pruned a little severe they get sick and many die in a month or so. The plants were given one dose of nitrate of soda in January last and a little soot in March. I am unable to state the amount of nitrate applied. Some appear to be healthy, but if pruned the succeeding growth is small, yellow and sickly. They were rested for a few weeks, but always given a little water, except during the week before pruning, and even then they were not sufficiently dry to affect the roots seriously. The day temperature ranges from 75° to 90°, night 50° to 60°. At the present time I am giving them a small dose of bone meal occasionally, but would also like to know the best feed for them, and how often it should be applied.

California. E. L.

These roses are evidently in a very bad way, and it is rather late in the day to attempt to restore them to healthy condition. Judging from the letter describing the treatment given, my impression is that the main trouble comes from an overdose of nitrate of soda. This is a very powerful stimulant; given in weak doses at intervals of three or four weeks when the plants are making lots of growth it is very useful, but an overdose will be as bad for roses as an overdose of stimulants is for men; both lead to bad effects later on.

At the present time I should advise "E. L." to withhold all fertilizers in every form; water very carefully, giving just sufficient moisture to keep the roots active, but syringe overhead on every favorable opportunity, giving all the air possible during the day and a little at night, except in very stormy weather. Follow this treatment till the plants show healthy growth in their leaves, which will be a sure indication that the roots are also getting into active work again. Do not prune anything away from the plants in

SILVER SERVICE PRESENTED TO PRESIDENT WM. F. GUDE AT THE OMAHA CONVENTION OF THE S. A. F.

their present condition, as every leaf is of value, but when they show by better growth that they are gaining strength, the very weak thin branches may be shortened somewhat and the stronger growth tied down. This will induce strong, vigorous shoots to start from the base of the plants. When they reach this condition a more liberal treatment may be given them, but a mulching of well decomposed manure not more than half an inch thick spread evenly over the surface of the soil will be much safer till next spring than any artificial fertilizer. Then, if the plants show indications of needing more help, a dose of any weak liquid manure can be applied once every ten or twelve days. If nitrate of soda is used not over one ounce to eight gallons of water should be given at once.

The application of bone referred to by "E. L.," as it was at a time the plants were not in vigorous health, was a positive injury to them. Plants, like animals, as a rule do very much better with plain, wholesome food in reasonable quantities and given at a time when they are hungry, than they will if overfed with rich food which they cannot readily digest.

JOHN N. MAY.

CHRYSANTHEMUMS.

SEEDLINGS AT PHILADELPHIA.

Maryland was well represented at last Saturday's meeting of the C. S. A. committee, which convened for the purpose of examining seedling chrysanthemums. A. A. Seidewitz, Annapolis, Md., had Adeia, an incurved Japanese of a delicate pink tint. It is a bloom very full of florets, and appears to be a good keeper and travels well when shipped, two prime requisites in a commercial variety of the queen of autumn.

Wm. Paul Binder, Rider, Md., had a pink incurved Japanese, darker in color than the foregoing, with larger florets, though not quite so full. The name is Lady Harriett. Is this not dangerously close to one called The Harriott? The same exhibitor also had a delicate yellow reflexed Japanese, which has been named Harry A. Parr.

New Jersey was also in evidence with a variety which will grace any occasion at any season of the year, no matter whether it be mid-season, early or late. Two names accompanied this valuable novelty, Soliel d' October and October Sunshine, and it came from John N. May, Summit, N. J. If the people who buy flowers and the growers who produce them and the retailer who disposes of them were to hold a meeting anent the matter of nomenclature in connection with this particular variety, and had the above data to guide them, they would call it just Sunshine, without even going through the formality of taking the ayes and noes. Whether there is a meeting held or not to decide this important matter, that is the name it will go by when put upon the market. It is a clear yellow, with broad, reflexed florets, and large in size.

P. A. D.

WORK OF THE COMMITTEES.

The several committees of the C. S. A. judged seedlings submitted to it October 22 as follows:

NEW YORK, N. Y.—David Rose, Jersey City, N. J., exhibited Dolly Rose, Japanese, reflexed, white sport of Glory of Pacific; scored commercial scale 87, exhibition scale 81 points. Wm. Paul Binder, Rider, Md., exhibited Harry A. Parr, Japanese, yellow; scored commercial scale 78 points.

PHILADELPHIA, PA.—Wm. Paul Binder, Rider, Md., exhibited Lady Harriett, incurved, Japanese, pink; scored commercial scale 86, exhibition scale 86 points. The same grower exhibited Harry A. Parr, Japanese, delicate yellow; scored commercial scale 92, exhibition scale 90 points. John N. May, Summit, N. J., exhibited October Sunshine, reflexed, Japanese, clear yellow; scored commercial scale 93, exhibition scale 94 points. Ed. A. Seidewitz, Annapolis, Md., exhibited Adelia, incurved, Japanese, delicate pink; scored commercial scale 93, exhibition scale 94 points.

CHICAGO, ILL.—Wm. Paul Binder, Rider, Md., exhibited Harry A. Parr, Japanese, yellow; scored commercial scale 79 points. Nathan Smith & Son, Adrian, Mich., exhibited 12—10—97, Japanese, incurved, white; scored commercial scale 83 points.

BOSTON, MASS.—Wm. Paul Binder, Rider, Md., exhibited Harry A. Parr, Japanese, light yellow; scored commercial scale 79 points. ELMER D. SMITH, Sec.

POSTER DESIGNED FOR THE CHICAGO HORTICULTURAL SOCIETY BY K. A. BEUHR.

EXHIBITION POSTERS.

The accompanying illustration shows a poster designed for the Chicago Horticultural Society by K. A. Beuhr. Printed in five colors, it is one of the best advertising features of this character so far produced for the use of horticultural societies. The Courier Lithographing Company, of Buffalo, N. Y., also issue a very good poster for chrysanthemum exhibitions. In the latter a cluster of chrysanthemums (life size) is shown in a bowl, with the words "chrysanthemum show and floral exhibition" in prominent lettering.

CHARLESTON, ILL.—Miss Etta Nott made a very creditable display at the Farmers' Institute here October 27 and 28. The stock at her greenhouse is in excellent condition.

CARNATIONS.

AMONG THE GROWERS.

Albertini and Bridesmaid are considered the best varieties by August Dressel, Chicago. Mr. Dressel has 1000 plants of the newer sorts and grows several thousand each of Scott, Daybreak and McGowan.

A. G. Prince & Co., who are the selling agents for the Hinsdale Rose Co., are receiving the cut from seven carnation houses and find them marketable at good figures. Mr. Prince speaks highly of Flora Hill and considers it certainly the best white, if not the best commercial variety of the many sorts in general cultivation.

Henry Mundt, Oak Park, Ill., has found Flora Hill to have a too weak stem and has also failed to find merit in Jubilee. His principal varieties are Daybreak, Tidal Wave and Silver Spray. The only new sort he is trying is the Stollery Bros'. Argyle, which has done well thus far.

Wietor Bros., Chicago, are growing nine more houses of carnations than they had last year, in all something near to 50,000 plants. They are particularly pleased with Triumph and are cultivating it largely this year in place of Wm. Scott. Their collection includes almost all of the standard varieties and many new sorts, and they report the plants in excellent shape.

A. H. Schneider, Oak Park, Ill., has benched 1500 Daybreak, 1000 Wm. Scott, 500 Tidal Wave and an equal number of Flora Hill, together with a quantity of Mayor Pingree and newer sorts. He finds Flora Hill a free bloomer and the flowers large. Scott and Fisher he found to be the best for summer blooming.

Stollery Bros., Chicago, are growing many new sorts and 500 second year seedlings from which they hope to pick out as good a novelty as their Argyle. They are growing 3500 of this variety and have found it a good seller this season. McGowan was once their best paying variety, but the returns have so diminished that they dropped it this season.

Bassett & Washburn, Hinsdale, Ill., have the largest carnation house in America. It is 52x600 and contains upwards of 30,000 plants. Most of these are new varieties, with a few Daybreak and Scott. Mrs. Bradt was one of their best paying varieties last year and Jubilee did well; the latter variety Mr. Bassett believes to do best when grown continuously under glass. Mary Wood is a new sort which will be accorded a large place if this season's test shows it to be prolific enough to be profitable. Mr. Washburn is enthusiastic over the big house and says that it is producing better blooms than do their ordinary houses.

Charles Schafer, Chicago, has not increased his last year's planting, but is growing 30,000 fine, healthy plants. Lizzie McGowan is his leading variety, as he has 12,000 of them. He benched 5000 each of Tidal Wave and Nancy Hanks, 4000 Wm. Scott, 2000 Daybreak and 1000 Flora Hill and has 1000 of the novelties, including a few hundred each of Argyle, Painted Lady, White Cloud and Evelina. Mr. Schafer considers Argyle the best of all the new sorts.

SUPPLY AND DEMAND.

From a grower's point of view it is very plain that there is danger of an overproduction of carnations; in fact it looks as if the overproduction was going to be an apparent factor this season. Production will eventually regulate itself, but there is another and more important element in the market and that is the reduction of the consumption of cut flowers in general.

The fact that flowers are no longer used for personal adornment at balls, the theatre, or at other gatherings, is indicative of a lack of love for flowers and is from both a moral and aesthetic point of view very deplorable. It sometimes seems as if our retail men had become so lofty and artistic in their ideas for the use of flowers that they have let the individual love for a few flowers die out of their trade entirely and cater only for immense decorative effects such as are practically beyond the reach of persons of limited means. The result is an irregular and unsteady market with thousands of flowers going to waste, or to the street fakirs, which is worse than waste.

So long as the grower is pulling one way, the wholesaler another, and the retailer a third, we can expect nothing but dire consequences and the idea that grower and retailer have nothing in common is all tommyrot of the worst kind, for they have every thing in common if they can but be made to appreciate that fact. Make it your business to attend the local club and attend it regularly. Demand an answer to some of the problems of trade that perplex you and if this is persisted in you will eventually get the club members in a communicative habit which will be of great benefit all around. I attend my club once a month almost as regularly as the month comes around and find it profitable even though I have to travel sixty-nine miles each way to attend the meeting. Perhaps this does not add to the price I receive for carnations but it does add to my knowledge as to how to grow them to the best advantage, how to ship them, what varieties are taking in the market, what are likely to become leading sorts for the next season and a host of little things which help make my business more of a success than if I stayed at home and allowed myself to get rusty.

The American Carnation Society affords much help to the grower who is interested in this flower and if he attends its meetings instead of falling back in the race he will be going forward and thus gain far more than the amount of the dues and the cost of attendance at the meetings. Neither the local club nor the national society can create a demand for cut flowers but they can and do give us some ideas as to the best method of disposing of our stock and the society by its free exhibition always arouses additional interest among the buying public which does, in some degree, help the market. If the carnation men of the country would support the society properly this feature of its work could be carried to such a point that it would very materially aid in fostering a love for carnations and if this were followed up by the retail men being careful to still further nourish this growing popular favor by selling only such blooms as would be sure to keep for a few days at least, and putting them up in an effective manner so as to bring out their full beauty, we would eventually get a market that would be in some measure near the production of the growers.

ALBERT M. HERR.

Winter Treatment of Aquatics.

It is well to bear in mind one thing, that water lilies classed as hardy are hardy only in the sense that if planted in open, or natural waters with mud bottoms, they will survive the winter; but they are not hardy in the sense that a pæonia or hyacinth is; they cannot endure protracted hard freezing and thawing. During the summer nelumbiums or lotuses make long, jointed runners, the joints sometimes three feet apart, which creep along just under the surface of the soil. These runners will travel thirty or forty feet in a season and at the approach of frost turn straight down. If the soil is soft they will dive two or three feet, entirely below the frost line, where they form a tuber, which remains dormant until the warm days of spring. Nymphæas do not make this perpendicular turn but are more hardy than lotuses and if planted in ponds with mud bottoms will need no attention.

Now, when the hand of art interferes with these natural laws of self protection it becomes necessary for that same hand to devise a means of care. Where hardy lilies have been put out in shallow ponds with hard or rock bottoms and it is evident the roots will be exposed to hard freezing, a good protection of brush, straw, leaves or other convenient material should be thrown over them. The same will apply to lilies planted out in boxes and sunk in a pond. In tanks or artificial ponds when the water is to be drawn off over winter, the lily roots should be taken to the greenhouse or cellar, but if the water is to remain, any protection that will save the walls of the pond will be sufficient for the hardy lilies.

Tubs with lilies growing in them should now have the water poured off and be taken to the cellar or otherwise prevented from freezing. The soil should not be allowed to become too thirsty and if there are any tropical lilies planted in them, these should be taken to warmer quarters. All the tropical water lilies everywhere north of the extreme southern states, should be wintered in a greenhouse or warm cellar. The Zanzibars and a few other varieties refuse to "dry off" and if kept over winter will have to be bedded in tubs or tanks of water and kept in a half growing state in a greenhouse. Practically speaking, however, all the tender nymphæas have by this time formed tubers as plump and smooth as potatoes and should be packed away in moist sand and wintered at a temperature of from 50° to 60°, the same as any other tubers or bulbs, except that they should not be allowed to become so dry.

GEO. B. MOULDER.

Standard Mignonette.

The culture of mignonette in pots is by no means difficult. For standards the stronger growing varieties, such as Machet and Pyramidalis, are particularly well adapted. The seed is sown in fall, about September, in sandy loam. The seedlings are pricked off as soon as possible in thumb pots, in which they are carried over winter in a light, cool house, close to the glass. In spring the plants are repotted, using a rich sandy soil and providing good drainage. The watering during winter should be done very cautiously. All side shoots are removed and the plants tied to stakes to avoid their growing crooked. As soon as the plants have attained the desired height the top is pinched out and all flowers which appear prematurely are removed. An application of liquid cow manure twice a week is necessary to their luxuriant development.—*Moller's Deutsche Gartner-Zeitung.*

GALVESTON, TEX.—Otto Fehrlin opened a retail store in the Y. M. C. A. building.

New York.

EXCESSIVE OVERSTOCK IN FLOWER MARKET.—LOW WHOLESALE RETURNS.—RETAIL BUSINESS FAIRLY ACTIVE.—THE GREEK'S OPPORTUNITY.—FASTIDIOUS BUYERS.—AUCTION SALES.—KENTIAS BEGIN TO SELL WELL.—VARIOUS LOCAL ANNOUNCEMENTS.

The wholesale district is distracted with roses, chrysanthemums, discontent and express wagons. The big ice boxes are fairly bursting with roses, the chrysanthemums stand in long ranks on the counters and impede the passage way, the discontent clings in big chunks to the features of flower growers and commission men and the express wagons are heaped high with more stock and more agony to add to the daily accumulation. That almost his entire cut of the past three days still reposes in the refrigerator does not deter the grower from making a requisition on the wholesaler for the returns from the sale of the same and the latter is at his wit's end to so balance himself between the insurmountable conditions and his desire to keep the grower on his list. The retail florists are incapable of using ten per cent of the present daily receipts and the Greek has an independent air which is intended to impress his audience with the fact that he is master of the situation. He turns the stock over in a contemptuous manner, pushes it aside and in an offhand condescending way asks "What you want?" Whatever figure may be quoted he jumps as though stuck with a knife. If offered to him for nothing he would jump just the same and insist that a horse and wagon be thrown in.

This is the third week of the annual disturbance that experience has taught us to expect about this time. Whether it is as bad or worse than previous years is of little consequence; it is bad enough and there is no practical remedy. The plants will persist in producing more flowers than the market calls for and the growers will persist in sending them to market, so there is nothing to be done but wait as patiently as possible for the turn that will come some time. At such times it is hard lines for everything except the extra fancy selection in all varieties of flowers. A trace of mildew will dump an otherwise four-dollar-a-hundred rose into the two-dollar-a-thousand class in a fraction of a second and if a chrysanthemum cannot trot in the thirty-cent class down it goes into the two-cent mass. A few exhibition blooms, superb in every point, are coming in and these are the flowers that bring a price—large as compared with average results, but small as compared with figures on such goods two or three seasons back and surely unremunerative to the grower whose skill and time have been taxed to produce these splendid flowers. But the retailers seem very well satisfied with their fall business.

The auction rooms down town have been well patronized during the week. At Cleary's kentias realized good prices for the first time this season and other things went satisfactorily, as a rule. The sale of orchids for Sander last week disclosed a big demand for Dendrobium formosum giganteum and cattleyas brought fairly good figures. Cypripediums alone seemed to lack friends and went very slowly. Next Tuesday Cleary sells for the big Philadelphia plant growers and a big crowd will be there.

The New York Gardeners' Society met last Saturday and arranged to hold a free exhibition at 64 Madison avenue on Saturday, November 19. The schedule provides for about twenty classes.

John I. Raynor has just finished a new and capacious refrigerator. He will need every inch of it under present conditions.

Mr. Dihm, who has been manager of Siebrecht & Son s nursery at Trinidad, is in the city for a brief stay.

This week *American Gardening* was sold to J. W. Withers, who will publish it hereafter at 136 Liberty street. Leonard Barron will continue as editor.

Chicago.

MARKET CONDITIONS.—FLORISTS' CLUB ELECTS OFFICERS.—PLANS FOR THE FALL SHOW.—SPECIAL PRIZES.—SHIPPERS ATTACK EXPRESS COMPANIES.—DOINGS IN THE TRADE.

At the beginning of this week there was a decided scarcity of carnations, but in the past three days the supply has increased until it is equal to the demand. Chrysanthemums are coming in faster every day and are more plentiful than orders, so that prices are lower than last year. As a rule the blooms are very good. Roses are very plentiful and much of the stock sells for a song if, indeed, it is sold at all. Good flowers are, however, very scarce and command good prices. Violets are in very short supply.

On Friday the supply of American Beauty and other roses decreased materially and prices took a sharp advance.

At the last meeting of the Florists' Club the following officers were elected: President, Edgar Sanders; vice-president, C. W. Johnson; recording secretary, C. W. McKellar; financial secretary, John Degnan; treasurer, W. W. Barnard; executive committee John Zech, Charles Held, John Reardon, Joseph Reeve and W. L. Palinsky. The club voted to offer $50 in special premiums at the show and the executive committee was instructed to arrange for the annual banquet during show week.

Plans are progressing most satisfactorily and President W. H. Chadwick, of the Chicago Horticultural Society, is anticipating the most successful chrysanthemum show on record. Many special features are being planned, which, coupled with the admirable location, will attract an increased attendance. Superintendent W. N. Rudd has announced the selection of the following judges for the exhibition: A. Herrington, Madison, N. J., superintendent of the estate of H. McK. Twombly; John F. Cowell, Buffalo, curator of the Botanic Garden, and Emil Buettner, Park Ridge, Ill.

Two of the special prizes for the flower show which should occasion extensive competition are those of $25 each by C. W. Marx and Bassett & Washburn. The former is for the best six varieties of carnations, one dozen blooms of each, which permits every grower to compete, and the latter is for the best arranged basket, regardless of size, which affords an opportunity for every retailer to show his most artistic work.

Heavy shippers on South Water street have combined to bring action in the Superior Court to compel the express companies to pay for the stamps which the war revenue law requires upon all receipts for shipments. Their success will be a considerable saving to wholesale florists, who are now paying the tax under protest.

The Grand Rapids Florists' Club has voted to visit Chicago during the chrysanthemum show and expects to bring a goodly delegation.

Messrs. Prince and Bassett & Washburn receive their morning consignments of stock from their greenhouses upon the train which arrives on the Burlington at 7:46 and the cut is now so heavy that these two bring in nearly half a carload daily.

A new flower stand has been opened in the Mrs. Clark restaurant building at 153 Wabash avenue. R. H. Hardy is the proprietor and Tom Rogers manager.

J. Austin Shaw will soon return to 114 Wabash avenue with another stock of palms.

At the Florists' Club meeting on November 4 the topic will be "Are our Flower Shows a Benefit to the Trade?" The discussion will be opened by J. T. Anthony.

Mrs. Andrew McAdams is quite ill with pleurisy and will be taken away to recuperate as soon as she is able to travel.

Reinberg Bros. have begun taking their rose cuttings and other growers will enter upon this work next week.

The Illinois Cut Flower Company has issued a neat hanging card in two colors giving the dates of the principal chrysanthemum shows.

E. H. Hunt has been confined to his home this week.

O. P. Bassett is at West Baden, Ind.

Boston.

BUSINESS QUITE SLOW.—CHRYSANTHEMUMS CHEAP.—FINE ORCHIDS.—NIVEA IS ALL RIGHT.—CUCUMBERS AFTER CHRYSANTHEMUMS.—LOCAL ENTERPRISE.

But little change in market conditions is noted since last week's report. Chrysanthemums are increasing in number daily and a corresponding advance in quality is also made. Prices, however, tend downwards, very few flowers bringing creditable returns and it is impossible to see where any profit on fancy blooms comes in. Roses are still over-stocked; carnations also; violets are arriving in increasing quantity and lily of the valley is barely holding its own. Outside of the above quoted staples there is practically nothing offered in cut flower stock, but with chrysanthemums so cheap it costs but little to make the window showy and attractive and the retailers have no just cause for complaint.

At Horticultural Hall on October 22, J. E. Rothwell showed a finely bloomed plant of Cattleya labiata var. ardens. Cattleya labiata var. Lucibilis from Oakes Ames was greatly admired for its noble flowers which measured nine inches from tip to tip of petals. Mr. Ames also showed Cypripedium Curtisii var. viride.

Nivea carnation is now coming in satisfactory shape to Welch Bros. and gives promise of holding the same position the coming winter that it did last year as a white of the first rank.

J. D. Twombly will fill his large house with cucumbers after the chrysanthemums are cut. These give better returns than any flowers when they are successful but they are somewhat uncertain.

Horticultural Hall is a storm center this season owing to the sharp rivalry of three floral establishments conducted by enterprising young Hebrews on Bosworth street and Chapman place.

The removal of the counters from the front part of W. E. Doyle's Tremont street store is a great improvement. The modern flower store has no need for counters.

Hydrangeas in the gardens have never been so finely colored as they are this year. The flower heads are now a rich dark red although most of the foliage has fallen.

THE AMERICAN FLORIST

Subscription $1.00 a Year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements, 10 Cents a Line, Agate $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

THE premium list for the chrysanthemum exhibition of the Newport Horticultural Society can be had by addressing the secretary, J. J. Butler.

EDMUND M. WOOD has issued invitations to an exhibition of chrysanthemums in bloom at Waban Rose Conservatories, Natick, Mass., Thursday, November 3.

IN the advertisement of Clucas & Boddington, New York, published October 15, in the line "Choice Lilium Harrisii, 7-9 bulbs, $12 per case of 400 bulbs," 5-7 was intended.

C. B. KNICKMAN and bride, of New York, were registered at Meriden, Conn., last week. Another recent addition to the benedicts is Louis Schmutz, Jr., of Flatbush, so they say.

THANKS to substantial insurance, many of those growers who recently suffered from fire have been enabled to keep right on with business. It is always an advantage to be on the safe side—your place may burn to-night.

THE former business of Thos. S. Ware, at the Hale Farm Nurseries, London, Eng., has, after a series of changes, passed into the hands of J. H. Osborne, to be carried on as heretofore under the style of Thomas S. Ware, Ltd.

SANDER & Co. have named a new cypripedium seedling after Prof. Wm. Trelease, of the Shaw Gardens at St. Louis. This is a Rothschildsianum cross bearing three or four individual blooms on a stem, the flowers being of the largest size. It is said that this unique plant is coming to America.

We have received an excellent collection of colored plates of Japanese maples, so brilliant and varied in foliage, from Messrs. Suzuki & Iida, of Yokohoma, Japan, and 11 Broadway, New York. Thirty-seven varieties are represented, and two of the plates show the effect of several varieties grafted on a common stock.

WE are in receipt of the revised list of premiums offered by the Horticultural Society of Chicago for competition at the annual fall exhibition to be held November 8, 9, 10, 11 and 12. This society offers a larger amount in prizes for its chrysanthemum show than any other society in the country. A large number of interesting exhibits should be brought out by the "International Competition," in which a prize of $6 is offered for the best twelve blooms, in twelve varieties, grown in each state and territory, also British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario and Quebec, with a grand prize of $50 for the best exhibit in the international series. Copies of the prize list with full particulars, may be had on application to the assistant secretary, Room 202, at 183 Dearborn street, Chicago.

Catalogues and Cut Flower Price Lists Received.

A. G. Prince & Co., Chicago, Ill., florists' requisites, cut flowers; L. E. Archias & Bro., Carthage, Mo., bulbs, plants and seeds; Wm. Scott, Buffalo, N. Y., palms and ferns; W. K. Nelson, Augusta, Ga., roses; Richmond Stove Co., Norwich, Conn., boilers; Stecher Lithographic Co., Rochester, N. Y., lithographic plates; Japanese Tree Importing Co., Kobe, Japan, trees; Roustan Servian & Co., St. Remy-de-Provence, France, seeds; Soupert & Notting, Luxembourg (Grand-Duchy), roses; W. A. McFadden, Cincinnati, Ohio, cut flowers; Cincinnati Cut Flower Co., Cincinnati, Ohio, cut flowers; Louisville Florists' Supply & Exchange, Louisville, Ky., cut flowers.

Greenhouse Building.

Greenfield, Ind.—Jacob Forest, two houses.

Grand Rapids, Mich.—Mulick Bros., carnation house 16x100, violet house 12x100.

Westboro, Mass.—Alfred H. Brown, one commercial house.

Lowell, Mass.—Harvey B. Greene, three commercial houses.

Montpelier, Vt.—E. Jacobson, one commercial house.

Philadelphia, Pa.—Wm. Arner, one conservatory.

West Gouldsboro, Me.—S. L. Kingsley, one forcing house.

Newburyport, Mass.—J. J. Conley, one house 20x150.

Abington, Mass.—A. E. Blanchard, one house 25x100.

Rockland, Mass.—W. B. Arnold, one violet house 12x60.

COHASSETT, MASS.—The South Shore gardeners held their annual concert and ball in the town hall on the evening of October 20. Many guests from Hingham, Scituate, Weymouth and Hull were present.

Colonial Postage.

The postal authorities inform us that no changes have yet been made in the postage rates to Hawaii. It should be remembered, however, that parcels of merchandise not exceeding a combined length and girth of six feet, and eleven pounds in weight, may be mailed to this island at the rate of twelve cents per pound, also to the Bahamas, Barbados, Columbia, Costa Rica, Danish West Indies, British Honduras, Jamaica, Leeward Islands, Mexico, Salvador, British Guiana, Windward Island, Newfoundland and the Republic of Honduras. Rates to Cuba and the Philippines remain the same as heretofore, except in the case of soldiers and sailors in the United States service, where domestic rates obtain.

A Friend to Horticulture.

Although the columns of the AMERICAN FLORIST are not intended for political literature, yet it seems to me that it might not be out of place to mention that Senator Wm. D. Daly, of New Jersey, who was mainly instrumental in stopping the passage of the Skirm Plant Inspection bill in its original form, and who subsequently took the fight upon his shoulders on behalf of the amendment exempting florists' stock, is now a candidate in Hudson county for Congress, and the florists of that county might have a grateful rememberance of his efforts in their behalf. There is little doubt that a national bill will be offered and we want all the influence we can get in Congress to fight it, therefore Senator Daly could be of service to the florists if elected to Congress. Yours very truly,

PATRICK O'MARA,
Chairman Legislative Com. S. A. F.

Coming Exhibitions.

[*Secretaries are requested to supply any omissions from this list.*]

BOSTON, Nov. 8-11. Chrysanthemum show, Massachusetts Hort. Society. Robert Manning, Sec'y, Horticultural Hall, Tremont St.

PROBLEMS CONFRONTING QUAKER CITY DEALERS.—A DEPARTMENT STORE PLAN.—WANAMAKER MAY SELL FLOWERS.—CHRYSANTHEMUM COMMENT.—JUBILEE MATTERS.

Flowers of all kinds are most plentiful and thankful should be the man who has large orders, for he can get all the stock he wants at most reasonable figures. The general opinion of the growers is that flowers are not bringing near the prices they did at this time last year, the general average being fully twenty-five per cent lower. This is a very serious decline and no one seems to know how to account for it as but little additional glass has been added since last season.

Robt. Scott & Son are sending in some very fine Kaiserins and Carnots. They seem to know how to handle grafted stock and cannot understand how the average grower can fail with such plants. They are handling some fine chrysanthemums and were the first in with Mrs.

Robinson. Chrysanthemums are now quite plentiful; in fact some varieties are hard to sell even at low figures. The varieties in since last week are Mrs. Robinson, Ada Spaulding, Mrs. Whilldin and Florence Harris, W. K. Harris' new yellow. It is a very fine incurved, the outer petals being rather stiff and straight with elkshorn ends. It is one of the largest and best of the early yellows.

Carnations are very plentiful and some quite fair stock is to be seen. Choice Flora Hills and Victors bring $1.50, but the general average must range away below $1 judging from the quantities that are left for the street gentry. The quantities of surplus stock, that not handled by regular stores or left over after their calls are filled, seems to be constantly increasing. Quite a number of the Greek fraternity, cousins of the New York and Brooklyn tribe, are becoming familiar and their brass and silver plated showcases kept constantly filled with good stock are located at prominent places in the shopping districts; they appear to handle a great many flowers and do things in a business like way. Their success has set the boys to thinking and some of the smaller dealers, men who conduct their business with the help of only one man or boy, talk of clubbing or going in together in renting a good sized store on Chestnut street and managing it on the department store plan, each one having a division of the business to attend to. They think that by running such a store on the popular price order they could build up a fine business in all branches of the trade and meet the department store competition, which threatens to become serious.

It is rumored, and we have it on good authority, that the opening of a complete floral department is under serious consideration by John Wanamaker. If such is established it is to be thorough in every way. Competent help will be employed and nothing left undone to make it first-class. Their efforts in this direction have heretofore been of a spasmodic nature, on the order of plant bargain sales, and loose cut flowers have been sold in the spring of the year. If this department is established the effect on the business will be watched with interest.

E. A. Seidewitz and Wm. Paul Binder, of Baltimore, were in town last week.

The great peace jubilee the past week, while giving a few of the trade some good orders, did not create any general demand for flowers and was a great disappointment to many in this respect. A violent rain storm postponing the first day's parade and drenching the miles and miles of reviewing stands on Broad street placed a damper on the affair and took the color out of the cheap bunting decorations so that they presented a very sorry appearance. Graham had some extensive plant decorations and Battles had the flowers for the tables at a banquet given to the president. K.

Pittsburg.

BUSINESS IMPROVES.— PRICES.— RASPBERRIES IN LATE OCTOBER.—JOTTINGS.

Business this week shows a slight improvement. Wholesale prices are at present, for carnations $1 to $2 per 100, roses $2 to $6 per 100, Beauties 10 cents to 25 cents each, chrysanthemums, $3 to $8 per 100, selected, $1.50 to $2 per dozen.

A novelty was on exhibition the first of the week at the stand of Gustave Ludwig, consisting of branches of a new raspberry with fine ripe red fruit. They were grown by Peter Decker, on his place at Perrysville. He sold to the leading hotels fifty quarts of the berries at 35 cents and will have in market about as many more the latter part of this week. Mr. Ludwig reports business fair. On Thursday he had a very extensive decoration at the Monongahela House on the occasion of the Presbyterian reunion. At the banquet there were thirty-four tables at which chrysanthemums were the principal flower used.

Elliott & Ulam report business improving somewhat since conclave week.

The value of good surroundings was never better shown than in the appearance of the new stand of E. C. Ludwig.

W. F. Kasting, of Buffalo, was a recent visitor. REGIA.

Grand Rapids.

CLUB RESUMES ITS SEASON WITH AN INTERESTING DISCUSSION.—MAY IMPORT GLASS.—PLAN A TRIP TO CHICAGO.—CROP CONDITIONS.

The Florists' Club held its first meeting of the fall season on October 18 and it proved to be a very interesting session. The price of glass was the principal subject under discussion, none of the members being able to comprehend a logical reason for the doubling of the price of this very necessary article within the past year. Several think that glass can be imported from Belgium at a saving. Geo. F. Crabb, of Crabb & Hunter, was instructed to investigate the feasibility of a club importation.

The club voted to attend the Chicago chrysanthemum show in a body and Henry Smith, James Schols and Eli Cross were designated to make the arrangements. A large number will doubtless participate in the excursion.

It was the consensus of opinion that the carnation crop will be the best on record here and that chrysanthemums are both good and plentiful. The crop will come on rapidly now.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

R. H. SHUMWAY, of Rockford, Ill., is recovering from a painful dislocated ankle.

The New York Market Gardeners' Association has been incorporated. Capital $10,000; directors A. C. Nellis and two others.

MRS. J. E. NORTHRUP died October 22 at Minneapolis, aged 40 years. The funeral was held October 24. Four children survive. Mr. Northrup has the sincere sympathy of his many friends in the trade.

CHICAGO VISITORS: B. F. Brown, of the Brown Bag-Filling Machine Co., Fitchburg, Mass., who proceeded to La Crosse, Wis., October 22, whence he will return shortly to install one of his machines with S. F. Leonard, 143 Randolph street; Fred. H. Hunter, with the Cox Seed Co., San Francisco, Cal.; Eugene Schaettel, of Vilmorin-Andrieux & Co., Paris, France; Edwin M. Haven, of South Haven, Mich.; Alfred J. Brown, Grand Rapids; and H. M. Claire.

Government Seed Contract.

The *Evening Times* (Washington, D. C.) of Saturday, October 22, says:

The Secretary of Agriculture has let contracts for the putting up and packing of seeds to be distributed by the department, as has been done for many years past. Heretofore the department has been putting up the seeds, but congress recently provided that the work should be done by contract, and appropriations have since been made to meet the expense of the work. The appropriation recently made by congress amounted to $130,000. The contract is with A. C Nellis, of New York, who came to Washington and furnished bond yesterday. According to the requirements of the law the seed must be put up in this city, and Nellis has leased a building at the corner of Tenth and G streets northwest for that purpose.

The Abuse of Blue Lobelia.

How often is the effect of what would otherwise be a brilliant and tasteful garden entirely spoiled by one plant, and that a very pretty one in itself. A few years ago men of taste and perception protested loudly against the over use and wrong use of the Pyrethrum Golden Feather, which, save in springtime, is really a plant to be avoided rather than planted for ornament. Thanks, no doubt, to folks' eyes being opened, one sees comparatively little of this plant now, so I need say no more about it to-day; but the blue lobelia, the plant to which I now prefer the grievous charge of spoiling many a pretty garden, is so charming in itself, that its constant misuse demands a strong protest. It is not too much to affirm positively that in the hundreds of gardens, great and small, that I have seen lately, blue lobelia is used as an edging to three-quarters of the beds that are filled with summer bedding plants, and yet there is never a broad mass of rich blue to catch the eye and fill it with a sense of repose. Take even the London parks, where sometimes one sees what wonders really good taste can work, and yet, how often will you see a bed edged with blue lobelia, which not only "swears" generally with the flowers it surrounds, but invariably disturbs the eye where it touches the green grass. Modern milliners no doubt have been busily trying to persuade us that grass-green and a hard blue are fashionable as a combination, but they cannot convince us it is good taste and a thing to be admired. What a pity then it should be so constantly reproduced in our gardens. A really pale shade of blue is beautiful on grass, as the spring forget-me-nots show us, but the fully rich blue of lobelia next green grass, next red, or next yellow is atrocious, and yet how rarely it is otherwise used. Do let us stir up those who have eyes to see and tongues to talk, to protest against this misuse of blue lobelia, which is really at the root of the dislike to summer bedding, which is growing day by day on account of the carelessness and bad taste so often displayed by those who should know better. Nothing is more charming than a broad mass of blue when properly treated, but full rich blue absorbs so much light that it requires plenty of white, or still better, cream color to set it off. There are now plenty of dwarf white-flowered or creamy-foliaged plants suitable for edging blue lobelia, why not use them for an edging and put the blue inside? A rich orange or a tawny-brown flower, such as gazania or brown calceolaria, make most effective contrasts near blue when the latter is edged with a creamy-toned plant. Echeverias with their bright flowers left on are particularly suitable for edging lobelia; white and blue in mixture, or white grouped or dotted on blue is always admissible. What a relief to the eye would be a good mass of blue and white as a central object in small gardens, now vulgarized by a constant repetition of reds, yellows and blues! And what a satisfaction it would be if any one would just plant half his garden in the way I have indicated, and the other half in the usual blue-edged uniform. I feel sure the difference in beauty and brilliancy would be so great that another year I should have converted him from the error of his ways.—*E. H. W., in the Gardeners' Chronicle.*

ATTENTION, SECRETARIES!

OF CHRYSANTHEMUM CLUBS AND EXHIBITIONS.

The season of Chrysanthemum Exhibitions being close at hand, we have, as in seasons past, placed ourselves in position to supply your Club with our beautiful CHRYSANTHEMUM LITHOGRAPHS. We have just issued, at a very great expense, two new lithographs (a full sheet and a half sheet), which we believe are the handsomest yet offered. They are entirely new in design, and, being highly illuminated are admirably fitted for advertising your coming exhibition.

We respectfully solicit your patronage, and will be pleased to send samples and prices on application. ☞ ORDERS WILL BE PROMPTLY FILLED.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

COSHOCTON, O.—J. W. Almack has purchased from the assignee all the nursery stock of J. R. Johnson and will continue the business.

CAMDEN, N. J.—Cooper Park is undergoing a great improvement. Cement walks are being put in and hundreds of trees and shrubs are being planted.

ROCHESTER, N. Y.—In opening a gravel pit on its property the Green Nursery Company unearthed ten complete skeletons, presumably those of Indians.

MANCHESTER, PA.—E. B. Good has found in his nursery two burs of the Paragon chestnut each containing seven large chestnuts where ordinarily there are but three.

DODGEVILLE, WIS.—Thomas Elwood, proprietor of the Elwood Nurseries, has been sending some splendid grapes to market and reports this year's crop the best on record.

Late-flowering Tender Shrubs.

For sub-tropical bedding, isolated specimens on lawns, or for growing in tubs, there are quite a number of very ornamental tender shrubs which, while common in cultivation, that is, they are to be found in most collections of plants, yet they are not generally used for this purpose. Shortly after mid-summer the hardy shrubs, with very few exceptions, make, unless it be to the connoisseur, a very uninteresting display. At that time we usually see them with even the foliage past its best. Some of the undernoted plants, dotted here and there among the shrubs, will work wonders in imparting to an otherwise uninteresting border quite a gay appearance for several months. The majority of the plants herein recommended can be wintered over with little more care than is accorded such plants as the crape myrtle (Lagerstrœmia Indica) in the northern states.

Among the many species and varieties of hibiscus there are a number which are well adapted to this purpose. The Chinese species, H. rosa-Sinensis, has numerous forms, some single, others very double and very large, the colors ranging from red to pink and from dark buff to bright yellow. Their culture is very simple, allowing them to make their growth out of doors during the hot months and keeping them over in a cool house until the time arrives to place them in their summer quarters, or if found advisable, they can be given warmer winter quarters and during the early spring make growth which if carefully hardened off will flower much earlier in the season. When grown in tubs they do not require shifting often unless it be for the purpose of increasing the size of the plants; a top-dressing of rich soil annually and an occasional application of weak liquid manure during the period of growth will keep them in good flowering condition in the same receptacles for several years. Some of the best kinds are Brilliantissimum and Grandiflora, single reds; rubra fl. pl., double red; flava plena, double yellow; Callerii, buff. H. schizopetalus and H. Denisonii are evidently species; the former has long pendulous flowers with beautifully fringed petals, the latter a bright single pink bloom.

The propagation of these plants ought to be undertaken in the fall, selecting the ends of the ripe shoots. Those which are not over-robust are to be preferred as the wood is firmer and will emit roots with greater certainty. Put in three-inch pots when rooted and keep in an intermediate house till spring when they should get a good-sized shift, growing them to a single shoot till they are about eighteen inches high, when they can be stopped and allowed to branch. During their growth in this state the best place for them is out in the full sun with the pots plunged to the rims.

Hibiscus cisplatanus is a species seldom met with in good condition, owing to its being grown like the others, with cramped root room; it is best planted out in good rich soil and watered frequently as it is not an ever bloomer. In this latitude it consumes the greater part of the summer making a very profuse growth. During the first part of September it begins to show the flower buds, very commonly more than twelve in a corymb at the ends of the even, moderately sized branches. These buds as a rule expand one at a time, seldom more than two at a time, on each branch and the display they make while in bloom is a sight equalled by but few plants. The flowers are from four to five inches in diameter, light pink shaded dark at the margins with a dark spot at the base of each petal. The plants have the merit of setting seeds very freely, which, if sown as soon as ripe, will provide good sized plants by planting out time the following spring. It forms a very symmetrical bush three feet high and about four feet through in a single season. The accompanying illustration shows a two-year-old plant in bloom growing among other sub-tropical plants in the botanical garden here.

In the same family and closely allied to the hibiscus we have the old Malvaviscus coccineus with large soft bright green leaves and intense scarlet flowers very freely produced. Like the last named hibiscus it takes the greater part of the summer in making flowering growth, but the autumnal display of bloom is sufficient to make the plant a general favorite. This species needs a slightly warmer temperature in which to winter it over; if the plants are carefully lifted from the ground on the approach of frost they will continue in bloom the greater part of winter in a warm conservatory.

Tecoma Smithii is desirable both on account of its foliage and flowers. The leaves are pinnate, the flowers bright scarlet and larger than in the well known T. Capensis, which is said to be one of its parents, the plant under consideration being one of antipodal origin. Large sized plants give the greatest satisfaction as the flowers are but sparsely produced on one-year-old bushes. C. L. R.

Washington, D. C

HIBISCUS CISPLATANUS IN THE BOTANIC GARDEN, WASHINGTON, D. C.

Cannas in 1898.

This season has been very favorable to the growth of cannas, and to bring forth their salient points as bedders; and this year has proved them to surpass all other plants for decorative purposes, leaving geraniums and other plants far in the rear whenever a display is desired. We regret to say that they seemed rather neglected last spring and were in much less demand than last year, but in fact every other class of plants went slowly in the first turmoil of the war.

Our stock cannas are planted out in blocks, each variety by itself, giving at a glance the opportunity to show their quality as bedders. They are grown on light soil with only a dressing of superphosphate, and they made a short, compact growth, developing more and better flowers than some planted nearby in well-manured soil. Of the several new varieties sent for trial we noted the following:

Parthenope, salmon; Wendlandii, an improved Italia; Suevia, yellow; Asia; America, red and yellow, large; La France, deep salmon, bronze foliage; Heinrich Seidel, yellow, spotted red; Edouard Andre, red, bronze foliage.

The above are the best of the Italian varieties, and while having larger individual flowers, are not for general purposes of bedding to be compared with the Crozy class, as follows:

Comtesse de Sartiges, light yellow, spotted; Fuerst Bismarck, deep red; Francois Gos, apricot red; Menelek, red, large flower, very good; Baronne Thenard, light salmon; Hohenlohe, yellow, dwarf; Madagascar, yellow and red; Goliath, crimson, very large; Paul Meylan, apricot red.

The following are mostly of American origin: Robert Christie red, very good; Fairy Queen, improved Queen Charlotte; Sam. Trelease, scarlet, free and good; J. D. Eisele, deep red; Annie Laurie, pink, very good; Maiden Blush, light blush; Duchess of Marlboro, pink, nice shade; Gloriosa, a dwarf Queen Charlotte, not very free;

Duke of Marlboro, the darkest crimson; Philadelphia, dark red, good; Baltimore, red; Blazing Torch, scarlet; Martha Washington, pink, large.

Most of these, if new and good, are hardly equal for general purposes to some of the older varieties, and if asked for a selection, we would recommend the following:

Pres. Cleveland, bright red, as a bedder not equaled by any of the foreign or native varieties; Florence Vaughan, yellow spotted; Mme. Crozy, scarlet; Charles Henderson, deep red; Paul Marquant, salmon; Mlle. Berat, pink; Annie Laurie, pink, large truss; Duke of Marlboro, dark crimson, dwarf; Sunbeam, yellow; Yellow Crozy; Fairy Queen, improved Queen Charlotte, dwarf; Leonard Vaughan, scarlet, bronze foliage.

Possibly some of the new ones may develop better points another year.

DENYS ZIRNGIEBEL.

Storing Cannas Through Winter.

ED. AM. FLORIST:—Please give details of the best method of treating and storing cannas after they have been taken up.

CANNA.

Replying to the above I will say: Where greenhouse facilities may be had place the canna clumps just as they are under the stages and keep them dry. Give a temperature of from 50° to 65°. About March 10 the tubers can be divided, potted and placed on a bench where plenty of light may be had and the house kept at 70° or 75°. When in a growing state give plenty of water. Where greenhouse facilities cannot be had the tubers should be stored in the basement or attic, kept free from frost and not warmer than 65°. If placed in damp, clean sand, under the above conditions, the tubers will winter very well. An occasional look at the tubers is necessary, inasmuch as they sometimes rot. The rotted ones should immediately be taken out and the remaining tubers set over.

EDWIN A. KANST.

ROCKFORD, ILL.—Julius Kraft leaves next week for Henry A. Dreer's, at Philadelphia, and will spend ten days in the east.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

FLATBUSH, N. Y.—A score of 946 with a five-man team was recorded at the last session of the club. Eugene Dailledouze led the list with a score of 208 in one game. There were three "pots," the winners being Eugene Dailledouze, Louis Schmutz and D. Y. Mellis. Some of the Flatbush members are as good pool players as they are bowlers.

Fair Bowling at St. Louis.

Following is the score rolled on Monday evening, October 24:

Name.	1st	2d	3d	4th	5th	Av
J. J. Beneke	129	151	133	169	157	148
D. Finlayson	150	123	148	173	141	146
C. A. Kuehn	140	129	170	142	145	145
F. J. Fillmore	151	133	139	133	115	134
Emil Schray	118	154	126	126	144	133
R. F. Tesson	80	102	173			119

Chicago Bowlers Elect Officers.

October 21 the Florists' Bowling Club elected Phil. J. Hauswirth, president; C. W. McKellar, vice-president; John Degnan, secretary and treasurer. After the meeting two games were rolled with the following score:

Name.	1st	2nd	Av
Walter Kreitling	181	143	162
P. J. Hauswirth	129	177	153
G. L. Grant	130	160	145
John Degnan	124	127	125
C. W. McKellar	98	145	121
A. Lange	90	148	119
J. C. Vaughan	97	120	108
E. Enders	96		96
Alex Henderson	73	108	90
S. Snedeker	83	75	79

New Yorkers Organize for Bowling.

Sixteen bowling enthusiasts responded to the call of the New York Florists' Club to organize a bowling section on Monday evening, October 24, several of the number being members who had not been seen at a club meeting for many months. A. S. Burns presided and appointed Messrs. Weathered, Lang and Leuly a committee to frame by-laws, etc. Election of officers will take place on Monday, November 14, and in the meantime Alex. Wallace is secretary and Alex. Burns custodian of the funds. Bowling will be in order each Monday evening until then. After the business session three games were played and scores varying from 35 to 179 were made. Adjournment came at midnight and all were happy over the first meeting.

Sports at Philadelphia.

The Gun Club met at the rooms Tuesday evening last and discussed shooting matters. A new club house is to be built on the grounds at Wissanoming in the near future. That the meeting of the American Carnation Society here next February is not to be all work is evidenced by a programme made out by the Gun Club, which expects to have a shooting tournament at that time. Nor do we believe the bowlers will be behind; visitors handy with the wooden spheres will be sure to have a chance to show their skill, either singly or in teams and there will probably be some prizes to carry away as mementoes of the occasion. George Watson is getting to be a regular bowling fiend; he scarcely gives up any tickets, managing to get on the winning side by reason of his good luck and skill.

The Gun Club's shoot for the president's medal on the Wissanoming grounds, October 25, was a spirited affair and some excellent scores were made as will be seen by the following record. Each contestant was allowed fifty targets.

C. D. Ball	37	W. H. Westcott	22
W. K. Harris	41	J. Engle	34
John Burton	36	W. C. Smith	41
George Anderson	44	A. B. Cartledge	44

The positions at the finish, when the handicaps had been added, was Smith, first; Ball, second; Cartledge, third; Anderson, fourth. Westcott and Harris tied for fifth place and Engle last.

A fifteen target team match followed in which some good shooting was done, the team captained by Smith coming out winners by five.

Anderson	15	Smith	15
Cartledge	14	Burton	15
Harris	8	Engle	13
Ball	10	Westcott	9
	47		52

K.

A Short Sermon for Quakers.

Skilled physicians tell us that bowling is the best exercise that a man can take. Men have died for want of exercise many a time, while a judicious hour or two on the alleys regularly would have prolonged life, saved doctor's bills and secured the countless blessings of high health.

Take heed, therefore, ye nabobs of the retail shop and the rose farm, and listen, thrice precious gouty gentlemen of the seed store and the nursery; save yourselves while there is yet time, and join the jocund crowd who make the welkin ring of an evening in Horticultural Hall. Good judges say we have the best built, truest, most convenient alleys of any club in Philadelphia and the attendants are on duty both day and evening, so it is no fault of the Florists' Club of Philadelphia if its members are not well exercised and in sound health.

We had Wm. Paul Binder and E. A. Seidewitz, both of Baltimore, with us recently. Mr. Binder is keen on the game and bemoans the want of enterprise which prevents the Baltimore club having these elegant accommodations in the way of bowling alleys, shuffle boards, pool and billiard tables; but he need not worry, for even the Buffalonians cannot yet boast of their own alleys although they are the "really great people" under the footstool at the present time. Friend Leuly, who was a visitor in Philadelphia recently says that New York has only been able thus far to raise $100 for the bowlers, which is not what one would expect from a city so near to Philadelphia. Four figures would be more like the thing. I think it will come, however, because eventually the New York club will have a house of its own with all the "comforts," similar to the people who live on the banks of the Delaware. Even progressive Boston is away behind on this question of providing exercise and recreation. However, I feel that 1899 is going to be a great year for us—there is already apparent a great awakening which will crystalize into action in the near future.

When John Westcott arose in the meeting at Omaha and spoke those telling words in favor of recreation, in his earnest, enthusiastic, convincing way, he set many to thinking who had never thought on the subject before. His words carried conviction, not only because of his high standing in the trade but also because of the absolute sincerity of the man. He has often talked in the same way but never with such effect; never before were circumstances so favorable for creating a profound impression. Conventions are like schools. Their aim is grand and desirable, but first get your pupils. If there are no sports there will be very few pupils, at least of the kind that are worth having. The ablest minds in the business have said so and Omaha was a striking example of the truth of that position. It was fortunate there was a John Westcott present to speak the right word at the right moment.

Here in Philadelphia these many years there has been a large percentage of the trade who were keen sportsmen, either in bowling, shooting, shuffleboard or some other line and it is pleasing to note that the year 1898 shows no falling off. Last week a few more new faces were seen in the club rooms; some were old timers not seen for ages, others entirely new recruits, and all found a cheery welcome. This being jubilee week, difficulty is encountered in getting across Broad street; besides, many are very busy, so the rooms have not been so lively. Philadelphia is "a sight" just now. The walls are fortified and ramparted for the jubilee. There are little fortresses, bastions, ravelins, gabions, platforms, peristyles and what not in all directions and for the nonce all the world and his wife are daft with enthusiasm because the war is over. So if we Philadelphians are unduly enthusiastic this week remember the occasion and our good intentions.

G. C. W.

Mould of the Paeonia.

During the last week of May a most remarkable development of Botrytis vulgaris Fr., was met with upon garden pæonies. At that time the plants were in an apparently vigorous condition; they were pushing their flower stalks and the buds beginning to show pink color. While the outer leaves of the clumps were in a healthy condition, all the inner ones were already brown and hung lifeless upon the stems, overrun with a surprising growth of botrytis.

In the present instance the fungus is playing no saprophytic role, like a toad stool upon a dead log, but has flourished as a parasite upon the rank spring herbage of the host and at the time was spreading to and upon the outermost leaves of the clusters. It seems to be a clear case of an unusual outbreak of a comparatively harmless pæonia fungus destroying all the foliage that was not directly in sight, that is, in the sunshine.

The conditions favoring this fungus are the many rainy days that preceded the time of the inspection, there having been eighteen out of twenty-eight upon which showers had fallen, and the excessive cloudy weather, the month up to that time having a record of twenty dark days.

The writer has had no better illustration of the influence of rainfall and consequent absence of sunshine upon fungus growth, for in this case only the outermost leaves exposed to the air and sunshine were healthful, while all within the umbrella-like cover that these made were dead or dying and literally covered with a dense growth of mould, and the multitudes of spores. In short, the young foliage that otherwise might have been normal was destroyed by the Botrytis vulgaris that had been highly favored by continued moisture, lack of sunshine and the confinement of the spore laden air in the interior of the clumps.

BYRON D. HALSTED.

OF INTEREST TO YOU

GIANT PAPER WHITE NARCISSUS.

There has been a slump lately in the Romans and Paper Whites that are left over from the regular fall trade, and we want to get rid of ours just as badly as anybody, BUT, there is just this difference, the bulbs we have left are of regular full size, clean, smooth skins, and not the scraped-up cull lots left over on the other side and "consigned" here at any old price. Yet, we will sell at low rates NOW to clear them out.

Elmira, N. Y.

Owing to the lateness of the blooming season the chrysanthemum exhibition of the Elmira Horticultural Society has been postponed to November 15 and 16. The society presents the following list of prizes, competition open to all, and the exhibits judged according to rules of the Chrysanthemum Society of America:

Eclipse Bicycle Company's '98 wheel, for best new chrysanthemum seedling or sport, winner to be named Eclipse; Fassett prize, for best collection twelve varieties; Fassett prize, for best collection six varieties; Slee prize, for best six pink blooms; Slee prize, for best six yellow blooms; Stancliff prize, for best six white; Stancliff prize, for best six bronze; Stanchfield prize, for best vase cut blooms; Hoffman prize, for best single bloom, '97 variety.

The members of the society are working hard to make this first show a success. H.

KINGSTON, ONT.—O. G. Johnson showed the first chrysanthemums of the season October 14. They were well grown specimens.

CROMWELL, CONN.—A. N. Pierson, the largest grower here, has 200,000 feet of glass and a magnificent display of chrysanthemums is on now.

GREENFIELD, MASS.—E. B. Beals proposes, with the help of school children and amateurs, to give a chrysanthemum show about the middle of November.

KANSAS CITY, MO.—Geo. M. Kellogg, Pleasant Hill, Mo., is opening a fine retail store here. H. J. Millatt, formerly in business at Buffalo, will be in charge.

POUGHKEEPSIE, N. Y.—The fourth annual flower show of the Duchess County Horticultural Society will be held this year in the Masonic Temple on November 2, 3 and 4. Entries must be made on or before October 26 on account of the limited space available.

Newport, R. I.

The Newport Horticultural Society's chrysanthemum show will be held at Masonic Hall on November 15, 16 and 17. The society previously set dates to hold this show on November 2, 3, and 4, and were disappointed in not doing so, which was owing to the fact of the chrysanthemums not blooming here as early as usual. It is expected that a finer display of cut blooms will be made than at any previous exhibition. There will be a falling off, it is thought, in the plant exhibit in comparison to what has been shown here in previous years although sufficient plants will be exhibited to make this part in the exhibition interesting. The present outlook is that it will be a very creditable show.

The society's past experience in regard to the public's support is a sad one as the exhibitions have always given poor financial returns. With this fact in mind the committee of arrangements has this year added some side attractions. It is understood that there will be dancing each evening from 9 o'clock until midnight; the charge for each person, including admission to the show and dancing, will be 25 cents. The committee also intends erecting a flower booth to be presided over by several young ladies who are expected to sell such flowers and plants as members may donate and it is intended also to have a shooting gallery and refreshment stand, which it is thought will add much to the general receipts. It will be necessary to receive considerable money to meet expenses as the money prizes offered this year are larger than heretofore, but with the members working with a will, as they now are, their efforts should result in good returns financially and give to the public a fine display of flowers and plants. J. J. B.

ROCHELLE, ILL.—A very successful chrysanthemum show is in progress here, the proceeds of which will go to the relief fund of Company M, Third Illinois Infantry, now in Porto Rico.

Germantown, - - Philadelphia, Pa.

There are buyers for all kinds of stock advertised in the American Florist.

Cincinnati.

BUSINESS SHOWS IMPROVEMENT.—BEAUTIES AND CHRYSANTHEMUMS.—BINDER'S SEEDLING.—VISITORS.

With cooler weather business has brightened up somewhat, but trade as a whole can hardly be called active. Our wholesale houses report shipping orders quite numerous, especially the latter part of last week. The Cincinnati Cut Flower Company shipped over 500 Beauties daily and it seems as though they have a "cinch" on them. Chrysanthemums are with us in all their glory, but judging from present indications they are not sought after as in former years; $1.50 per dozen for choice Robinson is all that can be realized at retail, with few exceptions. Bergmann sold slowly at the flower market and pot plants are not in it so far.

Paul Binder, of Rider, Md., had a seedling chrysanthemum before the C. S. A. committee here on October 22. The flower is a bright yellow, medium size, foliage well up to the bloom.

Fred. C. Koltoff was thrown from his buggy October 18 by his runaway horse and received a severe cut over his left eye.

Walter Mott, representing H. A. Dreer; J. B. Heiss, of Dayton, Ohio, and S. S. Skidelsky, representing Robt. Craig & Son, Philadelphia, were recent callers. They report wholesale trade in decorative plants as satisfactory.

H. SCHWARZ.

Mt. Kisco, N. Y.

The fourth annual show of the Bedford Flower Club will be held at the Casino on November 10, 11 and 12, under the management of the Westchester Horticultural Society. Four silver cups and other valuable prizes will be competed for. Howard F. Bailey offers a special premium, value $75, for the best twenty-five blooms of chrysanthemums, not less than eight varieties. Schedules may be obtained from the secretary, H. A. Spavins.

Cyclamen Plants!

BUSINESS IMPROVEMENT.—ROSES AND CARNATIONS PLENTIFUL AND CHEAP.—THE CLUB DISCUSSES FAKIRS.—NOTES.

Business continues to show some improvement and there seems to be considerable promise from the future. At present roses and carnations are in somewhat over supply. Roses in fair quality have been sold as low as $15 per thousand. Chrysanthemums are increasing regularly in supply, although as yet there has been no overstock. Prices vary considerably, running from 75 cents to $1.50 per dozen. The latter rate buys a very good article indeed. Bergmann is nearly all cut or has been susperseded by later sorts such as Mrs. Henry Robinson.

At the last meeting of the Florists' Club some discussion was occasioned by the practice of some growers of selling stock to fakirs at the same or lower rates than the legitimate dealer can obtain. It seems to be the same old story that is familiar to the florists of all the larger cities—a practice that must react to the disadvantage of the growers themselves as well as working a great injustice to the regular dealer. The general opinion seemed to be that the best way to discourage the custom is for each retailer to refuse to buy of wholesalers guilty of the practice. The entire matter, however, was laid over for further consideration at the next meeting, when possibly some action may be taken.

Cleveland will have no chrysanthemum show this fall.

W. J. Pentecost, of S. N. and W. J. Pentecost, and Miss Saywell were married October 26. A.

Nashville, Tenn.

The cool weather of the past two weeks has made a wonderful improvement in the quality of roses. The color of Bridesmaids is especially improved. Brides, too, are much larger. Beauties are abundant but sell very slowly even at from $2 to $3 per dozen; other roses are retailing at $1 per dozen. Violets are improving, but only the single varieties are yet in this market. Chrysanthemums are coming in sufficiently to supply all demands. Pot grown varieties may improve as the season advances, but are not now up to standard. Carnations have also put on new vigor with the cooler weather, but growers say that another season they will not plant so early, as the long hot season gives them a setback not easily recovered from. Trade continues to improve and is fully fifty per cent better than it was at this time last year. M. C. DORRIS.

Toronto.

TRADE CONDITIONS TERSELY TOLD.—PROSPERITY OF THE GARDENERS' AND FLORISTS' ASSOCIATION.—MEDAL FOR MANTONS.—NOTES.

The weather is mild and wet, which makes business quiet. Chrysanthemums, roses and violets of excellent quality are coming in freely.

The Toronto Gardeners' and Florists' Association at its last meeting added twelve new members to the list and elected A. H. Ewing an honorary member. A handsome special medal was presented by Captain McMaster to Manton Bros. for the best table of decorative plants shown at the last industrial exhibition. The members expressed their sympathy with President Alonzo Watkins, whose daughter Clara, after suffering for some time with consumption, had that day passed away.

The executive committee of the Toronto Horticultural Society held an important meeting October 25, at which the final arrangements for the school childrens' chrysanthemum exhibit to be held in conjunction with the Gardeners' and Florists' show on November 12, were discussed and furthered. S. P.

ELKHART, IND.—Mrs. M. J. Bishop has sold her greenhouses to Enos Myers and William Currier, and will sell cut flowers and decorative plants at wholesale from a down town office. Myers & Currier are removing the houses to a farm owned by the former.

84 Randolph St., CHICAGO.

Worcester, Mass.

Chrysanthemums are plentiful now, in white, pink and yellow. Bergmann still hangs on and we are getting some good Robinson; Ivory will be ready to cut very soon. In pink, Glory of Pacific takes the lead and some good sized blooms of Rose Queen are being sent in, but are rather washy in color. Marion Henderson and Gold Lode are the only yellow ones in the market at this time.

Roses and carnations are in good supply and the quality is still improving. The same can be said of violets, both single and double.

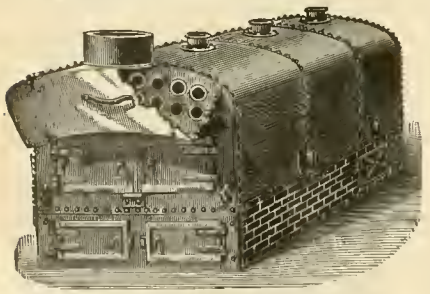
The last exhibition of the Horticultural Society, October 20, brought out a good showing of plants and blooms. Everyone made an extra effort to have the last regular show a good one, and were successful.

Trade fell off slightly last week owing to the inclemency of the weather.

A. H. L.

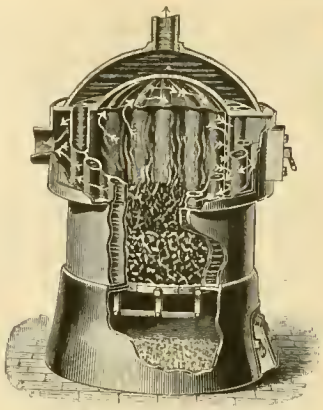
Lockland, O.

W. K. Partridge, formerly in the employ of J. M. McCullough's Sons, of Cincinnati, has embarked in the florists' business, having succeeded F. Pentland, one of the oldest florists in this section. With a range of six well built and splendidly equipped houses as well as with a thorough knowledge of the business, Mr. Partridge's venture promises to be of the most successful sort. Cut flowers and bedding stock are his specialties and his stock appears to be in the best of condition. While catering to the retail trade, it is Mr. Partridge's intention to keep also in touch with the wholesale market.



HOMO.

EUCLID, OHIO.—E. H. Cushman has been made chairman of the committee which will arrange for the meeting here in December of the State Horticultural Society.



BROCKTON, MASS.—Arrangements have been perfected for the forthcoming exhibition of the Gardeners' and Florists' Club. B. Ellis Eaton has been appointed superintendent and R. M. Grey, gardener at the Oakes Ames estate, will serve as one of the judges.

SO. WEYMOUTH, MASS.—The old established Weymouth Fair, which opened September 29 was successful as usual. Entries in the flower and plant department were numerous and the quality of the exhibits very good. W. J. Stewart acted as judge in this department.

FLOWERS FRESH FOR FALL FETE.—TRADE STARTS IN BRISKLY—STOCK IN FINE SHAPE.—NO SHOW THIS YEAR.

The first killing frost of the season came the night of October 17. We were glad to have cold weather hold off until after the Mountain and Plain Festival. The first day's procession included decorated carriages; one in grape vines with the fruit took first prize. The swell affair of the entire carnival was the ball of the "Slaves of the silver serpent," which occurred the second evening and created a lively demand for flowers.

Fall trade has opened well and the stores show good Beauties, fair tea roses and now the chrysanthemums are in good shape. Mrs. E. G. Hill, The Queen and Bonnaffon are among the best shown so far in quantity. We shall have no show this fall. Show plants cost too much to pay except in larger cities. G.

Erie, Pa.

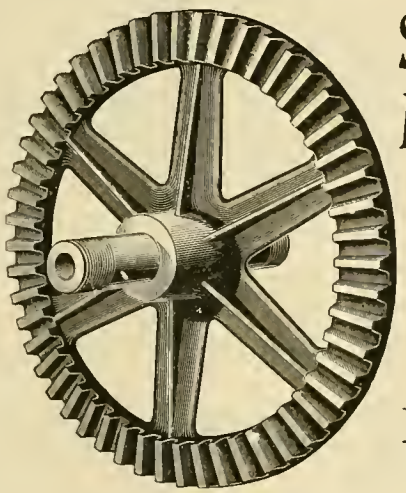
Mrs. W. Niemeyer, who has done an extensive retail plant and cut flower business for the past forty years, has sold her greenhouses to Leonard Spoden and Frank Hanson, of Fredonia. These gentlemen have been very successful at the trade and will no doubt make the Erie florists hustle.

E. C. Hill has rented a place on State street and will open a flower store about November 1.

The Schluraft Floral Company has added three new houses, also a new hot-water boiler, to their plant.

John Trost has built two new houses this fall for growing plants. V. L. S.

PADUCAH, KY.—On the occasion of the opening of the new dry goods store of The Hays, Foster & Ward Company, C. L. Brunson & Company furnished an elaborate decoration of palms, smilax, asparagus and floral work; also 1100 roses, all of their own cut, which were given away as souvenirs.



The Right Cypress for Greenhouse Material.

Have you heard of Cypress Greenhouse Material that has not been satisfactory? If you have it does not follow that Cypress is not the best lumber to use. There is White Cypress, Yellow Cypress and Red Cypress; there is Cypress that grows on the high lands and Cypress that grows in the swamps.

All of these different kinds are not suitable for greenhouse purposes. Do you know which kind is best and do you know that kind when you see it? If not you would better buy from those that do know and will deliver exactly what they sell. We introduced Cypress for greenhouse construction and pushed it to the front. We know all about it. For fifteen years we have made a specialty of furnishing it, and during this time we have built up a reputation that we can not afford to jeopardize. We send out the best only.

Are Flower Shows Beneficial to the Trade?

[Paper read by J. T. Anthony in opening the discussion at the Chicago Florists' Club, Friday evening, November 4.]

Are flower shows beneficial to the trade? This is a question affording but little chance for argument, as there is practically no difference of opinion on this subject among the well informed of those connected with the trade. We all know that there has been a remarkable, I may say wonderful, improvement in chrysanthemums in the ten or fifteen years since they were adopted in this country as the one principal show flower. Would it have been possible to have brought the flower to its present perfection in any way except through the general competition for premiums offered at our floral exhibitions?

We often hear growers complain that it does not pay as well to grow the fancy chrysanthemums which the trade now demands as it did to grow the flower years ago when the blooms commanded an average of about $2 per hundred. It is asserted that the increased cost of cultivation more than makes up for the higher prices now obtained. This may be true, but I believe it is also true that the poorer grade of chrysanthemums, grown as they used to be grown years ago, brings as good a price to-day as they did before the demand for fancy blooms was created. However, fancy stock is being produced in ever increasing quantities from year to year, while the cheaper grades are now almost obsolete in our market.

Carnations, which a few years ago occupied a rather humble position, being used by florists principally as a filler, or background upon which to display roses and other choice flowers, have come rapidly into public favor, until at present they nearly equal the rose in popularity. There can be no doubt that our exhibitions have been largely instrumental in bringing forward both the chrysanthemum and carnation. Not only have our shows aided materially in leading these two flowers to the high positions which they now occupy in public estimation, but they have also been of much value in fostering a love and appreciation for all other flowers.

Flower shows being, as we believe, beneficial to the trade, the question arises as to how we can best create a large public interest in these exhibitions. As the first step every member who is not already enrolled in the Chicago Horticultural Society should make haste to join. Every florist in Chicago should be not only a contributing member of the Horticultural Society but should be an active, working member; he should solicit his friends and customers to become members, for the society ought to have an enrollment of 6,000. If each one would do his share toward increasing the list of names we should soon have a society so strong that it would not be necessary to call upon our friends each year in our search for special premiums and to tide our shows over their financial shoals. We should all do our best to promote attendance at the exhibitions.

Our club is not in a position to help the Horticultural Society financially by offering premiums and, if we were better situated than we are at present, I would not be in favor of this club offering premiums, believing, as I do, that the club can use its money to better advantage to promote its interests and those of the Horticultural Society by employing it in other directions. This club, although composed only of those who are connected with the florist business, is primarily a social organization. It has been our annual custom to spread a banquet some evening during each show and much more could be done in this direction which would be of benefit to both our exhibition and our city. We should send out special invitations to all our friends in the trade to attend our show and banquet, the idea being to bring as many of the craft as possible to the exhibition.

Another thing which could be done by the Florists' Club, which, I think, would be highly appreciated by the officers of the Horticultural Society, would be the appointment of a reception committee whose duty it should be to attend the show to receive and entertain visiting florists. The name of every visiting florist and the address at which he is staying should be registered by this committee, which should be composed of the most widely known members of the trade. Members of this committee should be present during every hour the show is open and as many of them as possible should be on hand during the hours when there are most apt to be visitors from out of town. An arrangement of this kind would make it pleasant for the guests and would relieve the busy officers of the society from this duty. No one can better appreciate the value of a register of the addresses of visitors in the city than can the writer, who has spent much valuable time in search of those whom some one wished to find but whose hotel or host was unknown. If they were registered friends could be directed to them without trouble or delay.

The Florists' Club should be represented at the show and I think the work of this committee should be performed by us, as from our number a committee could be appointed who would be better ac-

quainted with visiting florists than are members of the Horticultural Society, and also because this work in the past has, in a manner, been done by the officers and employes of the Horticultural Society, although largely for the benefit of the Florists' Club and its members. We should take hold of this matter and do the work in such a manner as to redound to the credit of our club and the Chicago Horticultural Society.

Nymphaea Richardsonii.

The accompanying illustration shows this new hardy double white nymphæa quite impartially. It is if American origin, having as its pistilate parent the common N. tuberosa. It partakes of the color, and to a great extent of the habits, of that variety, but is somewhat larger, blooms more freely and submits with greater willingness to cultivation. However, the winning point which so readily characterizes it from all other nymphæas is its numerous petals. From eighty to one hundred perfect petals may be counted on a good sized flower, making it by far the most double of any nymphæa we have ever seen. This is a long coveted improvement with water lily lovers and this variety is doubtless the forerunner of a race that will become widely popular. GEO. B. MOULDER.

The Approaching Carnation Meeting.

[*Albert M. Herr, Secretary of the American Carnation Society, read the following paper before the Philadelphia Florists' Club on November 1.*]

This is a very large subject for a little fellow like myself to tackle and I trust you will take my size into account when you deal with the shortcomings of this paper.

The first and most necessary point in considering the approaching annual meeting of the American Carnation Society is to get the date well fixed in our minds: February 16 and 17, 1899. It looks a long way off now, but time flies and unless we take it by the forelock and keep just a little ahead of it, the meeting will be here and we not ready for it. Fortunately I know my fellow members of this club well enough to understand that I could not add one suggestion as to how they should treat the society socially during its sojourn in this city. I can, however, add a word of caution and I trust the club in general and every individual member of the club will take it to heart. Do not plan too much in the way of entertainment. This society meets at a busy time of the year, for business purposes and its members are all wanted at its sessions. This is quite as important as the date of meeting and we wish to fix it in our minds just the same.

I think I voice the sentiment of every member of the American Carnation Society when I say that I sincerely trust there may never be rivalry between the cities in which we meet to outdo each other in the way of entertainment, and thus have us eventually become a burden to the local club of the city in which we meet. As a society we prefer to have our meeting looked upon among the craft as a pleasant social event and to feel that the benefits derived by the members of the local club from our sessions and exhibition will almost or altogether balance their share in the meeting, exhibition and our entertainment.

We meet at a season when all carnation growers are busy with work and can ill afford a long stay from home. As a consequence we meet strictly for business purposes. Arrangements are usually made so that a half day, of the two days we are in session, can be devoted to visits to such growers as can be quickly reached. Experience shows us that a goodly number of those who attend remain for the Saturday following the meeting and spend the day among the growers. Then there are a few who will come a day or two ahead and make a pretty general canvas of the growers in and aronnd the city in which we meet. In view of this it will be well for us to all be prepared for critical visitors and our pride will lead most of us to make a special effort toward having our stock in the pink of condition when these men come aronnd. The result is the standard of excellence in the carnation will be raised a notch or two through these efforts, and this is one of the benefits derived from entertaining

NYMPHÆA RICHARDSONII.

the American Carnation Society, for after this notch or two has been put into the upward tendency of the carnation it will not likely be allowed to fall back.

Another great benefit of these meetings is the opportunity it affords local growers to rub shoulders with men from other sections, who grow for a different market. This personal contact brings out ideas and facts that never are reached in any other way. It therefore behooves all the members of this club who are interested in carnations to so arrange their affairs that they can attend the meetings. It would also be a neat thing to do if all those members of this club who are especially interested in the carnation were to join the society and take an active part in its discussions and business. Membership costs but $2 per year and there is no fee for initiation. Do not let this little hint keep you away if you do not care to join, for we are a liberal minded body and throw our doors open to any one connected with the trade; grower, wholesaler, retailer, all are invited and all are welcome.

The papers for the coming meeting are not voluminous but will cover some interesting ground. There will be one by Prof. Britton on commercial fertilizers and their relation to the growing of carnations; one, and possibly three, by growers of indoor carnations; and one by our own Mr. Kift on carnations from the retail point of view. In addition to this there will be a question box open to members and any knotty problems we may want solved can be forwarded to the secretary or brought to the meeting with the assurance that they will receive careful consideration.

The exhibition is held during the two days of the meeting and all entries should be forwarded to the secretary at least ten days before the exhibition, and all exhibits must be staged by 11 a. m., February 16, or they will be disqualified. These are very important items and should be fixed in our memory as they are not paper rules, but rules that have to be lived up to and obeyed to the letter in order to avoid confusion and the interference of the exhibition with the business sessions. The premium list will be ready for distribution by December 1 and will be mailed to any one who applies, no matter whether they are members or not; all intending exhibitors should bear this in mind and send their names to the secretary at once.

Our exhibitions have been second in size only, to the chrysanthemum shows of the fall, and fully as well appreciated by the general public. By carnation enthusiasts they are looked upon as each one better than its predecessor and perfect marvels in the way of progress. There is no reason why this exhibition should not be far ahead of any of the preceding ones and there is every reason why it should be ahead of them. In the first place the premiums offered by the society are no mean ones, but represent quite a nice outlay in good cold cash, beside a few in the way of trophies, and the outside premiums this season cover all the ground that can be taken up.

Perhaps the first one of these to be considered is the cup offered by E. H. Michel, of St. Louis, for the club winning the highest number of premiums in the whole exhibition. This will be awarded by points, so many for first prize, so many for second, and in the same way for certificates and special premiums. This will be a feather in the cap of some club, and one well worth winning. Another award that ought to bring out a good exhibit will be that of the medal offered by the S. A. F. for the best six vases, twenty-five blooms each, of six varieties, introductions of 1897 and 1898. The grower who wins this will have double honors and such as have never been offered before.

From a money point of view the most valuable prize of the lot will be the vase offered by the Rookwood Pottery. This will be a gem and is to go to the grower who is fortunate enough to have the best three vases, fifty blooms to each, of scarlet, pink and white, three varieties. Frederick A. Blake, of Rochdale, Mass., has $10 to be divided into three premiums for his new carnation, Bon Ton. Richard Witterstaetter, of Sedamsville, Ohio, has a like amount to be divided into two prizes for his new Evelina, John N. May, of Summit, N. J.; offers $5 for the best twenty-five scarlet and the *Florists' Exchange* offers a like amount for the best red seedling to be named Charlotte. The AMERICAN FLORIST has offered $10 toward the general fund and others are to be heard from.

The society is making an innovation in the way of an award by offering a vase for the most artistic arrangement of carnations, with foliage or otherwise, said arrangement to contain not over 100 carnation blooms and all other flowers excluded. It is to be hoped that this

PARK VIEWS IN GRAND RAPIDS, MICH.

award will bring out a good display and some new ideas in the use of carnations. If it does, this end of the exhibition will no doubt be well taken care of in the future.

The Cottage Gardens' cup this season goes to the best scarlet and this, in addition to the other premiums offered for scarlet, ought to make the show a red letter one (no joke intended). As a club we should take pride in winning as many of these trophies as possible and it is time to begin right now. We will have strong competition from other sections for I hear almost daily of some one who is coming from a distance and intends to exhibit.

We, as a club, should appoint a committee to meet the members of the society as they come in, conduct them to their hotels and see that they can reach the hall readily and without trouble. As the headquarters will be at the hall it will hardly be necessary to have one hotel designated, but it would be well to see if we can secure special rates for those who care to take advantage of them. We will also want a superintendent of the exhibition who will have charge of the arrangement of the tables and to whom all boxes and packages may be directed with instructions how to display the contents. We shall have to give up our club room to the society for two days and one evening or provide some other place of meeting, as it has always been customary for the local club to provide a meeting room and exhibition hall free of expense to the society.

Parks of Grand Rapids.

The parks of this city are under the control of a commission of three members with Wencil Cukerski as superintendent and city florist. The public gardens have never looked better than they have this year and they show that the right man is in charge.

John Ball Park, the largest in the city, contains 100 acres of woodland which nature certainly planned for a pleasure ground.

Lincoln Park, next in size, with its wealth of natural beauties and its well kept lawns, fine beds and large pavilion is a most attractive spot. Highland Park with its large trees, crystal streams and shady walks makes this a delightful breathing ground for another part of the city. Fulton and Crescent Parks are located in the most populous portion of the town. They are not large but excellently well kept. Lookout Park is a new outing ground situated on one of the hills that surround the Valley City.

HENRY SMITH.

A Philadelphia Chestnut.

Well, it has come to pass at last! After fifteen years more or less of agitation a Philadelphia grower has had the courage to put on paper, in the most profound manner, his and possibly the objections of all growers who sell their flowers in this city to a flower market. I say all the growers because he speaks of a discussion that took place a "day or two ago" and also says that under certain conditions "all growers will join hands" in the establishment of a flower market. In thus speaking for all, I presume "E. L.," who, like Davy Crockett, is always sure he is right before he goes ahead, has the authority to make these statements.

Since the advantages of the market system have so often been referred to and no reasonable objections have ever been offered, I always supposed there must be some obstacle, some serious drawback, an insurmountable something, that rose up invisibly and defeated the project. And now the secret is out at last! It is the soft, tender heart of the grower, who, fearing to offend a customer, would rather suffer great inconvenience than make himself liable to be placed in such an embarrassing position. His article states that "for a number of years there have been advocates for a flower market for the benefit of the growers." This is

the first time that I have heard that the market was for the benefit of growers exclusively. It would unquestionably be a great convenience, not only to them, but equally so to every one who handles their products.

The objections that "E. L." sees to a market are mere nothings. Man is a reasoning being and as soon as he is asked to step out of the beaten path he stops to think, and ponders and begins to work out objections, and by dint of this turning over and over the gray matter he often makes mountains out of mole hills. The wiseacres of England did not want Stephenson to run trains on his railroad because of the cattle that might wander on the track. The people in all the cities of this country were up in arms a few years ago against the introduction of the trolley system, yet in the short time of its existence it has revolutionized travel and city life in consequence.

Wherever markets pure and simple have been established they have been uniformly successful and the objections referred to are never mentioned. The Thirty-fourth street market in New York has grown from a handful of growers forced into an organization by the dealers, until it is a recognized factor in the flower business of that city. The Boston market is also a bright example of this plan and gives great satisfaction to both growers and dealers who enjoy its advantages.

Every large city in this country should have its wholesale floral center from which the retail trade could get its supply. New York City, together with its Thirty-fourth and Twenty-third street markets, has its center of commission men on Twenty-eighth street, where they stand practically as in a market, side by side, and where everything in season in flowers can be seen in the shortest possible time.

Philadelphia should have some such center—should have had it fifteen years ago—where all the flowers for sale that are sent to the city could be seen by all the retail dealers at an early hour in the day. They need not be under one roof but should be as near as possible in adjoining buildings.

It does not follow that when a market is established every buyer can have everything he sees or that the grower is obliged to sell out to the first man that happens along. A good salesman soon learns to know his customers and acts accordingly. There is nothing to hinder the use of the discretion that "E. L." talks about in his present dealing. He would not now sell out in the first store he entered, no matter how much the flowers were wanted. His other regular customers would be expecting and depending on their share of his stock and he would save it for them. As to the long or short credits, the man who pays his bills promptly is always given the preference and the grower who sells ever so little to doubtful customers does so after his cash, and more desirable, trade has been satisfied. The man who will sell his stock to undesirable customers when he could easily place it in good hands, simply because to refuse to do so would put him in an "embarrassing" position, had better think good and hard about the "expense and anxiety of the production of his commodities" and thereby cultivate the necessary nerve that will enable him to overcome this most distressing habit.

I venture to say, "E. L.'s" innuendo to the contrary notwithstanding, that the retail flower sellers of Philadelphia pay their bills as fully and as promptly as those engaged in the same business anywhere. I believe, however, that the opening of a flower market would have a tendency to bring the business nearer to a cash basis as so many more buyers and sellers would meet each other that neither would care to be bothered with small accounts and cash would be demanded and paid. ROBERT KIFT.

Wreaths on Easels.

The accompanying illustration is of a wreath recently sent by the Philadelphia Florists' Club to the funeral of one of its members. The flowers are arranged on a flat, crescent shaped, thirty-six inch wire form, the design being first outlined with palm leaves. The roses used were Carnots on one side and Beauties on the other. The tapering points were first made in two large sprays which were then laid on and finished at the bottom with long stemmed blooms. Orchids and Farleyense were used at the junction, as well as a few sprays of Clematis paniculata, tied in with the ribbon. The design was then attached to a six-foot easel. None of the roses were wired nor was the frame mossed. Six hours after making, the design was still in good condition, the quantity of rose stems together, after being well sprinkled, seeming to hold enough moisture to keep the flowers fresh a sufficient length of time. An assortment of easels should be in every florist's stock as they are very useful for the display of wreaths and similar designs. At least from one-third to one-half as much more can be obtained for a piece mounted in this way as for one sent plain and the cost for the easel is trifling.

K.

CHRYSANTHEMUMS.

SEEDLINGS AT PHILADELPHIA.

Seedlings for examination were out in force in Philadelphia, October 29, three coming from Maryland, one from Michigan and two from New Jersey—six in all. The two latter were from John N. May; one, No. 29, appeared to be a dwarf, compact grower, with a flower similar in form and color to Viviand-Morel, but hardly so large as that well-known variety. The other, named Meta, was in color white, with lemon shadings, similar in its colorings to Philadelphia. In form it is an incurved Japanese.

E. A. Seidewitz had two, one labeled Swern, pink in color and incurved Japanese in form. Another labeled John K. Shaw, from the same exhibitor, was a

WREATH ON EASEL.

beautiful delicate pink and also Japanese incurved.

A fine yellow, also from Maryland, exhibited by Wm. Paul Binder, was labeled Robert Halliday, named after one of Baltimore's most popular florists. In form it is very similar to Wm. H. Lincoln, somewhat flat, which may be described as a slightly incurved Japanese.

From Nathan Smith & Son, Adrian, Mich., came a beautiful light yellow, incurved Japanese, quite large, but by the retailers it was considered to have too long a neck.

By way of comment upon chrysanthemums in general, the mid-season varieties are as late as were the early and second early varieties coming into full bloom this autumn, which is no more than may be reasonably expected, because the season which caused the early ones to be late also retarded those which naturally come later.

A nobby single variety is attracting some attention in this city. I refer to Mizpah. It is field-daisy-like in form and size and magenta pink in color. It is one mass of bloom, establishing it at once as an ideal pot plant. When better known it will become a very popular variety for selling in pots. Gladys Vanderbilt seems to have caught on as a desirable variety to grow for cut flowers.

According to the *Gardening World*, London, the variety exhibited at Philadelphia labeled Soliel d' Octobre and October Sunshine is of European origin. No matter where it originated, it is a grand good variety. The English journal has this to say in reference to the matter:

Soliel d' Octobre has been brought before the floral committee of the National Chrysanthemum Society of Great Britain several times, but it has been passed over or accorded the polite "The committee wish to see this again." The first-class certificate long delayed, was, however, awarded it on the 11th ult., when it was shown by Mr. W. J. Godfrey. It is a sure sign that there is something good and reliable in a variety when it is shown time after time, so uniformly good as Soliel d' Octobre has been, and I should strongly recommend all amateur cultivators who like easily cultivated varieties not to lose sight of this one. To quote a well-known grower's words, "It comes good anyhow," and the varieties of which this can be said are all too few. The flowers themselves are of great size, the florets being long, rather narrow and drooping, and bright yellow in color."

European varieties are eligible to be examined under the auspices of the C. S. A. with the object in view of scoring them for a certificate, just the same as are varieties raised in America. This is certainly a valuable novelty but it occurs to the undersigned that when entered for examination all varieties should be entered as sports or seedlings of American origin, or sports or seedlings of European origin.

P. A. D.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The committees judging new seedlings will be in session November 5, 12, 19 and 26. Exhibitors should make their entries (for which a fee of $2 is charged for each variety entered) to the secretary not later than the Tuesday of the week the blooms are to be shown. Express charges prepaid and forwarded to any of the following addresses, exhibits will receive careful consideration.

Boston, Mass., A. H. Fewkes, Horticultural Hall, Tremont street.

New York, N. Y., E. Dailledouze, care of New York Cut Flower Co., 119 West Twenty-third street.

Philadelphia, Pa., A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O., R. Witterstaetter, care of Cincinnati Cut Flower Company, corner Fourth and Walnut streets.

Chicago, Ill., C. W. Johnson, care of Illinois Cut Flower Co., 51 Wabash avenue.

WORK OF THE COMMITTEES.

Philadelphia, Pa.—Wm. Paul Binder, Rider, Md., exhibited Robert Halliday, Japanese, yellow; scored commercial scale 89, exhibition scale 87 points. John N. May, Summit, N. J., exhibited No. 29, Japanese, pink; scored commercial scale 79 points. The same grower exhibited Meta, Japanese, incurved, white, lemon shading; scored commercial scale 90, exhibition scale 87 points. Nathan Smith & Son, Adrian, Mich., exhibited No. 57, Japanese, incurved, light yellow; scored commercial scale 84 points. E. A. Seidewitz, Annapolis, Md., exhibited Swern, Japanese, incurved, pink; scored commercial scale 83 points. The same grower exhibited John K. Shaw, Japanese, incurved, pink; scored commercial scale 92, exhibition scale 86 points.

Boston, Mass.—John N. May, exhibited Meta, Japanese, incurved, light straw yellow; scored commercial scale 87, exhibition scale 86 points.

Cincinnati, O.—Wm. Paul Binder exhibited Harry A. Parr, Japanese, lemon yellow; scored commercial scale 81 points.

ELMER D. SMITH.

CARNATIONS.

CULTURAL NOTES.

November 5.—It is not uncommon at this season of the year for some growers to find more or less of the disease commonly known as "carnation spot" among their plants. This is easily distinguished as it forms a distinct light brown patch upon the leaves and where it is especially bad it can be found on the flowering stems as well as on the leaves. The result is that the affected leaves dry off and die. Affected stems may live for some time but they will produce inferior flowers and it is only a matter of time until they will follow the leaves. Next to stem rot this is the most injurious disease that affects the carnation.

The cause of the spot is usually an excess of moisture among the foliage of the plants and it will be quite prevalent where the watering and syringing is left to inexperienced help. The check resulting from planting in makes the plants susceptible to disease and if too much moisture is given them a few dark days will bring this trouble on in full force.

Fortunately the cure is simple and effective. Personally I am not in favor of deluging the plants with a liquid fungicide of any kind; neither am I in favor of clogging up the pores of the leaves with any sort of a powder remedy, although in extreme cases a judicious use of a good fungicide might be not only advisable but necessary to save the stock. The first and most important part of the cure is to keep all moisture from the foliage, applying the water necessary to the plant between the rows without wetting the leaves. Do not imagine that if the day is bright the water will all be evaporated from the plant by night, for no matter how bright the sun may be it will not get all of the water out from the base of your plant before night and right there is where the trouble will commence. If there is a sign of the spot keep the plants absolutely dry. It is a good plan to syringe your plants once a month in order to keep the foliage clean but always choose a clear day.

In addition to keeping the plants dry it will be well to have a little heat on the houses so as to dry out the atmosphere and allow plenty of ventilation to be put on; then sulphur can be applied without injury. A good method of doing it is to mix it with linseed oil to the consistency of thick paint and then treat the steam or hot water pipes with it, renewing the application about every ten days. Sulphur, while a help in eradicating the spot, is a preventive of a number of fungus diseases and, therefore, should be a part of winter culture. In a house eight feet wide put a dash of it twenty inches long on the pipe and then skip about ten feet before putting on another dash, applying it to but one pipe. In a house twenty feet wide skip only four feet between dashes and in a wider house one whole pipe might be painted on one side, but too much will give you a sorry looking lot of carnations.

We are told that the growing of carnations under glass all summer will eradicate rust from a variety. This I know to be a fallacy, but I imagine that the intelligent culture of carnations indoors all summer would be a sure preventive of both stem rot and the spot. Unfortunately for myself I am not able to grow indoors such carnation plants as I want for winter blooming, but I have been able to keep disease away from my place by careful attention to the details of watering, syringing, firing, ventilation and the use of sulphur. There is but one excuse for heavy syringing in the houses and that is when red spider gets headway. In this case it is a choice of the least of two evils.

ALBERT M. HERR.

New York.

TRADE CONDITIONS SEEM TO IMPROVE.—CUT OF ROSES REDUCED.—VIOLETS SELLING MUCH BETTER.—A PAPER ON BULBS PROMISED.—A NEW TELEPHONE.

There is a dearth of news of general interest in the metropolis just at present. Among the florists—that section of the craft interested especially in the production and marketing of cut flowers—the main subject of comment has been the overstock and stagnation of the past few weeks and none are sorry to see October's last day. Hopefulness is now apparent and there is a general belief that the worst of the trouble is over and that hereafter the market will be better able to consume the daily receipts. Plant growers are serenely contented and confident, all indications pointing to a prosperous season for them. A disquieting feature this fall has been the very low prices at which palms of ordinary quality have been sold. An occasional and hitherto unheard-of sight is a wagon-load of palms of various sorts and sizes being peddled through the middle-class residential streets, the owner shouting the price, as is done with fruit and vegetables.

Receipts of flowers have relaxed some in quantity, roses especially showing a tendency to hold off, partially no doubt on account of the efforts of the growers, who have got tired of the work and expense of shipments on which it is impossible to realize. Chrysanthemums are still on the upward grade as regards quantity and quality, but prices show a disposition to go the other way. At best the prices received are but poor compen-

sation for the grower. Twenty to twenty-five cents is outside figure for best Robinsons. Violets are selling much better and values have advanced. Lily of the valley, ordinary brand, brings but $2 and the fancy, of which Carl Jurgens is sending a fine lot to John Young, brings $5 per hundred.

The pleasing announcement is made that at the meeting of the Florists' Club on Monday, November 14, Wm. H. Siebrecht will read a paper on "Bulbs." Mr. Siebrecht is not only one of our most successful bulb forcers, an experienced and observant florist, but is popular personally as well, and no doubt will be honored with a large and appreciative audience.

Rudolph Jahn, who recently opened a store at Forty-second street and Sixth avenue, has already closed up.

Most of the wholesale and retail establishments are signing for the new telephone which is soon to be in operation and which promises a relief from the extortionate rates charged by the old company.

The first longiflorum lilies of the season have appeared at John I. Raynor's.

Philadelphia.

TRADE CONDITIONS POINT TO BRIGHT PROSPECTS.—THE CROPS AND THE MARKET.—FLORISTS' CLUB AFFAIRS.—NOTES.

Things have taken on a roseate hue, as there has been a decided change for the better, which it is to be hoped will continue. The weather has been cool and bracing, and under its influence stock is much improved. Chrysanthemums are coming in a little faster than the market will take them; quite a list of varieties have been added to the assortment the past week. Ivory is now in, and was a great help for the All Saints' Day demand. Bonnaffon has arrived, as well as Minnie Wanamaker, Pink Ivory and Viviand-Morel. Prices are quite low. Pot plants are rounding up nicely; $3, $4 and $5 per dozen is the price in from 6 to 8-inch pots. Most of the stock has been planted out on the benches during the summer and potted about September 1. Some growers do well, however, with stock grown outside, the plants getting larger and bushier, but not holding their foliage as well nor producing such perfect flowers.

The rose crop is well advanced for the season, but the growers still bemoan the low prices. Kaiserins were never finer at this time of the year and Brides are having a hard time to catch up to them. Bridesmaids seem to be slow in getting up to their standard and very few have reached the $4 mark as yet. Beauties have taken a step up and $2 per dozen is asked for the best. Carnations are improving and Victor, Flora Hill, Scott and Triumph are seen in good form and the best bring $1.50 per hundred. Violets are now presentable and the retail storekeeper has laid away his stock of excuses except, "Yes sir, you will find them very fragrant in a warm room," which generally lasts the season out.

Palms and other house plants are moving fairly well. There is a good demand for the Boston fern. Great care should be used in transporting this variety, as so many plants are rendered unsalable on account of the tips of the fronds becoming damaged by careless packing or being whipped about by the wind in an open wagon.

The Florists' Club meeting last Tuesday was fairly well attended. Albert M. Herr's paper was a strong and forceful document and contained much of interest to the carnation growers of this vicinity. The chrysanthemum show of next week received some attention and it was resolved to keep open house next Wednesday evening. There will be something for the inner man and cigars to cloud the atmosphere. Everybody in the trade is to be made welcome. No tickets will be required and a good time generally is expected. The show promises to be a good one and quite up to the standard of the past few years.

H. Bayersdorfer & Co. now have wild smilax in stock at all times, which will be a great help to the decorators with hurried orders.

K.

Boston.

ANNUAL ELECTION IN THE CLUB.—A PAPER ON CHEMICAL FERTILIZERS.—STATE OF TRADE.—IMPROVEMENT NOTED.—RARE SHRUBS AND ORCHIDS AT HORTICULTURAL HALL.—JACKSON DAWSON ROBBED.—THE YELLOW LOTUS AT PEABODY.—CHRYSANTHEMUM SHOW NEXT WEEK.

On Tuesday evening the Gardeners' and Florists' Club met and elected officers as follows: President, Wm. H. Elliott; vice president, Robert Cameron; secretary, W. K. Wood; treasurer, Edward Hatch. Andrew H. Ward was the essayist of the evening, his subject being "Commercial Fertilizers." He read a carefully prepared and very interesting paper on the effects of fertilizers in various chemical combinations upon the soil and crops. He advocated using soda instead of potash and asserted that if this were generally done its effect would be to break up the syndicates that now control all the potash fertilizers. Nitrogen, he further claimed, which is usually regarded as an expensive ingredient, is cheaply obtained in nitrate of soda and in several other ways the replacing of potash with this chemical would be advantageous to the agriculturist and horticulturist.

Business conditions are somewhat improved since last week. The daily receipts of flowers have fallen off and it is probable that the worst of the fall avalanche is now over and that a steady, although slow, advancement may now be looked for. The quantity of roses, carnations and chrysanthemums coming in is still far out of proportion to the necessities of the local market. Outside demands are not yet sufficiently numerous or heavy to make much impression on the daily stock.

At Horticultural Hall on Saturday, Jackson Dawson was awarded certificates of merit for Euonymus Bungeanus and Ribes fasciculatus, two very showy fruiting shrubs. Cypripedium insigne var. Lutuycheanum, C. fascinator and Epidendrum conapseum were shown by Oakes Ames and from J. E. Rothwell came several pretty orchids, also R. and J. Farquhar & Co. received honorable mention for a new, very double pink Anemone Japonica. James Comley showed a collection of beautiful foliage of Japan maples.

On Thursday night while passing through Centre street, Jamaica Plain, Jackson Dawson was attacked and robbed of his watch and other valuables. The thieves, of whom there were two, struck him on the head, rendering him unconscious. They were captured on Friday by the Boston police. His injuries are very severe and the physicians say it will be some time before he can get out again.

The yellow lotus, Nelumbium luteum, has become thoroughly domesticated in Lake Winona at West Peabody and has already taken complete possession of over half an acre of the lake. The flowers make a grand display and attract great attention in the summer.

Preparations are now on for the annual chrysanthemum show, which opens in Horticultural Hall on Tuesday, November 8. Visits to a number of the growers are in order this week.

The Crowl Fern Co. have opened an office at 18 Chapman place.

Visiting Boston: A. M. Cheney, Orange, Mass.

Obituary.

DAVID D. GRIMES.

David D. Grimes, of the firm of D. S. Grimes & Sons, Denver, Colo., died October 20 from diseases contracted with the army operating about Santiago de Cuba, where, attached to the quartermaster's department, he participated in every action which led to the capitulation of that stronghold and the end of the war.

It was while carrying ammunition to Col. Roosevelt's Rough Riders in their famous storming of San Juan that florist Grimes had several hairbreadth escapes. It was necessary that his wagons pass over a strip of exposed ground in full view of the Spanish riflemen and in the perilous journey one Mauser bullet passed through his hat and another cut his stirrup, his horse dying under him. A shell fell at his feet but fortunately did not explode.

The funeral was held from the home of the soldier's father, D. S. Grimes, just one month from the day of his arrival home and was attended by Odd Fellows Lodge No. 56, Canton Navago No. 10, and Silver State Lodge, Knights of Pythias, of which the deceased was a popular member. The floral offerings were profuse and very beautiful, especially those from Daniels & Fisher and the Park Floral Company.

CHARLES HUSCROFT.

Chas. D. Huscroft died at the Wheeling hospital, October 27, in his 21st year. Two weeks before he underwent an operation for appendicitis and seemed at first to have rallied from the effects, but suffered a relapse, and grew steadily weaker. Deceased was born in Steubenville, Ohio, December 13, 1877. He was a young man of integrity, uprightness and sterling worth and these traits of character won him hosts of warm friends. Two years ago he moved with the family to Wheeling, W. Va., and became a member of the florist firm of Huscroft Bros. He is survived by his parents, four brothers and two sisters. The remains were taken from Wheeling to Steubenville to the residence of George L. Huscroft, at Eighth and Market streets, whence the funeral took place October 29.

SCHENECTADY, N. Y.—J. W. H. Grupe, on November 1, removed to 126 Wall street.

ADRIAN, MICH.—N. Smith & Son have opened an attractive flower store on South Main street.

THE AMERICAN FLORIST

Subscription $1.00 a Year. To Europe, $2.00.
Subscriptions accepted only from those in the trade.

Advertisements, 10 Cents a Line, Agate $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

As we go to press we receive by wire news of the death of S. B. Parsons, of Flushing, N. Y.; killed by train.

THE Commissioner of Internal Revenue has decided that the Florists' Hail Association is not exempt from taxation, the law only applying to mutual fire and life associations.

COMMISSIONER FERD. W. PECK has secured additional space for the United States at the Paris exposition and 4,800 square feet will be allotted to horticultural exhibits.

FLAMMARION, a French astronomer, in experiments in growing plants under different colored glass at Juvisy, near Paris, has discovered that under red glass plants attain a wonderful growth while under green they do very poorly and under blue almost perish. However, in red light the forms produced are far less desirable than those obtained in the ordinary way.

Reports Renewed Interest.

A renewed interest is being manifested in the Florists' Mutual Fire Insurance Association, the membership of which is rapidly increasing. After the first assessment it will probably dawn upon the mind of the trade that they can save some money by joining the F. M. F. I. A.

JOHN G. ESLER.

Awoke and Heard the Hail.

ED. AM. FLORIST:—How many of your readers have awakened in the night and heard the hail knocking in the glass? I did, on September 15. "Oh! That's awful," said my wife. "It's not nice," said I, "but don't be unduly alarmed. It's all insured in the Florists' Hail Association and as soon as I make proper proof of my loss Treasurer Herr will send me a check." And he did; for $125.40.

GEO. M. KELLOGG.

Chicago.

SHORT SUPPLY OF BOTH STOCK AND LOCAL BUYERS.—SHIPPING TRADE VERY GOOD.—PRICES ARE FIRM WITH FINE FLOWERS BRINGING GOOD FIGURES.—CHRYSANTHEMUMS IN OVER SUPPLY.—SHOW PLANS PERFECT.—FLORIST CLUB DISCUSSES EXHIBITIONS, INSTALLS OFFICERS AND PLANS THE ANNUAL BANQUET.—JOTTINGS IN THE TRADE.

Owing to a variety of causes, the approach of election, the unfavorable weather, the business activity consequent upon the end of a month, what would otherwise be a decidedly short supply has been just a little more than enough to meet the demand this week. Shipping trade has been very fair, but in the last two days the supply of flowers has increased more rapidly than have orders.

Of roses the supply has been short and prices have been steady. Some very fine stock has come to market, one or two lots of Brides commanding 8 cents, with 6 cent blooms not infrequent. The prevailing price has been from 2 cents to 4 cents. Good Beauties have sold for $4 a dozen.

Carnations have been in under supply, particularly whites. Good flowers have brought from 2 cents to 3 cents with no fair stock going at less than $1.50 per hundred. It seems that the bulk of the planting this year was of pinks or reds and the fortunate grower who has a few houses of good McGowans or Flora Hill is on the "sunny side of easy street." One grower who has fifteen houses of carnations affirms that when a house brings him $3 per day he is making money and any house of whites should do that under present conditions.

Verily, this is the day of the chrysanthemum. The blooms have deluged the market this week and are the only flowers which have been in over supply. The blooms upon which a grower can make money at from $4 to $6 a hundred have sold readily at those figures although the fancy sorts have, as a rule, failed to find a demand which was adequate to repay for the care exercised in their production. Nevertheless, one dozen Solar Queens fetched $5, which is the top price of the year. It is estimated that the flower show next week will take 10,000 blooms out of the market, which should operate to stiffen prices somewhat. After that will come the deluge but by that time cold weather should have greatly stimulated the market.

Everything in connection with the show arrangements gives promise of the most successful exhibition on record. Superintendent Rudd is assured of extensive exhibits, probably the best in the history of the Chicago Horticultural Society, and the public interest and the very favorable location are in themselves sufficient to guarantee a very large attendance. All that can now be desired is weather the antipode of that of jubilee week.

The new officers of the Florists' Club were installed with due eclat at the meeting last night. The discussion was upon the subject of the benefit of flower shows to the practical florists and was opened by J. T. Anthony.

The committee of the Florists' Club has arranged for the annual banquet at the Sherman House, next Thursday, November 10, at 8 p. m. Tickets are on sale at all the wholesale houses at $2 each.

Kroeschell Bros., who have been selling boilers to florists for many years, also manufacture refrigerating machines and are receiving many inquiries as to their practicability for florists who are weary of paying ice bills. One Chicago grower and wholesaler has virtually decided to put in a cooling machine next spring.

J. A. Budlong returned a few days ago from a three months' tour of the east. He made most of the trip to Providence, R. I., his old home, upon his bicycle and wheeled over 3,000 miles during the time of his absence, visiting most of the cities and resorts on the eastern coast north of New York.

George F. Crabb, of Grand Rapids, has been in town this week and states that probably ten of the Florists' Club of his city will visit the Chicago show next Thursday.

Arthur Reeves, son of Jos. Reeves, with Andrew McAdams, of Fifty-third street, met with a serious accident October 24 in having his collar-bone badly fractured by a fall.

A. Nelson, representing the F. R. Pierson Co., Tarrytown, N. Y., has been a visitor this week. Mr. Nelson recently returned from a business trip to Europe.

Bassett & Washburn have offered a special prize of $25 for the best basket of roses exhibited at the show, quality of flowers and arrangement considered.

J. A. Anderson has secured the flower booth for the sale of blooms in the show hall.

W. N. Rudd has a yellow sport of Mayflower which promises to be an acquisition.

Among the visitors the latter part of the week were J. H. Brumby, Benton Harbor, Mich., Chas. E. Neale, Worcester, Mass., and S. S. Skidelsky, Philadelphia.

Bulb Growing In America.

BY PROF. W. F. MASSEY, NORTH CAROLINA.

[*Read at the Omaha Convention of the Society of American Florists.*]

Americans have long been noted for their fondness for far fetched things. An article of any kind has been assumed to be better because imported from a foreign country. Years ago one of the leading seedsmen of an eastern city printed on all his seed packages "English Garden Seeds." His successor in the seed business has long ago learned better. Our growers have learned that, with many varieties of the seeds we cultivate, better results can be had from seeds grown in our own climate. But even now there is an impression abroad that seeds grown in this country are all better for being produced in the far north, and it is a common thing for seedsmen to advertise that their seeds are "northern grown." And yet only recently I met a gentleman in southern Georgia whose business is the production of seeds for a dealer in New York who sells only northern grown seeds, but who is wise enough to have certain kinds of seeds grown in the climate that suits them best. Georgia and California are beginning to make a reputation for flower seeds that will lead to the use of their product to the exclusion of the European in the near future.

We are gradually learning the varied capacity of our soils and climates, north and south, and are seeking to get the best, no matter where they are grown. We all remember well when no florist would have any tuberose bulbs but those grown in Italy, but now the tuberose industry has moved from Italy to North Carolina, and with the decreased demand for these, the North Carolina growers are fully able to supply the world with tuberoses. This decreased demand for the tuberose has made the culture rather more unprofitable and the men who control the tuberose output in North Carolina pay $2 per thousand for bulbs such as I formerly furnished to London houses at $60 per thousand.

I have for some years been endeavoring to get the bulb growers of eastern North Carolina to experiment with other and winter growing bulbs. So far the effort has not met with very great success, not because the bulbs cannot be grown, but because the growers have been inexperienced in the different methods of growing and curing demanded by hyacinths, narcissi and lilies, and because of the lack of capital to engage in the industry on a scale large enough to affect the trade.

In my experiments at the North Carolina Experiment Station I have been hampered by the indifference of those in authority. They can easily see the importance of experiments in farm products and cattle, but they fail to realize that there is money for their people in things of an ornamental character, and that there are people who will spend money for things they cannot eat.

Sometime since I sent to Messrs. Peter Henderson & Co., of New York., quite a large lot of Lilium candidum and wishing to ascertain the results from these bulbs after they got into the hands of the growers I wrote recently to the house. They replied that they were sorry that they had not kept up with the bulbs after they were sold, but that they were certainly very satisfactory, and they could see no reason why they should not have done as well at least as the French bulbs. These bulbs were thirteen inches in circumference and as solid as an apple.

At the same time the lily bulbs were sent to Henderson & Co. I sent samples of other bulbs. These were noticed in the *Garden and Forest*, and the editor remarked that no bulbs of equally fine appearance had been seen from Europe.

Latterly the Department of Agriculture, at Washington asked me to experiment with the Bermuda lily. At the time the only bulbs to be had were a few badly diseased ones of very small size. These were planted last fall. They grew healthily and made some bloom, and produced small but very clean and healthy looking bulbs, which were ripe and dug the last of July. The diseased condition of the original bulbs doubtless had something to do with this precocity, but we feel sure that after we have grown the Bermudas a while we can get them into a perfectly healthy condition, and can get them ready in full time for the early forcing.

In all the eastern section of North Carolina all the varieties of the narcissus do remarkably well. The polyanthus section has a reputation for tenderness, but I find that with proper treatment they are among the hardiest. If they are planted in the early fall, they start to grow at once and when our January cold comes they are hurt badly, but when the planting is deferred till the soil is cold, say about Christmas or the first of January, they remain below ground till the danger has passed and start off healthily in February, making fine bulbs.

The upland, red clay regions of the south are the best for the Roman hyacinths, and especially for the white Italians, which at Raleigh grow to the size of fine Dutch hyacinths. My Dutch hyacinths this year are finer than any of the new crop coming from Holland, which are rather inferior to their usual standard. But our people lack capital, and are not inclined to take hold of anything on which they cannot realize at once.

I have proven in a small way that the bulbs can be grown here, and grown to greater perfection than those imported, for the bulbs of L. candidum grown at our station have produced three times the number of flowers that were produced on imported bulbs growing alongside of them.

What we wish to accomplish is to get the Agricultural Department at Washington to divert some of the money now wasted in scattering turnip seeds all over the country to experiments here in bulb growing on a scale large enough to convince the dealers that we can grow them and thus induce them to invest capital in the industry in the southeast. North Carolina can grow the Bermuda lily as well or better than Bermuda. She has a fine soil and a climate better adapted to the proper ripening of the bulbs than has Bermuda, and all we need is someone to put money into the business here.

I have prepared this brief statement more as a suggestion to the florists assembled at Omaha, than as a history of what has been done here. Had time allowed I would have entered more fully into the subject, but at present am too badly crowded with work to do more than suggest that the South Atlantic coast country offers conditions more favorable for the bulb industry than any other part of the country.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By first-class fireman and steamfitter. Address Y N, care Am Florist.

SITUATION WANTED—By all-round workman on or before Dec. 1st. Good fireman, propagator, etc. Address N Y, care American Florist.

SITUATION WANTED—By experienced florist and grower fine roses, carnations, 'mums, violets; good designer. Best references. G. Bux 547, Alliance, O.

SITUATION WANTED—By English gardener, private or otherwise; age 32; thoroughly experienced in all branches of the profession.
H H H. care American Florist.

SITUATION WANTED—By first-class grower of cut flowers and plants with 20 years' experience; single. Fair wages expected.
K K. care H. Kuehlke Kansas City. Westport, Mo.

SITUATION WANTED—By first-class carnation and violet grower; good propagator, good grower in bedding stuff, good designer. Best references.
IRA P. HERSEY, 24 Atwood St., Newburyport, Mass.

WANTED—An offer to buy or lease six greenhouses; a fine chance for a practical florist.
4, 11, 44. care American Florist.

WANTED—An offer to buy or rent greenhouses in a good city of 60,000 inhabitants. A good chance for the right man Address J K, care Am Florist.

WANTED—Single man as assistant in greenhouse department of private place; must have good practical knowledge of orchid culture. Give particulars of experience, age, etc., and wages expected Address B R, care American Florist.

WANTED—A young active gardener, married; must understand vegetable raising, hotbed work and general outdoor gardening; house and fuel furnished free. Give references, age, number in the family and wages expected. Address No 5, care Am. Florist.

FOR SALE—Elegant florist's refrigerator, cheap; on view flower show. HIRSCHHORN,
46 Madison, Chicago.

FOR SALE CHEAP—Eighteen boxes A glass 16x16, never used. State price you will pay for same.
JOS. LADO, Joliet, Ill.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St, Springfield, Ill.

FOR SALE—One No. 17 Hitchings greenhouse hot water boiler, second-hand, price $60. One No. 24 Tobasco hot water boiler, used only four months, price $38. Address
GEORGE M. WITWER, South Bend, Ind.

FOR RENT—Two greenhouses, about 5000 feet glass, a good retail stand in city of Asheville, N. C.; also dwelling house if desired. Fine opportunity for a good tenant. Address
REV. H M. PARKER, James Island, S. C.

FOR SALE.

A well established and paying florist's business, with 10 to 30 acres of land, 17,000 square feet of glass. Good residence and houses for help. Situated near one of the largest cities in California. Ill health and desire to retire from business cause for selling. For full particulars address
LOCK BOX 720, Los Angeles, Cal.

FOR SALE.

A florist establishment for sale consisting of 13,000 square feet of glass, in good condition. Heated by steam; in the city limits, located in a city of 18,000 inhabitants on the Mississippi river in Iowa, with several acres of land and dwelling house. Must sell soon on account of old age. For further particulars address
IOWA, care American Florist.

Worcester, Mass.

Chrysanthemums were planted much less extensively than in former years but the supply is more than the demand and prices are much lower than last year. The best figure realized as yet is $3 per dozen and that is for extra good blooms at retail. Viviand-Morel, Yellow Queen and Woodford are now in condition to cut and Major Bonnaffon will soon be ready. Viviand-Morel, when well done, is still one of the best in pink. It seems that exhibition blooms and plants will be a trifle late for the various chrysanthemum shows in this vicinity.

Trade holds steady and the supply of general stock averages about same as last week with the exception of violets, which have shortened up considerably.

Of the newer carnations grown in this locality, Victor, Bon Ton and Alba Superba are showing up well. Victor seems to be a much more vigorous grower and more prolific than Daybreak.

A. H. L.

Nashua, N. H.

George E. Buxton has five very good greenhouses at his present location and is growing a fine assortment of general stock. He was in business twelve years on Vine street and in 1896 removed to Concord street where he has eight acres of fine land and his trade is thriving equally with his plants.

August Gaedeke & Brother purchased the establishment of Judge Hoitt in 1893 and have done a prosperous business ever since. This season promises to be the best they have experienced.

Charles H. Blake has 7000 feet of glass and reports a fine fall trade. He grows a general stock.

Mr. G. C. Watson,

Philadelphia.

My dear Sir:-

Re XL ALL, I could not give you much more information than that I told you the other evening. We use it extensively, and it annihilates the minutest thrips and bugs of all descriptions and after burning does not leave an unpleasant odor in the houses, like one experiences after the use of a tobacco fumigator.

The plants apparently do not suffer in any way, and in England its use is very extensive for many economic reasons; being easy to handle, and a rapid destructor of insect life. Excuse brevity. In haste,

Yours very truly,

A. DIMMOCK.

The above letter just received refers to the 'XL All' Fumigator advertised by me in the American Florist of Oct. 22. Kindly refer to same for prices and other particulars, or, send to the undersigned for circular.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The "GARDENERS' CHRONICLE" has been FOR OVER FIFTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, much of the information furnished is of such general and permanent value, that the "GARDENERS' CHRONICLE" is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, $4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

An advertiser feels better when he knows he is getting direct returns for his money. Mention the AMERICAN FLORIST

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

BEAN prices are firmer, there being evidently a great shortage.

J. M. KIMBERLIN, of Santa Clara, California, is on his eastern trip.

VISITED CHICAGO:—Henry A. Salzer, La Crosse, Wis.; Lester Morse, J. M. Kimberlin.

TERRE HAUTE, IND.—Hoerman & Cleary succeed J. A. Foote in the seed business at this place.

THE interests of Joseph Breck & Sons Corporation at Chicago are reported transferred to Chas. H. B. Breck.

READING, PA.—Wm. M. Koenig, seedsman, 843 Penn street, has made an assignment for the benefit of his creditors.

THE mother of William Henry Maule died Sunday, October 30. The funeral was held Thursday, November 3.

VAUGHAN'S SEED STORE was awarded a gold medal at the Trans-Mississippi Exposition for exhibits of cannas, pansies and roses.

NEW YORK.—Frank T. Emerson is registered at the Continental Hotel. H. H. Harries, of Goodwin, Harries Co., Chicago, and W. J. Langbridge are also in town.

VILMORIN-ANDERIEUX & Co., Paris, France, have been awarded a gold medal for their sugar beet exhibit at the Trans-Mississippi Exposition.

C. C. MORSE, while on his eastern trip, was taken suddenly ill at Minneapolis, October 24. His wife and son are now with him and his many friends will be glad to hear that he is much improved. Lester Morse will probably complete his fathers' trip.

MARY L. MEGGAT, youngest daughter of Mr. and Mrs. Wm. Meggat, Wethersfield, Conn., died November 2. She was a bright, winsome girl of sixteen years. She had been sick for about two months. The family have the sympathy of the entire community.

LONDON, OCTOBER 17.—Canary steady, hemp seed exhausted; inquiry for old lettuce seed for bird food. Red clover has an upward tendency. Rye grass quiet. White clover, alsike and trefoil looking up. Blue peas continue strong. No change in rape and mustard.

THE statement is made that 10,000 feet of floor space has been rented for executing the government seed contract. This would seem to be very cramped quarters for putting up this seed by hand. Messrs. Landreth & Sons used 15,000 square feet for a work room alone, and used machinery at that. The building engaged is said to have neither heat or elevator service.

IN a letter under date of October 15 one of our friends in Erfurt writes regarding the aster seed crop as follows: "Over 90 per cent of our asters are still out in the field; it is only the earliest sorts that have been harvested. For the last two weeks the weather has been cloudy and moist, even wet at times, so the harvesting could not be carried on with any degree of expediency, and the seeds would not dry in the lofts. The crop of the better class of asters will turn out considerably behind expectations."

CROMWELL, CONN.—A. N. Pierson, who has 200,000 feet of glass, is a director in the new Cromwell Water Works Company.

WASHINGTON, PA.—Lloyd Swarthout has opened a flower store at 146 S. Main street in connection with Richard Forest's greenhouses.

DORRANCETON, PA.—Robert Lamereaux has been engaged as a grower by B. F. Dorrance and will soon move his family from Harvey's Lake.

HOLLY=VAUGHAN'S XXX BRAND.

THE Holly situation changes nearly every year. For the last three years they've begun to bring it into the country towns like potatoes. Every man has taken to cutting his own—or some other man's Holly, and packs it well, badly or indifferently, or any old way. The result is very bad for the retail florist. When we first started the Holly business, in 1880, our buyer contracted for a man's grove and cut the best and sorted it himself, and established Vaughan's XXX Stock as a brand worth having. It is nearly 20 years old—almost of age—and has held its own well. But we wondered why so many culls came our way (to sell to peddlers at half rates) and this fall our Mr. Vaughan located this town market Holly system, and cut it off from our man. We are buying and packing our Holly in the woods ourselves, and it costs more money, but it is worth to the retailer a lot more than it costs. **A good case of Holly is easily worth Ten Dollars, while cull stock can't be given away.**

We can suggest delivery dates which will keep you in good supply on the best days for selling Holly. Our prices are not advanced. How much can you use?

Vaughan's Seed Store, *84-86 Randolph St., CHICAGO. 14 Barclay St., NEW YORK.*

WE'RE not in the woods but we are HEADQUARTERS for

Bouquet Green
Also Select grade **Delaware Holly**

We also ship out perfect **Palms** and fine **Ferns** at reasonable prices.

Order GREEN WREATHING for Thanksgiving now. Write for quotations. Special price in quantity.

ELLIS & POLLWORTH, Milwaukee, Wis.

ATTENTION, SECRETARIES!

OF CHRYSANTHEMUM CLUBS AND EXHIBITIONS.

The season of Chrysanthemum Exhibitions being close at hand, we have, as in seasons past, placed ourselves in position to supply your Club with our beautiful **CHRYSANTHEMUM LITHOGRAPHS.** We have just issued, at a very great expense, two new lithographs (a full sheet and a half sheet), which we believe are the handsomest yet offered. They are entirely new in design, and, being highly illuminated are admirably fitted for advertising your coming exhibition.

We respectfully solicit your patronage, and will be pleased to send samples and prices on application. ORDERS WILL BE PROMPTLY FILLED.

THE COURIER LITHOGRAPHING COMPANY, Buffalo, N. Y.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

ALVIN, TEXAS.—Russell H. Bushway has embarked in the nursery business here.

FIFTEEN states have enacted laws for the extinction of or protection from San Jose scale.

A POSTOFFICE has been established by the Dominion government at Brown's Nurseries, Ont.

WM. C. BARRY, of Ellwanger & Barry, is president of the Western New York Horticultural Society.

PROF. F. W. CARD has found that common lead paint is the best application for wounds caused by pruning.

NURSERYMEN find a strong demand for peach trees for spring delivery and many predict a sharp advance in prices.

KNAUTH, NACHOD & KUHNE, New York, are American agents for Barbier & Co., Orleans, France, successors to Transon Bros.

PROF. MARK V. SLINGERLAND, of Cornell University, is now State Entomologist of New York, succeeding the late Dr. J. A. Lintner.

A BULLETIN of the Michigan Agricultural College describes the gasoline blast as a means of destroying scale. It throws a flame similar to a plumber's torch and when properly used does not injure the trees.

Proposed Code for Pomological Nomenclature.

We are indebted to Prof. F. A. Waugh for a copy of the following rules, advanced by the Horticultural Club of Cornell University for the guidance of horticulturists in the naming of fruits. We are of the opinion that similar regulations might be applied to all departments of horticulture with considerable advantage, and it is hoped that our national societies may soon be enabled to adopt such measures as will insure a greater degree of accuracy and convenience than now obtains in the use of names.

FORM OF NAME.

1. The name of a variety of fruit shall consist of one word, or at most of two words.

In selecting names simplicity, distinctiveness, and convenience are of paramount importance. Pitmaston Green Gage and Louise Bonne de Jersey are neither simple nor convenient. Gold, Golden, Golden Drop, Golden Beauty and Golden Prune, all given to different varieties of plums, are not distinctive.

The use of such general terms as seedling, hybrid, pippin, buerre, damson, etc., is not admissible.

Nouns must not be used in the possessive form. McIntosh's Red, Crawford's Early, Bubach's No. 5, must be written McIntosh Red, Crawford Early and Bubach. Numbers are to be considered as temporary expedients to be used while a variety is under trial.

The name of no living horticulturist should be applied to a variety without his full consent; and the name of no deceased horticulturist should be used without the general agreement of living horticulturists.

An author publishing a new variety should use the name given by the originator, or by the introducer, or else should choose the oldest discoverable local name, providing such name may be conformed to these rules without loss of identity.

2. In the full and formal citation of a variety name, the name of the author who first published it shall also be given.

Names would then take such forms as the following: Summer Queen, Coxe; or Hale (Hale); or Sophie (J. W. Kerr, Cat. 1894); or America, Burbank, New Creations, 1898, p. 5.

It is expected that such citations of names will be used only in elaborate works on pomology, in scientific publications, or in some cases where they are necessary for clear discrimination of synonyms.

PRIORITY.

3. No two varieties in the same group shall have the same name; and the name first published for a variety must always be used to designate it. All names subsequently published must stand as synonyms

The term "group" as here used shall be held to designate the large general groups specified by words in common language, such as raspberry, plum, apricot.

PUBLICATION.

4. Publication consists in (a) the public distribution of printed name and description, the latter giving distinguishing characters of fruit, tree, etc., or (b) in the publication of a new name for a variety properly described elsewhere.

Such a publication may be made in any book, bulletin, report, trade catalogue or periodical, providing the issue bears the date of its publication, and is generally distributed among nurserymen, fruit-growers and horticulturists.

REVISION.

5. No one is authorized to change a name for any reason except when it conflicts with these rules.

AZALEA.

There has been a slump lately in the Romans and Paper Whites that are left over from the regular fall trade, and we want to get rid of ours just as badly as anybody, BUT, there is just this difference, the bulbs we have left are of regular full size, clean, smooth skins, and not the scraped-up cull lots left over on the other side and "consigned" here at any old price. Yet, we will sell at low rates NOW to clear them out.

Everybody is more pleased if you say "saw your ad. in the American Florist" when writing.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

VISITORS at Lawrence, Kansas, will find the finest bowling alleys in the west at the local club house in which Mr. Fred. Barteldes is interested.

St. Louis Bowling Record.

The attendance at the meeting of the bowling club, October 31, was affected by the night coming so near the first of the month, several of the regular attendants not being able to be present on that account. Interest, however, in the sport has not fallen off, although the attendance has decreased somewhat from this time last season.

Name.	1	2	3	4	5	6	Ave.
J. J. Beneke	172	166	193	143	137	153	160

R. F. T.

Philadelphia Pastimes.

The interest in bowling is still kept up, not so much from the high scores made as from the fun in the numerous small contests that take place. It is a fact, however, that few bowlers tire of the game while their scores are good, but if they get into a rut and luck seems against them they are noted for their absence. The following are the averages for the month of October; all games bowled are counted:

Moore	154	Craig	133
Goebel	149	Anderson	130
Smith	145	Kienhle	130
Moss	142	Rust	129
Connor	142	Star	126

Westcott	139	Watson	116
Longinotti	139	Lonsdale	104
Brown	138	Gibson	90
Archer	135		

K.

Chicagoans Choose a Captain.

After three games had been rolled at the last meeting it was proposed that a fourth should decide the captaincy of the team. The suggestion was immediately acted upon with the result that J. S. Wilson won handily with a score of 199. Following is the record of the evening's play:

Name.	1st.	2d.	3d.	Av.

Flatbush, N. Y.

The silver cigar holder won for best individual score in September by T. Brennan and by him generously put up again for another month's competition has been finally won by Eugene Daille-donze with a score of 208. Excitement was at fever heat last Thursday night when Alfred Zeller seemed to be on the track to win, but 201 was as high as he got. The attendance on this occasion was quite large, good scores were the rule and much enthusiasm prevailed. Messrs. Riley and Mellis officiated as captains for the evening.

P. J. HAUSWIRTH. J. S. WILSON.

PRESIDENT AND CAPTAIN OF THE CHICAGO BOWLING CLUB.

Toronto.

COOL WEATHER BRINGS GREAT IMPROVEMENT IN TRADE.—DUNLOP'S BIG ESTABLISHMENT.—HORTICULTURAL SOCIETY MEETING.—NOTES.

There has been a decided improvement in cut flower sales. The earlier varieties of chrysanthemums are coming in plentifully and good prices are paid without demurrer. The demand for Beauties is far ahead of the supply, but the quality of the stock is exceptionally good for this season of the year. Carnations are much in demand, but very scarce.

J. H. Dunlop had an order for a fashionable wedding in Hamilton during the week. A trip through his greenhouses shows everything in excellent order. Most of his chrysanthemums, as is the case everywhere, are late, but the early varieties are as good as could be desired, both in size and quality of bloom. Most of his greenhouses have been renovated during the past summer, and he mentioned in a casual way that he had used three tons of white lead. He is now building a large double-walled brick cellar as a cooling house for his cut flowers. His roses are being cut back till after the glut of chrysanthemums which is usual at this season. Very fine crops of carnations are coming on. Empress, Bon Ton, Triumph and White Cloud are especially good.

Arthur J. Frost reports an addition to the band of florists, weight about ten pounds.

George Mills is watching the development of an amber sport from Queen which he expects to give a good account of itself shortly.

Arrangements are about completed for the chrysanthemum show to be held next week, but many varieties do not look as though they would be ready.

The Toronto Horticultural Society held its usual monthly meeting on November 1. It was fairly well attended as there were nearly a dozen ladies present. Very little preparation had evidently been made for an interesting or instructive session. A few casual remarks by Geo. Mills on the care of dahlias and gladioli, by Alonzo Watkins on cannas and by Geo. Manton on roses and other hardy plants, being all that was tendered in that direction. The president, J. Mc P. Ross, who had promised a paper, was unable to attend. S. P.

SAN JOSE, CAL.—F. E. Bourguignon and H. L. Delaney have purchased the establishment of Emil H. Bourguignon.

MARYVILLE, N. Y.—A. T. Baldwin is completing a new greenhouse at Pleasantville which will be conducted by H. H. Ruland & Son.

EDGEWOOD, R. I.—George A. Pierce has retired from business on account of ill health and will be succeeded by his son, James A. Pierce.

SEATTLE, WASH.—Jos. Carbone and brother, of San Francisco, are now in the employ of the Puget Sound Seed Company at this point.

NEW HAVEN, CONN.—The Edward Malley Company will erect a winter garden modelled after the one in the Waldorf-Astoria in New York.

TERRE HAUTE, IND.—Supt. Snyder is selling the bedding plants at Collett Park. Geraniums go at 5 cents each and the proceeds will go into the park funds

KANSAS CITY, MO.—Geo. M. Kellogg, of Pleasant Hill, has opened his fine store here and will do a wholesale and retail business, handling both shrubs for yard planting and general florists' stock. He is not cramped for room as the main floor is 25x130 and the basement is 25x100. H. J. Millatt has arrived from Buffalo to take charge.

..AZALEAS..

WE are now filling orders for Azaleas, importations of which have arrived in excellent condition. Import prices will hold good as long as the stock is not potted; the varieties we supply are the most popular sorts suited to the American market and we give you any proportion you wish in the four leaders—

Mme. Vander Cruyssen, Vervaeneana, Deutsche Perle, Bernhardt's Andrea Alba.

Personal inspection of the stock in Belgium, through our own representatives, enables us to offer the best stock obtainable at bottom prices.

Order now and save heavy express charges later on, as shipments can at this time be made safely by freight.

J. L. SCHILLER, 404 East 34th St., NEW YORK CITY.

Say: "Saw it in the FLORIST."

Butte, Mont.

The recent report in regard to the losses of the florists by fire was in error, as Law Bros. & Day have suffered no loss. The only greenhouse destroyed was that of the Silver Bow Floral Co., now owned by L. A. Brouillard, of which a correct account was given. Mr. Brouillard has commenced to rebuild his place and will add considerable glass to the original establishment.

The Symans Dry Goods Company gave away 5,000 chrysanthemums at their opening last week. The store was handsomely decorated, Law Bros. & Day having charge of the floral work.

Chrysanthemums are in quantity now and bring from $3 to $4 per dozen. Roses are more plentiful, but not sufficient to fill the demand. Carnations are scarce and all flowers suitable for funeral purposes find a ready market at a good price.

The State Nursery Company, of Helena, is doing quite a business at its Butte branch.

Law Bros. & Day are figuring on building six new houses 20x105 for roses and carnations. They will use double strength glass 12x16 and heat by steam. E. L.

Little Rock, Ark.

George Vestal died October 24 in New Mexico, where he had gone for his health. He was the eldest son of J. W. Vestal, the leading florist of Little Rock and was engaged in the nursery business. He leaves a wife and child.

Ray Tipton has gone into business for himself with two houses each fifty feet long, which is a pretty good start for a young man.

J. W. Vestal has built two new houses each 150 feet long. WM. GALLAGHER.

Do the American Florist a small favor Mention the paper when writing advertisers.

The Annual

...SPECIAL...

CHRYSANTHEMUM NUMBER

Of the American Florist has become an established feature eagerly looked forward to by our thousands of interested readers. This special issue for 1898 will appear

NOVEMBER 12

And will be of surpassing excellence. It will be handsomely illustrated, tastefully printed, widely read and of superior value as an advertising medium.

There will be no increase in advertising rates: $1.00 per inch, $30.00 per page of 30 inches; the usual discounts to those who are continuous advertisers.

Send Ads. NOW

Syracuse, N. Y.

The chrysanthemum show is now the all important topic. The officers and members of the Central New York Horticultural Society, under whose auspices the above will be held, are up to their ears in correspondence and work in connection with it. President Betts anticipates a most successful exhibition, more so than in former years. Through his and Secretary Campbell's untiring efforts many new features have been added to the show which will be good drawing cards. The Alhambra rink has been rented for the occasion and the balconies will be arranged into private boxes; already quite a number have been sold, the price being $10 each.

The attractions already outlined for the first night are an informal promenade followed by a musical programme, a genuine cake walk participated in by twelve young society people, a special programme by the Syracuse University Glee Club and a sword drill by the St. Johns Cadets, closing with an informal dancing party. Grove P. Rawson, of Elmira has been secured as judge and Chas. Bechstedt, of Oswego, and Peter Crowe, of Utica, are to be his associates. Thos. Bishop will be superintendent of the exhibition.

There are a large number of special prizes, competition open to all, principal among them being a silver vase for the best individual exhibit, and a high grade Barnes White Flyer wheel for a new and distinctive white variety to be afterwards named and known as the White Flyer. Not less than six blooms nor more than twelve of a kind can compete for this prize. There are many other attractive premiums. Out of town exhibitors not accompanying their exhibits should send them to D. Campbell, 217 Warren street. The schedule reads that entries shall be made not less than six days before date of show, but owing to later special prizes three days will be sufficient for out of town exhibitors, whose patronage is earnestly solicited. Around here midseason varieties are rather backward and fine weather is needed to have them in their prime by the date of the opening.

CHRYSANTHEMUMS MONOPOLIZE ATTENTION.—ROSES PLENTIFUL AND CARNATIONS SCARCE.—AMONG THE GROWERS.—MICHEL TAKES ONE IRON FROM THE FIRE.—NEW RETAIL STORES.

Trade for the past week has been rather quiet although chrysanthemums have been coming in a little more freely than at last accounts, some of the very good earlier varieties occasionally bringing as high as $3 per dozen, selling from that all the way down. Some very fine Sunderbruch have been received for which $3 per dozen is asked. Nobody, however, has been found to take them from the wholesaler at these figures. The prevailing impression is that prices obtained for the last two or three years will not be duplicated the coming season. Roses are coming in much more plentifully; they may be said to be rather an over-stock.

In driving around St. Louis county among the carnation growers it was my good fortune to stop at C. C. Sander's place. His carnations are in very good shape, especially Scott and Alaska. The roses, especially Bridesmaid, are looking well. The grounds surrounding the greenhouses, are used for nursery purposes, of which stock he has a fine assortment.

At J. W. Dunford's the finest lot of carnations were benched that it has been my good fortune to see around St. Louis. The cut for the present season promises to be very heavy and the quality will be fully up to his usual standard. He is a great believer in feed and while he has not started as yet he expects to do so shortly. It will be principally applied in the shape of mulching. The violet house is in elegant shape, Californias being especially promising. These are fine companions for the carnations and the cut when the crop comes on will be enormous. Small singles are also grown, it being found last season that these paid as well as the Californias. Doubles are represented by Farquahar, though these have not been given a fair trial until the present season. It is probable if they prove satisfactory they will be grown more extensively next year.

Mrs. Ayers, formerly of the Ayers Floral Co., has opened a temporary store on Grand avenue. There is a handsome store and greenhouse being erected for her next door to the building occupied at present. The completion of this will place three well equipped flower stores within a radius of half a block, with another within one block.

Will Jordan, son of L. M. Jordan, of the Jordan Floral Co., has opened a retail store at 517 Locust street. Mr. Jordan has also under his charge the greenhouses on Kings Highway formerly operated by the Jordan Floral Co. and his retail store in connection with the greenhouses should prove a good combination.

H. G. Berning has succeeded E. H. Michel as president and manager of the St. Louis Cut Flower Co. Mr. Michel is giving his attention to his Old Orchard plant and to the Michel Plant and Bulb Co. and has his hands full.

From present indications the chrysanthemum show will be a success. The only drawback so far appears to be that the plants are a shade late and the best blooms will not be ready for exhibition. Outside of this, however, everything is progressing favorably, both in regard to interest shown by the florists and general public. R. F. T.

THE HARRISH DISEASE can be prevented by immersing the bulbs for ten hours in a half solution of 99 per cent.

The MODEL Extension Carnation Support

QUEENS, N. Y., Feb. 16, '97.
MR. THERON PARKER, Brooklyn, N. Y., Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention.
Very truly yours,
C. W. WARD.

FLATBUSH, BROOKLYN, N. Y., Feb. 18, '97
MR. THERON PARKER, Dear Sir:—Your wire stake is certainly a gem Without hesitating we indorse it as an up-to-date carnation support. Yours truly,
DAILLEDOUZE BROS.

CHRYSANTHEMUMS AND VIOLETS THE ONLY FLOWERS IN DEMAND.—HALLIDAYS' CARNATIONS.—OTHER TOPICS.

Trade has been very slow the past week with nothing in demand but chrysanthemums and violets. The first named are in prime condition and many fine varieties are seen. There is little call for roses and carnations, though there is a marked improvement in quality and a greater abundance.

Our store windows are filled to overflowing with Beauties, Bridemaids, Brides and Meteors. Some of our florists have the carnation craze and have cultivated this sweet flower in great abundance. Halliday Bros. are of this number, having five large houses devoted exclusively to Victor, Daybreak, Tidal Wave, Portia, Wm. Scott, Lizzie McGowan and Flora Hill, all in fine condition.

Samuel Feast & Sons have a new sport from La France; rose; shell pink, large flower, sturdy stemmed and with no thorns; a splendid keeper, which they have named Ekas, after their late foreman, Wm. Ekas.

The Gardeners' Club held its meeting on October 24 with a good attendance. Chas. Seybold gave an interesting talk upon succulents.

Fred. Bauer, formerly with I. H. Moss, Govanstown, has taken J. H. Hantske's place and branched out for himself.

A. R. J.

Milwaukee.

BINZEL & KELLNER WILL SEE THAT THE CREAM CITY HAS A FLOWER SHOW.—NOTES AMONG THE GROWERS.

The city seems sure to have its annual flower show for some one invariably "bobs up" and runs it on their own account whenever the club fails to do so. This time Binzel & Kellner have taken hold of the matter. They will not hire a hall as their new quarters are unusually large. They have issued a premium list that will enable growers of cut flowers to compete, and have arranged for judges. No prizes are offered which will interest others than growers, but they will themselves provide a good display of decorative stock. The show will be free to the public.

Thompson & Sons are growing a large stock of geraniums, hydrangeas, genistas and primroses.

Archie Middlemass' carnations are looking well and he is strong in Boston ferns and Adiantum cuneatum.

C. Zipnick has built another house, increasing his violet stock considerably. His mignonette is more backward than usual this season.

Mr. Zweifle's carnations are very good, including new varieties. His chrysanthemums are to the front.

John Bartels leads in mignonette.

C. B. W.

Wichita, Kans.

H. L. Hunt, late of Jamestown, N. Y., has entered into partnership with W. H. Culp, the firm name remaining W. H. Culp & Co. They have added about 1600 feet of glass to their greenhouses, most of the additional room being planted to carnations. They have a fine location in the best residence portion of the city, and are well equipped to take care of their constantly increasing business. Mr. Culp had the misfortune to fall from a tree which he was topping on the morning of October 29, breaking his right arm near the wrist.

BUSINESS SITUATION SHOWS A MATERIAL IMPROVEMENT.—CHOICE STOCK MEETS WITH READY SALE.—GOOD CHRYSANTHEMUMS.—NOTES AND VISITORS.

Trade, which was somewhat dull and backward during the dark, rainy weather which prevailed last month, is improving daily and Beauties, chrysanthemums and all choice stock meets with ready sale.

Flowers of all kinds, except carnations, are abundant and of good quality. Beauties are in good demand, with a supply about equal to the requirements. Meteors, Brides and Bridesmaids are of excellent quality. Woottons, Perles and Sunsets are in favor and are readily disposed of. Carnations are still somewhat off crop, with blooms of indifferent quality, due in a great measure to hot weather early in the season, which forced everything out.

The chrysanthemum season is now fairly opened. Mrs. Henry Robinson in white, Pennsylvania in yellow and Autumn Glory in pink are a fine trio, just now at their best. Glory of Pacific is disappointing on account of its uneven color. The most prominent of the lesser lights now to be seen are Whilldin, Domination, Ivory, Yellow Queen and Elvena. Wholesale prices range from $1 to $2 per dozen.

L. L. May & Co. have a very promising sport from Mrs. Bradt carnation, a beautiful rich red of enormous size and fine keeping qualities. This firm is cutting some very choice Siebrecht roses, this variety improving with them each year.

Harrisii bulbs are reported as badly diseased by most of the growers. Longiflorum from Japan are just now arriving and it will keep our florists busy until Easter to get them into bloom.

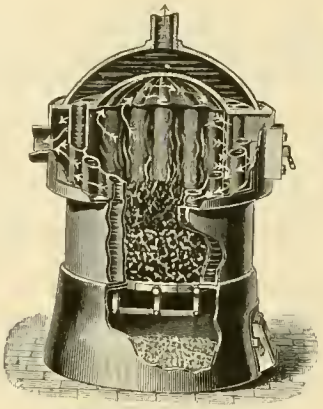
Visitors: Joseph Rolker, C. P. Braslan, S. Y. Haines, Arnold Ringier.

FELIX.

Newburyport, Mass.

E. W. Pearson is cutting some fine chrysanthemums and his Daybreak carnations are the best in this neighborhood.

Kent & Marsh have some fine white seedling carnations which bid fair to make a name in the market. They also have a fine magenta carnation, but it is rather early to judge it, as this is its first season.



G. Coffin, who five years ago sold out his establishment on Chapel street to C. G. MacGregor has again gone into the business. He has erected a greenhouse 12x50 and is growing carnations and general bedding stock.

Jos. L. Freeman, the Amesbury florist, expects to start shortly for Los Angeles, Cal., where he intends to go into growing gladioli, callas and tuberoses on a large scale for the wholesale market. His mother will probably carry on his business here.

E. P

LOWELL, MASS.—Edwin Sheppard is the latest addition to the lengthening list of victims of the nimble palm swindler. The method of procedure was the same as often described in these columns and Mr. Sheppard's debit in the transaction is about $50.

SOUTH BEND, IND.—The annual chrysanthemum show will be given at the home of Clem Studebaker about the middle of the present month.

Telephone Lake View 88.

375 LINCOLN AVE., CHICAGO.

Providence, R. I.

Business reports are fairly good. Chrysanthemums and roses have begun to come in quite plentifully. Violets are a little shy as yet. Carnations have held their sway this fall and the quality has been good for the early crop.

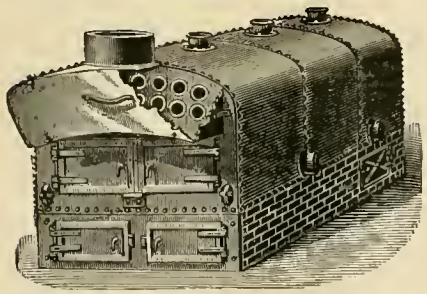
The suburban establishments of A. W. Medbury, W. E. Nichol, W. Maxfield and W. C. Diamond, of Barrington, who make a specialty of carnations and violets, have houses well stocked with flattering prospects of a good cutting this season. Geo. E. and E. R. Seymour, of Warren, have a fine stock of carnations and violets.

Messrs. Macrae, Williams, Hazard and the Rhode Island Greenhouses are the principal growers of chrysanthemums for special cut flower trade. Prices this year are low compared with former years. Good well grown flowers bring from 50 cents to $1.50 per dozen; it is only fancy blooms that bring the maximum price.

The chrysanthemum exhibition to be held by the Rhode Island Horticultural Society will be on November 7–11. Fears are expressed by a number of would-be exhibitors that the date of the show is about ten days early, as many varieties will not be at their best.

The next meeting of the Florists' and Gardeners' Club of Rhode Island will assume the nature of a ladies' night. An efficient committee has the affair in hand and no doubt success will be the result.

James Crawshaw has opened a branch store on Westminster street in connection with his business in Olneyville. The store is very attractive.



J. F. Parks & Co. have opened at their winter quarters at 142 Westminster street and have put in a commodious refrigerator for cut flowers. Fannie E. Carter manages the store with her usual aptitude.

James Day, formerly at the greenhouse on the Eaton farm, has gone out of business and is employed at Geo. Johnson & Son's.

Wm. Hoffman, of Pawtucket, has returned from his trip to Europe, much improved in health, after a three months' vacation. LITTLE RHODY.

DES PLAINES, ILL.—F. L. Pruse is growing 32,000 carnations, a slight increase over last year. His leading varieties are Daybreak, Lizzie McGowan, Wm. Scott and Portia. He has both Jubilee and Flora Hill on trial, but they do not do very well and he thinks his soil is too light for them.

THE EXHIBITIONS.

Chicago.

Superintendent Rudd had the eighth annual chrysanthemum show of the Horticultural Society of Chicago in full running order on Tuesday morning, the 8th. The judges were John F. Cowell, A. Herrington, Emil Buettner. The Keith Building, corner of Wabash avenue and Monroe street, with two floors, each 125 x175 feet with fifteen foot ceiling, gave the best floor space ever available to this society for the flower show.

The walls and stairways had been decorated with a carload of oak branches, mixed with a liberal supply of wild smilax, but the grand and attractive feature was the liberal electric lighting. Festoons of incandescent lights with metal reflectors were arranged in some twenty lines on each floor and were so adjusted that the same could be economically used with the available outside light. The floor space was much better adapted for grouping and passage ways for visitors than the old armories, and Superintendent Rudd was not slow to avail himself of this fact.

The weather is what the craft have come to call regular chrysanthemum weather. Blustering rain was the rule Tuesday and Thursday, with a slight let up on Wednesday. The box office shows $500 shortage over last season on Wednesday night, and a great deal more Thursday night.

In arranging the exhibits, the place of honor on the first floor, a space some fifteen by twenty feet with a cordon of electric lights was allotted to J. Algots, gardener to Mrs. Geo. M. Pullman, and the large ferns and palms which he used were wisely chosen, reaching well into the upper space and giving a tropical effect. Next in decorative plants was Geo. Wittbold's fine group, the arrangement of which in the south-west corner was especially admired, and north of these was an excellent display from Head Gardener Stromback, of Lincoln Park, containing some very choice palms, crotons, pandanus and anthuriums. Ernst Weinhoeber made a neat display of palms in the west center, embellished with some cut blooms of chrysanthemums and roses. Well grown geraniums, dwarf as well as standard, shown by four different exhibitors in lots of ten well scattered through the building, supplied patches of color not available in the chrysanthemums.

The show of chrysanthemum plants this time was perhaps a little scant, hardly equal to former seasons, and as we have stated, nearly all exhibitors were handicapped by the fact that the plants would not be ready for a week or ten days. Nevertheless, there were some very excellent specimens in the bush varieties, and quality nearly made up for lack of quantity. In the standards Chicago has never had a better exhibit. Those grown by Robert A. Mueller, gardener for A. S. Trude, as well as those from Vaughan's Greenhouses, were excellent. Two specimens of grafted plants, showing a dozen varieties, one a standard by Robt. Mueller, and the other fan-shaped from Vaughan's, attracted much attention.

In the single stem classes, Henry Smith and Crabb & Hunter, of Grand Rapids, Mich., showed excellent work, the former taking first with twenty-five magnificent Bonnaffons and the latter first in white with a double block of Mrs. H. Robinson. Mr. W. N. Rudd won the prize premium in a mixed block with Viviand-Morel and Mrs. Perrin. Vice-president Uihlein, A. Skoldager, gardener, displayed a very extensive collection of orchids arranged on rock work while an aquarium with aquatics and gold fish embellished the display. Another feature in Mr. Uihlein's exhibit was several blocks of ice in which handsome cut orchids and ferns had been frozen.

The handsome geraniums, whose effective coloring we mentioned above, were fully equal if not better than those shown last year, and in larger numbers. C. W. Johnson, at Mr. Rudd's place, Vaughan's display and the grafted ones from Mr. Mueller were all good. Chas. A. Samuelson made an excellent display of cut flowers, chrysanthemums, roses, violets, etc., handsomely arranged in silver vases, with a background of palms and Asparagus Sprengerii. The use of the latter in a general way, was almost a feature of the show, half a dozen very fine plants being effectively placed on both floors.

The second floor was devoted to cut blooms. The classes of cut blooms and the table decorations, the latter being shown daily after Tuesday, were exceptionally good. The display was far superior to last year, competition being especially strong in classes of twenty-five blooms of a color and in the classes of twelve, twenty and forty varieties. The awards in these as well as other classes

we have mentioned, will be found in part in this issue. The international classes were shown from the following states: Colorado, Illinois, Indiana, Maryland, Michigan, Missouri and Ohio.

Wednesday was rose day and the entries were not as full as in former seasons. The South Park Floral Company, of New Castle, Ind., did themselves proud by winning first prize on American Beauties. Bassett & Washburn were certainly a very close second, their stock in foliage, stem and bloom being much admired. J. A. Budlong showed some excellent Beauties, Brides and Bridesmaids. Wietor Brothers showed Brides and Henry Smith's Meteors were very fine.

The table decorations, which were first shown Wednesday, were awarded prizes as follows: C. A. Samuelson, first with a compact center bunch of white, Gretchen Buettner, trimmed with Asparagus Sprengerii; Klunder-Thiele Floral Co., won second, with a high vase of Modesto, and ornamented at the base with adiantums and small chrysanthemums. The Art Floral Company were given third place with a very artistic vase of Niveus, the base trimmed with white chrysanthemums and Asparagus Sprengerii. This table was much admired. Messrs. Anderson, Lange and Wittbold made a creditable showing on the second day. Roses were prescribed for the table decorations Thursday and the American Beauty was used on four tables out of six, the exceptions being Geo. Wittbold's decoration with Bridesmaids and the Kaiserins used on the Anderson Floral Company's table, supplied by Reinberg Bros., the latter taking first prize; the Art Floral Company was second; A. Lange third.

The Illinois Cut Flower Co., supplied chrysanthemums for the Samuelson, Anderson, Lange and Klunder-Thiele tables on Wednesday.

Messrs. Bassett & Washburn supplied Beauties for the Anderson, Lange and Samuelson tables on Thursday. Messrs. Weitor Bros. supplied the Beauties for the Klunder-Thiele, Art Floral and Lange tables on Thursday. Mr. Geo. Wittbold used his own roses.

AWARDS.

Cut blooms of chrysanthemums:

Twenty-five blooms, one variety, white, first, W. N. Rudd, Mt. Greenwood, Ill., with Mayflower; second, Bassett & Washburn, Chicago.

Twenty-five blooms, one variety, yellow, first, Hinsdale Rose Co., Hinsdale, Ill., with Major Bonnaffon; second, W. N. Rudd.

Twenty-five blooms, one variety, pink, first, W. N. Rudd with Autumn Glory; second, E. G. Hill & Co., Richmond, Ind.

Twenty-five blooms, one variety any other color, first, E. G. Hill & Co., with Nyanza; second, W. N. Rudd.

Twenty varieties, one bloom each, first, E. G. Hill & Co., second, W. N. Rudd.

Twelve varieties, one bloom each, first E. G. Hill & Co., second, W. N. Rudd.

Twelve blooms, one variety, competition limited to varieties in commerce named after Chicago ladies; Mrs. John J. Glessner, Mrs. Martin Ryerson, Miss Florence Pullman, Mrs. Wm. C. Egan, Mrs. W. H. Rand, Mrs. Geo. M. Pullman, Mrs. Arthur J. Caton, varieties eligible to compete; premium a silver cup valued at $25, which went to E. G. Hill & Co., for Mrs. Wm. C. Egan.

Six blooms, one variety, white, first, E. G. Hill & Co., with Mrs. Seulberger, second, W. N. Rudd.

Six blooms, one variety, yellow, first, W. N. Rudd with Modesto, second, E. G. Hill & Co.

Six blooms one variety, pink, first, W. N. Rudd with Mrs. Murdock, second, J. Hartshorne, gardener to H. N. Higinbotham.

Six blooms, one variety, red, E. C. Hill & Co. with Casco, second, Crabb & Hunter.

Six blooms, one variety, bronze, E. G. Hill & Co. with Bruant, second, W. N. Rudd.

Six blooms, one variety, any other color, W. N. Rudd with Henry Nanz; second, E. G. Hill.

Collection, named varieties, one bloom each, not less than forty varieties, first, E. G. Hill & Co.; second, N. Smith & Son.

Collection anemone varieties, one bloom each, not less than fifteen varieties, N. Smith & Son.

International competition:

Twelve blooms, twelve varieties, Colorado, Daniel B. Fisher, Denver; Illinois, J. Hartshorne; Indiana, E. G. Hill & Co.; Maryland, E. Weber & Sons; Michigan, N. Smith & Co.; Missouri, W. A. Shinfilt; Ohio, Theo. Bock, Hamilton.

Twelve blooms, twelve varieties, competition restricted to prize winning exhibits in the international classes.

EXHIBIT OF THE ANDERSON ART CO. AT THE CHICAGO SHOW.

A protest having been filed in the International contest, the winning entry for the grand prize was disqualified and the remaining entries rejudged, with the result that the prize was awarded to James Hartshorne, the Illinois competitor.

Cut blooms of roses:

Twenty-five American Beauties, first, South Park Floral Co.; second, Bassett & Washburn.

Forty Kaiserin Augusta Victoria, first, Bassett & Washburn; second, South Park Floral Co.

Forty Bride, first, South Park Floral Co.; second, Bassett & Washburn.

Forty Bridesmaids, first, Bassett & Washburn; second, South Park Floral Company.

Forty Meteor, first, Henry Smith, Grand Rapids, Mich.; second, Bassett & Washburn.

Forty Perle, first, Bassett & Washburn; second, Wietor Bros.

Twenty-five any other variety Bassett & Washburn for Mrs. Robt. Garrett.

Six American Beauty, J. A. Budlong.

Twelve Bride, J. A. Budlong.

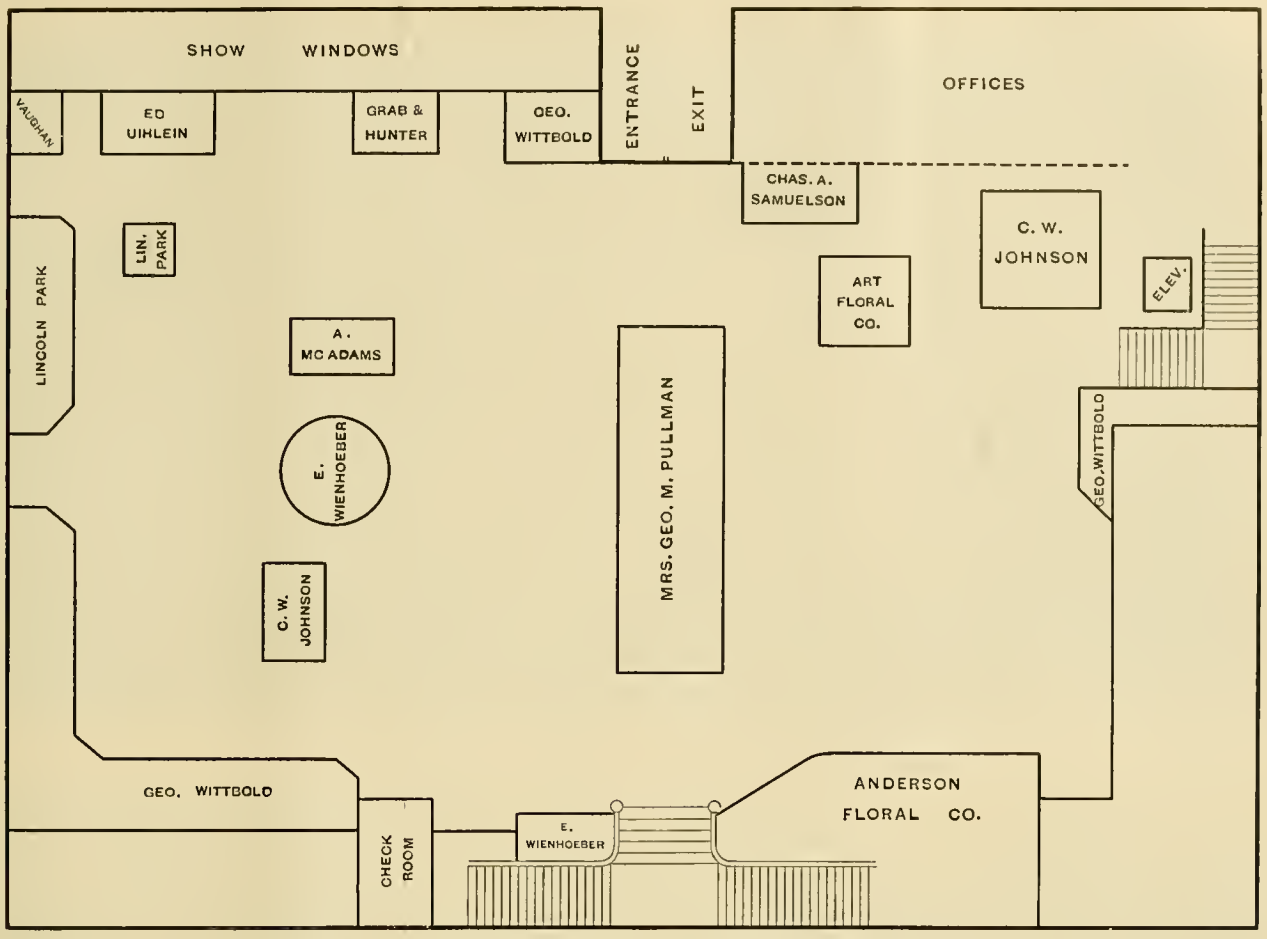
Twelve Bridesmaid, J. A. Budlong.

Twelve blooms of new rose never before exhibited in this country silver cup awarded to J. W. Dunlop, Toronto, Canada, for Lady Dorothea.

The awards for table decorations were made in the following order: First, Chas. A. Samuelson; second, Klunder-Thiele Floral Co.; third, Art Floral Co.; fourth, Anderson Floral Co. Messrs. A. Lange and Geo. Wittbold were also exhibitors in this section.

Chrysanthemum plants:

Specimen plant, white, first, W. N. Rudd with Helen Wright, second, Vaughan's Seed Store; yellow, first, W. N. Rudd, with H. Hurrell, second, Vaughan; red, W. N. Rudd, first with Defender, Vaughan second; bronze, Vaughan's Seed Store first; any other color, Vaughan first with C. B. Freeman.



Specimen standard not less than thirty inches high, white, W. N. Rudd first with Mrs. Ryerson, Robt. Mueller, gardener to A. S. Trude, second. Standard not less than thirty inches high, pink, W. N. Rudd first with Mrs. Murdock, Robt. Mueller second. Yellow standard, Robt. Mueller first with W. H. Lincoln, W. N. Rudd second.

In the class for five standards Vaughan was first with W. H. Lincoln, Mrs. C. B. Freeman, The Bard, Beauty of Truro and Louis Boehmer, Robt. Mueller second. W. N. Rudd was awarded first for five standards in 10-inch pots, Robt. Mueller second. The prize for five standards in 8-inch pots was secured by Vaughan's Seed Store.

Twenty-five plants grown to a single stem, Crabb & Hunter, Grand Rapids, Mich., first with Mrs. Henry Robinson, A. McAdams second; twenty-five yellow, Henry Smith, Grand Rapids, Mich., first with Bonnaffon, Crabb & Hunter second; twenty-five pink, W. N. Rudd first with Viviand-Morel, Crabb & Hunter second; ten plants of W. H. Chadwick, first W. N. Rudd; one plant naturally grown, first Vaughan's Seed Store with The Bard, second W. N. Rudd; one plant grown single stem, first Crabb & Hunter with Mrs. Henry Robinson, second, Henry Smith.

Cut blooms of carnations:

Special premiums for fifty blooms of Argyle, first Wietor Bros., second Chicago Carnation Co., Joliet, Ill.; fifty blooms Flora Hill, first Bassett & Washburn, second W. N. Rudd; fifty Lizzie

GENERAL PLAN OF GROUPING ON MAIN FLOOR AT CHICAGO SHOW.

McGowan, first Hinsdale Rose Co., second, Wietor Bros.; fifty Alaska, first, Wietor Bros.; second, South Park Floral Co., New Castle, Ind.; fifty any other white, first, Bassett & Washburn; second, South Park Floral Co.; fifty Jubilee, first, Bassett & Washburn; second, Wietor Bros.; fifty Mrs. McBurney, first, W. N, Rudd; second, Bassett & Washburn; fifty Wm. Scott, first, Bassett & Washburn; second, Wietor Bros.; fifty Daybreak, first, Hinsdale Rose Co.; second, Bassett & Washburn; fifty Triumph, first, Wietor Bros.; second, Bassett & Washburn; fifty any other pink, not lighter in color than Wm. Scott, first, W. N. Rudd, with Cerise Queen; second, Hinsdale Rose Co., with Bridesmaid; fifty any other pink, lighter in color than Wm. Scott, first, Chicago Carnation Co., with Victor; second, South Park Floral Co., with Albertini; fifty Armazindy, first, Wietor Bros.; second, Chicago Carnation Co.; fifty Helen Keller, first, Chicago Carnation Co.; second, Bassett & Washburn; fifty blooms any other striped except those with yellow ground, first, Bassett & Washburn; fifty blooms Mayor Pingree, first, Bassett & Washburn; second, W. N. Rudd; fifty any other yellow, first, Bassett & Washburn; second, Chicago Carnation Co.; twenty-five white, introduction of 1898, first, Bassett & Washburn with White Cloud; second, Wietor Bros. with Evelina; twenty-five pink, introduction of 1898, not lighter in color than Wm. Scott, first, W. N. Rudd; with Cerise Queen; second, Wietor Bros. with Argyle; twenty-five pink, introduction of 1898, lighter in color than Wm. Scott, first, Chicago Carnation Co. with Mrs. Jas. Dean; twenty-five red, introduction of 1898, first, Wietor Bros. with Bon Ton; second, Chicago Carnation Co., also with Bon Ton; twenty-five any other color, introduction of 1898, first Chicago Carnation Co. with Gold Nugget (yellow); fifteen blooms Lizzie McGowan; first, Fred. Bahr, Highland Park, Ill.; fifteen blooms Jubilee, first, Jas. Hartshorne; fifteen blooms Mrs. McBurney, first, South Park Floral Co.; fifteen blooms Tidal Wave, first, Fred. Bahr; fifteen blooms Daybreak, first, Jas. Hartshorne; second, South Park Floral Co.; fifteen blooms any other pink not lighter in color than Wm. Scott, first, F. R. Hills, Maywood, Ill.; second, Jas. Hartshorne; fifteen blooms any other pink, lighter in color than Wm. Scott; first, Jas. Hartshorne; fifteen blooms Armazindy, first, Jas. Hartshorne; fifteen blooms Helen Keller, first, South Park Floral Co.; fifteen blooms Mrs. Geo. M. Bradt, first, Jas. Hartshorne; fifteen blooms Mayor Pingree, first, Jas. Hartshorne; fifteen blooms pink, introduction of 1898, not lighter in color than Wm. Scott, first, Jas. Hartshorne.

Miscellaneous plants:

Most interesting plant of any kind, Robt. Mueller first with chrysanthemum bearing fourteen different varieties, including Marguerites; second Vaughan's Seed Store.

Ten geraniums, not over 10-inch pots, white, first, Vaughan's Seed Store; second, W. N. Rudd.

Ten geraniums, pink, first, Vaughan's Seed Store; second, W. N. Rudd.

Ten geraniums, red, first, Vaughan's Seed Store; second, W. N. Rudd.

Ten geraniums, ivy leaf varieties, W. N. Rudd.

Ten geraniums, variegated foliage variety, first, J. Cook, of Downer's Grove, Ill.; second, W. N. Rudd.

Ten begonias, not less than five varieties in not less than 10-inch pots, first, J. Algots; second, James Hartshorne.

Ten cyclamens, first, Fred Bahr; second, Kalous Bros.

Collection of cypripediums, E. G. Uihlein.

Collection of orchids, other than cypripediums, E. G. Uihlein.

Collection of ferns, first, J. Algots; second, Geo. Wittbold.

Ten foliage plants, six varieties, second divided between E. G. Uihlein and Geo. Wittbold.

Palm, first, Geo. Wittbold; second, J. Algots.

Basket of Asparagus Sprengerii, first, Bassett & Washburn; second, W. N. Rudd.

Display of stove decorative and greenhouse plants arranged for effect, first, Geo. Wittbold; second, J. Algots.

Same display open only to commercial florists, Geo. Wittbold.

Two hanging baskets, first, J. Algots; second, Geo. Wittbold.

Araucarias, first, Art Floral Co.; second, Robt. Mueller.

Dracæna, prizes divided between Geo. Wittbold and J. Algots.

Boston fern, first and second, J. Algots.

Adiantum Farleyense, first, Art Floral Co.; second, Geo. Wittbold.

One other fern, first, J. Algots; second, Vaughan's Seed Store.

Foliage plant, J. Algots.

Six araucarias, Geo. Wittbold.

Special nine geraniums, W. N. Rudd.

Philadelphia.

That the chrysanthemum is not done is evidenced by the good displays of these still popular flowers at the exhibition of the Pennsylvania Horticultural Society, which opened November 8. There were more large chrysanthemum plants than last season, and most of them better grown, but a little too much green-plant-stake seed had evidently been sown in many of the pots and had thrived wonderfully. The stake also entered somewhat into the competition; in fact, in the premium offered for the best pair of plants it was stipulated in the schedule that not more than eight stakes would be allowed to a plant. The varieties that won this prize were Mutual Friend and Mrs. Emerson. The first prize specimen plant was Mrs. H. Robinson; second, Frank Hardy. First specimen plant, any color, was won with Georgiana Pitcher; second, with Sam Weller. The prize six plants with single blooms, was won with Minerva; second with Mrs. Geo. Morgan and third Mrs H. Robinson. The prize for four Japanese varieties was secured with Minerva, Golden Queen, Mutual Friend and Geo. W. Childs. The best three yellow were Major Bonnaffon, Georgiana Pitcher and Lincoln, The best three of last season's introduction were Defender, Sunstone and Bonnie Dundee. Best four plants in four colors were Defender, Mrs. McK. Twombley, Golden Gate and Ostrich Plume.

Yellow varieties predominated in all the exhibits, and in a look over the whole from the platform at least half appeared to be of that color. The center of the floor contained Hugh Graham's exhibit, which was beautifully arranged and received the gold medal of the society as a work of decorative art. There was about the usual display of cut blooms and John Cullen, gardener to Percival Roberts, Jr., was easily first with his magnificent display of over five hundred blooms, embracing sixty-five varieties. Hugh Graham's flowers were also of the finest grade, and Philadelphia and Pennsylvania as grown by him are conspicuous wherever shown. He won eleven first and four second premiums.

John N. May won first prize with Mme. Carnot for the best new yellow, also a certificate of merit. This was clearly the largest flower in the show, the blooms measuring nine inches in diameter as they stood. The prize for six blooms crimson was also awarded to Mr. May on John Shrimpton. An exhibit of pompons by him was very pretty and received first prize. He also received first for best American variety, not disseminated, on six blooms Silver Wedding. Best American variety, pink, was given to the American Rose Co., Washington, for a sport of Pink Ivory. A grafted plant containing seventeen varieties attracted considerable attention and was awarded a special prize.

The foyer was a fern paradise and contained the various collections of this class of plants. There were many perfect specimens, and in this department we believe the show exceeded that of any other season. In the lower hall the H. A. Dreer Co. made a splendid display of handsome palms, ferns, bays, laurels and other decorative plants. A decorated tank contained water lilies. Their bank of ferns in pans consisted of forty-one varieties, all very well grown and several of them new and rare. Jas. Hurley received a certificate for a remarkably fine specimen of Nephrolepis Bostoniensis. Robert Craig & Son exhibited a fine lot of crotons arranged on a circular table. John Shellem's collection of crotons were especially well colored and he received first prize for the best twelve and first for specimen. H. Alburger's group of standard chrysanthemums were very pretty plants and attracted considerable attention. A very unique exhibit was made by Jos. McGregor, who staged three dozen very fine plants in 8 and 9-inch pots with from twelve to twenty blooms on each.

Mr. Clinkaberry's table of over fifty plants of orchids in flower was also a very attractive spot. Renanthera Lowii with a four-foot spike of bloom was labled "from the Philippines." He received a certificate of merit. Westcott Brothers' group of palms was very well arranged as was the one entered by John Hobson, gardener to E. A. Schmidt, Radnor. These groups were arranged against the wall and did much to relieve the gay colored chrysanthemums. John Thatcher exhibited a very well flowered plant of Ixora Williamsii, also Aralia Guilfoylei, a fine specimen six foot high and well colored. He received first prize for a collection of ferns.

The rose exhibit called out quite a collection. The feature of this display were the new candidates for public favor, chief among which was Liberty, exhibited by Ernst Asmus and Alexander Scott, which Robert Craig says is the best introduction since the Bridesmaid. John Cook showed a fine full blush seedling and the American Rose Co. exhibited Golden Gate and a new one, Mme. Jules Groliez.

On carnation day a choice lot of blooms were staged, quality rather than quantity being the rule. The principal contest was for the Robert Craig silver cup for the best American seedling not yet disseminated. Out of eight entries it soon narrowed down to an unnamed seedling of John Shellem's and Mrs. T. W. Lawson, Peter Fisher's entry from Ellis, Mass. The judges finally gave the prize to the Mrs. T. W. Lawson. The American Rose Co. has a fine variety in Mephisto, a good red, almost the color of Portia. A. M. Herr, Lancaster, exhibited some California seedlings, at least two of which are good. Dailledouze Bros. had a vase of a large white faintly streaked, called J. Whitcomb Riley. Craig & Son had six good commercial sorts in Painted Lady, Victor, Mrs. F. Joost, Evelina, Jubilee and Gold Nugget. A vase of the new Melba was conspicuous. It is an ideal pink and a large flower.

H. F. Michell made an exhibit of his specialties and the H. A. Dreer Co. had a

ONE OF GEO. WITTBOLD'S EXHIBITS AT THE CHICAGO SHOW.

VAUGHAN'S SPECIMEN CHRYSANTHEMUMS AT THE CHICAGO SHOW.

similar display which included Japanese bronze jardinieres. The Stoke-Pogis Nurseries ornamented the street entrance and foyer with a choice collection of their evergreens in tubs, all correctly named. Inside the foyer the Andorra Nursery Co. had a display. K.

Boston.

The annual chrysanthemum show of the Massachusetts Horticultural Society is now on, favored with the most delightful weather and an unprecedented attendance of the craft from distant points. There is no exhibition in the country that can compare with this in the high quality of the exhibits; this is as true this year as it was last year. The flowers shown are simply wonderful and the entire absence of any but high grade blooms is especially noticeable. The lower hall holds the cut flower exhibits. The arrangement of tables is decidedly awkward, the effect poor and the hall badly overcrowded. At the time of writing, the prizes are not all awarded. The big vases, which are always a prime attraction at this show, are well filled with enormous, long stemmed blooms, in arranging which the operators required the use of a step ladder. Robert Laurie wins first prize with a vase of Peter Kay (Jeannie Falconer) and Alex. McKay, C. H. Souther, C. Sandiford, gardener, and Miss E. J. Clark, John Ash, gardener, follow in order named.

The vases of ten long stemmed blooms each make a big showing. Those from Waban Conservatories are superb, especially Eugene Dailledouze, Phenomenal, Frank Hardy, Jeannie Falconer, Autumn Glory, Mrs. Jerome Jones, Rustique and Golden Wedding. Alex. McKay's Modesto, Chas. Davis, Viviand-Morel, Maj. Bonnaffon and Eureka, in the same classes, are also grand. Eureka is a splendid white, which would lead the race if Frank Hardy were not in the way. The predictions for the latter variety, made last year, are more than verified. No variety on exhibition here attracts so much admiration, and it is well worthy of it. A surprise to all are the blooms of Pink Ivory shown by H. Dumaresq, W. Downs, gardener. They beat anything ever seen here, either in white or pink.

The classes of six, twelve and twenty-five blooms in single vases are very extensive and the great round specimens stand rank after rank, in a profusion that must fairly bewilder the committees that have to judge between them. Among the prominent contributors in this section are Mrs. P. B. Cheney, John Barr, gardener, Jas. L. Little, Geo. B. Green, gardener Jas. Nicol, S. J. Goddard, Edw. Whitin, O. B. Robb, gardener, A. F. Whitin, Thos. Howden, gardener, N. T. Kidder, W. J. Martin, gardener, E. S. Converse, D. F. Roy, gardener, C. A. Souther, C. Sandiford, gardener, Dr. C. G. Weld, K. Finlayson, gardener, J. H. White, J. Wheeler, gardener, J. W. Howard and Robert Laurie; among the finest specimens shown are Laurie's Inter Ocean, Silver Cloud and Pluto; Howard's Chas. Davis and Mrs. O. P. Bassett; Kidder's Evangeline, Little's Minerva; Cheney's Mrs. H. Weeks, Modesto, Mayflower and Philadelphia, and the anemones from Souther and Converse. J. H. White's twelve incurved Chinese are gems in their way, but with the constantly widening gap in size between these and the Japanese they look smaller and smaller to the eye each year, and but little notice is taken of them. In the seedling classes are but two entries, and the only other novelties are two vases of Mrs. Trainor L. Parks from Ernst Asmus, and a pearly colored incurved sport from Glory of Pacific, shown by J. H. Playdon.

Plants occupy the upper hall. The main contributors are J. S. Bailey, Wm. Donald, gardener who wins first prize for twelve specimens and Mrs. B. P. Cheney, John Barr, gardener, who leads in a number of the other classes. Mr. Bailey's winning twelve consist of Columbine, Theo, Iora, Geo. W. Childs, Vernal Fall, Mrs. Cleveland, The Bard, Golden Trophy, Louis Boehmer, John Shrimpton, Gretchen Buettner and Marion Henderson. Mr. Bailey's specimen anemone Garza is much admired. Mrs. Cheney's plants are exceedingly handsome. Notably fine are her specimens Arethusa, Marion Henderson, Charity, Defender and Mrs. J. G. Breer. In the estimation of many the most perfect plant in the hall is one of Pink Ivory exhibited by James Garthly. The sixty mile trip from New Bedford seems not to have disturbed a petal. The plants grown to single stem and flower number about two hundred and the names of Dr. Weld, Mrs. A. W. Blake, Henry Wild, gardener, and Jas. L. Little are prominent on the prize cards. They are all remarkably well finished specimens of this class.

A fine table of Begonia Gloire de Lorraine from Wm. Edgar is a prominent feature in the hall and is greatly admired by the visitors. On a centre table are arranged the roses, carnations, etc. The sensation of this section is a vase of the new rose, Liberty, from Ernst Asmus. A silver medal was awarded it and the general verdict seems to be that it is the greatest find of recent years. John H. Taylor's new pink rose, Admiral Dewey, and J. H. Dunlop's Lady Dorothea are also shown and have received honorable mention. J. N. May shows a pretty pink carnation named Melba, Peter Fisher shows Mrs. T. W. Lawson and Donald Macgregor has a seedling carnation, marked No, 9, color resembling the Lawson, and which has every appearance of being a winner.

St. Louis.

The eighth annual chrysanthemum show, held this week under the management of the St. Louis Florists' Club, may be said to have been fairly satisfactory in all respects, although the weather was very unfavorable and the showing at the opening was not the equal of previous years. The exhibition was held in the Coliseum and afforded a far finer view

than that which could be obtained in Music Hall, in which the previous shows have been held. The exhibits from out-of-town competitors were larger than had been expected.

Following are the premiums awarded:

CHRYSANTHEMUMS—CUT BLOOMS.

Best forty-eight, eight varieties, E. G. Hill & Co., first; Michel Plant and Bulb Co., second; Gus Eggling, third. Among the varieties of note shown by Hill & Co. were Mrs. Geo. Morgan, M. B. Verlot, Fee du Champsaur and Mrs. W. C. Egan.

The West End Floral Park took first for twenty-five white with Mrs. Robinson; W. E. Jordan, second with Niveus, and H. Weber & Sons third with the same variety.

Best vase of white blooms was Georgiana Pitcher, exhibited by E. G. Hill & Co.; second went to W. H. Chalfant.

Mme. Rossenam was judged to be the best twenty-five yellow as exhibited by Hill & Co.; the West End Floral Park was second and W. E. Jordan third.

CUT ROSES.

For best twenty-five Wootton Ellison & Tesson were first; C. Young & Sons Co., second; F. J. Fillmore, third.

W. J. & M. S. Vesey had the best twenty-five Bridesmaids; Fillmore, second; Ellison & Tesson, third.

On best twenty-five Perle J. F. Ammann was first; Young & Sons, second; Fillmore, third.

There were but two competitors on American Beauties, Ellison & Tesson winning first.

CHRYSANTHEMUM POT PLANTS.

For best single specimen, white, C. Beyer; yellow, A. Meyer; pink, C. Beyer; any other color, C. Young & Sons Co.

On best ten plants in not over 10-inch pots, Wm. Schray was first; best five, C. Beyer.

Max Hergad had the best plant naturally grown. Young & Sons were first for plant with twelve flowers.

On three plants, white, pink and yellow Section 9, C. Beyer won; Sec. 10, Wm. Schray; two white, two yellow, G. B. Windler; three specimens, any color, Wm. Schray; three plants, different colors, Wm. Schray; three plants, Sec. 14, Wm Schray; Sec. 15, A. Meyer; three specimens, any color, Young & Sons; three specimens, assorted colors, Young & Sons; three specimens, three colors, Wm. Schray; four plants, four varieties, A. Meyer; Sec. 20, Wm. Schray; two white, two yellow, Sec. 21, Wm. Schray; Sec. 22, Wm. Schray.

GROWN AS STANDARDS.

Best white, F. J. Fillmore; best yellow, F. J. Fillmore; best pink, Wm. Schray; any other color, Wm. Schray; best three, white, yellow and pink, Wm. Schray; three, any color, Wm. Schray.

Grown to one bloom, not over 5-inch pot: Best fifty, A. Meyer; twenty-five white, C. C. Sanders; twenty-five pink, C. Beyer; twenty-five yellow, A. Meyer; twenty-four any varieties, Young & Sons; fifty assorted colors, Wm. Schray; twenty-four, Sec. 7, C. C. Sanders; Sec. 8, Wm. Schray; best twenty-four, Young & Sons.

Plants in groups: To cover fifty square feet, C. Beyer; to cover 100 feet, Sec. 2, Wm. Schray; Sec. 3, C. Beyer; to cover twenty-five feet, G. B. Windler.

SHAW PREMIUMS.

For largest and best collection of named plants, Wm. Schray; best collection named begonias, Michel Plant and Bulb Co.; best collection named ferns, same; best collection named foliage plants with variegated foliage, same; twenty-five blooming plants for house decoration, Wm. Schray; twelve varieties named geraniums in bloom, Young & Sons; most tasteful fernery, Wm. Schray; best climbing plants, Young & Sons; best two Asparagus Sprengerii, W. E. Jordan; best two hanging baskets, C. Beyer; best specimen auracaria, Wm Schray; Areca lutescens, C. Beyer; Kentia Belmoreana, Wm. Schray; Kentia Forsteriana, Wm. Schray; Livistona Chinensis, C. Beyer; Pandanus utilis, C. Beyer; best decorative plant other than above, Wm. Schray.

MISCELLANEOUS.

Best fifty Wm. Scott carnations, W. J. & M. S. Vesey first; J. W Dunford, second; H. S. Ude, third.

C. Young & Sons won a prize of $50 for a design showing the trade mark of the Wabash railroad.

Best twenty-five carnation plants in bloom, F. J. Fillmore, first; J. W. Dunford, second.

C. Beyer captured every one of the eight premiums offered for palms, aggregating $90.

Visitors: H. Weber, Oakland, Md.; Mrs. B. W. Vesey and Mrs. W. J. Vesey, Fort Wayne, Ind.; A. F. J. Baur, Erie, Pa.; C. Cropp, Chicago. R. F. T.

ORCHID DISPLAY OF E. G. UIHLEIN AT THE CHICAGO SHOW.

Montreal.

The annual chrysanthemum show of the Montreal Gardeners' and Florists' Club opened November 8. The exhibits, though fewer in number than last year, were fully up to any former year in quality. There were only two entries of twelve blooms in competition for the Lord Strathcona Cup, and two entries of six specimen plants for the other cup from the same donor. The want of better competition in these two sections was very disappointing to the management as in former years there have been from three to five entries in these sections while twenty-four blooms and twelve plants, respectively, have been called for. The cause for the falling off can only be charged to the fact that the standard of quality fixed by the cup winners of the past few years has been so high that only a few are willing to give them the required attention for the small prizes offered for second and third places.

The large number of splendid palms, tree ferns and other decorative plants went a good way toward making up for the lack of chrysanthemum plants.

The exhibits of roses, carnations and made up work were all behind former years in quantity, but in quality certainly very fine.

W. J. Wilshire, gardener to R. B. Angus, came first for the twelve specimen blooms, with Thos. McHugh second. Mr. Wilshire's blooms were Mrs. H. Weeks, Barrington, Col. Smith, Inter Ocean, Golden Wedding, Mrs. Henry Robinson, Harry Hurrell, Mme. Carnot, Mrs. G. H. Morgan, M. Ed. Andre, Viviand-Morel and Vicomte Chezelle. The bloom Mme. Carnot was the largest in the show, measuring about nine inches through and about twenty-six inches in circumference. Mr. McHugh won first for six blooms of the following: Chitto, Modesto, Mayflower, Ed. Andre, Viviand-Morel and Mrs. Weeks. Also for three best white with Mrs. Weeks. The first place for six plants was taken by G. Pascol, gardener to Robt. Reford, with Georgiana Pitcher, Pink Ivory, Lincoln, Shrimpton, Ivory and Mrs. Henry Robinson; Chas. Smith, gardener to T. A. Dawes, second with Mrs. Perrin, Whilldin, G. W. Childs, Ivory, Viviand-Morel and Yellow Queen.

BEAVER.

Germantown, Pa.

The annual chrysanthemum show of the Germantown Horticultural Society was held on Monday, November 7, at Association Hall. To awaken interest in the society, it was determined to make it entirely free to visitors, and the doors were open during the afternoon and evening. The liberality of the society was

evidently much appreciated, the hall being crowded the greater part of the time. The exhibits and decorative plants were well arranged, making an artistic whole, thanks to the able secretary, George Redles, and to his committees.

The awarding committees reported as follows:

Chrysanthemums. — Specimen plant, first premium for white, yellow, red and any other color to Matthew Brachen, gardener to H. L. Townsend. The same exhibitor secured first premium for three plants in pots, the second going to Henry Dougherty, gardener to Stephen Greene. For twenty-five cut blooms, in variety, the first premium was secured by John F. Sibson, gardener to Mrs. Thos. McKean; also the first for six blooms, white, the second in both cases going to Albert Woltemate. For six yellow blooms, J. Wisher for a collection of vegetables.

Special mention was made of a fine collection of foliage plants from William Wilkie, gardener to R. S. Mason; a white seedling carnation, Mme. March, from Charles Leisley; a grafted chrysanthemum from Matthew Bracken; Mrs. Harrington, vase of cut chrysanthemums and a Pandanus Veitchii; collection chrysanthemums from Matthew Brachen; decorative plants, Albert Woltemate; Saint Paulia ionanthe, from Michael Punch; and vase cut chrysanthemums, twenty-five blooms, D. Cliffe.

While the huge plants which make such a striking show at many of the larger exhibitions were not visible here, the plants were mostly good. Too much staking was to be seen, as it usually is, and this detracted from the beauty of plants. Another defect in this show, as specimen chrysanthemum plants, of which there were none.

In the classes for eighteen American Beauties and for twelve, Henry Hentz, Madison, was first. In the latter M. Tilden was second.

There were eight competitors in the class for eighteen Bridesmaids, P. Connolly winning first, Henry Hentz second, and W. Charlton third.

There were nine exhibitors of Brides, F. V. Burnett securing first, P. Connolly second and N. Charlton third.

For six yellow cut chrysanthemums George Bird, of Morristown, was first and H. L. Hand, gardener to G. E. Kissell, second. On whites Mr. Hand was first with Evangeline, and Mr. Tilden second with Mrs. Henry Robinson. In pinks Mr. Hand was first with Good Gracious, and Mr. Tilden second. Mr.

AWARDED THE AMERICAN FLORIST AT THE INTERNATIONAL EXPOSITION, BRUSSELS, BELGIUM.

Albert Waltemate was first and John Sibson second. This was reversed for six pink, John Sibson being first and A. Woltemate second. The latter secured first for six red.

First premium for six ferns went to F. Smith, gardener to Miss Nixon; second to Henry Diehl, gardener to Miss Steele, who was also awarded first premium for twelve crotons.

For twelve American Beauty roses first went to John Welsh Young, as did the prize for twenty-five assorted roses.

The first premium for twenty-five white carnation blooms went to Charles Leisey, gardener to Mr. Van Schaick.

Joseph Kift & Son's premium for twenty-five chrysanthemums, in variety, arranged for effect, went to Albert Woltemate. Miss M. M. Nixon's prize for best specimen of the new chrysanthemum, Martin Nixon, was awarded to John McGowan, gardener to William Bayard; second to Matthew Brachen. For six cut blooms of the same, first went to Frank Smith, second to John McGowan.

A something which the schedule termed a "Consolation Prize," which was for ten chrysanthemums in 6-inch pots, was awarded to John McGowan; second to Albert Woltemate.

Special premiums were awarded to Michael Punch, gardener to R. Le Boutelier for a rare and odd collection of ferns and to P. McGowan, gardener to Chas. it is in nearly all shows, was the great disregard for the labeling of plants and flowers. Many of the prize exhibits had no name, nullifying one of the main objects of the exhibits, viz., to instruct visitors as to the best kinds to grow.

The twenty-five cut blooms of chrysanthemums from John F. Sibson were arranged in pleasing contrast to this, each flower being named. Such good kinds as these were among them: Oakland, Louise D. Blanc, Mayflower, Mrs. Geo. West, Golden Gate, Lenawee, Mrs. Geo. M. Pullman, Mrs. Perrin, West Newton, Philadelphia, Catharine North, Pennsylvania, Frank Thomson, The Queen, Viviand-Morel, Mrs. W. C. Egan. The new one spoken of, Martin Nixon, as it appeared in the hall, was a light bronze, fading to a still lighter color when well expanded. The three chrysanthemums which took first premium for three were Geo. W. Childs, Yellow Queen and Frank Hardy. John H. Sibson's six yellow cut blooms, were Sunderbruch; his six white, Mrs. H. McK. Twombley.

JOSEPH MEEHAN.

Morristown, N. J.

The date of the show, November 1 and 2, was very early, and in number the chrysanthemums were not quite equal to last year, but in quality they were much superior. The roses were particularly excellent. The only deficiency was in Tilden was first on vase of twelve varieties.

A. Herrington, gardener to H. McK. Twombley, exhibited, but not for competition, eight varieties, six each of Major Bonnaffon, Mrs. Henry Robinson, Viviand-Morel, Mrs. Weeks, Jeannie Falconer, Solar Queen, Mutual Friend and Wm. Seward, for which a certificate of merit was given.

John N. May exhibited a collection of six large varieties, forty-eight pompons and a table of roses. Certificates of merit were awarded to the pompons, to his new seedling, Meta, and his new pink carnation, Melba.

For vase of fifty carnations N. Butterback, gardener to C. N. Bliss, was first.

Lager & Hurrell exhibited orchids, Oncidium varicosum and Cattleya labiata, which won first prize.

In violets for table decoration D. H. Burnett, Whippany, N. J., was first and John Jones, Convent Station, second.

For 100 best double violets Mr. Burnett was first, Mr. Jones second and R. McMullen, gardener to Mrs. G. H. Stone, third. For 100 single violets Mr. McMullen was first.

Honorable mention was accorded an exhibit of the Bon Silene rose by Mr. Tilden and to a display of mixed roses by Mrs. A. R. Whitney.

Competion was close upon groups of foliage plants arranged to occupy spaces of fifty square feet. First prize went to

J. Dickson, gardener to Mrs. J. Catlin; second to H. C. Holmes and third to R. A. Elliott.

For a group of chrysanthemums and foliage plants covering fifty square feet first was won by J. Davis, gardener to Mrs. A. R. Whitney, and second by John Jones. A group in this class, but not for competition, exhibited by Wm. Duckham, gardener to D. W. James, was given a certificate of merit. The same exhibitor showed a splendid specimen of Dracæna Sanderiana with twenty-eight stems averaging four and one-half feet high and twenty strong young shoots.

Mrs. L. F. Sturgis won first for a specimen of Kentia Belmoreana. A certificate of merit was awarded to Julius Roehrs for Acalypha Sanderi.

Ellwanger & Barry made a fine display of pears and apples, for which a certificate was given.

Mrs. A. R. Whitney was first on collection of vegetables, Mrs. Geo. F. Stone second and John Jones third. D. Willis James was given a certificate of merit for a collection of fruit.

Indianapolis.

The twelfth annual chrysanthemum exhibition was opened November 8 at Tomlinson Hall under the auspices of the State Florist Association of Indiana. Mayor Taggart delivered an address of welcome. He said in part that he hoped the people of Indianapolis and the state would appreciate the grand display of flowers brought here by the florists, which excels anything seen here before. Pres. J. D. Carmody, of Evansville, responded in his usual happy way.

As usual Tomlinson Hall presented a beautiful appearance. The decoration around the balcony was a departure and was certainly very beautiful. It consisted of southern smilax, hung gracefully, intermixed with long streaming Florida moss. The arrangement and grouping of plants was ackowledged to be more artistic than in former years. Two large groups of palms formed a good background for the single stemmed chrysanthemums. Roses and carnations were not shown in as large quantities as heretofore, but those that were exhibited were of exceptional quality, especially the carnations. The Triumphs shown by the South Park Floral Co., New Castle, were by far the finest ever seen here, and the Flora Hill and Jubilee shown by W. W. Coles were also extra fine for November.

In roses the largest entries were in Brides, Bridesmaids and Kaiserins. The Brides and Bridesmaids of the South Park Floral Co. were particularly fine. Kaiserins were good in all five entries but those shown by W. W. Coles were without question the finest ever exhibited here and were an easy winner, making six consecutive years that Mr. Coles has carried off first premiums for Kaiserins. American Beauties were not quite up to the average, but the Meteors shown by Henry Reiman were ahead of the usual first premium flowers.

Single stemmed chrysanthemums were much finer and better done than at any previous exhibition. Those shown by Crabb & Hunter, of Grand Rapids, Mich., were a sight long to be remembered. Their fifty Mrs. Henry Robinson were all less than two feet high and did not vary over two inches. Their Major Bonnaffon were equally well grown. The bush forms grown by the Berterman Floral Co. and Henry Reiman were excellent specimens. The cut flowers were hardly as good as last year. Many of the blooms would have been better one week later. This was very noticeable in the Bonnaffons and Viviand-Morels. The Queen, which has been prominent here for the past five years, was not seen in any of the large entries, but there is nothing in white that can compare with twenty-five Queens as usually shown here. Unfortunately the Queen is a poor shipper and is dropped on this account. Mrs. Henry Robinson seemed to be the leading white this year, both in cut blooms and single stems. John Heidenreich exhibited two grand specimen plants of A. H. Fewkes, a variety well adapted to pot culture.

Two very pretty groups of decorative plants were arranged in the center of the hall by the Berterman Floral Co. and Henry Reiman. The former exhibit, particularly, received many flattering comments. Two groups of ferns were also very attractive and some well grown specimens were noticed in both lots. Two beautiful mantle decorations added to the attractiveness of the hall. Our old friend Theo. Bock, of Hamilton, Ohio, was judge and gave excellent satisfaction.

Stuart & Haugh, Anderson; Nathan Smith & Son, Adrian, Mich.; E. G. Hill & Co., Richmond; W. A. Chalfant, Springfield, Mo.; F. Dorner & Son, La Fayette; M. A. Hunt Floral Co., Terre Haute; Crabb & Hunter, Grand Rapids, Mich., and E. Huckride & Son were other large exhibitors who participated in the distribution of the prizes. W. W. C.

New Bedford, Mass.

The chrysanthemum show this year was something more than a chrysanthemum show for it comprised a fine variety of exhibits which made a much more effective picture than would be possible with chrysanthemums exclusively. Effective advertising and the high merit of the show as a whole sufficed to awaken the public interest and the attendance was better than on previous occasions. A. H. Fewkes, of Boston, served as judge.

William Keith was first on group of chrysanthemum plants, one Chinese variety, one red, six distinct varieties of bush plants for which the prize was a silver cup, on four single flowered Japanese plants, on six foliage plants, six exotic ferns, specimen stove plant, specimen exotic fern, banana in fruit and specimen lycopodium.

James Garthly won first place with three Japanese bush plants, one yellow, one pink and one white, one standard, twelve varieties one flower each, vase of yellow, basket of flowers, specimen palm and ficus.

John Allen was first on vase of pink and twelve cut Japanese varieties.

Samuel S. Peckham was first on six Japanese varieties, one specimen, six of one variety, six pots of carnations and best booth display.

John W. Frazier captured two firsts and several seconds. Michael McCarthy was first for three Japanese varieties, one bloom to a plant. C. H. Waite was first for cacti, cycas and tree palms. Peter Priaul won on violets and A. J, Fish for begonias. Jahn Brothers were first on ferns and booth display of palms and ferns. Seventy diplomas and certificates of merit were awarded.

Among the visitors were Robert Laurie and John Allen, Newport; C. J. Wood, Beach Bluff, Mass.; James Farquhar and T. J. Grey, Boston, and Samuel Burns, New York.

Poughkeepsie, N. Y.

The annual fall show was held under most favorable auspices and the special features of the entertainment, including vocal solos by Mrs. P. B. Cusac, added much to the interest. The patronesses served tea each afternoon and evening. The receipts were $404.

Considering the early date the displays were very good. The first premium for six plants of chrysanthemums, six blooms to a plant, was won by Archibald Rogers, gardener to Samuel Horn, as was the prize for best group occupying twenty-five square feet and for the best group of decorative plants. In the latter class second was won by Isaac Fricker. First for plants grown to single stem and

MEMBERS OF THE DETROIT FLORISTS' CLUB AT MT. CLEMENS, MICH.
SEE DETROIT LETTER PAGE 466.

bloom went to Wm. Russell, gardener to Chas. Dieterich, Millbrook, N. Y.

The first premium for twelve cut blooms, white, went to Alex. McKenzie, Nyack, N. Y., on Mrs. Henry Robinson. Mr. Russell took first for twelve blooms, yellow; twenty-four blooms yellow; six blooms yellow, and twenty white blooms arranged for effect.

The silver cup offered for 250 violets was won by Benj. Willig. J. G. Bahret was first on 100 violets. On mushrooms Wm. Milner, Newburgh was first. W. G. Gomersall, gardener to Mrs. Winthrop Sargent, was first on twenty-four varieties chrysanthemums, three varieties of pink, six of each, and twenty-five white chrysanthemums, for lunch table decoration and for English cucumbers.

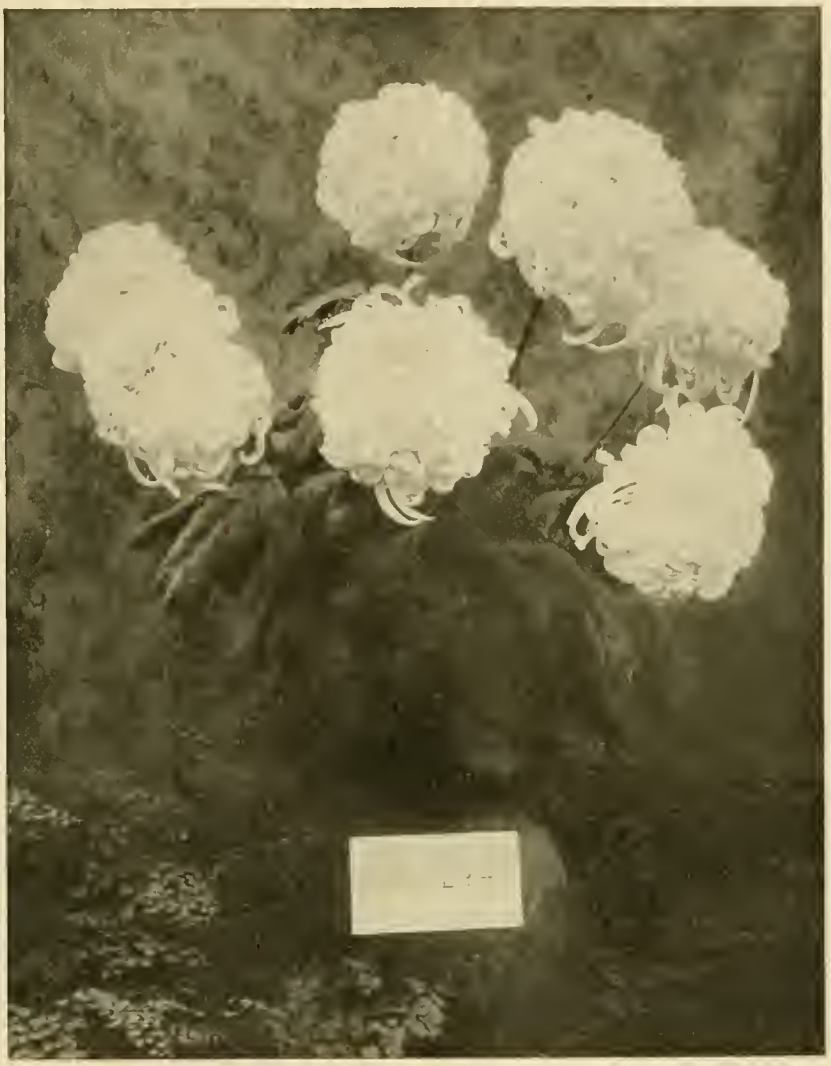
The special prize for fifty carnations was won by Wm. Russell with Mrs. Bradt. A certificate of merit was awarded John N. May for his new seedling Meta and a certificate was also given for Acalypha Sanderi.

The judges were A. Herrington, S. Golding, W. Anderson and N. Duethan.

New Jersey Floricultural Society.

There were some very good displays at the impromptu exhibition given at the club rooms November 7, at which Prof. Byron D. Halsted gave a lecture.

Certificates of merit were awarded to Thos. Wiley, gardener to H. T. Ambrose, for seven vases of chrysanthemums; to Dr. J. M. W. Kitchen for a collection of sixteen orchids; to John Hayes, gardener to O. D. Munn, for crotons; to Peter Duff, gardener to J. C. Brown, for a splendid specimen of Nephrolepis davallioides furcans, vase of carnations and for chrysanthemums in 6-inch pots; to John Smith, gardener to S. M. Colgate, for Marie Louise violets; to Malcolm McRorie for foliage plants; to W. A. Manda for new and rare plants; to George Van Qualon, gardener to T. C. Barr, for adiantum; to Robert McInnis, gardener to B. O. Chisolm, for Rex begonias; to David Rose, for vases of pompons; to John N. May for a collection of eighteen varieties of chrysanthemums, including several of his new ones, and for a new pink carnation.



Evansville, Ind.

One of the best advertised and most successful chrysanthemum shows of the year was that of the Evansville Press Club held November 8–12. Evans hall was handsomely decorated and filled with a profusion of exhibits. In the section open to florists Julius Niednagel captured seven firsts and one second. J. C Ellsperman won one first, three seconds and four thirds. Carl Zeidler secured four seconds and four thirds and Wm. Blackman won prizes in seven classes.

CHRYSANTHEMUMS.

CHRYSANTHEMUM MRS. FRED. L. BUTTON.

Attention has recently been called to this variety on account of its earliness. The variety is a Japanese importation, Mr. J. A. Carbone, of West Berkeley, Cal., having had it in cultivation since 1896. The flowers are pure white and said to be as large as Modesto; they are at their best September 15; foliage good; stem strong and stiff.

CHRYSANTHEMUM MRS. FRED L. BUTTON.

WORK OF THE COMMITTEES.

NEW YORK.—Wm. Anderson, Mamaroneck, N. Y., exhibited Mrs. F. A. Constable, Japanese, pure white; scored commercial scale 91, exhibition scale 95 points. F. R. Pierson & Co., Tarrytown, N. Y., exhibited G. J. Warren, Japanese, canary yellow; scored commercial scale 78, exhibition scale 85 points.

PHILADELPHIA.—Jno. N. May, Summit, N. J., exhibited Mrs. Trainor L. Park, Japanese, incurved, yellow; scored commercial scale 91, exhibition 90 points. Same grower exhibited Mrs. N. Molyneaux, Japanese, white; scored commercial scale 90 points. Also Yellow Mayflower, Japanese, light yellow; scored both scales 88 points. Mavourneen by the same grower, Japanese, pink, scored commercial scale 85, exhibition scale 33 points. H. B. Surman, Germantown, Pa., exhibited Mrs. J. V. Merrick; Japanese, pink; scored commercial scale 82 points.

CHICAGO.—Jno. N. May exhibited Meta, incurved, Japanese, white; scored commercial scale 85 points. Yellow Mayflower by the same grower, reflexed Japanese, light yellow; scored commercial scale 84 points. He also exhibited Mrs. Trainor L. Park, incurved Japanese, yellow; scored commercial scale 89 points. Nathan Smith & Son, Adrian, Mich., exhibited No. 35–4, incurved Japanese, pink; scored commercial scale 82 points. Shilowa by the same growers, reflexed Japanese, crimson; scored commercial scale 86 points. G. P. Rawson, Elmira, N. Y., exhibited without name or number a reflexed Japanese, white, which scored commercial scale 81 points. Smith & Son, Cleveland, O., exhibited Yellow Ivory, incurved Japanese, yellow; scored commercial scale 73 points.

CINCINNATI, O.—Nathan Smith & Son exhibited No. 35–6, Japanese, blush pink; scored commercial scale 81, exhibition scale 80 points. ELMER D. SMITH.

GANE MEMORIAL FUND.

Mrs. Jerome Jones has established a fund to be known as the Henry A. Gane Memorial Fund the income from which is to be devoted to premiums for chrysanthemums at the exhibitions of the Massachusetts Horticultural Society. The late Mr. Gane, who was Mrs. Jones' father, gave much of his time to hybridizing and improving the chrysanthemum and his efforts in that direction were rewarded by the production of some of the finest varieties extant. Among the most notable varieties originated by Mr. Gane were Mrs. Jerome Jones, Mrs. Henry A. Gane, (Anem.) Marcia Jones, (Anem.) Golden Ball, West Newton, Mrs. Geo. A.

Gane and Bessie Jones. There are now being tested by Elijah A. Wood some thirty more seedlings raised by Mr. Gane, unnamed as yet, a number of which look very promising. The fund provides for the following prizes to be awarded annually for three years after which time the schedule may be rearranged:

For the best twelve specimen blooms of any of the chrysanthemums originated by the late Henry A. Gane, first prize $20, second, $10.

For the best twelve specimen plants or blooms of any chrysanthemums, not less than four varieties, originated by the late Henry A. Gane, first prize, $12, second $8.

Kneeling Stool for Weddings.

No house wedding is complete without this accessory. Placed in front of a group of plants at the end of the parlor it gives a finish to the whole decoration. The illustration shows a very neat design of willow painted with white enamel. There is a cream white satin cushion on the stool and also at the head rest. It may be seen at a glance how few flowers are required to make this presentable and there are many ways in which it can be decorated to suit the pocket of the customer. The design figured is forty-two inches long and thirty-four inches high. We have seen many frames to which ferns are attached for this purpose, some made by carpenters, some of wire, to be mossed up, and others, but all necessitating much work to complete and looking very unsightly before being decorated. The willow enameled stool is ornamental without the flowers and can be trimmed as shown in a very short time. K.

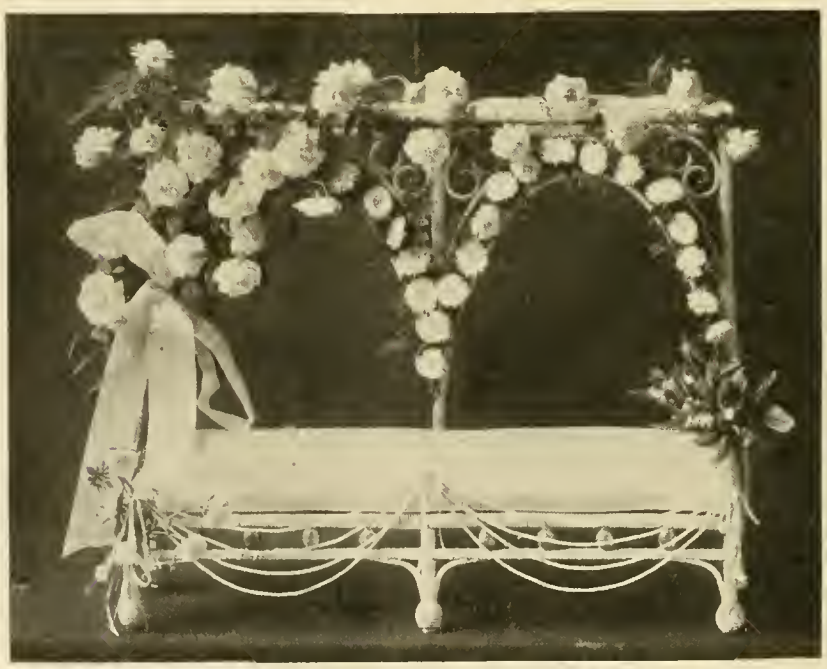
CARNATIONS.

CULTURAL NOTES.

November 12.—Stem rot affects many carnations at this season of the year, and is the one and only disease that has any terrors for a good grower. It apparently comes without cause and there is no known remedy for it. Perhaps I am not the person to write on this subject, as, with the exception of a few instances, I have never had any trouble with this disease. These few instances have, however, led me to make a few experiments.

The first conclusion arrived at was that the disease was a modified form of the cutting bench fungus, the spores of which were formed in the cutting bench and remained dormant until the conditions were favorable to their growth. This conclusion was arrived at by an experiment with a batch of McGowan cuttings, the second year of its introduction. This particular lot of cuttings was badly affected with cutting bench fungus, and being expensive, and greatly in demand, they were carefully potted up so as to save as many as possible of them. A few of them died in the pots, and more in the field, while after they were planted in the house fully one-half of them were killed by stem rot. I do not recall losing a single plant by this disease among the twenty odd thousand planted that season except in this one lot. My conclusion has been strengthened this season by the fact that a novelty which came to the place last spring badly affected with cutting bench fungus, has behaved in just the same way.

Among growers who crowd their cuttings into the bench so thickly that you can scarcely see the sand between them you will nearly always find a good percentage of stem rot. One particular instance of this I have in mind is where a grower puts into a cutting bench that I would consider about large enough for 5,000 cuttings just ten times that number, and always has a lot of stem rot to contend with. Where the disease is due to cutting bench fungus there is no remedy for it. In exceptional instances the cutting off of the diseased branches will save the balance of the plant, but it is usually only a matter of time until the whole plant dies, and it is far better to pull up all affected plants and give the others the benefit of the extra light and air.



The prevention is very simple and consists in having cuttings that are entirely free from fungus. To make sure of this give the cuttings plenty of space in the bench so that when they are given light and air they can get it all around them. Deep planting is an acknowledged cause of stem rot, and one would naturally think, after all that has been written and said, that there would not be a grower in the country who would plant his carnations too deeply, and yet some of our apparently sane men will plant deeply and suffer the consequences year after year.

This deep planting often begins as soon as the cuttings leave the bench, it being a not unusual thing to find a potter or planter, who seems to think that the deeper he can get the cuttings into the ground, the better they will grow, while just the opposite is the case. In a favorable season the evil effects of deep planting in the field are not so noticeable as if it happens to be wet and cloudy for any length of time, when stem rot will start with a vengeance, especially in a soil that holds moisture. I am blessed with soil that it is almost impossible to water-clog and to this fact I attribute my freedom from this disease.

Carnations in the houses should be planted with the stem of the plant almost altogether above ground, yet it is not at all unusual to find a house of carnations planted so deeply that the lower leaves and branches are down to the top of the soil, and in many instances with the soil even among the lower branches. Such planting may result all right, but the probabilities are that a large proportion of the plants will die with stem rot before the season is over.

Where deep planting has been done the effects of it can be overcome by taking enough soil off the bench to allow the larger portion of the stalk of the plant to be above ground. In taking the soil off it would be as well to remove it over the whole of the bench or bed, as the mere taking it away from the base of the plant would form a hollow around it in which the water would collect and thus make matters rather worse than better. It might be brought as an objection against this sort of treatment that you would injure the little fibrous roots around the top of the soil, but it will be far better to loose a few roots than to lose the whole plant with stem rot. In addition to taking the soil off the benches it would be well to give the bench a light sprinkling of lime, which has a tendency to sweeten the soil and to develop root action.

ALBERT M. HERR.

KNEELING STOOL FOR WEDDING.

SEEDLING CARNATIONS.

George Hollis, of Bracondale, Ont., Canada, spoke as follows at the recent meeting at Toronto of the Canadian Horticultural Society:

I do not think that I can say much about carnations which would be new, although I have raised seedlings for many years and have obtained all colors from a dirty black to one very near blue. I would advise every one to grow a few seedlings; for a small place, say 100 each year. Sow the seeds early in February; keep them near the glass; work them along in pots or flats until May when they may be transferred to the open ground. Do not pinch them back but let them run to bloom; the first to flower are generally the most prolific. I need not tell you to pull up the single flowered plants, but also the very double ones, as nine times out of ten they will come worse inside the greenhouse.

A VIEW OF THE PHILADELPHIA CHRYSANTHEMUM SHOW.

After raising the first batch of seedlings select the seed-bearing plants for the next year. They should be sturdy, with stiff flower stems not less than from fifteen inches to two feet long, bearing erect not too double flowers. Cross a pink with a pink and white with white. I have tried violent crosses but do not recommend them. All crosses should be recorded. Work among your seedlings and do not revert to the old varieties if you can avoid it. Many growers will secure a seedling of a fine color but otherwise no good and from this will raise a lot of plants, usually getting nothing but weak stems and frequently not one of the color used and desired. I have done this myself, but not lately. Never mind the color; what you want is strength and form. Selection is the thing which wins.

The carnation is in many places a hard worked plant. Life is short with many new varieties, fed highly to produce blooms to win a certificate, pumped hard for cuttings, and then the buyer runs it to beat some other grower, so that what might be a good thing is often thrown out with many a curse for the raiser. I would advise you not to stimulate too much such plants as you wish to take cuttings from. After cuttings are removed, if an increase of food will make them produce more bloom, why, let them have it.

Summer planting of carnations was tried by many this year and in most cases the plants are doing well. For this the houses should he well ventilated and to accomplish this it is often necessary to remove every sixth row of glass. The new varieties have this year nearly all made very large plants, showing more care in propagation. It is a good sign. The varieties of to-day are far ahead of those of ten years ago, and the American Carnation Society is certainly to be given much credit for the work it has done in stimulating seedling raising and in setting the standards higher.

THE STEM-ROT DISEASE.

For many years carnation growers have been familiar with a disease that attacked their plants, causing the tips to wilt gradually, turn yellow, and finally become dead and dry. An examination would show that the stem and roots were partially decayed, or at least appeared to he dead, and were often in a dried or withered condition. This trouble appears both in the field and in the house after the plants have been set in the benches. It has been known to growers under various names, such as stem-rot and die-back, but its cause was more or less obscure until Dr. W. C. Sturgis, of the Connecticut Experiment Station, who investigated the matter in 1897, found it to be due to a fungus belonging to the genus fusarium. The stem of the plant is filled with the mycelium, or vegetative threads of the fungus, to such an extent that the ducts or passages are partially or wholly closed to the sap, thus choking the plant and causing a gradual wilting. The spores or fruit of the fungus are somewhat difficult to find but occasionally they may be seen on the stems of dead or diseased plants, in the form of a pinkish mold. A fuller account of the fungus was published in the Report of the Connecticut Agricultural Experiment Station for 1897, Part III, p. 175. Dr. E. F. Smith has also investigated a similar disease of melons and ascribed the cause to a choking of the ducts by the mycelium of a fungus of the same genus.

Just how the plants become infected has not been determined, but attempts to inoculate healthy plants above ground failed. It seems probable that the spores live over winter in the soil and thus gain access to the plant. Propagating from diseased plants is another means of spreading the disease. Here at the station, cuttings taken from apparently healthy plants and set in ground where carnations were never before grown, showed symptoms of the trouble within a few weeks, and later, died. When lifting the plants to set in the house only the apparently healthy ones were taken. After setting, the stems were laid bare and painted with Bordeaux mixture. After the Bordeaux mixture had become dry the earth was replaced. It was thought that this treatment might in a measure prevent the fungus from gaining access to the stems of the plants. One or two plants out of two hundred, on October 19, show signs of being affected. The plants were set September 19, and of course may have been attacked before setting though they did not then show it. It is apparently a difficult disease to

control, and the most that can now be recommended is to destroy all diseased plants, propagate only from healthy ones and use fresh soil both in the house and field.

In the fall of 1897, a row of snapdragon plants, antirrhinum, growing in the field near the carnations appeared to be affected in a similar manner. After repeated trials the same characteristic pink mold was obtained on the stems, and under the microscope the spores appeared to be identical with those from the carnation. The present season, asters sent to the station presented the same symptoms. Stems were placed in a moist chamber and soon exhibited the looked for appearance, being covered with spore masses of a salmon pink color. That the same fungus attacks these three plants, which are not very closely related, is probable though not yet fully established. W. E. BRITTON.

Geraniums in Autumn and Winter.

There are among the geraniums some beautiful colors and forms which should be well adapted for market plants if properly grown. This is especially true of some of the new semi-double varieties for there is nothing that makes a finer show than a well bloomed geranium plant. The most important point in developing well foliaged plants with good

DWARF GERANIUM GROWN BY C. W. JOHNSON.

trusses of bloom is to provide a light and airy place. In watering moisten only those which absolutely require it and do not let the atmosphere of the house be at all damp.

Presuming that you now have the young stock in thumb pots, shift them into a size larger. They will very soon send their roots to the sides of these pots and should then be potted on as often as they require it till they reach a salable size, which should be by the time they are well in bloom, in a 6-inch pot. Never allow the plants to become drawn or they will be ruined for market purposes. An even temperature of about 50° to 54° at night suits them to perfection. They thrive in a nice open soil, not too heavily charged with manure. The semi-doubles hold their petals much better than do the single ones and are therefore much better to use, although the single pink, Mrs. E. G. Hill, will make as nice a plant as any one could wish for.

If you can make use of some standard geraniums now is the time to start them for next season. When well done they make striking decorative plants and there is nothing better to attract attention at the fall shows than a group of well grown standard geraniums of different colors. They should be caused to run up to one stem until the required height is obtained. This is done by picking off the side shoots, allowing the foliage on the main stem to stay till the head is formed, when it can be removed. They should at no time be overwatered, particularly during a very hot spell. A little weak stimulant is beneficial when the buds are allowed to mature, which should be about six weeks before the plants are wanted for use. Previous to this the plants should be kept free from buds.

The best varieties for standards are as follows: Heteranthe, scarlet; Le Cid, crimson; Mme. Aime Le Chevraliere, white. C. W. JOHNSON.

Winter Protection for Herbaceous Plants.

Among our so-called perennials or border plants, we have only a few which cannot be safely left without protection of some sort. In many parts of the country some of them might winter through unharmed year after year, without any other protection than a few inches of snow but subsequently an open and comparatively mild winter with frequent and alternate thawing and freezing would destroy them. I do not say that all the herbaceous plants require protection or are better off for being protected. On the contrary, it is often the case that such plants are actually injured even by a thin covering; nearly all evergreen species, especially the dense and compact growers, want a free circulation of air all around them at all times, even while apparently dormant. Moisture among the foliage will invariably cause decay in time and a part of the plant at least will be lost. I have seen a splendid densely clothed patch of aubretias destroyed by too much kindness in this way. The bed had been covered with leaves on a cold November day and when these were removed early in April, the green carpet which we expected to find, was gone. It took two years of growth to replace the dense carpet in that bed and we never covered it again. The evergreen Alyssum argenteum and A. rostratum would act precisely in the same manner; so would the dwarf erysimums, arabises, some of the silenes and arenarias; most of the dianthuses, armerias, drabas, erinuses and others of like habit.

We should never use any material as a covering which will pack down close and exclude the air; light long stuff, put over and between the plants, seldom does any serious harm if it is scattered thinly and evenly. It is not the cold from which we want protection, for it is alternate thawing and freezing which does the mischief and by keeping the ground shaded we lessen the danger in this direction; the winter sun is not powerful enough to warm up the earth beneath a screen of evergreen boughs, straw or leaves and the ground remains frozen hard all day. There is another class of plants, which are not harmed by covering deeply with more solid material—those which annually die down entirely and form their new crowns underground. For instance, we may safely pile six or more inches of old manure onto a patch of Japanese anemones, and they will come out all right in spring. With us it is not necessary to protect anemones in any way, but in other sections they are sometimes badly winter-killed, especially the younger stock, which has not had time to send its roots deep into the earth. I may say here, too, that I always favored rather deep planting for these when laying out a new bed of them; with six inches of soil above the crowns they withstand any climate.

What I have said so far only demonstrates that a thorough knowledge of the peculiarities in growth and habit of the various perennial plants is indispensable in the man who is sent out to do the work of covering for the winter. Things which are a little tender, such as Cedronella cana, Salvia farinacea, S. ringens, Hedysarum coronarium, Pentstemon Murrayanus and a few others should be protected against excessive moisture rather than against the cold. Generally speaking, I never advocate the covering of the herbaceous borders, excepting where plants were set out in the fall and had not become fairly established before winter come on. In such a case we must not neglect to cover the ground in some manner, but a thin layer of long litter or, better still, evergreen boughs, laid over the rows is a sufficient protection to the young plants in all positions.

In very moist places many of the shallow rooting plants, even when well established, are liable to lift themselves out of the ground and of course are then injured more or less by the drying winds and the action of the sun upon the stiffly frozen exposed roots. Where the soil is of such a nature we have no alternative and are obliged annually to protect carefully against the rays of the sun; especially should we be on our guard on mild days in February and March.

STANDARD GERANIUM GROWN BY C. W. JOHNSON.

HERBACEOUS GROUND, LOOKING NORTH, IN THE NEW YORK BOTANIC GARDEN.

Earlier in the winter there is but little danger, even if the weather should be severe, as cold does not hurt our hardy plants, for, as I have often said, we do not pretend to keep them warm by such a covering; we merely try to keep the ground frozen continuously until winter is over.

The north side of a building or wall is exposed to the very coldest winds and still it is the best place for things of doubtful hardiness because there the sun does not reach them in midwinter and the ground generally remains frozen solidly until spring has really arrived. But all may not agree with my mode of looking at the subject. It has been a time honored custom with a great many practical men to protect all these plants in one way or another each winter. If some of the plants were found dead or partly decayed when the covering was removed in spring, they were simply pronounced winter-killed and no more was said or thought about it. To all these I would say, if you think you have to cover at all, do it lightly and discriminate between those plants which form an underground crown and those with the crowns above the surface. See whether you are covering a patch of plants with thick, soft, fleshy roots or a mass of hard, fibrous, matted roots; whether the foliage is in close tufts, forming a carpet, or whether it is large and leathery.

Evergreen boughs are superior to any other covering material, but if these are not procurable or too expensive, then the cheapest serviceable, though not exactly the tidiest, substitute will be found in the dead tops of the taller growing plants themselves. There are generally enough of these to be found on the place. By all means wait for the real cold weather before you cover any of your plants; December or even January is often early enough. Far more plants are killed by covering too early than by leaving them entirely unprotected. When the ground is frozen hard and likely to remain so, then it is time enough to perform the work, if you think best to follow the old practice. J. B. KELLER.

Rochester, N. Y.

New York Botanical Garden.

The first botanical garden established in America was begun by John Bartram in Philadelphia in 1728 and the plot still remains as a public ground. The principal gardens at present operated in the United States are the Botanical Garden of Harvard University, Cambridge, Mass., Arnold Arboretum, Jamaica Plain, Mass., National Botanical Gardens at Washington, D. C., Missouri Botanical Gardens, St. Louis, Mo., Buffalo Botanical Gardens and the Botanical Gardens of Michigan Agricultural College, University of California, University of Pennsylvania and Smith college.

The New York Botanical Garden which is now in course of development occupies about 250 acres of the northern part of Bronx Park. After several years of agitation inaugurated and influenced by the Torrey Botanical Club, the sum of $250,000 was, in June, 1895, raised by public subscription and the Board of Estimates and Appointments was authorized to issue bonds aggregating $500,000 for the construction and equipment, within the grounds, of the necessary buildings. Much has already been accomplished in grading, planting borders, establishing a nursery and accumulating herbarium, museum and library material. By an agreement with Columbia University the herbarium and botanical library of the University will be deposited with the garden. Reservations of suitable extent and location have been set apart for decorative grounds, forest areas, meadows, pinetum, deciduous arboretum, fruticetum, viticetum, herbaceous grounds, rockery, economic garden, bog garden and ponds. The range of horticultural buildings to be erected comprise thirteen houses, covering about 45,000 square feet. A circular palm house 100 feet in diameter and 90 feet in height is the central feature and the houses are so arranged as to enclose a large court that will be utilized for aquatic planting and other ornamental features. The houses occupy a commanding position upon a broad terrace.

The tract of land devoted to the garden is an ideal one for its uses. Its surface is

undulated and it includes all degrees of shade and of exposure to sunshine and moisture and a soil that is remarkably good throughout. The families of plants in the various departments will be arranged in a sequence following the latest system of botanical classification. The Bronx river, with its overhanging banks and damp glades, will furnish an appropriate home for the ferns and moisture loving plants, which cannot be located in formal beds, and will also add beauty to the landscape features. Our illustrations show, in the river views, some of the beautiful natural features of the locality and the view in the herbaceous grounds give some idea of how the classified planting is progressing. The chief work in the garden during the past summer has been on the border, which is to enclose it, making a thick plantation of trees and shrubs, sloping down from the outside and shutting out objectionable views where such exist. This border when completed will be about two miles long and comprises some 350 species or varieties of trees and shrubs.

The planting is under the direction of Superintendent Samuel Henshaw, who is a well equipped gardener of the old school and eminently fitted for the work before him. The permanent labels used in marking the plants are of zinc—the name and habitat of each plant being written on its label with chloride of platinum. In addition to these there are other larger labels of wood painted lead color with the name written quite large for the information of casual visitors. These latter are removed from the grounds in fall and returned again in spring.

FOUR LOTS OF GOLDEN BEDDER COLEUS WATERED WITH WATER AT TEMPERATURES INDICATED IN FOREGROUND.

Notes on Watering.

Before discussing further the subject of cold vs. warm water for plants, permit me to say that I do not in any sense advocate the use of ice water for greenhouse plants; nor do I wish to be understood as saying that ice water will not injure any plants. There may be many species that would be injured by the application of water at 32° Fahrenheit. I regret that I have not been able to make use of palms or orchids in this work, species that one would naturally expect would be injured by such treatment. I feel under obligations to Mr. Taplin for his fair-minded criticism as it has directed my attention to many points not clearly stated in my first article.

Definitely, the time occupied by the experiment was as follows: The cuttings were taken January 1 and the final measurements May 15, a period of 135 days. No exact record was made of the number of times the plants were watered, but my notes indicate that the average was six times a week. Both the boxes and the pots were provided with abundant drainage; the plants were never watered until quite dry, and were then thoroughly moistened and syringed, some of them, as previously noted, with water at only 3° above the freezing point. Now, it was not my imagination, but the truth, as demonstrated by the balance and rule, that these plants were not materially injured by this treatment. None of the plants dropped leaves nor suffered any apparent check during the experiment. It was as healthy and vigorous a batch of plants as one could wish for. There was, near the close of the experiment, an apparent difference in the height of the plants in the different lots in favor of the 50° and 86° lots, but when measured it was found to be a trifle less than eight-tenths of an inch in the average height of the plants in favor of the 50° lot, with the 86° lot a close second.

These were the results of but one trial and, as it is not usually advisable to draw conclusions from a single test, the experiment was repeated the following season with still more striking results. Golden Bedder coleus was selected as before and the cuttings and plants treated as in the first trial except that a different range of temperature was employed, viz., 32° to 35°, 40°, 70° and 100° Fahrenheit. For the first lot no water was used warmer than 35° and it was as much colder than that as it was possible to get it. The cuttings were taken January 12 and the experiment closed June 1, a period of 139 days. At the close the roots of the plants comfortably filled 6-inch pots. The plants were cut off at the surface of the earth and weighed with the following results:

32°.....373 grammes (13.3 ozs.)
40°.....325 grammes (11.6 ozs.)
70°.....377 grammes (13.4 ozs.)
100°.....371 grammes (13.2 ozs.)

In this case the plants of the 32° lot weighed more than those of any except the 70° lot but the weights vary so little that it is difficult to discover any difference that might be ascribed to the temperature of the water used. Photographs were taken at different stages of the experiment, one of which is here reproduced.

In addition to the above, several crops of vegetables were grown, including two crops of tomatoes, each crop occupying a solid bed 18x60; two crops of beans, a crop of radishes and a crop of lettuce, all watered as in the coleus experiments except for slight changes in the higher temperatures. Also during the past summer, a crop of tomatoes and a crop of beans and of radishes was grown outdoors. To a portion of each of these ice water was applied throughout the entire growth period with no disastrous results. In fact, in the first crop of greenhouse tomatoes the 32° lot produced a greater weight of fruit and of vines than the plants in the 70° lot.

I cannot give detailed results at this time because it is customary in experiment station work to first make public the results of experiments through the medium of the reports and bulletins of the station. The above mentioned work will form a part of our annual report which will be ready for distribution in a few weeks. A copy will be mailed free to any interested person who applies.

Investigators are supposed to approach their work with a mind free from prejudice, but this I believe rarely happens. In this case I admit that I confidently expected to see every plant die outright within a few days after being treated with ice water. The question asked in

BRONX RIVER, NEW YORK BOTANIC GARDEN.

MEADOWS IN THE NEW YORK BOTANIC GARDEN.

in the beginning was this: Will water at a temperature several degrees below that of the air in the greenhouse injure plants? In the light of my present experience I feel that I can answer that it will not injure any of the plants here named. I will ask Mr. Taplin to remember that I did not lower the temperature of the greenhouse to 35° at any time. Only the temperature of the water used in watering was lowered to that degree. Right here lies the main point, and one apt to be overlooked. The air, the pots and the soil in them, the sand in the benches and the leaves of the plants were all warm, so warm that three hours after being drenched with ice water the effects were not discernible with the aid of a most accurately graduated thermometer, and in most cases the soil regained its normal temperature, lacking a fraction of a degree, in less than one hour. The changes in temperature of soil in pots and on greenhouse benches due to alternations between sunshine and shade are greater, if not as violent, than the changes due to watering with warm or ice water.

I cannot dispute the statement made by Mr. Taplin that palms were injured by cold water; I can only doubt that the coldness of the water was the real cause of the injury. Were other plants available for comparison and watered with warm water? The question as to whether or not cold water will injure greenhouse plants is an important one and is not as yet fully answered. Many valuable facts may be gained by a close study of one or two dozen plants in an experiment station greenhouse but is will not be decided to the full satisfaction of florists in general until some progressive grower with one or two dozen houses summons sufficient courage to water at least one-half of the plants in each house with the coldest water obtainable and the remainder with warmer water. Will general disaster follow? I firmly believe it will not. It must be that there are men who have had experience in this line. Can they not be prevailed upon to give us the benefit of their experience?

FREDERIC CRANEFIELD.
Wisconsin Experiment Station.

Sweet Pea Troubles.

ED. AM. FLORIST:—Please give me some advice on the treatment of sweet peas. Mine were very fine until the middle of June; then with no apparent cause, having plenty of moisture and fertilizers, and careful cultivation, the thriftiest plants drooped and died. I found on examining them that ants had laid their eggs along the stems under ground and the young ants were feeding on the juices of the plants. After spraying them with whale oil soap and Bordeaux mixture the trouble ceased for a time, but still I lost many of my best plants, apparently from some other cause. My friends complain of the same thing, several having lost all of their sweet peas. C. D. W.

Your correspondent has plenty of good company, but the nest of ants he found nearby was only an exceptional circumstance, as are many other local troubles that are reported. Some observe aphis, some discover a grub that has eaten out the pith of the stalk and some report that they have found caterpillars. But these are all exceptional and do not account for the real trouble. "C. D. W." says: "I lose my best plants apparently from some other cause." That "some other cause" is just now the most serious problem our best sweet pea growers have on hand.

I do not know what state your questioner lives in, or what are his conditions of soil, but it matters not, for the trouble is very widely prevalent. We had it badly all through New England. At Cohocton, N. Y., where conditions are remarkably adapted to sweet peas and where they had some of the finest blossoms I ever saw and a very enthusiastic interest in them, they had to go through their vines and pull up those that yesterday were in full bloom, to-day are drooping and to-morrow are beyond recovery.

I take it your inquirer knows whether he had red spider or not. They don't "droop" with the red spider, although they rapidly go to straw. When a vine droops as if it had been cut off at the base there you have the trouble that is discouraging sweet pea growers to-day. Dig up such a vine and you find the fibrous part of the root gone. It bravely did all it could to carry the vine into its first bloom, but was completely exhausted in that effort. That is the simple story of hundreds of the best vines with all of us. Even if we did not have

the trouble in this acute form we had it in the shortening of our season of bloom. As far as my observation goes all our best growers are now getting not more than half the length of season of bloom we used to get, some not more than two weeks. With me the season of bloom begins at the middle of June and is at its best the second week of July. I thought myself fortunate this year to hold my vines in tolerably good bloom till the first week in August. I used to have thrifty vines up to frost and the blossoms attained fine size as the cool nights came back.

This trouble that your inquirer asks about is not, in my judgment, attributable any disease or insect. There is an early blight that many suffer from, in which sections of a row will die before they are six inches high. That is due to planting in soft ground that gets superheated, or to the trench method, which causes them either to damp off or suffocates the tender plants by filling in the earth around them. And this early blight is easily remedied by firming the soil both under the seed and above it. The other and more serious trouble acts like a root exhaustion. I have just dug up some of the greenest vines to examine the roots. A few years ago the vines were thrifty at this time of year, and when I pulled them up to be burned they would show a mass of fibrous roots. Now every root is destitute of these fresh rootlets and has an exhausted look. All the way along from the middle of June the roots give out, some having only vitality enough to give a little early bloom. We do not get the strong, healthy root action and growth that we used to.

By careful attention I had a fine season of bloom of about seven weeks and at show time in July tabled good displays. And still, even with close attention to their every need, I find now that the bloom comes in waves. They throw out their first crop of blossoms and then have to recuperate before they make another good crop of buds, and so on. Between the red spider and this root weakness they have to be helped and favored in every way. I miss the old vigor that held them steadily to their business and brought them still green and growing into the fall months. Even the vines grown in new soil I pulled up first this year. I have refrained from discussing this matter because it involves the whole subject of the modern sweet pea, taking in the whole range of the hybridizer's work and the seed grower. We are simply paying the price of the highly developed novelties that have been made for us. We have plighted our troth to these fair candidates and must take them "for better or for worse." The old staid habits of the flower have been changed. We must adjust ourselves kindly to this fact, but our seed growers will come to our relief if we will give them time. They are just now in the heyday of novelty work and it takes time for novelties to settle down to staid habits.

If our growers would settle on a good standard set of, say thirty varieties and grow the seed stock right up to a settled type year after year we would get the hardy habits of this flower back in ten years. We who grow our rows from this ever changing stock cannot expect anything different from what we are now experiencing. I keep in touch with the best amateur growers and we find it very perplexing now to carry our vines through any considerable period of bloom unless we are favored by a specially good season.

One thing is growing plainer every season; that we must change the location of our rows each year, or, if we cannot do that, we must thoroughly change the soil in the place where we want them. No amount of enriching or fussing will make a row do well now if sweet peas were grown there the year before. Change the location and see that the soil is deep and moderately rich. If it is heavy soil, let the ground be only slightly hollowed where you plant. If it is light soil hollow it out about three inches, and having firmed it, put the seed in one, two or three inches deep, according to the earliness or lateness of planting, and firm well above the seed. Cover only one inch if you plant in March in this latitude. If you do not get your seed in before the first of May cover it three inches. This simple direction of firming the soil is a great specific for blight. But you must be reasonable about this. Treading it down with the feet until it is comparatively firm, but not hard, is sufficient, and then finish it off neatly with a rake. We must not have a quick top growth for this flower. Early planting, slow germination, a month of May that hardens and holds them at a standstill, six weeks of cool root work before they begin to show a disposition to grow much above ground, the soil kept firm about the roots, with very light surface culture, no watering before they come into bud if you can help it, nothing to stimulate top growth before they begin to show bud, but plenty of good food and drink after that.

However, none of these directions touch the difficulty of your correspondent. Vines may be given the most approved culture, and still a percentage will droop and die just after apparently coming into a vigorous bloom. It is, I believe, a weakness of constitution. The seed that Mr. Eckford grows comes to us shriveled, but while our American seed is more plump it acts as if an unequal strength was imparted to it. The weaker ones carry the plant only barely into bloom. It is not reasonable to expect novelties and strong seed at the same time. And yet the American novelties show fine vigor at first. None of the stock we get now has the staying qualities. And this will continue to be so until our growers settle on such varieties as are good enough, and year after year put such work on them as will give them strong, settled habits.

It is not at all to the discredit of our seed growers that this is so, for it is a very patent law of nature that high development in the quality of a bloom can only be had at the expense of seed production, and the higher a flower is carried the less fortified it is against its foes. Here is the simple explanation of what we now have to contend with in growing the highly improved sweet pea. I am not disturbed by it, only I must be contented to see my sweet peas go by comparatively early in the season for the present. And I can as yet see no effectual remedy for the sudden drooping and dying of a percentage of our finest sorts. I can only think of one possible expedient which I have not tried—that of cutting the vines back before they bloom and giving them two weeks more of root development. Of course by late planting, if we have a cool, wet summer, a row of sweet peas may be made to blossom into September, but all my remarks apply to those who want blossoms as early as possible. There is little excuse for anyone who doesn't get at least six weeks of bloom from the middle of June on.

W. T. HUTCHINS.

Massachusetts.

Cannas at Cottage Gardens.

There were four acres of the leading varieties of cannas grown here this season and they made a very remarkable sight throughout the summer. In crimson President McKinley far outstripped all others as a dwarf. It is identical in color and height with Chas. Henderson, having a rather closer truss but in quantity of bloom there is no comparison. It is simply a complete mass of bright crimson. It has dark green foliage and throws its growth very freely, and is in the first rank as a bedder or pot plant. Alphonse Bouvier held its own as a tall crimson. It was grown between Florence Vaughan and Count de Bouchard and showed itself to perfection with those two fine yellows on either side.

Philadelphia is a beautiful dwarf crimson but is not a robust grower here. Tarrytown is in every respect a superb thing and too much can hardly be said in its praise. It is of a lighter color than Philadelphia, being more of a bright red. Its blooming proclivities are unprecedented, some of the growths bearing double headers and having six trusses, combined with which it has a clean healthy growth and dwarf habit. Chas. Henderson, which has always held first rank in dwarf crimson, will have to give first place to President McKinley, as will also Beauty Poitevine, though the latter is more of a scarlet and indispensable in a collection. Giant Crimson will prove an acquisition, being a very vigorous grower and carrying a massive truss of scarlet-crimson flowers. In general habit of growth it resembles President Cleveland.

In orange scarlet varieties President Cleveland has the lead, being massive in all its parts. It closely resembles Papa, but is rather larger and better colored, being a very free bloomer. Secretary Chabane is a light orange scarlet of the President Cleveland build of flower and is undoubtedly the best light colored in this section. Chicago is a very free flowering and cleanly variety in this class and made a fine display through the entire season.

The gilt edge varieties were Souvenir de Antoine Crozy, Mrs. Fairman Rogers, Mme. Crozy, Queen Charlotte, Pierson's Premier, Cuba and Samuel Trelease. Mrs. Fairman Rogers is an improvement on Madame Crozy, being rather larger and deeper gold margin. Souvenir de Antoine Crozy is a beautiful bright flower and superior to Pierson's Premier, having a deeper golden band and better habit of growth. Queen Charlotte is of a somewhat duller color than the two preceeding ones, but it makes up for much in its immense quantities of bloom. Cuba seems destined to outstrip all of these; it is very large in flower and truss and of dwarf habit and very cleanly in appearance. Samuel Trelease is one of great beauty on the type of Madame Crozy. It is entirely distinct and stands unrivalled. There is no question of its coming popularity, for all who see it fall in love with it on sight.

The yellows were led by Eldorado and Defender for mass effect. In tall yellows Count de Bouchard and Florence Vaughan rank first; the former is a slight improvement over the latter in size of flower, but there is little to choose between them. As a very dwarf, Yellow Crozy is a great acquisition. The flowers are a pure yellow and stand the sun without much bleaching and it is a healthy grower. Brilliant is an exquisite thing of pure lemon with a few small bright scarlet blotches. Doctor Masters is another gem of golden yellow with a very delicate raying of scarlet

from the center of the flower. Captain Drugan showed well; it is of the type of Florence Vaughan, being dwarf in habit.

Black Beauty and Bassett's Red were the leaders in the dark-leaved section. They are the perfection of high color. Bassett's Red is tall and Black Beauty dwarf, making them both indispensable for color massing. Souv. du President Carnot has rich crimson flowers and fine dark foliage. It is very floriferous and a fine grower. Egandale is a free bloomer with bright crimson flowers and bronze green foliage; one of the best. Leonard Vaughan is a crimson scarlet with fine truss and magnificent dark foliage. Admiral Avellan made a grand show of orange scarlet flowers and displaces J. D. Cabos as a tall variety. President Carnot is also a fine one in this class.

Mlle. Berat represented the pink class here. It is a very beautiful and desirable canna. It holds its color perfectly and makes a splendid display. Its unique and pleasing color will create a great demand for it.

New York.

ROSES SUFFER FROM COMPETITION OF CHRYSANTHEMUMS.—VIOLETS IN DEMAND AND PRICES ADVANCING.—COMING EXHIBITION OF GARDENERS' SOCIETY.—TWO FLORISTS ARRESTED. — BRIEF LOCAL NOTES AND PERSONALS.

A steady improvement, interrupted temporarily by election day, is the present condition of the cut flower business in New York City. Chrysanthemums are now in their height and it is wonderful to note the vast quantities that some of the wholesalers manage to put through their hands each day. Roses suffer noticeably from the influence of the chrysanthemums. Outside of a limited number of selected flowers roses move slowly and at lump prices that are exceedingly low. Violets are soaring, the demand very brisk and stock of the right kind in short supply. Carnations are improving in quality if not in quantity, but while chrysanthemums abound they enjoy no special prominence. Orchids are elegant. Cattleyas, Dendrobium Phalaenopsis, cypripediums and oncidiums are quite frequently seen, and it would seem that each year adds to the popular appreciation.

A tempting array of special premiums appears on the schedule for the chrysanthemum show of the New York Gardeners' Society, which is to be held on Saturday, November 19. The donors are J. M. Thorburn & Co., A. H. Hews & Co., Clucas & Boddington Co., F. L. Atkins, W. A. Manda, Thos. W. Weathered's Son and others. Competition is limited to private gardeners excepting in three classes, which are open to all. Schedules may be obtained from J. I. Donlan, 365 Fifth avenue, New York City.

A. Herrington has gone to Chicago to serve as judge in the chrysanthemum show. He is sending many superb specimen chrysanthemums to Thos. Young, Jr., now.

Frank Millang reports early morning business at the market as booming. Frank closes his doors at 4 p. m. every day. It is nice to be prosperous.

John Reickert is sending, among other varieties, some fine blooms of Louise D. Black. Ten thousand hybrid roses are in the frames at New Durham waiting to take the places occupied by the chrysanthemums.

The dyed chrysanthemum has made its appearance again in many of the florists' windows. Not the atrocious emerald green sort, but a soft pink that would be pretty if only natural.

Geo. M. Stumpp has had an employe and a local florist arrested, the former for stealing plants and the latter for receiving the stolen property. Both are out on bail.

Chas. H. Allen has disposed of his bulb business to J. Lewis Childs, and in exchange has taken the range of greenhouses formerly belonging to Julius Scharfi at Floral Park.

The younger James Weir, of Brooklyn, is duly elated over the birth of a daughter on Sunday, October 30.

Fine specimen plants of Acalypha Sanderi adorn the windows of Vaughan's Seed Store on Barclay street.

Joseph Falardeau has opened a store at 1389 Broadway.

Chicago.

THE MARKET.—ALL SURPLUS STOCK GOES TO MINNEAPOLIS.—THE CLUB MEETING. —THE ANNUAL BANQUET.—CAPT. SCHUNEMAN MEETS A MARINER'S FATE.

The market has not been overburdened with stock this week, but there have been enough flowers to meet all demands. It is said that the largest orders ever shipped out of Chicago went on Friday to Wm. Donaldson & Co., Minneapolis, and pretty well cleared the market of carnations and low priced chrysanthemums. L. S. Donaldson was in the city on Monday and stated that the orders placed by his firm aggregated 25,000 carnations and nearly as many 4-cent chrysanthemums.

Much interest seemed manifest at the first meeting of the Florists' Club under the presidency of Edgar Sanders, who, on taking his chair, plead indulgence for his shortcomings, promised his best efforts for the good of the club and asked the cordial support and regular attendance of the members. Following the paper by J. T. Anthony the discussion turned to the application of some very practical suggestions made by that gentleman. On motion of Mr. Rudd a reception committee consisting of John Reardon, Andrew McAdams and John Zech was appointed to receive visiting florists at the show. The committee was instructed to provide a visitors' register and admission badges. The trustees were asked to see that members of the club were supplied with suitable badges to be worn during the show, a matter the neglect of which had been previously commented on. William Wallace, of Oregon, made a pleasant talk and was invited to exploit his insecticide at the next meeting.

Thursday evening at the Sherman House the Florists' Club entertained the judges of the show and visiting friends in the trade at a banquet. President Sanders presided and made an excellent toastmaster. Some seventy plates were laid, and the occasion was one of the happiest in the history of the club.

Following the dinner Prof. John T. Cowell, who was mentioned by the president as the "man who was put on, and not put off, at Buffalo," was called on. Prof. Cowell said he regretted that he had not taken advantage of the inclement weather and kept away as speech making had never been his forte. "How does the Botanic Garden benefit the commercial florist?" he had been asked. When an old lady has a plant which she has nursed past its present usefulness, she donates it to the Botanic Garden, and the florist gets a chance to sell her a new one. Seriously he believed the plan of the garden a good one, and hoped the day was not far distant when such gardens will be as plenty in this country as they are in Europe.

A. Herrington was called upon as representing that famous home of floriculture, Madison, N. J. He said it could well be called the Rose City, sixty-eight establishments being devoted to that class of flowers in a town of some 5,000 inhabitants, but, he said, their prize winning roses would not have taken third place at Chicago. He believed that the phrase Windy City is a libel on Chicago, and that the atmospheric manifestations are not wind in the ordinary sense, but a displacement of air caused by the extraordinary activity prevailing.

Emil Buettner closed his remarks with the suggestion for a spring show, believing the time had come when such an exhibition would add to and increase the prestige of our present fall displays. Remarks applicable to the affairs of the Chicago Horticultural Society were made by Messrs. Vaughan, Grant and Rudd, and James Hartshorne entertained the company with a typical old English coachman's song. James Gurney, long with the Missouri Botanic Gardens, thoughtfully called to mind the lofty mission of the florist, who placed in the human heart the love of the beautiful in nature. He strongly urged the increased use of greater variety in bedding plants and borders, and hinted at the need of increased care in the blending of colors in planting.

J. Austin Shaw read an entertaining prose poem in his usual happy style. John Thorpe recalled the beginning of the S. A. F. fifteen years ago in an adjoining room in the same hotel, reminding the club of the growth of floriculture during that time. A. C. Kohlbrand, of Cincinnati, read a very facetious dialect letter from Herr Blumenschneider criticising flower show judges and advocating as a substitute that each man be the judge of his own exhibit. Messrs. W. H. Ellis, O. P. Bassett, Phil Hauswirth, J. A. Evans and many others made short talks pertinent to the occasion.

In the severe storm of Thursday the schooner H. Thal was wrecked twenty miles north of Chicago and her captain, H. Schuneman, and his crew drowned. Capt. Schuneman is well known to the trade, as he annually brought green and Christmas trees from Wisconsin and sold them from moorings at the Clark street bridge. He will be missed.

Boston.

A GREAT SOCIAL EVENT AT WABAN CONSERVATORIES. — MANY DISTINGUISHED VISITORS.—HOW THE CHRYSANTHEMUMS APPEARED.—A TRIP TO J. S. BAILEY'S.—FINE SPECIMEN PLANTS.—SEVENTY-FIVE THOUSAND CHRYSANTHEMUMS AT E. R. PEIRCE & SONS'.—STRANGERS IN TOWN.

The great event of recent date in this vicinity was the annual visit to Waban Conservatories which took place on Thursday, November 3. Jos. A. Dirwanger, of Portland, Me., Hon. C. W. Hoitt, Nashua, N. H., Wm. Appleton, Providence, R. I., P. O'Mara and Henry Dailledouze, of New York, and Prof. Louis C. Elson were among the visitors, among whom were also included a number of gentlemen prominent in state and municipal affairs and a large representation of the local floral fraternity, wholesale, retail and private and commercial grow-

ers. An hour and a half was spent in inspecting the wonderful chrysanthemums, most of which were just in their prime, and the roses which are always a great attraction at Waban Conservatories. Among the newer chrysanthemums that attracted much admiration were Mrs. Weeks, Mrs. Robt. Carey, Pennsylvania, Symphonia, Frank Hardy, Mme. Philip Rivorie, Autumn Glory, Gold Standard, Chimpwee and Golden Gate. All the popular and well-known varieties were also in elegant display. The Yellow Fellow did not show up well, both foliage and flower being in poor condition. Maud Dean also appeared unhealthy. W. H. Chadwick, Dolores and a few other late varieties were not sufficiently matured to show their points fully.

After the visitors had satisfied themselves with flower gazing and recorded their names in the big register, Mr. Wood, who had accompanied the party from Boston, led the way to the carriages and all were conveyed to Bailey's Hotel at South Natick, where an elegant dinner was served. Speech making, singing and general felicity occupied the balance of the afternoon. Lawrence Cotter served as toast master in his usual acceptable manner. Eloquent speeches were made by Postmaster Thomas, of Boston, Hon. Jos. O'Neil, Pres. F. H. Appleton, of the Massachusetts Horticultural Society, Mr. B. F. Keith and all the gifted brethren of the craft, such as Warren Ewell, P. O'Mara, M. H. Norton, Judge Hoitt and John Galvin. J. M. Galvin led the singing as he only can do it. The number present was seventy-four and the occasion was in every respect a memorable and most happy affair.

On Friday the Garden Committee of the Massachusetts Horticultural Society and a few others visited the beautiful estate of J. S. Bailey at West Roxbury. Here the chrysanthemum plants intended for the Boston exhibition were a special attraction and the visitors lingered long in admiration of the superb specimens, which were arranged in the palm house with an elevated walk around the sides. Mr. Bailey is fortunate in having a gardener of such rare ability as Wm. Donald and he acknowledges that fact with frank enthusiasm. The stove plants, orchids, rose and carnation houses and graperies all show the work of the finished gardener. A house of vines planted last May from February struck cuttings was especially noted and pronounced unequaled by the knowing ones. An elegant lunch was served in Mr. Bailey's dining room.

On Monday, November 7, the chrysanthemum farm of E. N. Peirce & Sons at Waverly was visited. Seventy-five thousand chrysanthemums of fine quality is a sight but seldom seen in one establishment and the marvel of all was how and where the proprietors manage to dispose of such an enormous crop. After a tour through the houses the visitors were entertained with characteristic liberality by the Messrs. Peirce.

At the meeting of the Horticultural Society on November 5, the executive committee reported an appropriation of $8100 for prizes and gratuities for 1899. It was voted that the society offer the use of its halls to the National Farmers' Congress which is to be held in Boston next year.

Visitors are numerous in Boston this week, drawn by the annual chrysanthemum show which is now on. Ernst Asmus, J. H. Taylor and B. F. Dorrance came in from New York by the Fall River Line on Tuesday morning, and judging from the number of Newporters one meets in the halls, that city by the sea must be nearly deserted for the time being.

Geo. Morton Chase, son of Geo. H. Chase of the Chase Nursery Company, at Malden, was married on November 2 to Miss Anna B. MacKeown, of Boston.

Some Troublesome Insects.

The worst insect pest of the chrysanthemum, in this part of the country at least, is the black or brown fly, Siphonophora chrysanthemi. This insect is one of the plant-lice, and may nearly always be found on chrysanthemum plants either in the greenhouse or outside unless vigorous measures have been taken toward its extermination. It is rarely found upon anything except the chrysanthemum and a few allied plants. The young shoots are a favorite situation for the black fly, and often one sees the stems just below the tips literally covered with these aphides sucking the sap from the plant. As a rule they are difficult insects to kill and the ordinary remedies do not serve to exterminate the pest, though they, of course, help to hold it in check.

Tobacco dust on the plants and fumigating the house with tobacco are methods usually practiced against the black fly, and so far as my experience goes they are not very satisfactory and kill only a portion of the aphides. The fumes can be made strong enough to kill them all, but there is then danger of injuring the foliage. Tobacco decoctions made by steeping one pound of tobacco stems in water and diluting sufficiently to make two gallons of liquid, will, if sprayed upon the plants, kill most of the insects with which it comes in contact, but some will escape, and several applications are necessary during the growing season. Then the black liquid discolors the foliage, and unless washed off mars the appearance of the plants. Whale oil soap and fir tree oil are somewhat cleaner to use but are no more effective, and fir tree oil is too expensive to use in large quantities. Carbon bisulphide is sometimes employed, but there is always more or less danger of injuring the plants if used strong enough to kill the insects; then, too, it is exceedingly inflammable and must be used with care. Fumigating the house with hydrocyanic acid gas is a sure way, if properly managed, to rid it of all animal life, but extreme caution is a necessity, for this is one of the most deadly poisons known. On account of being such a violent poison its use is always attended with more or less danger, and at many establishments the proprietors prefer to use other methods of destroying the black fly than to run this risk.

During the season of 1898 our chrysanthemums have been kept practically free from black fly by the use of kerosene and water. On the whole this treatment seems to me the most satisfactory of anything I have ever employed against the insect. Kerosene and water do not as a rule mix readily, but the mixing can be done under pressure, and the Deming Co., of Salem, Ohio, manufacture a pump with a kerosene attachment for this purpose. Our spraying was done with a bucket pump. The kerosene attachment is provided with an index which allows the kerosene to mix with the water in any proportions from five to fifty per cent. While perhaps not strictly accurate the indicator is approximately so, and near enough for practical purposes. Fifteen per cent of oil is sufficient for most soft bodied insects, and gave excellent results against the black chrysanthemum aphis. A larger proportion of oil cannot always be used with safety on the more tender plants in foliage. Five per cent failed to destroy the insects, while fifteen per cent killed nearly every one, and not a plant was injured. Two thorough sprayings were given, and a small portion of the plants were sprayed a third time from the potting of the rooted cuttings to their blooming season. On account of the cheapness of this remedy, together with the safety and effectiveness that accompany its use, I expect it will soon be employed to a considerable extent in greenhouses, not only against black fly, but against green fly, mealy bug, thrips and scale insects.

A few weeks ago chrysanthemum stems were sent to me that had been attacked by borers. A larva of the stalk borer, Gortyna nitela Guenee, was at work inside one of the stems. It is the first time I have known this insect to attack the chrysanthemum, though it injures a variety of plants, including the potato, tomato, corn, aster, dahlia, cocklebur, and species of lilium. It was especially destructive to Lilium candidum during the season of 1897. Very little can be done in fighting this insect except to destroy all infested plants.

Another quite serious pest of the chrysanthemum is the leaf miner, Phytomyza chrysanthemi. This insect was not known to attack cultivated plants until about twelve years ago. It seems to be quite local in its destructiveness; it has never caused any injury here at the Station, yet fifty miles away it has at times been so destructive that florists made statements to the effect that unless the ravages of this insect abated they would be compelled to give up growing chrysanthemums. It does not seem to be as troublesome as it was a few years ago. The adult is a small fly which deposits the eggs either in or on the leaves. The eggs soon hatch and the larvae, which are small, footless maggots, begin to mine and tunnel in the leaves between the epidermis of the upper and that of the lower surfaces. When full-grown the larva transforms into a pupa within the mines of the leaf and later the adult fly emerges. The only remedy known is to destroy all infested leaves. According to Mr. Coquillett (*Insect Life*, vol. vii. p. 399) this leaf miner is also found upon cinerarias, tansy and eupatorium.

The drone fly, Eristalis truax, is nearly always found about chrysanthemum flowers, but it does no great harm to them. In fact, some growers consider the fly a great benefactor because it pollinates the flowers and the plants bear seed in consequence. Just how much good is done in this way by the fly has not been definitely determined but it certainly visits the flowers. Some growers kill the fly because it soils the blossoms.

Connecticut. W. E. BRITTON.

BAY CITY, MICH.—Boehringer Bros. have an exceptionally fine stock this season and report a prosperous trade.

NEW HARMONY, IND.—Wm. Hartman has just completed a large addition to his greenhouses.

OMRO, WIS.—The Omro Horticultural Society holds its November meeting and annual chrysanthemum show November 16 to 18.

MELROSE, MASS.—The Amateur Gardeners' Association has increased in membership very rapidly and its future prospects are exceedingly bright.

WE trust our readers will carefully peruse the pages of this issue of the AMERICAN FLORIST, and give the advertisers therein a trial order when goods such as they handle are needed.

INCLEMENT weather, though without much snow, has lessened the quantity of green picked in Wisconsin, and although prices have been reasonable, compared with former years, there is—in view of the continued stormy weather, much rain and some snow—little probability of a surplus this season. One great advantage in the cold, moist weather is that nearly all stock so far received has been first-class in every way. Buyers are better posted than ever as to quality required.

Greenhouse Building.

Philadelphia, Pa.—Ralph Morgan, conservatory 20x115.

The Age of Palms.

ED. AM. FLORIST:—Can the age of palms be determined by any means?

SUBSCRIBER.

No exact method applicable to all cases is known to me. Experienced cultivators of palms can make surprisingly good conjectures as to the age of certain palms, but such determinations appear to be only approximate at best.

GEORGE L. GOODALE.

Cambridge, Mass.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Robt. Sandiford, Mansfield, O., has registered at the secretary's office the following new plants:

Pelargonium Sandiford's Surprise; large black blotches on upper petals, edged fiery red, surrounded with a broad band of white. Lower petals white with bright red spots in center of each.

Sandiford's Wonder; semi-double, pure white, heavily fringed and crumpled. Some flowers showing small maroon spots in upper petals.

Sandiford's Best; pink, edged with a deep band of white, large pure white throat, large full trusses.

WM. J. STEWART, Sec'y.

The Dutch Horticulturists.

At the September meeting of the Dutch Horticultural and Botanical Society, held in Amsterdam, the floral committee made the following awards: First-class certificates to H. Hornsveld for Canna Hofgartendirector Wendland, cactus dahlias, Arachne, Capstan, Keyne's White and Standard Bearer; T. E. Houtvester for Canna H. Wendland; E. H. Krelage & Son for Canna Stadtrath Heidenreich, cactus dahlias, Arachne, Capstan, Daffodil, Keyne's White, Kingfisher, Night, Norfolk Hero and Standard Bearer, and Montbretia crocosmæflora Oriflamme; W. Van Veen for cactus dahlias Arachne and Keyne's White; B. Ruys for Cactus Dahlia Keyne's White; Groenewegen & Son for Rubus sorbifolius; V. Schertzer & Son for Tagetes Lemon Queen and T. Prince of Orange. Certificates of merit to T. E. Houtvester for Chrysanthemum Harvest Home; P. Van Noordt & Son for cactus dahlia Koningin Wilhelmina; H. Hornsveld for cactus dahlias Loreley; E. H. Krelage & Son for cactus dahlias, Loreley and Stern von Schoneberg, Lathyrus odoratus Countess of Powis and L. odoratus Lady Nina Balfour; B. Ruys for cactus dahlia Loreley. K. Wezelenburg received honorable mention for a collection of ericas and hibiscus, also Jac. Smits for a collection of syringas. J. D. Onderwater was awarded a gilded medal for a collection of cactus dahlias.

Hardiness of Ulex Europaeus.

ED. AM. FLORIST:—Please tell me through your columns what protection is needed by the furze (Ulex Europæus) when planted in the open. Can it be saved over winter? P. F.

New York.

Eight years ago I received seeds of this plant from a friend. The seeds germinated, and I have several large plants which are vigorous and healthy. In the vicinity of Boston this plant is not quite hardy and it needs slight protection in winter. In early winter, just before severe weather sets in, the bushes are bent down as near the ground as possible, large boxes being then placed over them. Outside or over the boxes a thick layer of leaves is applied. Care should be taken that they are not uncovered too early in the spring as late spring frosts do more harm than severe winter frosts.

ROBERT CAMERON.

Cement Paths.

ED. AM. FLORIST:—In reply to the inquiry of "W. S. J." I can say that we have had cement paths in our houses for the last twelve years and the only objection we can find is that they will wear out rubber hose if employes persist in dragging hose instead of carrying it. There are a great many advantages, of which durability, dryness and neatness are the most important. A properly laid cement walk will last a lifetime with practically no repairs and the first cost is not much greater, if any, than that of a good plank walk. I would add that Portland cement should be used and either sand or sifted coal ashes can be employed, sand making a smoother job, but ashes are just as durable. We have found a slightly convex surface the best adapted for our work. A. H. LANGE.

ED. AM. FLORIST:—I notice an inquiry of "W. S. J." as to what objection there is too cement walks in greenhouses. I know of none and I have used them for the past fifteen years. All my walks that are on the ground are cemented. In my case my houses have a fall of a quarter of an inch to the foot in the length of the house and I make the walks hollowing in the center and the waste water runs to the lowest corner of the house where it is carried off by a terra cotta drain protected by grating and properly trapped so as not to allow cold air to enter. In making cement paths we first grade the walk the shape we want it when finished, and then spread on the cement about one inch thick, working the surface very smooth with a trowel. You must work the surface well if you want a good walk and if you use a good brand of Portland cement, one part cement to two parts sharp sand, you can walk on it the next day. Then you have a walk which will last a lifetime, is always easy to keep clean and saves labor in sweeping. JOSEPH HEACOCK.

Hardy Plants for Rockery.

ED. AM. FLORIST;—I would like a list of hardy plants that would thrive in a rockery about fifteen feet in diameter, where water from the fountain is playing most of the time. P.

In reply to above inquiry, we would state that it would be necessary to limit the varieties mostly to ferns, and possibly the following hardy perennials might succeed under such adverse conditions: Acanthus mollis, Astilbe Chinensis, Cimicifuga racemosa, Lobelia cardinalis, L. syphilitica, L. syphilitica alba, Lysimachia clethroides, Lythrum Salicaria, L. virgatum, Lythrum species from Japan, Myosotis palustris semperflorens, Ophiopogon Jaburan, Polygonatum multiflorum, Saxifragra crassifolia, Spiræa aruncus, S. astilboides, Thalictrum minus, Tradescantia Virginica, Trollius Europæus.

These, however, would be more a list from which to experiment than one on which we would care to place positive assertion that they would do well.

J. WOODWARD MANNING.

Liquid Fertilizer for Chrysanthemums.

For three years we have treated chrysanthemum plants with a liquid fertilizer prepared after a formula given by Prof. Paul Wagner, director of the German Experiment Station at Darmstadt. This solution was given to the plants twice a week, beginning about six weeks before the blooming season and continuing until the season is over. The results have been satisfactory and fine plants with good foliage and blooms have been produced. The solution is much cleaner than liquid manure, and the cost of preparing it is extremely small. It is called Wagner's solution and may be prepared as follows:

Phosphate of ammonia,	2 oz.
Nitrate of soda,	1¾ oz.
Nitrate of potash,	1¾ oz.
Sulphate of ammonia,	1⅓ oz.
Water,	50 gals.

This makes an excellent liquid fertilizer for other plants as well as chrysanthemums, and we always keep it on hand.

W. E. BRITTON.

Specimen Chrysanthemums.

The exhibition season is now upon us and it affords growers an excellent opportunity to compare notes. We try many new varieties every season, though often advised not to do so, but rather stick to what we know to be good. It is an acknowledged fact, however, that the life of a variety is comparatively short, and that many new varieties will be forgotten, almost, in a year or two.

My selection for 1892 included the following popular varieties: Cullingfordii, M. Delaux, Mabel Ward, Jos. H. White,

Louis Boehmer, Ivory, Mrs. Alpheus Hardy, G. Daniels, Yellow Ball, V. H. Hallock, W. H. Lincoln, Mrs. Fottler, G. W. Childs, Hicks Arnold, President Hyde, Duchess of Connaught and C. B. Whitnall. Any grower will admit this was a representative collection. But very few of these are grown to-day. While we are carried along somewhat by novelty, a majority of these varieties have been discarded because we have better ones. A few still remain, unexcelled for the purpose of specimen plants, but these have been discarded long ago by the cut flower growers.

Better plants are grown now than was the case some years ago. We have become more exacting in our demand for improved form in the flowers, brighter colors, better shaped plants and more luxuriant foliage. We have disbudded closer for increased size, following the plan of the grower for blooms, but in part, because we have had to accept cut flower varieties if we wished to be up-to-date. However much improved in foliage and symmetry the plants of to-day have become, the line of advance requires that we continue to change. It is not necessary to follow the cut flower grower. Those who have watched the public closely in their criticisms know that a neatly formed pompon is most admired.

Beauty of form, clear colors, and an effective mass of bloom tell most, irrespective of the size of the individual flower. We can spread more color over our plants by less disbudding, as we did years ago. Stakes are a nuisance at best. It is unnatural to fill a pot with stakes. Plants trained on wire frames are less clumsy in appearance. A frame can be taken off more quickly than it is possible to remove stakes, and all the parts belonging to each can be tied together with a tag on each giving the diameter, and the name of the variety on which it was used, if thought convenient, and laid away for another season. When once a frame is placed in position the work of tying is easy.

Having taken our notes, discarded our failures and selected our list for another season we should begin at once to make sure of our stock. We can take cuttings and these when rooted can be kept cool until the time comes to grow them along. Sometimes it may be necessary to retake them. My own stock is kept in a well-protected frame, where occasionally the plants are frozen, but not enough to do them harm; perhaps it does them good. We should not destroy the foliage on specimens until it dies a natural death. This would strengthen the stool, but there are few who can afford the required space.

This season finds me a week later than usual. I am too late for the exhibition in Boston November 8 to 11. It is customary to ask the reason, and this brings into review the season's treatment. I did not take my cuttings so early as usual because it was intended to grow them in a smaller size of pot—10-inch. In this I was following the plan of my earlier years as an exhibitor. But I then had more trouble in holding my plants than getting them in, so I do not attribute lateness to this. Then as now I selected varieties for dates, as any grower of cut flowers would do, not expecting any management to change the season of blooming, except possibly a little shading to hold those already in; but no forcing, in the strict sense of the term, would be expected to hurry them.

The plants were slow in taking hold after the final shift, and it was not until August that rapid growth began. This was continued well into September when they were larger than I wished them, averaging three feet in 10-inch pots. Referring to my notes of several previous years, I found them growing when they should be setting buds. Feeding was gradually discontinued, though not altogether, as vigorous plants would suffer a loss of foliage if this were done, and set a poor bud. It is probably safer to blame the weather (no joke). It was unseasonably hot in late August and through the greater part of September. Buds do not set until the nights begin to get cool. In this connection it is a noteworthy fact that our earliest blooms come from the sea shore and hill tops, and that chrysanthemums are later in the south than north.

T. D. HATFIELD.

St. Louis.

NO CHANGE IN THE MARKET.—FLORISTS' CLUB HOLDS ITS FIRST AFTERNOON SESSION.—WALDBART'S NEW VENTURE.

There has been no change of note in the cut flower situation during the past week. Roses have shortened up somewhat, still there is an over supply for this time of the year. Carnations are scarce, improving, however, in quality with each day.

At the last meeting of the Florists' Club twenty members were present. This was the first afternoon meeting of a series of six which will occur during the winter months, and the attendance was considerably more than we have been having at our regular evening meetings. H. J. Falkenhamer was elected to membership. O. G. Koenig's application was read.

Alex. Waldhart, formerly in business on Grand avenue and Chestnut street, has rented a store under the Lindell Hotel, where he will soon open as a retail florist. Owing to Washington avenue having become very much more of a retail street during the past few months, he expects to find the location a very much improved stand over what it was several seasons ago, when two florists tried to make a success in the same location and failed.

R. F. T.

Springfield, Ill.

Brown & Canfield have no complaints to make about their chrysanthemums. Although some varieties, such as Mme. Bergmann and Robinson, are rather late they have many others which are in the best of condition, finding a ready market both locally and in St. Louis. They have a batch of Areca lutescens, grown in 6-inch pots, which for thrift and vigor of growth will equal the best of their kind grown by specialists. These plants were grown from seed in their own establishment.

Miss Bell Miller has added five houses to her establishment, having now a total of 20,000 feet of glass. She has likewise remodeled and has otherwise improved the other houses, having changed the heating system from hot water to steam. Miss Miller is a successful carnation and rose grower and ships most of her stock to the St. Louis market. Among other varieties in roses, President Carnot is grown very successfully.

Two houses of ferns in the finest conditions, in various stages of growth is what one finds at Louis Unverzagt's place. This is a case of having too much of a good thing, although Mr. Unverzagt expects to ship quite a few to wholesale dealers. His palms and general stock look fine and thrifty.

Mr. Phelps reports an improvement in business.

HOMO.

ROCHELLE, ILL.—Dwight Herrick is making extensive improvements on his greenhouses. He finds trade good.

ANDERSON, IND.—Stuart & Haugh have this year grown some splendid chrysanthemums. Their entire stock is in fine condition.

LAKE GENEVA, WIS.—Frank F. Manahan, of the Lake Geneva Floral Company has an extensive job of landscape gardening upon the Beidler estate.

BROCKTON, MASS.—The Brockton florists are working together with much enthusiasm for the success of their exhibition, which is to be held on November 16, 17, 18. Premium lists can be had of B. Ellis Eaton.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By first-class fireman and steamfitter. Address Y N, care Am. Florist.

SITUATION WANTED—By rose grower, married man. Chicago references. Address T T, care American Florist.

SITUATION WANTED—By all-round workman on or before Dec. 1st. Good fireman, propagator, etc. Address N Y, care American Florist.

SITUATION WANTED—At once, by English grower well up in growing for market. Low terms accepted for start. A W W, care Am. Florist

SITUATION WANTED—By experienced florist and grower fine roses, carnations, mums, violets; good designer. Best references. G, Box 547, Alliance, O.

SITUATION WANTED—By first-class grower of cut flowers and plants with 20 years' experience; single. Fair wages expected. K K, care H. Kuehlke Kansas City, Westport, Mo.

SITUATION WANTED—By practical florist of 15 years' experience; good flower grower, roses, carnations, etc; competent to take charge; now disengaged; German, single, sober, reliable. Address V G, care American Florist.

WANTED—Two young men to assist in general greenhouse work. Address, stating wages with board. R, care American Florist.

WANTED—Single man to take care of section of rose houses. Call at REINBERG BROS'., 51 Wabash Ave., Chicago.

WANTED—An offer to buy or rent greenhouses in a good city of 60,000 inhabitants. A good chance for the right man. Address J K, care Am. Florist.

WANTED—A good all round greenhouse hand, one who has worked in commercial places. Wages, $20 per month with board. W. L. SMITH, Aurora, Ill.

WANTED—2400 feet 10x12 or larger size single or double and 2400 feet rafters. No objection if second-hand material. State price. Address J. K. POSTMA, Princeton, Ky.

FOR SALE—Elegant florist's refrigerator, cheap; on view flower show. HIRSCHHORN, 46 Madison, Chicago.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR RENT—Two greenhouses, about 5000 feet glass, a good retail stand in city of Asheville, N. C.; also dwelling house if desired. Fine opportunity for a good tenant. Address REV. H. M. PARKER, James Island, S. C.

FOR SALE.

A well established and paying florist's business, with 10 to 30 acres of land, 17,000 square feet of glass. Good residence and houses for help. Situated near one of the largest cities in California. Ill health and desire to retire from business cause for selling. For full particulars address

LOCK BOX 720, Los Angeles, Cal.

FOR SALE.

A florist establishment for sale consisting of 13,000 square feet of glass, in good condition. Heated by steam; in the city limits, located in a city of 18,000 inhabitants on the Mississippi river in Iowa, with several acres of land and dwelling house. Must sell soon on account of old age. For further particulars address

IOWA, care American Florist.

The Cold Grapery.

ED. AM. FLORIST:—Permit me to ask for information as to the best time to trim grape vines in a cold grapery, also as to when they should be started? R. L.

The best time to prune grape vines in a cold grapery is immediately after the leaves have fallen. If the frost has affected the leaves while they were green they will not fall off and in that case the vines should be pruned as soon as the frost has killed the leaves. When the vines are pruned and the house cleaned, tie the rods horizontally along the lower wires and place some shading over them to protect them from the sun. This covering should be so adjusted that the vines can be easily examined and when the buds begin to swell it should be removed. There is no set time to start the vines. They will start when the weather becomes sufficiently warm to promote growth and the chief trouble, I find, is to keep them from starting too soon. To prevent this the vinery should be freely ventilated all winter, when the weather permits. The retarding must be done before the eyes swell, for if attempted afterwards it is certain to prove a failure.

GEO. MCWILLIAM.

USE W. C. KRICK'S FLORISTS' Immortelle Letters, Etc.

Medal Awarded at the World's Fair

And Highest Award Wherever Exhibited.

These Letters and Designs are made of the best Immortelles, wired on wood or metal frames, having holes drilled in them to insert toothpicks, by which they are fastened in the design. Give them a trial. You will find these goods to be superior to any in the market.

2-inch Letters, $2.50 per 100. Postage, 15 cts. per 100.

For other styles of Letters, Emblems and Designs send for catalogue. Before purchasing send for free sample and catalogue, and compare with any other letter on the market.

For sale by all Florists' Supply Dealers.

W. C. KRICK, 1287 Broadway, Brooklyn, N.Y.

HOLLY=VAUGHAN'S XXX BRAND.

THE Holly situation changes nearly every year. For the last three years they've begun to bring it into the country towns like potatoes. Every man has taken to cutting his own—or some other man's Holly, and packs it well, badly or indifferently, or any old way. The result is very bad for the retail florist. When we first started the Holly business, in 1880, our buyer contracted for a man's grove and cut the best and sorted it himself, and established Vaughan's XXX Stock as a brand worth having. It is nearly 20 years old—almost of age—and has held its own well. But we wondered why so many culls came our way (to sell to peddlers at half rates) and this fall our Mr. Vaughan located this town market Holly system, and cut it off from our man. We are buying and packing our Holly in the woods ourselves, and it costs more money, but it is worth to the retailer a lot more than it costs. **A good case of Holly is easily worth Ten Dollars, while cull stock can't be given away.**

We can suggest delivery dates which will keep you in good supply on the best days for selling Holly. Our prices are not advanced. How much can you use?

Vaughan's Seed Store, 84-86 Randolph St., CHICAGO. 14 Barclay St., NEW YORK.

WE'RE not in the woods but we are HEADQUARTERS for

Bouquet Green

Also Select grade **Delaware Holly**

We also ship out perfect Palms and fine Ferns at reasonable prices.

Order GREEN WREATHING for Thanksgiving now. Write for quotations. Special price in quantity.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

D. I. BUSHNELL, Mrs. Bushnell and their son, of St. Louis, sail for Italy on November 19, for a winter visit.

MINNEAPOLIS.—C. C. Morse, of Santa Clara, Calif., who has been ill at the West Hotel for the last two weeks, has improved so that a homeward journey was decided on, and he left on November 8, going via. Omaha, with Mrs. Morse and a Red Cross nurse in attendance.

Catalogue Onion Seed Prices.

This is the time of the year when catalogue, as well as local, seedsmen are anxious to obtain reliable opinions on onion seed values, that their printed prices when issued may not only contain a fair margin of profit, but be low enough to sell out their stock. Readers of the AMERICAN FLORIST who have read our crop reports on onion seed as the season advanced, must have formed by this time a tolerably correct idea as to the available stocks of old and new onion seed. We believe it is generally admitted that the amount of good seed in sight is not likely to be too much for the coming season's demand. We have asked a leading dealer to put retail catalogue figures on the standard varieties as he thinks they should be, and we print the list below. The FLORIST would be very glad indeed to receive expressions of opinion from other seed houses on these figures. As Mr. Burpee stated at the last meeting of the Seed Trade Association, onion was retailed last year at lower prices than contracts could be made for the next season. Such a condition of affairs ought not to be repeated, and if a fairly uniform scale of prices could be adopted, great benefit to the seed trade would certainly result, not alone in fair profits to the seedsmen the coming season, but better pay for careful work by the growers.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

PROF. L. H. BAILEY has returned from a vacation spent in Europe.

HARLAN P. KELSEY reports fall sales as excellent with bright prospects for spring trade.

F. W. WATSON & Co, Topeka, Kas., have just completed a large grafting house.

ROCHESTER nurserymen consider the aggregate of fall orders as twenty-five per cent ahead of last year.

THE lateness of the season and the extraordinary drought is causing English nurserymen no end of trouble.

THE New York park board will plant 30,000 trees and shrubs in Riverside Park at an estimated cost of $18,000.

GUTHRIE, KY.—Downer Bros. gave a rabbit hunt to rid their nurseries of the animals which were destroying their young trees.

THE park commissioners of Chattanooga, Tenn., will set out 3000 silver maple and 1000 Carolina poplar on public streets this fall.

W. & T. SMITH COMPANY note apple and cherry stock well cleaned up in the vicinity of Geneva, N. Y. They expect a very large spring trade.

ALPENA, MICH.—C. E. Sans has this season made over 100 gallons of wine from elderberries grown at his greenhouses. It is suited to medicinal uses and sells readily.

PROF. E. B. FERNOW has resigned the position of Chief of the Division of Forestry of the United States Agricultural Department to take charge of the new school of forestry at Cornell University.

THE Storrs & Harrison Company reports wet weather which has put them behind in digging. They report fall orders equal to and probably exceeding last season, with improved prices on some lines.

W. G. JOHNSON, entomologist for the state of Maryland, is strictly enforcing the anti-scale law and has recently held three shipments of nursery stock which were not accompanied by certificates of inspection.

NURSERYMEN predict a lively scramble for apple and cherry seedlings before the packing season ends. The shortage of apple seedlings has already caused an advance of 50 cents per thousand and higher prices are anticipated.

ANDOVER, MASS.—The chrysanthemum show of the Florists' and Gardeners' Club was held on November 4-5. The committee in charge, J. D. Fairweather, J. H. Playdon, Geo. Millett and Geo. Piddington are entitled to much credit for the perfect arrangements and general success of the show.

..AZALEAS..

WE are now filling orders for Azaleas, importations of which have arrived in excellent condition. Import prices will hold good as long as the stock is not potted; the varieties we supply are the most popular sorts suited to the American market and we give you any proportion you wish in the four leaders—

Mme. Vander Cruyssen, Vervaeneana, Deutsche Perle, Bernhardt's Andrea Alba.

Personal inspection of the stock in Belgium, through our own representatives, enables us to offer the best stock obtainable at bottom prices.

Order now and save heavy express charges later on, as shipments can at this time be made safely by freight.

Fine Bush Crowns, well set with buds:

10 to 12 inches in diameter	$4.50	per doz.;	$35.00	per 100

13 to 15 " "	7.50	"	55.00	"

SPECIMEN PLANTS of the leading varieties, $1.00, $2.00, $2.50 and $3.00 each, according to size.

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA.

Mention American Florist when writing to advertisers.

SPECIAL NOTICE. - SOMETHING - READY AT ONCE.

YOU CAN GROW TO A PROFIT.

We offer two-year-old Crimson Rambler Roses in fine condition at $25 per hundred, and will send six as a sample carefully packed, for $2. These plants should sell at Easter for $3 each.

ROBERT CRAIG & SON, 49th & Market Sts., PHILADELPHIA.

Our Pastimes.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

H. F. A. LANGE, of Worcester, Mass., has gone to Maine upon his annual quest for moose.

Bowling at Detroit.

Heretofore the Detroit Florists' Club has had no regular evening for sport on the alleys but in the future will meet every Monday evening and by dint of practice hopes to organize a team capable of holding the Evans Challenge Cup when St. Louis brings it to the convention of 1899.

Chicago Bowling Notes.

George Stollery cannot be classed as a veteran bowler, but he belongs in the champion class nevertheless. At the last session of the bowling club he made the high average in a contest in which twenty players participated. Captain J. S. Wilson made the high score, 191.

At St. Louis.

During October J. J. Beneke bowled twenty-four games and made an average of 147½ with a high score of 216, thereby acquiring both medals which were in competition. His nearest competitors were C. Kuehn, who made an average of 144 in twenty-four games, and D. Finlayson, whose high score was 200.

New York Pastimes.

The bowlers met at the Fourth avenue alleys last Monday evening and had a royal good time. Some of the old war horses were there but the crowd was composed mainly of the younger element. They are beginning to steady down and scores improve with each meeting. On next Monday, November 14, the meeting will be held at 3 p. m. and as officers are to be elected and rules adopted it is expected that a very large crowd will be on hand.

Bowling at Philadelphia.

A match between the team that represented Philadelphia at Omaha and a team selected from among those who did not go was played last Monday evening. There was much fun and raillery during the progress of the game. The Omahas were ahead thirty-eight pins in the first game, twenty-one at the end of the second and at the finish were still thirteen pins ahead. Smith, who was low man at Omaha, being then under the weather, showed that he had fully recovered by making the best score of the match, 468 in the three games.

ROBERT BUIST COMPANY, Philadelphia, Pa.

What John G. Gardner Says:

JOBSTOWN, N. J., NOV. 6, '98.

"GEORGE C. WASTON, Esq., Phila.

"DEAR SIR:—Please ship me another *1000* pounds of spawn from your next consignment. What you sent me in September is fully up to the usual high standard of your W P brand; it is *earlier in bearing* and *enormously prolific* and away ahead of any other brand I have ever tried in my *THIRTY YEARS'* experience in mushroom growing—and I have experimented with most all. W P is good enough for me. Yours very truly,

JOHN G. GARDNER."

The above letter is a sample of many which I am daily receiving from the principal mushroom growers all over the country, and is *convincing proof* of the superiority of my brand. Why should you pay fancy prices for inferior stock when you can buy this at the right figures. Write to me; no trouble to answer inquiries. My 24-page booklet on Mushroom Culture free to buyers or intending buyers—to others, 10c.

KRAFT'S PLANT TONIC

99% XX

It Kills the Harrisii Lily Mite — C. J. Stromback, of Lincoln Park, Chicago, says so.
It Kills Black and other Aphides — The Cornell University Experiment Station authorities, Ithaca, N. Y., say so.
It Kills Mealy Bug AND Prevents Carnation Rust — James Leake, gardener to B. Eldredge, Belvidere, Ill., says so.
It Kills Palm Scales — August Jurgens, Herendon St., Chicago, says so.

It kills all insect enemies of plants, prevents disease in all its varieties and imparts vigor to the growth without risk of injury to the most delicate forms of vegetation. This preparation is non-poisonous. We guarantee the above to be correct in every particular.

Nashville, Tenn.

TRADE SHOWS CONSIDERABLE IMPROVEMENT AND BRIGHT PROSPECTS.—CHRYSANTHEMUMS AND ROSES.

While the floral business has shown more decided activity in the past few weeks, there is still room for improvement. The outlook, however, is very favorable. Prices are not anything extra and the supply of stock continues to be abundant. Chrysanthemums are in all their glory, but they seem to have lost caste. Large blooms which a year or so ago easily brought 25 cents or 30 cents apiece now sell at $1.50 per dozen.

Among the roses the American Beauty ranks all others, and on all swell occasions florists can scarcely supply the demand, while their ice boxes are running over with other beautiful roses. Currey & Co. are growing fine Meteors, and this is a popular favorite. The quality of roses is fine. Brides and Bridesmaids are very large and handsome. Perles seem to have dropped out entirely.

Joy & Son had a palm sale at half price on Saturday last. M. C. DORRIS.

Bloomington, Ill.

A treat, which is likely to be appreciated, is promised to the public by A. Washburn & Sons, who will give a chrysanthemum show at their store on Main street. Mrs. Robinson, Sunderbruch, Yellow Queen, Ivory and a host of others, will no doubt attract a deal of attention, as their chrysanthemums this season are exceptionally fine. Whatever experience others may have had with Belle Siebrecht, at the Washburn's establishment this pretty, though capricious rose is doing splendidly. What it lacks in stem it fully makes up in size, color and fragrance of bloom and, what is most in its favor, it takes with the customers. A. Washburn is now a resident of Bloomington, having recently moved to his handsome residence in the finest part of the city. The greenhouses, which are located outside of the city limits, are in charge of Frank Washburn.

HOMO.

TERRE HAUTE, IND.—Otto Heinl & Co. embark in business under most favorable auspices. They have some fine greenhouses, an uptown office at 33 N. Fifth street, a thorough knowledge of the trade and a wide acquaintance.

PLYMOUTH, MASS.—F. W. North, formerly of Worcester, has leased the greenhouse of E. F. Shaw on Summer street and will henceforth carry on the business at that location.

OWENSBORO, KY.—The annual chrysanthemum show, to be held in the Miller building, was postponed to November 16–18 on account of the lateness of the blooms.

WHEELING, W. VA.—L. A. Smith has opened a model flower store at 66 Twelfth street which he will conduct in connection with his greenhouses on the Island.

MARLBORO, MASS.—F. B. Gleason gave a free chrysanthemum show in G. A. R. hall on November 2 with marked success. Many people visited and admired the display.

CLARKSVILLE, TENN.—James Morton, proprietor of Evergreen Lodge, has been called to Waco, Texas, to judge the exhibits at the chrysanthemum show.

CHRYSANTHEMUM SHOWS AT CITY PARKS.—MRS. WILLIAMS GIVES AN EXHIBITION.

The conservatories at Schenley, Highland and Allegheny parks all have chrysanthemum shows at present. They are drawing large numbers of visitors and giving great satisfaction.

Mrs. A. E. Williams, 1733 Carson street, South Side, gave her annual chrysanthemum show the latter part of last week at her salesroom. All the leading varieties were shown, and in very artistic arrangement. In the development of the flowers and foliage the plants shown were easily the equal of the larger shows here. Among those especially fine were Mrs. H. Robinson, Maud Dean and Golden Gate. The plants were grown with from two to four blooms each. Mrs. Williams reports business good on her side of the city. REGIA.

Baltimore.

BRIGHT WEATHER BRINGS BETTER BUSINESS.—W. P. BINDER'S SEEDLINGS.—DEATH OF AUGUST AUER.

The bright weather has made trade somewhat better the past week and chrysanthemums and violets are in demand. The latter, however, are still scarce, though the quality is greatly improved. Other flowers are fairly abundant, roses, especially, coming in large quantities and in fine shape.

W. Paul Binder has this season put four new seedlings on the market, Willow Brook, white; Lady Harriet, bright pink; Robert Halliday, golden yellow, and Harry A. Parr, a delicate yellow. This latter variety was one included in an exhibit of six which won the cup offered by the A. C. S. at Philadelphia, October 15.

We regret to announce the death of August Auer, which took place at his home in Catonsville November 2.

A. R. J.

KALAMAZOO, MICH.—Van Bochove Bros. recently gave a chrysanthemum show at their greenhouses and had an orchestra to make it pleasant for the large number of admiring visitors.

THE CONDITION OF STOCK.—GOOD ORDERS IN SIGHT.—FLOWER SHOW COMMITTEE PLEASED.—JOTTINGS IN THE TRADE.

Roses and chrysanthemums are good but carnations are inclined to be scarce, especially good flowers. Beauties are still good and find ready sale. Store windows now are beautiful, every one making a fine show. Thrall had a display of chrysanthemums Friday and Saturday which was fine; the flowers were of the best. The weddings and receptions announced for the next few days will make good business.

The committee on flower show is very much pleased with the results of its labors.

D. B. Long was out of town last week.

Fred. Stokes has gone to Pittsburg to manage the wholesale store of Mr. Kasting in that city.

Prof. Cowell informs us that work is progressing favorably on the new greenhouses at South Park. W.

Portland, Ore.

One of the attractions at the Portland Industrial Exposition was a magnificent group of palms, ferns, ficus, dracænas and araucarias, the work of L. G. Pfunder. Artistically arranged at each corner of the group was a handsome bouquet of long stemmed roses of different varieties made by Miss Rose Pfunder, who has the reputation of being the most expert designer of cut flowers in the northwest. W. G.

COUNCIL BLUFFS, IA.—J. F. Wilcox states that the Trans-Mississippi Exposition just closed helped his trade and that of every Omaha florist and that he believes that the fair was of incalculable benefit to the entire west.

ANDERSON & CHRISTENSEN, Short Hills, N. J.

How Does It Happen?

That the largest load of flower crates comes every morning to John I. Raynor's store?

That in the shipping season the biggest load of boxes starts every day from John I. Raynor's door?

That the same consignors stay year after year and never desert 49 West 28th Street?

The consignors know why. If you are a grower it will pay you to enquire why. Call and ask Mr. Raynor. Perhaps he can explain

All Florists now know that the place to procure American Beauty, Bride and Bridesmaid Roses, Carnations in fancy and standard varieties, Orchids, Lily of the Valley and Violets is at

JOHN I. RAYNOR'S

Wholesale Commission House. 49 West 28th St., NEW YORK.

LATANIA BORBONICA.

3-in.,	4 to 5 leaves,	12 to 15 in. high		10.00 per 100	
5 "	5 to 6 "	18 "	$5.00 per doz.	40.00 "	

I desire to thank my customers for past favors, and suggest that with increased facilities I am offering a larger **STOCK OF PALMS** and will be able to serve them better than ever before. My trade this season has exceeded my most sanguine expectations, and with *prosperity smiling on our country* I bespeak a share of their patronage in the future. The palms offered are all home grown, strong and healthy. **The measurements given are from the top of pot to the top of plant, in its natural position.** I am particular to mention this, as some growers include the pot in their measurements, in other words, **include the length of the roots** with the height of the plant.

TERMS: Unknown correspondents will please furnish satisfactory reference or cash with the order. All orders will be shipped by express, unless otherwise ordered.

JOSEPH HEACOCK, Wyncote, Pa.

Louisville.

NO CHRYSANTHEMUM SHOW IN KENTUCKY'S METROPOLIS THIS YEAR.—TRADE IS REPORTED GOOD.—JOTTINGS AMONG THE PLANT AND FLOWER MEN.

For the first time in years the patrons of chrysanthemum shows, accustomed to look forward to this annual treat, will be disappointed. There will be no show this season, the reason being a lack of financial support to warrant the undertaking. Chrysanthemums, however, are by no means conspicuous by their absence. In common parlance, "the woods are full of them," both the stores and the greenhouse men showing some well grown varieties, which, as usual, find ready sale.

Fred. Haupt has recently added a handsome conservatory to his large floral store and has made many other improvements about his place. With his collection of specimen palms and plants he can now execute the largest decoration orders at the shortest notice. Trade in this line has been quite brisk with him.

Jacob Schultz's recent addition to his greenhouse establishment, mention of which has been made, fully harmonizes with his entire splendidly equipped place. His general stock, as usual, is up to the standard and in many respects above the average at this season of the year. Mr. Schultz will be the judge at the Evansville chrysanthemum show.

Those Beauties of C. W. Reimer's are the "talk of the town," and to the credit of his customers be it said that they know a good thing when they see it. The The daily cut is invariably sold, not a flower going to waste.

Joseph Coenen & Co. have put the last finishing touches on their new houses, being now well equipped to take care of their wholesale trade, which they report is increasing. Roses, carnations and bulbous stock are grown successfully in their establishment.

E. Reimers is quite sanguine as to the outlook and has accordingly made ample preparations to meet the growing demand. His stock of young palms looks fine and thrifty; so do his roses and carnations.

Wm. Mann is in the very front rank with his chrysanthemums this year, both his pot plants and those in the benches being of the first grade. Mr. Mann is a successful all around grower.

Geo. Schultz, is as busy as the proverbial bee. This has been an unusually busy fall with him. Among other things he is kept busy at landscape gardening, having the grounds of one of the stateliest mansions in the city to put in tip top shape.

Wood & Stubbs have every reason to feel gratified with the results in the short time they have been in business. HOMO.

IF YOU

or your neighbor have any reason to wish a change in the manner in which you are listed in our 1898 Directory, drop us a postal card now, to aid us in the work of revision for the next issue.

All the new Chrysanthemums from France including Calvat's celebrated novelties: **Fee du Champsaur**, the new white; **M. B. Verlot**, fine pink, globular in form; **Lucy Faure**, a prize winner in France, and twenty other new varieties. These will be ready early in February in nice young plants. Look for January list for prices.

GERANIUMS Now ready for shipment, all the very finest geraniums extant. Splendid novelties in the Bruant type, English round flowered and the Corrounne section.

CANNAS:::::: An immense stock; thousands of the new Dammann type. For sale in large lots very cheap, so cheap that catalogue men cannot do better than get quotations on these by 100, 1,000 or 10,000. Also quantities of the old standard sorts in quantity and price that will suit all buyers. The new Crozy type in all the newer varieties at prices to suit any one. Here are some of the varieties: President McKinley, President Cleveland, Robt. Christie, Gloriosa, Mrs. John Laing, Dutchess of Marlboro, and others.

SOME OTHER GOOD THINGS:

ASPARAGUS SPRENGERII, 2½ in., strong, $5.00 per 100.
ASPARAGUS PLUMOSUS, 3 in. pots, strong, $6.00 per 100.
BOSTON FERN, Magnificent, 4 in. pot plants, $12.00 per 100.
BOSTON FERN, Magnificent, 3 in. pot plants, $8.00 per 100.

ROSES..... of all kinds in immense quantity. Send and get quotations on what you may be needing in this line before ordering. A few thousand bench grown roses suitable for spring sales at the low price of $5.00 per 100; $40.00 per 1,000.

E. G. HILL & CO.,

RICHMOND, IND.

Helpful Reminders.

At this season most greenhouses are receiving plants by freight or express that come packed without pots. The balls are tightly pressed and require careful treatment; this is particularly true of azaleas. A plant that is inclined to make a strong growth at once will send out a few roots into new soil if it gets half a chance and, once started in the new soil, all danger is over. But azaleas and some other plants are at a standstill period now and what the plant requires must be given to the roots; they will not stretch out for it. The compressed ball plunged into light soil in a pot, will allow the water to run through and not penetrate the ball at all. It is best to soak the balls half a day in a tub of water, and when you pot them make the soil firm around the ball. Many palms also suffer from careless potting.

Shrubbery that is desired for Easter bloom and which has been kept in pots this season is best cared for by taking them out of their pots and placing them close together on the ground floor of a cold house or frame, piling about three tiers high. They should be fairly moist when piled up. Cover quite thickly with a non-conductor, as leaves or straw. There is still time to get nice plants of adlumia established if started at once. One of the most valuable plants a florist can have is the jasmine, which gives a few long sprays of its sweet scented flowers daily, but perhaps the most useful flower, excepting roses and carnations, is the bouvardia. Bench it as you would roses but in soil a trifle lighter. It requires care in watering or red spider will be numerous. It is safest on this account in open beds, but the crop through the winter will not be quite as large as on a well managed raised bench.

GOOD BUSINESS.—FINE CHRYSANTHEMUMS.—A NEW GROWERS' SUCCESS.—INTERESTING CLUB MEETINGS.—A VISIT TO MT. CLEMENS GROWERS.

Business has been very good for the past week and our chrysanthemum growers are bringing in some very fine flowers, Holznagel's Mrs. Robinson and Rackham's Mrs. Whilldin and White and Pink Ivory being particularly good. At the last meeting of the Florists' Club J. K. Stock, a new grower, brought specimens of Mayflower, Georgiana Pitcher and Viviand-Morel which were greatly admired. The club meetings are being made very interesting by the free use of the question box, which elicits discussions which are of real, practical value.

The first pleasure trip of the Detroit Florists' Club was to Mt. Clemens at the invitation of Philip Breitmeyer. About a score of the members accepted and spent a most enjoyable day at the establishment of John Breitmeyer & Sons. The hosts spread a bountiful repast accompanied by very fine home-made wine. Most of the visitors were surprised at the extent of their establishment. They have sixty-two acres under cultivation, raising fruit of many kinds and very excellent, particularly the grapes. They have 150,000 feet of glass, and have four large houses of American Beauties which promise a splendid crop for Christmas. This is the home of the Pingree carnation and it is grown in large quantities. They have a new one called Cerise which is an improvement on Tidal Wave. It is a good seller in Detroit. They have still another new one, a bright scarlet, which our party judged to be the best thing in its color we had ever seen. The Breitmeyers' chrysanthemums are in splendid shape, their Glory of Pacific being better grown than any we had ever encountered. They also grow violets well and in quantity.

Our party also visited Mrs. Robert Klagg and her model establishment. She has two houses of violets in splendid condition and her cyclamen are grown to perfection. Her carnations are also well worth seeing. At John E. Carey's we found one of the finest places in Michigan. Mr. Carey grows roses, carnations, violets and chrysanthemums as they should be grown.

Fred. Breitmeyer entertained the Detroit party at the Hotel Monro in the evening and the finish was full of fun. The Detroiters presented John Breitmeyer with a silver wine cup inscribed with his name and in German, "We hope to meet again." George A. Rackham made an eloquent speech in presenting this token of regard. R. F.

OUR WELL KNOWN SPECIALTIES.

1500 Rubber Trees, perfect in growth and foliage, 5½-inch $5, 6 inch $7, 8-inch $11 per dozen. 100 at 7 dozen rates.

THE AUTUMNAL MUSE.

OUR DEAR FRIEND.

BY WM. K. HARRIS.

The Soldier gives his life-blood, our country to save;
The Preacher gives us bliss beyond the grave;
The Doctor, to relieve our pains, responds to every call;
But "Money" is our dearest friend of all.

My Stock has Grown Very Corpulent.

Its growth has consumed my purse to a mere skeleton; and as I badly need my "dear friend" I will offer for the wanderer's return the following stock at 25% less than my usual price, for this month, November, only:

There are many dealers and growers in the trade that have but little idea of the beauty of the Rubber (**Ficus Elastica**) as it is grown by me. Having a large and fine stock of the most perfect developed specimens, I offer for a short time an opportunity for all to obtain at least a sample of how a Rubber should be grown.

Tree Rubbers, 5 to 6 branches 6 feet high worth $7.50 at $5.50. Same 4 feet high in 10-inch pots worth $5.00 at $3.50. Same 3 feet high in 10-inch pots worth $4.00 at $2.50.

Tree Rubbers in 8-inch pots, 4 to 5 branches, worth $2.00 at $1.50.

Straight Rubbers 5 feet high in 8-inch pots worth $2.00 at $1.50. Same 4 feet high in 7-inch pots worth $1.50 at $1.00.

WM. K. HARRIS,

55th St. and Springfield Ave. - PHILADELPHIA, PA.

New Orleans.

A STRONG DEMAND FOR FLOWERS FINDS STOCK SCARCE AND HIGH PRICED.—NORTHERN FLOWERS OF LITTLE USE.—NO EXHIBITION THIS YEAR.

The first of November, or All Saints' Day, has always been a great flower day for New Orleans, as this is the day par-excellence that we all remember our dead ones and bring flowers to their graves. Flowers have been very scarce this year and prices have been high. A month ago we had a long heavy rain which killed many of our large chrysanthemums. Then came on unusually cold weather. Very seldom in former years has white frost occurred here before November. This year we had several cold snaps in the latter part of October.

The little pompon chrysanthemum, which is extensively grown and forms the largest part of the designs, did not open at all for All Saints' Day and the poor people who cannot afford fancy or costly flowers had to do without. Prices in the north are too high for us to handle shipped in flowers in great quantities, and besides, northern flowers are so delicate that they do not stand to be exposed outside for any length of time. Carnations alone are used with good advantage.

No chrysanthemum show will be held this year in our city and a spring show has not yet been decided upon.

TRADE IS IMPROVING.—CARNATIONS THE ONLY SCARCITY.—WHOLESALERS MOVE TO LARGER QUARTERS.—FLORISTS' SOCIETY PLANS A SERIES OF EXHIBITIONS.

The past week's business has been fairly good. Chrysanthemums are increasing in quantity, some very choice blooms can be had and the call for good flowers is also increasing. Roses are now plentiful to meet a steady demand. Carnations have been somewhat scarce of late and the supply is not now equal to the opportunity for sales. Violets are improving in quality. The Sixth street flower market has been badly overstocked the past few months and business last Saturday was at a standstill owing to disagreeable wet weather.

Ed. Freis, of Newport, Ky., will be married Thanksgiving Day to Miss Hattie Hagedorn, of Avondale. The wedding will be somewhat of a social event as the young people are well known on both sides of the river.

Karl Wolf, of Cumminsville, is now the happy father of a son.

Owing to increased business the Cincinnati Cut Flower Company, has removed to the College building on Walnut street. Their office, salesroom and packing department are on the first floor and everything is arranged in a most practical manner. This is now one of the best equipped wholesale houses in the west.

Nathan Smith & Son, Adrian, Mich., had one of their seedling chrysanthemums before the A. C. S. committee on November 5. The flower is a good pink on the order of Good Gracious, with strong stem and foliage.

The Cincinnati Florists' Society has prepared a schedule of premiums for plants and flowers to be exhibited at the meeting upon the second Saturday of each month. The November meeting is to be devoted to chrysanthemums, December to carnations, January to violets, February to roses, March to carnations, April to bulbs and May to bedding plants. H. SCHWARZ.

ORCHIDS. Splendid assortment of best varieties for Cut Flowers.

CACTI. Large stock of best Mexican sorts, including the popular "Old Man's Head."

1899 ANNOUNCEMENT 1899

Having added largely to our greenhouse plant, we are now better than ever prepared to supply first-class florists' plants at prices allowing a good profit to the florist. We have added many new and valuable plants to our list and call particular attention to our select line of Novelties as well as to our large healthy stocks of Standard Varieties.

CHRYSANTHEMUMS

We shall offer new varieties of startling merit in yellow, white and pink, among them **ADMIRAL DEWEY,** an entirely new and striking shade of **deep orange yellow.** We offer also stock plants of the best of the introductions of last year and a full line of stock plants of standard sorts.

GERANIUMS.

We have full sets of the **Novelties** of recent introduction by the leading **French** and **English** growers, many of them of such striking colors and markings as to create a lively interest in the Geranium by all who have seen them. Our list will cover all the different types such as double and single **Aureole, English Round Flowered,** double and single **Bedders** and double and single **Bruants.** Our stock of **Standard Varieties** is large and our list especially well selected.

CARNATIONS.

In conjunction with Messrs. F. Dorner & Sons we shall introduce valuable commercial seedlings, such as **General Maceo,** a rich scarlet maroon; **General Gomez,** a brilliant cardinal crimson; **G. H. Crane,** a dazzling deep scarlet, and a **white seedling** of the type of **Snowden,** of dwarf habit, suitable for side benches. Our list of standard sorts includes **New York, Mrs. Jas. Dean, White Cloud, Bon Ton, Gold Nugget, Mrs. G. M. Bradt, Daybreak, Victor, Wellesley, Evelina, Empress, Flora Hill, Argyle** and several other well tried varieties. We have 10 large houses in Carnations and having added ample cold frames with heat for holding young stock, shall be prepared to fill large orders with clean healthy cuttings and plants.

DAHLIAS.

A select stock in varieties that flower profusely in this climate and are suitable for florists, either as bedding plants or for cut flowers.

CANNAS.

The new variety **President McKinley** has proved to the satisfaction of all Canna growers that it is the best dwarf crimson bedding Canna introduced, really the gem of the collection. We have a fine stock of it and can fill all orders that are sent in season. We have also fine stocks of **Pres. Cleveland, Sec'y Chabanne, Beaute Poitevine, Mrs. Fairman Rogers, Philadelphia** and all the leading standard sorts.

ASPARAGUS SPRENGERII.

Fine bushy plants in 4-in., 5-in. and 6-in. pots and 8-in. pans, ready for grand specimens for Christmas and Easter.

PANDANUS VEITCHII.

A house full of well grown specimen plants in 5-in., 6-in. and 7-in. pots at prices ranging from $1.00, $1.25, $1.50 and $2.00 each upwards.

KENTIAS BELMOREANA and FORSTERIANA.

Strong, clean, stocky, cool grown plants from 5-in. and 6-in. pots in fine shape, at $1.00 to $1.50 each.

NEPHROLEPIS CORDATA COMPACTA.

In 2½-in., 3-in. and 4-in. pots and 8-in pans.

ACALYPHA SANDERI.

We are **headquarters** for this striking new bedding and decorative plant.

OUR 1899 PRICE LIST will be issued early in January and will contain full descriptions of all the best Novelties and cuts of the most striking and meritorious varieties. Before deciding on your purchases for 1899, it will pay you to wait and study our Catalogue.

Important Notice.

To the Seed, Flower, Nursery and Allied Trades:

THE seventh edition of our Directory will soon be ready for the press. This book is in constant use by all the leading wholesale and retail seedsmen, nurserymen and florists of the United States and Canada, and there are some 13,000 of them. The names and addresses are in process of revision, and the new edition will be issued promptly on January 1, 1899. An advertisement in this publication will largely increase your trade; and to insure good position and display, we should have the order early. A copy of the book will be mailed free of charge to all advertisers.

Many of our patrons have expressed the highest satisfaction with the increase of business due to having their names on the alphabetical list in large type. This feature will be continued in the next edition at the small cost of $1.00. For $2.50, sent with order, we will place your name in large type and mail you a copy of the next edition. The book will save you many times its price in the course of the year.

Trusting to be favored with your commands, we are,

Yours very truly,

The American Florist Company,

324 Dearborn Street, CHICAGO, ILL., U. S. A.

LAST CALL!

AZALEA.

There has been a slump lately in the Romans and Paper Whites that are left over from the regular fall trade, and we want to get rid of ours just as badly as anybody, BUT, there is just this difference, the bulbs we have left are of regular full size, clean, smooth skins, and not the scraped-up cull lots left over on the other side and "consigned" here at any old price. Yet, we will sell at low rates NOW to clear them out.

BUSINESS GOOD.—A BRISK DEMAND FOR CHRYSANTHEMUMS.—GROWERS' HEATING EXPERIENCES.—A PAPER ON CINERARIAS.—THE SHOW.

Most of our florists pronounce last week's business as good. Carnations are becoming more plentiful, while roses and violets continue to be rather scarce. The demand for chrysanthemums, cut flowers as well as pot plants, has been steadily increasing until it is now considered better than last year, with prices about the same. Most buyers prefer pink. Among the early ones Glory of Pacific took the lead and now Mrs. Perrin takes its place. Major Bonnaffon is still the favorite yellow and in white Mrs. Robinson leads.

Ed. Corneli had a break down in his heating system which caused him considerable trouble and expense; the fires could be started, however, before his stock was seriously damaged. The houses and heating system of the Columbian Place Floral Company received a thorough overhauling this year. A. Nelson's place cannot be beat for neatness; he is justly proud of his carnation houses.

At last week's meeting of the Florists' Club A. Schreiber read a paper on cinerarias. He is considered an expert on pot plants, and we hope he will soon favor us with another lesson on their culture.

The chrysanthemum show will be opened November 8 by Mayor Taggart. The decoration of the hall is vastly different from that of former years; colors are less prominent, the idea being to have a back-ground on which the exhibits will show to their best advantage. The entertainment to visiting florists will take place Wednesday evening.

H. JUNGE.

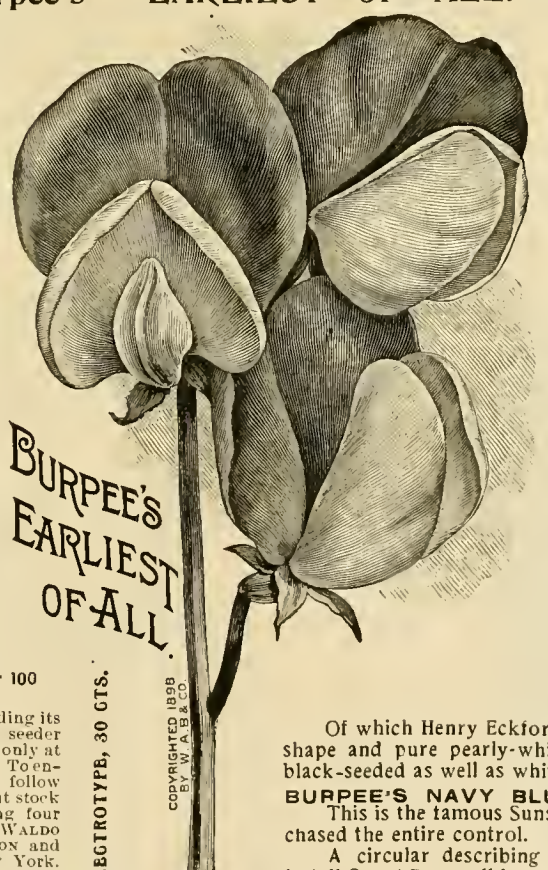
New Dwarf CUPID Sweet Pea,—Burpee's "BEAUTY."



BURPEE'S BEAUTY CUPID, while being always of the true Cupid type—growing only six to seven inches high with deep emerald-green foliage—bears flowers fully equal in size, form, and substance to the best of the new tall Sweet Peas. The handsome large flowers are borne most profusely all over the plant in clusters of three at the top of strong stems. Of unusual breadth, rather pointed at the top, and edges recurved, giving it the deeply hooded effect of *Prince of Wales* or *Her Majesty*. The standard is a delicate and yet *decided rose color*, lightening to nearly white at the edges, and slightly striped with carmine at the base. The wings are suffused rosy-carmine, deepening at the edges. A vigorous grower, it is a wonderfully free bloomer, and besides its beauty in the garden promises to be of real value as a commercial flower in greenhouses.

New Sweet Pea.—Burpee's "EARLIEST OF ALL."

"Every florist will be eager to have this distinct new strain, when we state that it is identical with the *Extra Early Blanche Ferry*, except that it is more dwarf in growth and comes into full bloom *at least ten days earlier.*" The prophecy just quoted from our remarks last year has been more than verified as the demand was extraordinary, and we have received most enthusiastic letters as to the unique value of EARLIEST OF ALL, both for forcing and open ground. The illustration was engraved from a photograph of a spray of flowers, exactly natural size. This most valuable new strain originated with MR. THOMAS GOULD, who wrote us, September 10, 1897.

"The new '**Earliest of All**' were so closely selected that their habit was *uniformly* dwarf after slight roguing, as compared with parent plants, coming into general bloom fully two weeks before the Extra Early Blanche Ferry showed scattered bloom. The distinctiveness in early habit was so marked in all stages of development as to invite interrogations from *every* visiting seedsman as to the difference between this selection and its parent stock, growing immediately contiguous. In fact, this characteristic was unquestionable to an experienced eye as far away as the bloom could be distinguished. I was much chagrined to receive such a small crop after all the precautions taken to save almost every seed."

Per pkt. 10 cts.; per ounce 40 cts.
Wholesale, **$5.00 per 100 pkts., $25.00 per 100 ounce-packages.**

ELECTROTYPE, 30 CTS.

Burpee's "EARLIEST OF ALL," notwithstanding its free-flowering character, proved such a shy seeder last year that we were able to offer the seed only at retail, in sealed packets of twenty seeds each. To enable us to meet the demand that was sure to follow from florists and dealers this season, we sent stock seed for planting last winter to the following four well-known growers: C. C. MORSE & Co. and WALDO ROHNERT, of California, and W. A. DENISON and ROGERS BROTHERS, of Jefferson County, New York. In inspecting these contract crops the past spring and summer, as well as on our own grounds at FORDHOOK, we found that "**Earliest of All**" came uniformly dwarfer, more even in growth, and **always ten days to two weeks earlier in bloom than the Extra Early Blanche Ferry.**

3 NEW CUPIDS.

WE invite special attention to the THREE NEW CUPIDS—BURPEE'S BEAUTY, ALICE ECKFORD, AND PRIMROSE—as undoubtedly **the most important Novelties for 1899.**

We offer all of these at uniform price as follows:

In regular size packets (each containing twenty-four seeds):

Per pkt. 25 cts.; 5 pkts. for $1.00; per dozen pkts. $2.00;
Per 100 Pkts. $12.50.

A lower rate will be quoted by **the thousand packets.**

In half-size packets (each containing twelve seeds):

Per pkt. 15 cts; 2 pkts. for 25 cts.; or 10 pkts. for $1.00.
Per 100 Pkts. $7.50.

A lower rate will be quoted by **the thousand packets.**

ALICE ECKFORD CUPID.

The blooms, while of only medium size, are of fine, erect form, and borne in close clusters of three on stiff stems, displaying most attractively the charming, blended coloring. The standards are a rich, creamy-white, suffused or blended with a delicate shading of soft-flesh pink; the wings are silvery-white with a faint pink flush in the central portion. The flower is identical in size, form, and color, with that of the tall *Alice Eckford*, which, while not of the largest size, has been admired so greatly on account of the delicate and harmonious shadings of softly blended tints.

It is a *black-seeded* variety of strong vitality, so that no difficulty need be feared in securing a good stand of plants, even under adverse circumstances, while like all the *Cupid* varieties it will bloom much longer and more freely during hot dry weather than any of the tall varieties of Sweet Peas.

PRIMROSE CUPID....

Like all the other Cupids, this is very free flowering, and the dwarf plants, only six to seven inches high, have that distinct *emerald-green* foliage which is peculiar to this new race. This is identical with the original white CUPID in all respects except coloring. The flowers are of a rich *creamy tint*, identical with that of the tall *Primrose*. The seed we offer is all hand-picked and therefore, although *white-seeded*, will grow nearly as vigorously as the hardier *black-seeded* varieties.

TWO GRAND NEW TALL SWEET PEAS

.... NOW FIRST INTRODUCED.

ECKFORD'S SADIE BURPEE.

Of which Henry Eckford says "the extreme daintiness of its shape and pure pearly-whiteness is beyond description." Being black-seeded as well as white-seeded, makes it of exceptional value.

BURPEE'S NAVY BLUE.

This is the famous Sunset Novelty "A," of which we have purchased the entire control. It is a distinct color innovation.

A circular describing both of these remarkable Novelties in tall Sweet Peas will be sent on application.

OUR SPECIAL CATALOGUE of 24 pages, giving full illustrated description of all these and other new Sweet Peas, besides several other important Novelties in Vegetables and Flowers, which are now offered to the trade, will be mailed free on application. Electrotyes furnished at a nominal price (practically free) to houses who catalogue our Novelties for 1899.

W. ATLEE BURPEE & CO., PHILADELPHIA.

Rochester, N. Y.

The local Florists' Club is fast asleep if not deceased. No meetings have been held for over a year; no entertainments have been going on, no contests of any kind, no lectures delivered, no papers read; even dues are not collected. It is true, the club never had a regular gathering place. The meetings were held at the bowling alleys or occasionally in one of the stores. From the very start the club had been in feeble health and the members needed a great amount of coaxing to keep them together. There is no reason for this unfortunate state of affairs other than simply lack of interest. A few would like to see a revival of the weekly meetings, not only for the sake of a bowling game, but for the more useful purpose of exchanging ideas and learning the views of others on topics pertaining to the trade. Whether their endeavors to stir up the sluggish members will meet with success is doubtful as yet, but we are in hopes.

Fall trade in the nurseries is very brisk this year. A large amount of ornamental stock is being dug up. Fruit trees are not so much in demand for fall planting, but small fruits, especially gooseberries and currants, are dug by the thousands every day. The tree digging machines come very handy for these large orders; they save a pile of labor and don't mutilate the roots half as much as does a man with a spade.

The past few weeks have been quite satisfactory to the retail florists. Chrysanthemums are very plentiful. Perhaps too many are grown in town and they move slower than in former years. Growers are not well pleased as prices are low and are likely to decline still further in the near future when the mid-season chrysanthemums come on in bulk. There is no regular wholesale price for the chrysanthemums, some good flowers having been bought for 3 cents, while 6 or 8 cents were paid for the same goods and on the same day by another party. This irregularity extends to other flowers as the grower is anxious to dispose of his cut, more flowers being in sight than we are used to in the beginning of November. J. B. K.

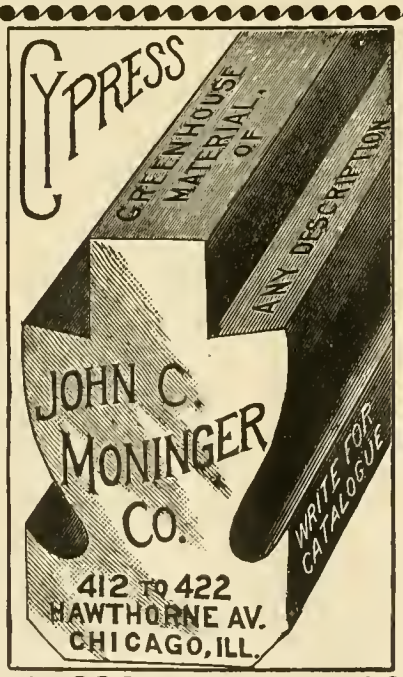
Our Good Book



THE American Florist Company's Directory of the trade lists both alphabetically and by states and towns every one of the 13,500 persons or firms in North America engaged in the Florist, Seed or Nursery business. It states in which particular branch of the business each one is engaged, a feature of great value to those who issue catalogues, as by its guidance mailing to those not interested in your goods may be avoided and many times the cost of the book will be saved in postage and printing, to say nothing of disappointment.

GOOD DEMAND FOR STOCK.—ROSES SELDOM GO TO WASTE AND CARNATIONS NEVER.—CHRYSANTHEMUMS SELL WELL BUT PRICES ARE NOT HIGH.

There is a very fair demand for stock of nearly all kinds and good quality. Roses sell well but the greater part of them go at from 2 cents to 3 cents, with at times a few going to waste. Chrysanthemums are very good in quality and sell at all prices, from 4 cents to 12 cents, the latter being absolutely the top notch and attained by very few flowers. These, by considerable effort, occasionally retail at $3 a dozen. The greater call is for the stock at a lower price, say from 4 cents to 8 cents and retailing at prices between $1 and $2 a dozen.

Carnations seem to be in rather short supply, and are often hard to get in quantity. They seem to be rather off crop with nearly everybody, but the all-pervading chrysanthemum prevents any increase in price. A.

WILMINGTON, DEL.—H. P. Potter, whose greenhouses are at Twenty-fourth and Market streets, has opened a store at 401 Delaware avenue.

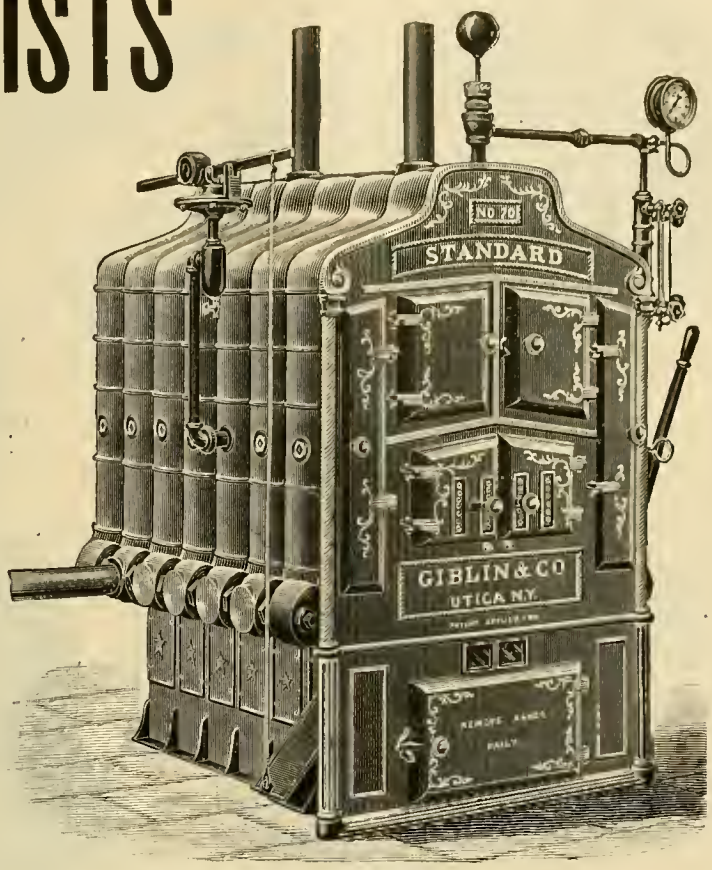
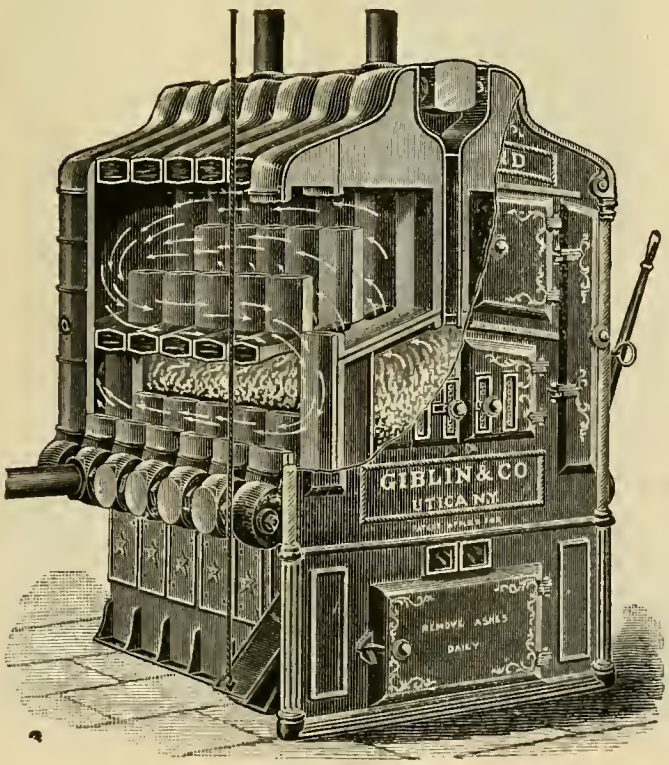
WHY DO FLORISTS



not use the same common sense in buying their heating apparatus as in developing their plants? On certain plants, money and time are thrown away, and no matter how much money and time are spent on them they never amount to anything. It is so with boilers; unless they have excellence in their construction, they are a constant source of

WASTE

Such boilers are usually cheap when first bought, but because of repairs, waste of fuel, labor required in managing, they are a continual source of expense, and every year the florist wastes the difference between what he has paid for a poor boiler and what he would have to pay for a good one. Our boilers are acknowledged of superior merit, they operate with a reasonable supply of



FUEL

and the labor required in managing is reduced to a minimum. With these boilers the florist does not have to

STAY UP NIGHTS

to keep his plants from freezing. He sleeps with perfect confidence that the boiler will take care of itself and provide the heat wanted. Where our boilers are known they are appreciated. Where they are not known it is safe to say money is wasted.

WE KNOW that our statements are prejudiced because we are interested in selling our boilers. Do not believe them, but write for our Catalogue and read the letters of florists who have used these boilers and who have written us the results accomplished. They are not prejudiced or interested.

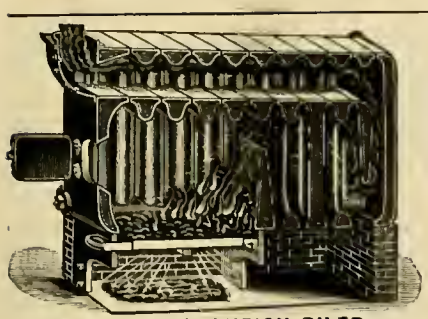
For the purpose of introducing our boilers where they are not known, we will sell at

WHOLESALE

to the person in each town who first orders a boiler for his own use, and in addition will

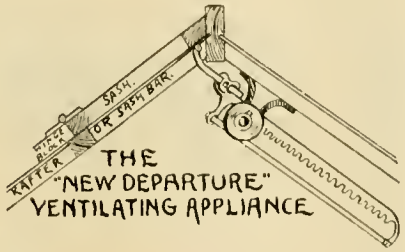
DONATE 25 %

on the net price towards paying for the fuel consumed the first winter.



OUR STANDING { Bradstreet's, Highest Credit. / Dun's, " "

While our boilers have been sold for the past seven years in the whole cold region of the United States, yet there are some places where they are not known, and we make this **EXTRAORDINARY** offer to make them known.



This advertisement will appear this time **ONLY** and anyone wanting a boiler may inquire by mail, when full particulars will be given and a chance of a **LIFETIME** offered to obtain a boiler at a nominal cost.

I take mi pen in hand to tel the Florists that i hev got up sum good things fur them to uze in greenhouses, i aint mutch on Buck larnin, but i am sum at inventin things fur to help Florests out. Now if u use one uf mi Bilers u wil save ½ ure Kole Bil. Uze 2 an u wil save it awl, an if you git 3 u wil have Kole to sel. i have the Best an cheapest Sash liftin Machine, an the Best Sash Hinges what is. Write me an i wil tel u al about em. My name is J. D. Carmody, i live in Evansville, Indiana, which is close to Posey Kounty.

THE EVERLASTIN HINGE.

The Standard Ventilators.

IT has been fully demonstrated by the thousands of Standards now in use in the United States and foreign countries that it has no equal for the purposes to which it is adapted. It requires no expert to put in position. No chains or springs to adjust or slip. The **Wheel** and the **Shaft** are all in one piece, made out of malleable iron, consequently no slipping on the shaft. Has no friction that is not oiled by self-oiler.

THE STANDARD VENTILATOR HINGE.....

The long-looked-for friend of the up-to-date florist—a Hinge that will not rust, break pins or draw the screws out of the wood. Malleable Iron or Brass, all in one piece.

The E. Hippard Company,

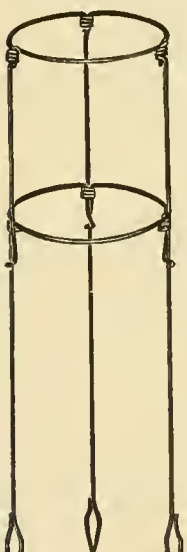
YOUNGSTOWN, OHIO.



Worcester, Mass.

The sales of chrysanthemums have increased considerably this week, and prices have stiffened in consequence. We are now getting the better grades of flowers and though prices are not what they used to be, they are fairly satisfactory. The early varieties are pretty well cleared out and we are getting splendid Mrs. Perrin, Philadelphia, Bonnaffon, Ivory and Belle of Castlewood.

Outside of the regular trade we have been getting a good many wedding decorations and considerable funeral work. The supply of flowers is about equal to the demand and the quality is very good. Violets are still in rather short supply, but a few bright days will remedy this. A. H. L.

NEWPORT, R. I.—The will of the late Mrs. John Fadden is to be contested by her children. The will left the estate and greenhouses on Bellevue avenue, valued at $50,000, to her three children in trust, with the provision that after their death the property should be diverted to the use of several local churches.

The MODEL Extension Carnation Support

QUEENS, N. Y., Feb. 16, '97.
MR. THERON PARKER.
Brooklyn, N. Y., Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention.
Very truly yours,
C. W. WARD.

FLATBUSH, BROOKLYN, N. Y., Feb. 18, '97.
MR THERON PARKER,
Dear Sir:—Your wire stake is certainly a gem Without hesitating we indorse it as an up-to-date carnation support. Yours truly,
DAILLEDOUZE BROS

W. HOBOKEN, N. J., Feb. 18, '97.
MR. THERON PARKER,
Brooklyn, N. Y., Dear Sir:—It gives me much pleasure to congratulate you upon your success in getting up carnation supports. I think that those I have had from you are about as perfect as anybody will be able to make them. They certainly fill my bill for an ideal carnation support, a thing I have been looking for for a long time Wishing you every success in the sale of them, I am
Yours truly, E. ASMUS.

THE EXHIBITIONS.

Chicago.

The two closing days of the Chicago Horticultural Society's exhibition, (November 11-12) were much more satisfactory than the three preceding. The attendance on the 11th was the largest in the history of the society, and that of the following day was well up to the average. While not a financial success on the whole, the two last days of the show went far toward making good the losses of the opening days.

Late awards included prizes for violets to Henry Smith and Crabb & Hunter; for specimen plant in bloom other than chrysanthemums, first J. C. Vaughan, with Acalypha Sanderi, second J. Algots with standard heliotrope; hanging plant other than fern or asparagus, J. Algots with Russelia juncea, second John Cook with Lysimachia nummularia. The final awards for table decorations were made on the last day of the exhibition, and the competitors then stood as follows: First, Klunder-Thiele Floral Co.; second, Charles A. Samuelson; third, Art Floral Co.; fourth, Anderson Floral Co.; fifth, A. Lange. The Kaiserin roses used in this competition by George Wittbold and the Anderson Floral Co. (the latter supplied by the Reinbergs), were exceedingly fine. The orchids used for the Saturday decorations included cattleyas, dendrobiums and oncidiums.

The exhibit of hardy shrubs bearing fruit or richly tinted foliage, from Swain Nelson & Sons, attracted much attention. The most pleasing plants in this group were Symphoricarpus racemosus, Mahonia aquifolia, Berberis Thunbergii, Rosa rubiginosa and Euonymus Europæus.

JOHN THORPE'S JOTTINGS.

Dracæna Godseffiana will be a great factor in parlor decoration. It is distinct and beautiful, grows without much care and is always bright and interesting.

Without doubt Acalypha Sanderi has come to stay, and it will become as popular as any plant introduced in the past decade. I understand that it does well out doors, in window boxes and vases.

Two heaths (Erica Wilmoreana and E. melanthera) were as good specimens as any I have seen in England, where they are grown by the thousand. We must have more ericas. These were exhibited by J. C. Vaughan.

Associated with the ericas was a silver variegated geranium with bright scarlet flowers as double as the blooms of S. A. Nutt. This very attractive variety was named Wm. Langgutt. The flowering geraniums were a grand feature of the show.

There were only two new roses in the exhibition, Mrs. Robert Garrett, which improves on acquaintance, shown by Bassett & Washburn, and Lady Dorothea, by John Dunlop, of Toronto. The latter has tawny flowers similar in shape to the old Safrano but more pronounced in color, with the fragrance of Gloire de Dijon.

In Izanga, a Japanese anemone, Nathan Smith & Son had the most remarkable of the new chrysanthemums. The ray florets are pure white, fluted, twisted and divided, each being three inches long. The cushion-like center, three inches in diameter, is of the purest yellow color. The same growers exhibited two crimsons brighter than Childs, and a bronze reflexed which will be heard from.

John N. May's Mrs. Trainor L. Park looks like a flower which would displace our much admired Bonnaffon, and his Silver Wedding is a superb pure white reflexed flower with broad petals distinct from any other variety. In his Mavourneen we have a distinct creamy flower with flecks of true purple. The flower is of good size and form, with florets reflexed, and I believe it will prove to be a good thing.

Among new carnations, Mrs. T. W. Lawson, from Peter Fisher, was leader, and well deserved all that has been said in its favor. Mr. May's Melba is a beautiful variety of the Mrs. McBurney type, the color being a pure pearl pink. No. 11 from the Chicago Carnation Company, bids fair to take the place of Armazindy, and other seedlings from the same firm showed considerable merit. Mr. Dorner's G. H. Crane hold's the position assigned to it at the last meeting of the Carnation Society.

SUNDRY COMMENTS.

The low cut flower tables displayed the flowers to good advantage.

The Art Floral Company exhibited a novel bed of bird nest ferns, Asplenium nidus.

The display of photographs in color, shown by the aid of lantern slides, was an unexpected advance in this class of work.

The specimen blooms of Frank Hardy

chrysanthemum, brought on from the east by Mr. Herrington, could not have been finer.

Superintendent Rudd has certainly the routine work of these annual shows in excellent order and a well drilled force of assistants.

Uncle John was on hand, taking as much interest as ever, and a very handy man when something had to be explained to interested visitors and patrons.

The reception of visiting florists and patrons was better handled by the officers of the society and the committee of the Florists' Club than during former exhibitions.

Mr. Dimmock said this show with its lighting, decorating, grouping, and the high quality of displays all along the line, was the best he has ever seen in this country. Does Alfred make the same remark at other shows? He says he don't.

It may be stated here that good judges of American Beauty roses were captivated by the fine stock at the show, admitting that it equalled anything grown in the eastern states. The rose Mrs. Robert Garrett, shown by Bassett & Washburn, was in fine shape.

Acalypha Sanderi, posing as plant from our new South Sea colonies, the Philippines, was given a prominent place. Brother Dimmock by the second day was able to testify that it really came direct from that quarter, although he was in considerable doubt about this the first day.

VISITORS.—In addition to those mentioned in last issue the following were among the visitors show week: Geo. W. Doswell, Ft. Wayne, Ind.; F. E. Dorner, Lafayette, Ind.; F. A. Belt, Sterling, Ill.; W. E. Colberg, Des Plaines, Ill.; Mrs. Ella Grant Wilson, Mrs. J. M. Gasser, Mrs. Anna Bartels, E. A. Fetters and wife, of Cleveland, O.; Mrs. C. W. Pike, Racine, Wis.; G. Volk, Max Reitz and F. P. Dilger, of Milwaukee, Wis.; J. H. Hollister and wife, Grand Rapids, Mich.; H. J. Bailey, New York City; Albert Knopf, Columbus, Ohio; Chas. Kintzele, Michigan City, Ind.; Alice L. Barnes, Springfield, Ohio; Thomas Archer, St. Joseph, Mich.; Benj. Thompson, Tama, Iowa; Judson Kramer, Cedar Rapids, Iowa.

Toronto.

The ninth annual chrysanthemum show of the Toronto Gardeners' and Florists' Association was the best ever held in this city. The show opened on November 9 under the most unfavorable auspices; the weather was simply abominable, and as a consequence the attendance for the first two days was very light.

The exhibits were probably not quite so numerous as in 1897 but in quality they were decidedly superior. The hall had been beautifully decorated a short time before for the banquet to Lord Aberdeen and made a most appropriate setting for the display of flowers. A large number of incandescent lamps had been hung in circles from the center of the ceiling making the whole interior a blaze of light and showing the colors of the exhibits in the evening almost as faithfully as the light of day. Mayor Shaw was in attendance on the opening day for the purpose of delivering an address but the attendance was very slim and he deferred his remarks until the afternoon of Saturday. The stage was most beautifully decorated with plants two gigantic Latania Borbonicas occupying the back of the proscenium. One of these obtained the first prize for Exhibition Park and the other second for the Horticultural Gardens.

Fronting these were the exhibits of six specimen ferns for which the Horticultural Gardens took first and Exhibition Park second. On the left was an immense davallia, the fronds of which must have been eight or nine feet in length and which was as perfect and healthy as if growing in its native woods. For this the Horticultural Gardens deservedly obtained first prize, Exhibition Park coming second and Manton Bros. third. On the right of the stage the exhibitors vied with each other for the prize for six pots of blooming callas, the Horticultural Gardens again winning. The wings of the stage were decorated with collections of orchids and here Exhibition Park took first, Manton Bros. second.

In front of the proscenium the general collection of orchids was arranged. For the best three in flower, the Horticultural Gardens took first prize with two plants of Cypripedium insigne and one of Cypripedium Spicerianum. Exhibition Park came second with beautiful flowers of Cattleya labiata, Oncidium crispum and Dendrobium Phalænopsis. To the right and left of these exhibits on the floor of the hall were groups of chrysanthemums, palms, ferns and selaginellas arranged for effect and the arrangement was very effective. Horticultural Gardens took first and Grainger Bros., second prizes here. The groups of foliage plants were excellent, Exhibition Park winning first and Horticultural Gardens second.

One of the finest groups of plants was that of the specimen chrysanthemums on which Robert Gore took first prize with a beautiful plant of Midge which had about 150 good blooms. The display of standard plants was not very conspicuous, Mr. Gore taking first, Horticultural Gardens second, and Robert Sugden third. Mr. Gore also came well to the front in the next exhibits, taking first for three white, Queen, three pink, Viviand-Morel, three yellow, Golden Wedding, and three any color, G. W. Childs.

For the best twelve distinct varieties, single stem, single flowered, Ernest Collins took first, with Exhibition Park, second, and R. Gore third. For twelve white, Goodier & Shawcross came first with Mrs. Henry Robinson. For twelve pink Exhibition Park took first with Viviand-Morel. The best yellows were Major Bonnaffon grown by Ernest Collins, Exhibition Park coming second and Grainger Bros., third. The section for twelve distinct varieties, three plants of one variety in 6-inch pots, surprised many of the visitors by the size of blooms when the number of plants and size of pots were considered. Exhibition Park gained first here.

There was close competition between J. H. Dunlop, Manton Bros., Exhibition Park and Grainger Bros., for the awards for palms, honors being easy. Of small ferns there were creditable exhibits by Grainger Bros., W. Jay & Son, Manton Bros., and the North Toronto Floral Co. Grobber & Wandry showed cyclamens. On primulas the Horticultural Gardens were first and R. Gore second.

Among the cut chrysanthemum blooms J. H. Dunlop took first prize for twenty-first distinct varieties with H. Dale of Brampton, a close second. George Hollis took first for twelve varieties; J. H. Dunlop second. H. Dale took first on vases of twelve pink, white, yellow and any other color, J. H. Dunlop being a close second in each class. For six in vase, white, George Hollis took first. For pink, Jay & Son were first with Viviand-Morel and George Hollis second with Mme. Perrin. For yellows, George Hollis was first with Modesto and Fewkes, Dunlop being second with Major Bonnaffon. On vase of twenty-five, any variety, the competition was very keen, George Hollis winning, with H. Dale second, and Jay & Son third.

J. H. Dunlop showed a magnificent vase of American Beauty which made an appropriate center for the other exhibits, which ranked as follows: Second, H. Dale; third, S. Tidy & Son; fourth North Toronto Floral Co. Dunlop also took first for Bridesmaid, Bride, Sunset, Mme.

EXHIBITS OF A. S. TRUDE (ROBT. MUELLER, GR.) AND CRABB & HUNTER AT THE CHICAGO SHOW.

A VIEW OF THE EXHIBITION AT ST. LOUIS.

Hoste, Mme. Cusin and his own rose, Lady Dorothea. H. Dale took first for Perle, Mrs. Pierpont Morgan, Pres. Carnot and Meteor.

The carnations showed a considerable improvement over former years. Dunlop, Dale and the North Toronto Floral Co. dividing the honors. Violets were good but not very plentiful; for bunches of fifty double flowers the awards were: First, North Toronto Floral Co., second, Manton Bros.; third, Steele, Briggs Co. For fifty single, H. Dale came first, Manton Bros., second, and Steele, Briggs Co., third. The design work was good.

Edwin Utley was first on a specimen Ficus elastica but J. R. Copping captured most of the prizes for decorative plants. E. Tyrrell, D. A. Coulson and G. Mills each came in for their share of the premiums. The school children's competition was one of the features of the show. George Hollis' seedling chrysanthemum, Toronto attracted much attention. It was shown by J. H. Dunlop.

The judges were F. J. Foster, of Hamilton, and Walter Mott, of Philadelphia. S. P.

St. Louis.

Awards at St. Louis chrysanthemum show were as follows: Vase twenty-five blooms chrysanthemums, assorted colors, C. Young & Sons Co.; second, H. Weber & Son; third, E. G. Hill & Co. Vase twenty-four blooms, three varieties, Weber & Son; second, E. G. Hill & Co. Vase fifty blooms, quality and arrangement considered, Wm. Schray; second, E. G. Hill & Co. Vase twenty-five yellow, Michel Plant & Bulb Co., with Golden Wedding; second, W. A. Chalfant with Bonnaffon.

Cut roses: Twenty-five Bride, W. J. & M. S. Vesey; second, Ellison & Tesson. Twenty-five Meteor, W. J. & M. S. Vesey. Eighteen American Beauties, Young & Sons; second, Ellison & Tesson. The next class calling for the same, eighteen Beauties, was taken by Ellison & Tesson. Vase pink roses, any kind, Ellison & Tesson; second, Young & Sons.

Cut carnations: Vase fifty white, W. J. & M. S. Vesey; second, E. F. Overmann, Wabash, Ind. Vase fifty pink, Vesey; second, Weber & Son; third, Overmann. All the winning vases in this class were Triumph. Vase fifty red, H. Weber & Son. Best box of cut flowers, Ellison & Tesson.

Cut chrysanthemums: Vase of white, Nathan Smith & Son; second, Michel Plant & Bulb Co. Twelve blooms Golden Wedding, Michel Co.; second, Hill & Co. Fifty blooms, quality and arrangement considered, Nathan Smith & Son; second, Wm. Schray; third, Hill & Co. Vase twenty-four blooms, twelve white and twelve yellow, Michel Co.; second, Smith & Son.

Cut roses: Twenty-five President Carnot, Ellison & Tesson. Four vases cut roses, fifteen of a kind, Vesey; second, Ellison & Tesson. Twenty-five American Beauty, Ellison & Tesson.

Cut carnations: Vase forty Jubilee, W. J. & M. S. Vesey. Vase of Daybreak, Vesey; second, H. G. Ude. Vase 100 Scott, W. J. & M. S. Vesey. Designs, C. Young & Sons Co.

Cut chrysanthemums: Vase fifty, quality and arrangement considered, Hill & Co.; second, Smith & Son. Vase yellow, Michel Co.; second, W. A. Chalfant. Vase assorted blooms, Hill & Co.; second, Smith & Son. Twelve Major Bonnaffon, Hill & Co.; second, Vesey. Vase fifty, quality and arrangement considered, Wm. Schray; second, Smith & Son.

Cut roses: Twenty-five Kaiserin, Ellison & Tesson; second, W. E. Jordan. Twenty-five American Beauty, Young & Sons Co.; second, Ellison & Tesson. Vase Bridesmaid, Vesey; second, Ellison & Tesson. Twenty-five American Beauty, Young & Sons; second, Ellison & Tesson. Twenty-five La France, Young & Sons.

Cut carnations: Vase 100, H. Weber & Son; second, J. W. Dunford. Vase of yellow, H. Weber & Son; second, H. F. Aue. Table decoration, Ellison & Tesson; second, Young & Sons Co.

Shaw Premiums: Twelve The Queen, Michel Co.; second, Smith & Son; third, W. E. Jordan. Twelve Major Bonnaffon, W. A. Chalfant; second, Vesey; third, S. Wilson & Son, Marion, Ohio. Twelve blooms any other yellow, Max Herzog; second, Hill & Co.; third, Vesey. Twelve blooms any other white, Vesey; second, Hill & Co.; third, H. Weber & Son. Twelve blooms any pink, first, Michel Co.; second, Vesey; third, Wilson & Son. Twelve blooms any variety, introduction of 1896-7-8, Vesey; second, Weber & Son; third, Smith & Son. Best 100 double violets, Ellison & Tesson; 200 single, first, Ellison & Tesson. R. F. T.

Syracuse, N. Y.

The Syracuse show was a grand success, the best Syracuse has ever seen, and the only one that has ever paid expenses. This time we have a nice little balance left after paying all debts. It was held in the Alhambra, a very large hall, the galleries being nicely decorated and divided into boxes which were sold at $10 each. The stage was used for evening entertainments and dancing. In the center of the hall was a raised platform where the orchestra was completely hidden from view by palms, foliage and flowering plants.

For the artistic arrangement of the exhibits we were indebted to our Secretary, David Campbell, manager of Thornden, Maj. Alex. Davis' place, and Thomas Bishop, our park superintendent. The entries were numerous and excellent in character and in connection with the flower and plant exhibit was a fine display of native and tropical fruits; also an exhibit of native ferns of

Onondaga County. Prof. C. E. Hunn, of the Geneva Experiment Station brought a fine exhibit of some thirty-two varieties of cut chrysanthemums, not for competition, and was also one of our judges. In Prof. Hunn's exhibit, which was all excellent, was noticeable a vase of pure white solid incurved blooms, perfect globes in form, marked "12-1895 P. & M." John N. May controls the stock. It might be described as a white Major Bonnaffon, only larger and more globular in shape.

Our old friend, Grove P. Rawson, of Elmira, was on hand with a splendid exhibit and also acted as our chief judge. His floral design was a masterpiece. L. E. Marquisee outdid himself with a magnificent collection of foliage plants, chrysanthemum plants and blooms, carnations and roses and he captured many first prizes. His vase of twelve Golden Wedding was grand, his American Beauties peerless and his large exhibit of carnations attracted much admiration. He also showed a vase of a pink seedling carnation which was awarded a certificate of merit.

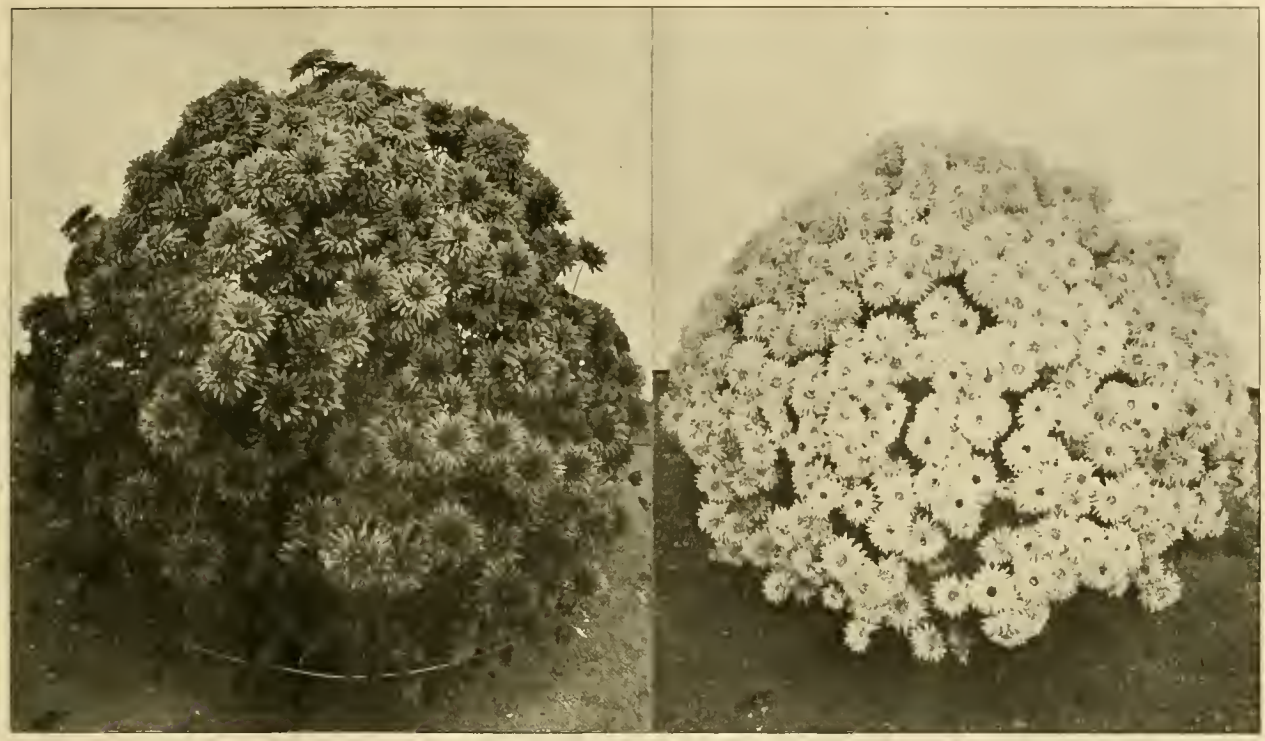
John H. Dunlop, of Toronto, sent a vase of roses, a sport of Sunset, which were much admired by the rose growers. Meneilly & Sons captured the $20 prize for the best twelve salmon pink reflexed Japanese blooms with magnificent Autumn Glory. They also showed some fine standards of Georgiana Pitcher and a fine assortment of bush plants and blooms. Mr. Meneilly is the originator of the chrysanthemum Adelaide White which was shown in fine form by Marquisee.

Nathan Smith & Son sent six blooms each of three white seedlings to compete for the White Flyer prize and captured it with No. 18, a pure white reflexed bloom with good stem and foliage. For largest bloom on exhibition, C. A. Phillips, an amateur, tied Marquisee, the florist, Phillips showing a Mrs. Geo. West and Marquisee a Golden Wedding. Both blooms were whoppers but the judges could find no difference in size and so the prize was divided and the blooms presented to our congressman-elect, Mr. Driscoll. Phillips also showed twenty-four fine single stemmed plants, twenty-four varieties. They were noticeable for being very dwarf with large blooms. One Good Gracious was fifteen inches high with a splendid bloom perfectly erect on its stem and a Jeannie Falconer was twelve inches high with an eight inch bloom. Phillips also took first for twenty-four blooms, twenty-four varieties, in the open class, and Marquisee second. The prize for six blooms of Jeannie Falconer, offered by Peter Kay, originator of the variety, brought out two magnificent vases from Phillips and Marquisee; the latter captured the prize. This is the same variety with which Phillips captured the prize for largest bloom at last year's show.

Our secretary, David Campbell, was awarded the silver vase offered by President Betts for the largest and finest exhibit. His was a fine collection, indeed, consisting of palms, foliage plants, orchids, chrysanthemum plants and blooms, besides a collection of choice and rare plants. He also was awarded the prize for the rarest plant or flower on exhibition and for six single stemmed plants of Thornden.

Through the foresight of our president, S. T. Betts, many innovations were added that materially helped to swell our receipts and to him we are largely indebted for our financial success. The stage performance was a drawing card as was also the presence of Chaplin Chidwick, of the ill-fated Maine. Then we had four beautiful young ladies in fancy costumes selling souvenirs of the show that netted us a snug little sum, Miss Betts winning the prize, a beautiful oil painting, for selling the most of them. On our opening night, all attending were presented with carnations and roses. At each corner of the hall were nicely decorated booths for the sale of plants and flowers. L. E. Marquisee, Peter Kay, Bannister Bros. and Walter Meneilly & Son were the owners and decorators of these booths and they proved an attraction to the show as well as remunerative to their owners. C. A. PHILLIPS.

CHRYSANTHEMUM MME. CARNOT AS EXHIBITED BY JOHN N. MAY AT THE PHILADELPHIA SHOW.



Notes from the Philadelphia Show.

Too much credit cannot be given to the H. A. Dreer Co., Hugh Graham and John Cullen for the part they took in our exhibition. Their displays were large and far out of proportion to the amount of premiums offered, which is the test to which so many exhibitors subject their entries. Dreer's exhibit of new things attracted particular attention from the private gardeners who are always looking out for meritorious new plants. A plant of Acalypha Sanderi with its long red tassels was among this collection. The number of well grown specimens of choice ferns in pans was quite ahead of any of the society's previous displays in this department and to many seemed to be of as much interest as the plants in bloom.

In speaking of the very unique exhibit of Joseph McGregor, I neglected to say it was of geraniums, not chrysanthemums. It opened the eyes of many people who had no idea that these plants could be grown to such perfection. Mr. Shellem's new white carnation, which ran so well against the New England favorite, Mrs. Thomas W. Lawson, was awarded a certificate of merit. The certificate is a prize of itself, but to have a white carnation so good that when in competition with this $5,000 beauty it was a toss-up as to who would get the prize, is something to be proud of. It is a flower that will surely make itself felt in the competition next February.

The mortuary design exhibited by L. A. Jonas sent a chill down the backs of the visitors. It was a representation of a marble cradle or scroll design that is made to lie the length of a grave, the center space being left to be planted with ivy. It was, so to speak, life size, made of white chrysanthemums and Bride roses, the center space being filled with ivy leaves and a cluster of cypripediums. It was well done but it certainly did not lend a charm to the surroundings.

On Friday, in addition to the dinner tables, there were two decorated mantles. Jos. Kift & Son received first prize and Julius Wolff, Jr., second. Mr. Wolff received first for a plateau of chrysanthe-

RED WARRIOR. ARETHUSA.

SPECIMEN CHRYSANTHEMUMS GROWN BY T. D. HATFIELD, GARDENER TO WALTER HUNNEWELL, WELLESLEY, MASS.

mums; John Kuhn, second. On plateaus of ferns and foliage David Cliffe was first. Handle basket, first, Wm. Reider; second, Julius Wolff, Jr. A committee of society ladies awarded the prizes and in the main their work was satisfactory.

As to the financial results, although the attendance was good, there will be but little more on the right side of the ledger than last season. There was election day and wet weather to keep timid people at home. It seems hard that a society so richly endowed should not he able to pay its premiums. The receipts from members' dues, and they amount to considerable, together with the paid admissions are not sufficient to pay the premiums and other expenses of the society. It would seem as if something should be done to give those now interested in the welfare of the society a chance to show what they could do aud not leave it all to the generations to come. K.

Buffalo.

The Florists' Club is certainly to be congratulated upon the success of its annual exhibition, just closed, although the show was not a money maker. The new Glenny block was selected for the display and in it the exhibits, which were very profuse, were installed with a skill which made the general effect very fine. Thomas Clayton acted as superintendent and Adam Graham, of Cleveland, and H. G. Eyres, of Albany, were the judges.

Among the largest exhibitors were the Botanic Gardens, Delaware Park, Forest Lawn and the Buffalo State Hospital, each contributing splendid specimens of decorative plants and novelties. Neubeck & Myers and J. C. Bamberg sent some of the best chrysanthemums in the show. In several classes no premiums were awarded as the exhibits were not judged worthy and in several others there was no competition so that the first prize was won without effort. S. A. Anderson and W. A. Adams each showed excellent made up work but not for competition. The judges awarded prizes as follows:

In classes for six cut chrysanthemums, Wm. Scott, three firsts. Twelve ferns, State Hospital; Scott, second. Twelve decorative plants, Forest Lawn; Scott, second. Six decorative plants, same awards. Collection palms and orchids and plants arranged for effect, Scott, three firsts. Twelve white blooms, Scott; Nathan Smith & Son, Adrian, Mich., second. Twelve yellow, Scott; Smith & Son, second; T. A. Webb, Corfu, N. Y., third. Twelve pink, same awards. Twelve crimson, Smith & Son. Twelve any color, G. E. Fancourt, Wilkesbarre, Pa.; Webb, second. Six white, Scott, Webb, second. Six yellow, same awards. Six pink, Scott; H. B. Buddenborg, second. Six crimson, Smith & Son; J. C Bamberg, second. Twenty-five blooms to a vase arranged for effect, Scott; Bamberg, second. Twelve blooms same, Scott. Twenty-five blooms, Neubeck & Myers; Scott, second. Twelve blooms, Scott. Twenty-four blooms, twenty-four varieties, Smith & Son; Bamberg, second. Fifteen blooms, distinct varieties, Smith & Son; Scott, second; Bamberg, third.

Twelve American Beauties, Scott; C. T. Guenther, Hamburg, N. Y., second. Twelve Bridemaid, Fancourt; Scott, second. Brides, Fancourt; Scott, second. Perle, Scott; Fancourt, second. Kaiserin, Guenther; Kasting, second. Twelve roses, any variety, Fancourt; Scott, second. Largest and best collection, Kasting. Fifty scarlet carnations, Fancourt; Webb, second. Fifty white Scott; Fancourt, second. Fifty pink, Fancourt; Scott, second. Fifty variegated, Scott; Fancourt, second.

Scott was first on three arrangements, in which he had no competition, and was second on bridal bouquet, in which no first was awarded. On wreath Scott was first and Buddenborg second and on a flat bunch Scott was first and Neubeck & Myers second.

Among the week's visitors were: H. A. Hart, Cleveland; Geo. Fancourt, Wilkesbarre; E. H. Butler, Niagara Falls; Mr. and Mrs. C. L. Dole and Thomas Mansfield, Lockport; H. J. Wise, East Aurora; Chas. Hewson and R. C. Avery, West Seneca; R. E. Boettger, Eggertsville; T. A. Webb, Corfu; Peter Crowe, Utica; Walter Mott, Philadelphia; W. J. Palmer, Sr., Lancaster. W. A.

Boston.

The awards at the annual chrysanthemum show of the Massachusetts Horticultural Society, November 8 to 11, were as follows:

Chrysanthemum plants: Display of twelve, named, distinct varieties, J. S. Bailey; second, Mrs. B. P. Cheney. Three Japanese incurved, Mrs. B. P. Cheney; second, J. S. Bailey. Three reflexed, distinct named varieties, Mrs. B. P. Cheney; second, J. S. Bailey; third, Mrs. B. P. Cheney. Specimen incurved, James Garthley; second, J. S. Bailey; third, J. S. Bailey. Specimen reflexed, named variety, Mrs. B. P. Cheney; second, J. S. Bailey. Specimen anemone flowered, named variety, J. S. Bailey; second, Mrs. B. P. Cheney; third, Mrs. B. P. Cheney. Specimen pompon, named variety, Mrs. B. P. Cheney Twelve plants, of twelve varieties, grown to one stem and bloom, in not over six-inch pots, Mrs. A. W. Blake; second, Mrs. A. W. Blake; third, Dr. C. G. Weld; fourth, C. H. Souther. Six plants, red, J. L. Little; second, Dr. C G. Weld; third, E. S. Converse. White, Dr. C. G. Weld; second, C. H. Souther; third, J. L. Little. Pink, Dr. C. G. Weld; second, Dr. C. G. Weld; third, J. L. Little. Yellow, Dr. C. G. Weld; second, J. L. Little; third, Jas

Nicol. Any other color, A. W. Blake; second, Dr. C. G. Weld; third, A. W. Blake. Group of chrysanthemums, without stakes, arranged for effect, limited to one hundred square feet, Mrs. A. W. Blake. Gratuities: Wm. Edgar, begonia Gloire de Lorraine; James Garthley, chrysanthemum Le Colosse Grenobles.

Awards for cut blooms, Josiah Bradlee fund: Twenty-five blooms, twenty-five varieties, Mrs. B. P. Cheney; second, Robert Laurie; third, David Nevins. Six vases of six named varieties, ten blooms each, Waban Conservatories; second, Mrs. B. P. Cheney; third, David Nevins.

Cut blooms, society's prizes: Twelve cut blooms, incurved, named, in vases, Jos. H. White; second, C. H. Souther; third, Dr. C. G. Weld. Japanese incurved, C. H. Souther; second, Mrs. B. P. Cheney; third, N. T. Kidder. Anemone, C. H. Souther; second, Jas. L. Little; third, Dr. C. G. Weld. Six cut blooms, incurved, named, C. H. Souther; second, Jos. H. White; third, John Jeffries. Japanese, C. H. Souther; second, Mrs. B. P. Cheney; third, James L. Little. Japanese incurved, J. H. White; second, Mrs. B. P. Cheney; third, Edward Whitin. Anemone, E. S. Converse; second, J. L. Little; third, John Shepherd. Twelve best varieties, named, introductions of the current year, J. W. Howard. Vase of ten blooms on long stems, pink, named, David Nevins; second, Robert Laurie; third, Robert Laurie. Red, David Nevins; second, Mrs. B. P. Cheney; third, Alex. Frazer. White, Waban Conservatories; second, Mrs. B. P. Cheney; third, David Nevins. Yellow, Waban Conservatories; second, David Nevins; third, Waban Conservatories. Vase of blooms on long stems, arranged in the society's large China vases, Robert Laurie; third, David Nevins; fourth, C. H. Souther; fifth, Miss E. J. Clark. Best seedling, never disseminated, six blooms, white, George Hollis, Peerless. Yellow, Ernst Asmus.

Gratuities: Mrs. E. M. Gill, display of chrysanthemums; H. Dumaresq, two vases chrysanthemums; James Comley, display of chrysanthemums; David Nevins, two vases of chrysanthemums; S. J. Goddard, display of chrysanthemums; Wm. W. Edgar, vase of chrysanthemum Mrs. Weeks; J. Fuller, chrysanthemum Wachusett; James Garthley, display of chrysanthemums; John Jeffries, display of chrysanthemums; Peter Fisher, vase of carnation Mrs. T. W. Lawson; S. J. Goddard, carnations; Carl Jurgens, vase of rose Kaiserin Augusta Victoria; Dr. C. G. Weld, collection. A silver medal was awarded to Ernst Asmus for rose Liberty. John H. Taylor received honorable mention for rose Admiral Dewey, and John H. Dunlop received honorable mention for rose Lady Dorothea.

Providence, R. I.

The annual chrysanthemum exhibition of the Rhode Island Horticultural Society opened November 9 and continued three days. The exhibits of cut flowers and plants were not up to the standard, it being too early for most mid-season blooms. Carnations were never shown in such variety and quantity here before and for quality it eclipsed any former exhibition. The judges were H. F. A. Lange, of Worcester, Mass., and S. J. Reuter, of Westerly, R. I. The various exhibitors won premiums as follows: Wm. Goddard, Alfred Powell, gardener, twelve firsts, eleven seconds, one third; Farquhar Macrae, thirteen firsts, five seconds, one third; Reservoir Greenhouses, four firsts, one second; John Macrae, four firsts, one second; Homogansett Greenhouses, two firsts, four seconds; Wm. Hill, one first; S. J. Reuter, one first; Hazard, Werden Co., four seconds; M. J. Edwards, one second; Fairbrother & Wood, one second, one third.

Gratuities were awarded to N. U. Pierce, Jr., for his seedling carnations Beau Ideal and Dexter Pierce; to Wm. Hill for a table plant; to E. Leuly for chrysanthemum Philadelphia; to the Hazard, Werden Co. for specimen plant of chrysanthemum Naunshon; to Wm. Appleton, Jr., for collection of palms and ferns; to E. J. Johnston for same; to F. Macrae for begonia Gloire de Lorraine; to J. A. Shellem for his new seedling carnation Agnes Shellem.

The exhibition was in charge of Silas H. Manchester, Henry T. Root, Farquhar Macrae, N. U. Pierce, Jr., Fred. C. Hunt and Wm. Hill.

EXHIBIT OF MRS. GEO. M. PULLMAN AT THE CHICAGO SHOW, J. ALGOTS, GR.

Worcester, Mass.

The fifteenth annual chrysanthemum exhibition of the Worcester County Horticultural Society was an unqualified success and was very gratifying to the few enthusiasts who worked early and late to advance the cause of the queen of autumn.

Although the date was all of a week too early to get out the best blooms, the last few days of bright weather helped us immensely to make a good exhibition. As has been the case in former years the display of cut blooms was much superior to the plants shown and the vases of twenty blooms of one variety were the most striking feature in the hall.

On the stage was a very pleasing arrangement of decorative plants and pink and white chrysanthemums in pots; encircling the hall the specimen plants were arranged on slightly elevated platforms and in the body of the hall the cut blooms were displayed on circular tables. Here and there were groups of palms to relieve the mass of color and in the center of each table was a specimen areca. The display of carnations and roses was the largest and the quality of the blooms the best ever shown here.

It seemed to be H. F. A. Lange's show as he captured eighteen firsts, nearly everything in sight. A. H. L.

Mt. Kisco, N. Y.

The fourth annual exhibition of the Bedford Flower Club, which was held in the Mt. Kisco opera house on November 10, 11 and 12, under the management of the Westchester County Horticultural Society, was a gratifying success. No finer chrysanthemums have ever been staged, so the judges say, than those shown here in competition for the various cut flower prizes. C. T. Brill, A. L. Marshall and Wm. Duckham were the principal contributors in this class. In plants J. D. Layng and Herbert Spavins excelled. There were six competitors for the handsome $75 Bailey cup offered for the best twenty-five blooms of not less than eight varieties. Wm. Turner, gardener to W. M. Rockefeller was the winner with an unequaled set. Wm. Duckham, gardener to D. Willis James, came in for a second and W. Scott, gardener to Mrs. Eastman, for a third premium.

Outside of chrysanthemums there were a number of fine exhibits, notable among which were the groups of decorative plants from J. H. Crane and John E. Gorman, cut roses from J. D. Layng, carnations from H. Spavins, violets from Wm. Willis, cannas from A. L. Marshall and a display of fifty varieties of Rex begonias from Mr. Marshall. The exhibition by the school children was most creditable and helped to increase the public interest and patronage materially.

Breitmeyers' Chrysanthemum Show.

The old maxim that "whatever is worth doing at all is worth doing well" seems to hold true in the case of Breitmeyer & Sons, of Detroit. Their magnificent and elegantly appointed store has been transformed this week into a sort of dreamland and the public is treated to a chrysanthemum show the like of which has seldom if ever been undertaken by one florist. The finest of chrysanthemums grown in their establishment, the choicest of Beauties, the cream of carna-

VISITORS AT THE WABAN ROSE CONSERVATORIES, NATICK, MASS.

tions, including their own Pingree, orchids of various hues, shapes and pedigrees, lofty palms and decorative plants —all these are displayed in a way that is both attractive and artistic. Coupled with the display of flowers an orchestra provides sweet music for the many guests. Over 1800 people viewed the display in one afternoon and evening.

Viewed from whatever standpoint, an undertaking of this kind is worthy of emulation. It educates the public, it creates a demand for flowers, it advertises the florist and, incidentally, brings dollars and cents into his pocket.

HOMO.

Portchester, N. Y.

The annual chrysanthemum show of the Westchester Gardeners' Association, November 11 and 12, was very successful. The exhibits were principally from the estates of millionaires and were very fine. Whitelaw Reid was awarded a first prize of $2 for the best six American Beauty roses and $1 for the best twelve white carnations. Mrs. T. C. Eastman, who exhibited two bunches of black grapes, nearly eighteen inches from tip to tip, won a $5 prize. Others who exhibited flowers and fruits were William Rockefeller, Robert Mallery, James M. Constable, T. L. Park, Mrs. T. W. Palmer, W. H. Parsons and E. C. Hoyt. The judges were William Turner, head gardener on William Rockefeller's estate; William Plumb, gardener for Collis P. Huntington; John N. May and Richard Brett.

Visitors at Waban.

The accompanying illustration is from a photograph taken on the occasion of the annual visit to the Waban Rose Conservatories of E. M. Wood & Co. at Natick, Mass. The group is composed mainly of Bostonians with an occasional individual from neighboring states to add further dignity and grace to an aggregation which will hold its own as to solidity and good looks with any similar delegation that side of Buffalo. This chrysanthemum visit to the foremost New England florist establishment is one of the great events of the season among the craft in that section and an invitation to participate is a favor highly esteemed, for chrysanthemums and roses grow at Waban as they are grown nowhere else and Mr. Wood's hospitality is unbounded. The host himself is seen standing at the right of the picture with a bunch of six foot chrysanthemums under his arm.

CHRYSANTHEMUMS.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The committees judging new seedlings will be in session November 26 for the last time this season. Exhibitors should make their entries (for which a fee of $2 is charged for each variety entered) to the secretary not later than the Tuesday of the week the blooms are to be shown. Express charges prepaid and forwarded to any of the following addresses, exhibits will receive careful consideration:

Boston, Mass, A. H. Fewkes, Horticultural Hall, Tremont street.

New York, N. Y., E. Dailledouze, care of New York Cut Flower Co., 119 West Twenty-third street.

Philadelphia, Pa., A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O., R. Witterstaetter, care of Cincinnati Cut Flower Company, corner Fourth and Walnut streets.

Chicago, Ill., C. W. Johnson, care of Illinois Cut Flower Co., 51 Wabash avenue.

WORK OF THE COMMITTEES.

NEW YORK.—F. R. Pierson & Co., Tarrytown, N. Y., exhibited Mlle. Lucie Faure, white, incurved, Japanese; scored commercial scale 86, exhibition scale 80 points. Jas. R. McDonald, Riverdale, N. Y., exhibited Col. D. Appleton, yellow, incurved, Japanese; scored both scales 92 points.

PHILADELPHIA.—C. W. Ward, Queens, L. I., exhibited Admiral Dewey, yellow, Japanese, reflexed; scored commercial scale 87, exhibition scale 85 points.

BOSTON.—Grove P. Rawson, Elmira, N. Y., exhibited Pride, white, reflexed, mentioned in last report as "exhibited without name or number"; scored commercial scale 86 points. E. G. Hill, Richmond, Ind., exhibited Phenomenal, light bronze, Japanese, incurved; scored exhibition scale 87 points. Nathan Smith & Son, Adrian, Mich., exhibited 25—1, amaranth pink, Japanese, incurved; scored exhibition scale 78 points. C. W. Ward exhibited Admiral Dewey, chrome yellow, reflexed; scored commercial scale 90 points. John N. May, Summit, N. J., exhibited Yellow Mayflower, primrose yellow, Japanese; scored exhibition scale 89 points. The same grower exhibited Silver Wedding, white reflexed; scored commercial scale 90 points.

CINCINNATI.—Theo. Bock, Hamilton, Ohio, exhibited No. 97, light pink, incurved, Japanese; scored commercial scale 79 points. Nathan Smith & Son exhibited Shilowa, red, Japanese; scored commercial scale 80 points.

CHICAGO.—E. G. Hill & Co., Richmond, Ind., exhibited Gen. Custer, red, Japanese, reflexed; scored commercial scale 79 points. John N. May exhibited Mavourneen, pink, reflexed, Japanese; scored commercial scale 84 points. Silver Wedding, shown by the same grower white, reflexed, Japanese, scored commercial scale 83 points. Nathan Smith & Son exhibited Izanga, white, lemon disc, anemone; scored exhibition scale 85 points.

INTERESTING MEETING OF THE FLORISTS' CLUB.—A WEALTH OF VERY FINE EXHIBITS.—THE MATTER OF ANNOYANCES AT THE CUSTOM HOUSE.—W. H. SIEBRECHT READS A PAPER ON BULB GROWING IN AMERICA.—NOMINATION OF OFFICERS.—MINOR MENTION.

The meeting of the Florists' Club on Monday evening, November 14, was one of the most interesting and enthusiastic of the season. All the old "war horses" were present, besides a strong representation of the younger generation. The center of the hall was splendidly decorated with a group of grand ferns, comprising 112 species and varieties from W. A. Manda. At one end was a vase of Ernst Asmus' new rose, Liberty, and at the other end a vase of J. H. Taylor's Admiral Dewey. J. N. May brought two vases of chrysanthemum blooms, including Mme. Lucie Faure, Pride of Ryecroft, Mrs. W. Mease, Silver Wedding, Mavourneen, Mrs. T. L. Park, Phœbus, Directeur Siebert and Yellow Mayflower, and W. A. Manda showed a notable group of ten kinds of asparagus, including retroflexus, decumbens, plumosus, p. nanus, Sprengerii, tenuissimus, Pitcherianus and three unnamed species.

The matter of annoyances sustained by importers through the present administration of customs laws came up and was discussed at length. A number of sufferers told of their losses through inadequate facilities and careless handling of goods in examining and the effect of rough treatment, red tape and delay upon the perishable goods imported for the florist trade was forcibly presented. A suggestion that the government could be held liable for all loss caused by delay in passing goods brought out the pertinent retort that "you never get anything back from Uncle Sam" and John Morris' suggestion that all the present annoyance may eventually benefit the country by encouraging and actually forcing us

to grow all our plants and bulbs here was received with applause. The matter was finally referred to the legislative committee of the S. A. F. and all the members of that committee, Messrs. O'Mara, May and Allen, being present, it was announced that the committee would at once receive from all having complaints to make, statements, dates and specifications regarding the same.

This discussion was a very appropriate prelude to the paper presented by the essayist of the evening, Mr. W. H. Siebrecht, whose subject was the culture of flowering bulbs in America and whose practical remarks on this subject appear in another column. The discussion following the paper was very interesting. That the right soil, the right climate and other requisites for bulb growing are to be found in many parts of this country was shown by many speakers, who instanced recent experiments in Washington, Oregon and other points on the Pacific coast and in Long Island, New Jersey and North Carolina on the Atlantic coast. The development of the tuberose and gladiolus industry and of budded rose growing was pointed out and the question of wages was proved to be of minor consequence, as with American methods and American implements one man could be counted upon to accomplish as much as two, three or four men will do abroad. Predictions were freely made that in a very few years we should be growing not only Dutch bulbs, but azaleas and Japan bulbs in sufficient quantity to supply all home demands. The nomination of officers resulted in the selection of Wm. Plumb for president, J. H. Troy, vice-president, John Young, secretary, and C. B. Weathered, treasurer, who will be the candidates for election at the December meeting.

The outlook in the wholesale cut flower trade is more encouraging and the retailers find enough to keep them fairly busy with regular store trade. Roses have shortened up considerably in supply and at the same time have improved in quality generally and prices are slightly firmer in consequence. Chrysanthemums have reached their height and a reducing stock may now be looked for. The poor quality flowers are pretty well worked off. The average grade of the stock seen in the wholesale stores is much better than last week. It is, however, none too good for even the lower class of buyers, who are, as a rule, hard to suit and as particular regarding "points" as an exhibition judge. Violets have not developed the activity hoped for on account of the horse show and all efforts to advance them to an abnormal figure have failed. Very likely this fact will prove beneficial to the regular violet trade throughout the season as in the past it has been claimed that high prices on violets in the fall have had the effect of a sort of boycott later on. The receipts at present are fortunately light. Carnations are also coming in but sparingly and all that are of good quality find a ready sale.

Traendly & Schenck have added a plant department to their commission business, which has heretofore been exclusively in cut flowers. Twenty-eighth street may yet become as important a center for the plant trade as Twenty-eighth, Twenty-ninth and Thirtieth are in the cut flower industry.

A column decorated with sprays of Dendrobium Phalænopsis, Vanda cœrulea and Adiantum Farleyense in the Bridgeman store is one of the prettiest window decorations to be seen here at present.

Autumn leaves figure conspicuously among the chrysanthemums in Warendorff's window and the effect is good.

Visiting New York: Mr. and Mrs. P. Welch, Boston; Fred A. Danker, Albany, N. Y.; Mr. Vick of Vick & Hill, Rochester, N. Y.; Ed. McMulkin, Boston; Peter Fisher, Ellis, Mass. and J. N. Champion, New Haven, Conn.

Philadelphia.

THE BUSINESS SITUATION.—SUPPLY, DEMAND AND PRICES.—FLORISTS' OPEN HOUSE.—VISITORS.

A little more business is doing and cooler weather is shortening up the crop; this has a tendency to stiffen prices and makes the commission men and growers a trifle more independent. Beauties have advanced the most, a few specials with three-foot stems and over having brought as high as $4 per dozen. Twelve inch stock goes readily at $1 per dozen.

Tea roses are a little more in demand at $3 to $4 per hundred. Special Carnots and Kaiserins bring $8. Carnations are improving but are still plentiful. Violets are aristocratic, $1 being asked for the best. Southerns still sell for 50 cents per hundred. Chrysanthemums are plentiful although there seems to be no glut. Prices range from $3 per hundred to $2 per dozen. Mme. Perrin and Maud Dean are the best pinks. Bonnaffon, Golden Wedding and Modesto the best yellows, and Ivory, Minnie Wanamaker and Western King the best whites. Pot plants of chrysanthemums are selling fairly well.

The open house of the Florists' Club on Wednesday of last week was a great success; there were quite a number of visitors from out of town and all seemed to enjoy themselves thoroughly. Some of the New York contingent had a good time on the alleys but would not allow a record of their scores. Among the visitors were: Eugene Dailledouze, Charles Allen, E. Asmus, Jr., C. Zeller, Chas. Weathered, P. O'Mara and J. Ward, of New York; J. N. May, Summit; F. L. Atkins, of Short Hills; I. Potter, Tewkesbury; Wm. Nicholson, Framingham; Prof. John Hamilton, Harrisburg; W. H. Hoskins, Reading; H. M. Hoffman, Elmira; Wm. Falconer, Pittsburg and W. R. Smith, of Washington. K.

Chicago.

SHORT SUPPLY OF GOOD STOCK CAUSES STIFFER PRICES.—WHEELER TAKES THE ROAD.—FLORISTS' CLUB DISCUSSES A LIVE TOPIC.—NOTES AND COMMENTS.

The supply has shortened very decidedly during the past week and with little prospect for an increased cut during the next few days the indications are that Thanksgiving flower buyers will be compelled to pay pretty strong prices for fair flowers. The reduction in the cut is the result of two or three influences. To begin with, it is off crop season with most of the rose growers, the early bloom being exhausted and the later buds not having developed. The dark weather of the past two weeks has had much to do with retarding the blooms and it is more than suspected that many a grower, foreseeing advancing prices for Thanksgiving week, has been holding back his plants and pickling the product to get the benefit of the rise.

There has been no over-supply in any line in the past few days, although there have been enough chrysanthemums, carnations and violets to meet the demand. However, poor stock has been much more plentiful than good, and particularly is this true of roses. A good rose has been worth 5 or 6 cents and fair Beauties sold readily for from $3 to $4 a dozen.

L. W. Wheeler, of Vaughan's Seed Store, will take the late Burt Eddy's route for this house. V. A. Clark, for some time bookkeeper at the same establishment, formerly of the Burlington, Vt., Experiment Station, has secured an appointment with the Department of Agriculture at Washington, D. C.

A. Herrington, of Madison, N. J., and J. A. Evans, of the Quaker City Machine Co., Richmond, Ind., visited Bassett & Washburn's at Hinsdale and Vaughan's greenhouses at Western Springs early in the week.

At the meeting of the Florists' Club last evening the subject under discussion was "Mildew on Roses and Carnations and the Remedies." The opening was by Wm. Wallace, of Colorado Springs, Colo.

C. J. Stromback, Charles Zapel and James Jensen have been giving chrysanthemum shows of their own this week at the parks of which they have charge. The plants were never finer, exhibition blooms being the rule throughout the conservatories, and large numbers of people were attracted by the splendid showing.

Vaughan, McKellar & Winterson are finding daily sale for some very fine orchids.

The Albion Floral Co., W. J. Coxe and C. J. Deanne, has opened a very pretty retail store on Cottage Grove avenue near Thirty-fifth street.

Mr. W. N. Rudd left for St. Louis November 18 to attend the ninth annual banquet of the Missouri Botanical Garden, to be given this evening at the Mercantile Club.

St. Louis.

BRISK DEMAND CLEARS STOCK OUT OF THE MARKET.—THE SHOW WAS A FINANCIAL FAILURE.—PREMIUMS TO BE SCALED TO COVER DEFICIT.

Trade during the past week has been fairly active, a large wedding having cleaned stock pretty well out of the market. Chrysanthemums have been received in increased quantities but have not been an over-supply, judging from the prices they are bringing. Carnations are scarce, and from present indications will be so for some time.

The chrysanthemum show, from a financial standpoint, was not a success. This may be directly traced to the unfavorable weather, as on Friday, the only good day we had, the attendance broke all previous records, and had the weather only been favorable there is no question but that the club would have come out a long way ahead. The present indications are that we will have to scale the prizes, according to rule 15, about twenty per cent.

Opinion among the florists most actively connected with the exhibition, with one or two exceptions, seems to be very strongly against holding a show next season. This occurs, however, whenever a show fails to pay expenses, but by the time the sober second thought gets to work, the decision generally is that it pays to hold the show, even at a financial loss, and the prospects are that the coming season will see St. Louis with just as good a show as it had the present year.

Will Huckley, of Belleville, who was formerly in business on south Grand avenue, has accepted a position with Alex. Waldbart and has charge of his new store under the Lindell Hotel. R. F. T.

Address THE AMERICAN FLORIST CO., Chicago.

PRICES of bouquet green have stiffened considerably this week.

WHILE preparing for Thanksgiving and Christmas, remember that Easter falls on April 2 next year.

GIBLIN & Co., Utica, N. Y., have come into possession of the J. S. & M. Peckham Company and will hereafter conduct that concern, making stoves, agricultural furnaces and kettles.

THE FLOWER CITY PLANT FOOD Co., Rochester, N. Y., has succeeded the Walker Fertilizer Co., Clifton Springs, N. Y., in the manufacture of Walker's Excelsior Brand odorless plant food.

EXTRA copies of the Chrysanthemum Number of the AMERICAN FLORIST can be had for fifteen cents on application to the publishers at 324 Dearborn street, Chicago. Some subscribers say this number alone is worth the yearly subscription price.

WE are in receipt of an extremely tasteful souvenir of the recent "at home" (November 15–17) of John Breitmeyer & Sons, Detroit, Mich., in the form of a neatly printed and richly illustrated pamphlet. The text, relating to orchids and chrysanthemums, is of the right character to awaken the interest of the general public in these plants.

IT IS A QUESTION if the grower does not make a serious mistake in his haste to get the first violets, the first chrysanthemums or the first of any other florists' flower into the market. Not to mention the possible injury to plants caused by the hurrying process, it would seem as though the better ambition would be to keep the flowers out of the sight of buyers until their quality is such as to attract and please the public. The first chrysanthemums—what are they? Half developed blooms that two weeks later would scarcely be taken as a gift. Yet these unworthy heralds of this superb race are hurried into the city and an unreasonable price is demanded for them; unreasonable because it is not based on intrinsic value and cannot be maintained beyond a very few days. The retailer, if he invests, is sure to disgust and anger his customer by offering him such material at fancy prices and the customer is prejudiced not only against the retailer, but, what is worse, against the chrysanthemum itself. At the present stage of the cut flower trade any course which may be construed by the buyer as an attempt at "roasting" is the sheerest folly and is bound to react with disastrous effect on a business, the condition of which now is that it cannot afford to take any chances in its relations with the public. As to the first violets, every florist knows that they are practically worthless, and no matter what price may be set upon them they are no credit to anyone. Here the retailer who invests suffers most. A young man buys the trash and sends it to a young lady thinking to please her because these are the first violets of the season. She makes a mental note of their condition and two weeks later will not hesitate to inform her friend of the lovely violets in B.'s window, so beautiful as compared with the rubbish sent her from A.'s store a few days ago. Fashionable people, especially those having greenhouses of their own, occasionally know and understand the situation and will take the first violet at its worth, without prejudice, but the great majority of buyers do not care to listen to explanations or reason out these things and consequently an irreparable injury is done to the industry right at the opening of the season. By all means keep your violets out of sight until they are worthy of the name.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

John H. Taylor, Bayside, N. Y., has registered at the secretary's office the new rose, Admiral Dewey, a light pink sport from Mme. Caroline Testout.

WM. J. STEWART, Sec'y.

The American Florist Company's Directory.

The final corrections are now being made for the next edition of our directory of florists, nurserymen and seedsmen, to be issued January 1, and we trust our readers will promptly inform us of any business changes which have come to their notice within the past year. Advertisements and orders for the use of large type in names of alphabetical list should be mailed as early as possible.

Proceedings of the Society of American Florists.

The report of the proceedings of the fourteenth annual convention of the Society of American Florists, held at Omaha, Neb., August 16–19, has come to hand. The book of 164 pages is presented in its usual complete and excellent style, showing much carefulness and judgement in the preparation of the matter. The papers, reports and discussions are given in detail, embracing a large amount of valuable information. Lists of the new introductions of the year are specially compiled for this work, and for reference purposes these alone are worth the annual membership fee. The index is very complete, and the volume as a whole reflects much credit on Secretary Stewart. President-elect Rudd's portrait appears as frontispiece.

The Dutch Horticulturists.

At the October meeting of the Dutch Horticultural and Botanical Society, held in Amsterdam, the floral committee made the following awards: First-class certificates to T. E. Houtvester for Chrysanthemum President Nonin and C. Soleil d'Octobre; Egbert Kloosterhuis for Populus trichocarpa, Pyrus erythrocarpa, Stephanandra Tanakee and Ulmus argentea albo-marginata; C. Meynen for Vriesea hybr. retroflexa × brachystachys. Certificate of merit was awarded to H. D. Willink van Collen for Iochroma Warsewiezi.

Attention! S. A. F.

Owing to numerous complaints regarding delays in passing plants through the New York custom house, the New York Florists' Club, by resolution passed at its last meeting, referred the whole matter to the Legislative committee of the S. A. F. The committee desires that all florists who have suffered by unnecessary delays in passing through the New York custom house, or whose invoices have been raised beyond purchase price, shall communicate the facts in writing at once to the chairman of the committee, 35 and 37 Cortlandt street, New York City.

PATRICK O'MARA.

Rusted Pipes.

ED. AM. FLORIST:—Two years ago when we built our greenhouses we put in 2-inch wrought iron pipe and we notice this year that it is beginning to rust very badly. We can break off large cakes in many places, and we are afraid our pipes will soon wear out if we do not get something to put on them that will stop this rust. We desire, of course, to apply something that will not hurt the plants. Some of our ¾-inch pipes have rusted out already. Can you recommend anything? T. S. & F. Co.

The best mixture for this purpose is composed of linseed oil and lamp-black, enough of the latter being used to give a fair body to the paint. This gives a dull rough surface which will radiate more heat than asphaltum and other glossy paints, which are sometimes used.

Catalogues and Cut Flower Price Lists Received.

The Cultivation of Flowering Bulbs In America.

[*Read before the New York Florists' Club, November 14, by William H. Siebrecht.*]

This subject is certainly nothing new to European bulb growers, but entirely new and uncertain to growers in this country on account of the lack of experience and trial to try and find the right way of doing it, the right soil, the right location and the right temperature. When once these are found in this extensive country of ours—in which there is a greater variety of land than in any other—we will be able not only to keep our money at home but to supply other countries with our products.

Certainly, undertakings of this kind take patience, time and capital, of which some people have plenty, and would gladly invest the same, if they only knew how to go about it. The soil should be rich and sandy, or nearly so, for easy working; easy for water to drain; easier to force and to ripen the bulbs better; also to give a healthier and a fine appearance to bulbs when put on the market. Furthermore the land should be situated so as to be almost level, and can be subirrigated by canals and ditches through which the water is supplied, and kept at all times in reach of the roots of the growing bulbs, at distances of 500 feet or more, with smaller ones crossing these.

The principal and main point is to keep the water as much as possible on a level at all times of their growth, which will prevent them from being checked for the want of moisture. This is the reason why they cannot be grown successfully everywhere, as the necessary moisture is not on hand in times of need, and land should be no less than three feet and no more than six feet above the water level. The climate for all sorts of Dutch bulbs should be a moderate temperature; not too warm in winter, nor too hot in summer, would suit them best. Bulbs when planted in the fall, in the fields, can stand quite cold weather, after taking root, properly covered with some kind of litter to keep the sun off, but after their winter nap, don't like to be checked by high raw winds in the early spring. Therefore, hedges for wind breaks are advisable, and if neatly trimmed, will be ornamental, and will also keep the cold winds from sweeping the fields, and injuring the tender growth.

After foliage once starts to develop, coverings must not be removed too early for a late frost will injure and check their growth. Bulbs produce but one crop of leaves, and if badly injured, will ruin the crop entirely. The land is generally trenched to a depth of three or four feet, heavily manured, and, to absorb superfluous strength, is planted with potatoes. After harvesting, hyacinths of all kinds are grown on such soil; tulips, as a rule the second year, and crocuses the third year. Daffodils, double and single, and even spiræas like a rich, heavier and lower situated piece of ground, well moistened, whereas lilies, gladioli, crown imperials, lilies of the valley, ixias, ranunculi and scillas will do better on higher situations.

The main question of growing bulbs in this country is wages. Compared with Europe, our bulbs would cost fifty per cent more if proved to be grown here just as good, and in the same length of time as in Europe, and to profit at all, a high duty must be levied. Roman hyacinths, paper white narcissus, freesias, etc., or French bulbs are generally grown at the foot of mountains, in a clay-like soil, which will retain the moisture longer. These need a warmer climate altogether; they can stand but a few degrees of frost, but can endure the heat better.

CARNATIONS.

CULTURAL NOTES.

November 19.—Chrysanthemums will soon be on the wane, the holidays are approaching and we carnation growers can look for better returns for our product. To have the super-excellent grade of blooms that are now demanded when a fair price is asked we must have our plants in the best condition possible. With some growers this necessitates the application of liquid manure, with others commercial fertilizer and with some manure as a mulch.

Soil has considerable to do with the choice of a method of applying a stimulant and each grower will have to use his own judgment. Until this season I have never had occasion to use a fertilizer in any form before about February 1, but this year, owing to the drought of the summer, my plants were in condition for a stimulant as soon as they had taken good hold in the houses and about three weeks ago I applied a mulch of well rotted manure. This was given with some doubt as to the result but nothing except good has resulted. Liquid manure applied ever so carefully to my soil has always been productive of more harm than good, but with this mulch the flowers are improved in size and substance and the plants are quite perceptibly benefited.

In making the application the soil was first stirred very slightly, the manure was sifted and none of it was put around the stems of the plants, but between the rows only. After the mulch was laid the houses were well watered. Three weeks after the application the manure had become so thoroughly incorporated with the soil that it could no longer be considered in the light of a mulch.

Care was used that the temperature of the houses was kept normal, as an increase of food and an increase of temperature at the same time would induce a soft growth and weak stemmed flowers that would be too lacking in substance to ship, while a decrease of temperature coincident with the application of extra nourishment to the plant would produce a groggy condition of the plant and an increased percentage of split calyxes.

With the approach of the holidays we should strive for our heaviest crop and the ready market will bring good returns for blooms of extra quality. In addition to the application of a stimulant we must also attend to disbudding carefully, and to supporting the flower stems so as to have them straight. Disbudding is a simple matter which can, however, be abused by a careless worker. About the only necessity is to see that buds are taken off small enough to be of some benefit to the terminal bud left standing and that in taking off the side buds the leaves are not broken nor the stem skinned. Quite as important as disbudding is the matter of supporting the flower stems, which is neglected in a great many establishments.

Another thing conducive to the production of extra blooms is the trimming of the plant by cutting out all weak branches and especially any which do not show a good flowering shoot. I do not hesitate to do this over my whole place but to any who are in doubt about the paying part of it I would recommend that they try it on one row of each variety and leave the others growing along in the usual manner, to see for themselves which method they prefer for another season. ALBERT M. HERR.

General Notes on Chrysanthemums.

It is advisable now to note the good or bad qualities of the different varieties, and also whether or not they have come up to the standard under the treatment to which they have been subjected. There are many little things which can be noted now that will be of the greatest assistance another year. For instance, note the difference in color and form of the blooms that were taken on the crown or terminal bud, also the height of growth and, most important of all, whether they have been quick and ready sellers.

From personal observation of the Chicago market it seems that most growers have an over supply of Mrs. Henry Robinson, the dealers being loaded down with this variety, a great deal of it being left unsold, although this is scarcely to be wondered at, as the majority of this stock is sent in just as soon as the blooms have begun to unfold their petals and in this state they give poor satisfaction to the buyer. Yellow Queen was a good seller when well done as also were Ivory, Major Bonnaffon and Mrs. Jerome Jones. The keeping qualities of these old standbys is what counts so much in their favor. This has been a good season for pink varieties, that is, so far as good deep color is concerned. I have seen some extra fine colored Viviand-Morel and Maud Dean. Pink Ivory was much better in color this season than last. Mrs. Perrin was one of the last to set its buds and made five or six feet of growth while other seasons three feet was its height. Glory of Pacific was grown in large quantities for an early pink, it being a good grower and, while a little off on color, there is not anything in sight as yet to displace it. Among the novelties of 1898 which we have had on trial we like Solar Queen as a second early yellow but to get it full to the center it must be taken on the early crown, though personally I much prefer the style of the flower when taken from the second crown, even if it does show a little center. As regards size of bloom and freedom of growth this variety is all that can be desired.

Autumn Glory has proven to be a good grower and a fine large flower of even color, but whether it will prove a good seller cannot be told as yet. It will have to be well done to show up as it should. The blooms of the Frank Hardy I have seen so far have been wrong side up. We get the blooms on their side and upside down and every other way except the right one. We cannot find a place for Yellow Fellow, as there are so many other fine yellows that are ahead of it, though it makes a fine growth for specimen plants or standards. Wm. H. Chadwick is very late with us and it is too early to speak of it as yet. The same may be said of Mrs. C. H. Pierce, but we find the latter to be showing considerably more bronze than it did last season.

After the blooms are cut pick out the best stools for stock, properly label them and plant them in a light, airy place where the temperature can be kept 40° to 45°. Keep the young growths free from black or green fly and be careful to have an extra supply of such varieties as are poor propagators. C. W. JOHNSON.

Boston.

AFTER THE EXHIBITION.—THANKSGIVING PREPARATIONS.—GLOIRE DE LORRAINE GAINING A POSITION.—A JAPANESE SALE.

The process of recovery from the excitement and diversions of the chrysanthemum show and the preliminary visits to the many interested growers is slow, and until the local toilers get well into harness again there will be a scarcity of interesting events in this neighborhood. The big crowd of visitors from outside localities melted away with the closing of the exhibition, Mr. Hurrell, of Lager & Hurrell, alone remaining as a reminiscence of a very pleasant company. Now the thought uppermost with all is how to make the best of the Thanksgiving trade. This New England holiday is always a fairly profitable season for the local florists but there is no special rush and no advance in price of flowers, nowadays, unless a sudden and severe wintry spell should come just in time for it. All kinds of stock are well represented and the demand is as steady as could be expected, for the season. Chrysanthemums have been coming in rather heavy for the outlet and there have been several disastrous breaks, but this applies more especially to the medium grades and the extra choice blooms are holding their own fairly well.

Begonia Gloire de Lorraine is a central attraction in several of the store windows. The public are beginning to realize the value of this beautiful flowering plant and, its good keeping qualities as displayed at the exhibition last week being now recognized, it will soon overcome the prejudice from which other begonias have suffered on account of their short-lived character after being taken from the greenhouse.

There was a very extensive sale of Japanese dwarfed evergreens and other curios at one of the auction rooms last week and prices were paid, in many cases, far in excess of what a florist could get for the same goods.

Detroit.

BAD WEATHER AND POOR BUSINESS.—YELLOW CHRYSANTHEMUMS AT A FOOT BALL GAME. — NOVEL FUNERAL DESIGNS. — NOTES.

There has been too much rain and business is poor in consequence. J. F. Sullivan made a hit with yellow chrsanthemums on Nov. 12, the occasion being a U. of M. foot ball game. George Leadley has been making a nice display of pink chrysanthemums, but this flower is too plentiful to be profitable this year.

Several of our florists have sent out invitations to what they call "fall openings."

In my account ot our trip to Mt. Clemens I should have written Mr. Robert Klagge instead of Mrs. Klagge.

B. Schroeter made two novel designs this week for the funeral of a furniture man. One was a bedstead 5x6½ feet, covered with a blanket of Mayflower chrysanthemums and the other an extension table 3½x4 feet. R. F.

Milwaukee.

BINZEL & KELLNER'S FLOWER SHOW—BUSINESS NOT BRISK.—JOTTINGS IN THE TRADE.

Most all the flower stores have made more than the ordinary display during the past week. Wm. Edletsen's store was very tastefully arranged and quite a stock of beautiful flowers shown.

Binzel & Kellner's opening attracted quite a large number of people. The flowers in competition were good but there were not many entries. Adam Zender was first on roses, except on Perles, where Jacob Meyer won. Mr. Zweifle was ahead on carnations and A. Billings on chrysanthemums. August Schueneman's violets did Oconomowoc credit, but owing to the number not being correct, were awarded no prize.

The prettiest window decoration was at Volk & Stewart's, a rustic landscape effect.

While there are quanties of flowers being used in a quiet way, there are so many doing retailing that no one feels that trade can be called brisk. Good violets have been cleaned up all along. Stevia was very prominent and effective at the hardwaremen's banquet this week. Ben. Gregory will decorate for the Calumet Club Thanksgiving anniversary. E. Haasch displays a good lot of pink cyclamen in his window. C. B. W.

Buffalo.

TRADE AND WEATHER FINE.—KASTING PLEASED AT PITTSBURG. — FLORISTS' CLUB IS PROSPERING.—PETER BARR IN TOWN.

The weather and trade are both excellent for the season and the stock coming in is very good. Foot ball is the rage just now and Palmer, Scott and Anderson all have very pretty and appropriate window decorations.

W. F. Kasting is greatly pleased with his business venture at Pittsburg. Fred. Stokes is his manager there and we wish them both success.

The Florists' Club has been meeting at Kasting's store for the past three months and as a host he is most successful. The club is prospering as six new members have been elected in the past two weeks.

Some of the best chrysanthemums in this market come from Jerry Brookins, Orchard Park, and the best violets in Buffalo are those from J. W. Feeter, Highland Park.

Peter Barr, the famous London seedsman and daffodil specialist, has been the guest of Wm. Scott. Other visitors were Walter Mott, Joseph Rolker and George Fancourt. W. A.

NEWS NOTES.

WOODSTOWN, N. J.—Isaac B. Coles is shipping large quantities of fine violets to the Philadelphia market.

EAST ORANGE, N. J.—C. A. Sands has completed a carnation house and violet house at his country place at Manchester, Vt.

TRENTON, O.—The Greenwood avenue greenhouses are now under the management of Mayor Harry E. Baslow of the Mercer pottery.

ALEXANDRIA, VA.—Arthur Hebel, a well versed Louisville florist, has arrived to take charge of a section of the establishment of J. Louis Loose.

SEDALIA, MO.—Chas. Koeppen's greenhouse was gutted by fire on the morning of November 10; loss $400, insurance $350. Mr. Koeppen considers it the work of an incendiary.

NEW ORLEANS.—The efforts of our Horticultural Society to organize a bowling club among the florists and gardeners have thus far met with little success but we shall doubtless be in line during the winter. M. M. L.

SPOKANE, WASH.—H. M. Sanders has opened a branch store at 718 Riverside avenue.

POMFRET, CONN.—Thos. Beattie, who has been engaged as a florist for many years in Newport has come to Pomfret to take charge of the extensive private greenhouses of Mrs. Clarke.

FORT DODGE, IA.—P. L. Larson is growing a general assortment of stock this season and has some very fine chrysanthemums. His roses, carnations and decorative plants are also good and are meeting with an encouraging sale.

ST. JOHNSBURY, VT.—C. F. Gibbs gave a public exhibition at his greenhouses on November 4 and 5. In the evening there was a brilliant illumination with lanterns and candles and visitors were present in large numbers.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

A WEEK OF POOR BUSINESS.—A LOCAL CHRYSANTHEMUM SHOW.—GARDENERS' CLUB MEETING.

Many complaints are heard of the inactivity of business of the past week. Flowers are of fair quality and the quantities are, in some cases, far in excess of the demand. Chrysanthemums especially are commanding smaller prices in consequence of over production.

E. A. Seidewitz has made an interesting exhibit of chrysanthemums from the gardens of individual growers and of his own growing. Paul Binder's seedlings, which have been before most of the C. S. A. committees, were given a prominent place. The most curious in the collection was a sport from Tasmania grown by R. H. Arning, the flower being distinctly and evenly divided between purple and white.

The Gardeners' Club held its regular meeting on Nov. 14. Being chrysanthemum night, there was a large attendance and fine exhibits by Fisher & Ekas, Sam'l Feast & Sons, W. B. Sands, R. Vincent, Jr., M. J. Hannigan, Philip Welsh, Paul Binder and R. H. Arning. Thomas Stevenson showed Farquhar and Marie Louise violets which were very fine. E. Kress read the essay of the evening, entitled, "Does it pay to grow early chrysanthemums?" A. R. J.

HOLLY=VAUGHAN'S XXX BRAND

AND

Bouquet Green.

THE Holly situation changes nearly every year. For the last three years they've begun to bring it into the country towns like potatoes. Every man has taken to cutting his own—or some other man's—holly, and packs it well, badly or indifferently, or any old way. The result is very bad for the retail florist. When we first started the Holly business, in 1880, our buyer contracted for a man's grove and cut the best and sorted it himself, and established Vaughan's XXX Stock as a brand worth having. It is nearly 20 years old—almost of age—and has held its own well. But we wondered why so many culls came our way (to sell to peddlers at half rates) and this fall our Mr. Vaughan located this town market Holly system and cut it off from our man. We are buying and packing our Holly in the woods ourselves and it costs more money, but it is worth to the retailer a lot more than it costs. **A good case of Holly is easily worth Ten Dollars, while cull stock can't be given away.**

We can suggest delivery dates which will keep you in good supply on the best days for selling Holly. Our prices are not advanced. How much can you use?

Vaughan's Seed Store, *84-86 Randolph St., CHICAGO. 14 Barclay St., NEW YORK.*

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

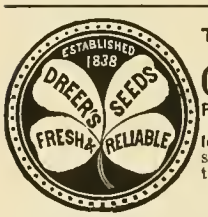
EVERETT B. CLARK, Pres.; JOS. A. BOLOIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

SAN FRANCISCO.—Waldo Rhonert, of Gilroy, was a recent visitor.

MRS. A. H. GOODWIN reached Chicago from Europe on November 8.

VISITED CHICACO: E. L. Coy, the veteran seed grower of West Hebron, N. Y.

VISITING NEW YORK: C. P. Braslan, Chicago; J. M. Kimberlin, Santa Clara; Lester Morse, Santa Clara; S. F. Willard, Wethersfield, Conn.



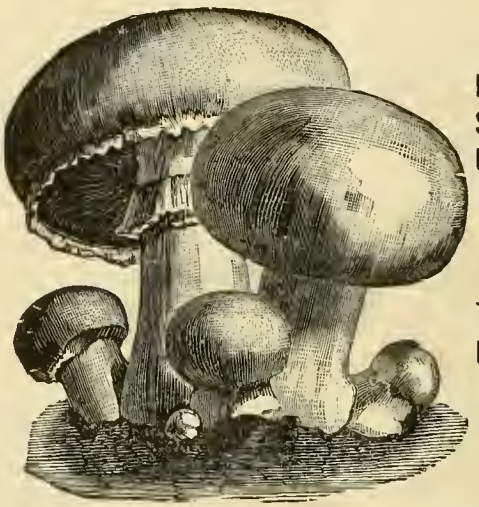
DUMMY inquiries are now in order and seedsmen's office help will soon be busy quoting round lots of the scarcer standard kinds, wasting good paper and postage.

SPRINGFIELD, O.—The Good brothers succeed Good & Reese, Mr. Reese engaging in the cut flower business on his own account. The old firm name remains unchanged.

J. M. THORBURN & Co.'s trade list, dated November 10, is at hand. This issue is always scanned with interest by the trade, being about the first printed indication of the coming season's market rate.

W. ATLEE BURPEE & Co. inform us that the name of their new sweet pea, Sunset Novelty "A" True Blue, has been changed to Navy Blue in courtesy to A. W. Livingston's Sons, who objected to the use of True Blue as an infringement on their trade mark of "True Blue Seeds."

NEW ORLEANS, LA.—C. W. Eichling has secured the services of the former president of the R. Frotscher Seed Co., Mr. L. Bruns, Jr., also their vice-president, Mr. J. A. Schalck, and bookkeeper, J. N. Moran. Mr. Eichling has leased the three story building 129–131 Camp street, which has a very central location. Invitations are out for opening the new store November 19. Besides a general line he will handle also cut flowers and decorations.



TRY DREER'S GARDEN SEEDS,
Plants, Bulbs & Requisites. They are the best at the lowest prices. Trade List issued quarterly, mailed free to the trade only.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

A. L. BROOKE, Pres.; E. ALBERTSON Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

WALTER WESTGATE, of Roseland Nursery, Houston, Texas, has changed his post office address from Houston to Brunner.

GALT, ONT.—William Cavers, of the nursery firm of Cavers Bros., died very suddenly, aged 39 years. He leaves a widow and son.

KANSAS CITY, Missouri, will set out large numbers of trees on the streets this fall and has asked nurserymen to bid on good sized orders.

EMPORIA, Kas.—James A. Yearout, nurseryman, of Lydon, Kas., was held up near the home of his son here, robbed of $200 and badly injured.

WENATCHEE, WASH.—Geo. K. Armstrong, of the Vancouver Nursery, will establish a nursery here and already has a considerable amount of stock on the ground. Walter Olive, of Mission, will be in charge.

E. Y. TEAS, Irvington, Ind., after years of success in the nursery business, is about to retire and writes that after the beginning of the new year he will devote his attention to the "propagation of pigs and chickens."

LENOX, MASS.—The exhibition at the Horticultural Society's rooms on Saturday evening, November 5, was very fine, most of the gardeners contributing liberally. J. F. Huss gave an interesting address on evergreens.

Cincinnati.

FLORISTS' SOCIETY HOLDS A VERY SUCCESSFUL MEETING WITH DISPLAYS OF CHRYSANTHEMUMS.—ROSE EXHIBITS.—A NEW RED.—DELINQUENTS ARE DROPPED.

The chrysanthemum meeting of November 12 was the most interesting in the history of the Cincinnati Florists' Society. The exhibits of chrysanthemums, roses and carnations were by the best growers in this vicinity. For this show we had three special cash prizes offered by Albert Sunderbruch, J. C. McCullough and Baron, Boyle & Co. The latter called for vases of twenty-five blooms and the $10 premium was justly captured by R. Witterstaetter with Major Bonnaffon, a display which caught the eyes of every visitor. E. G. Hill & Co. entered this contest with a fine vase of Mlle. Lucie Faure, a large globular white, which was undoubtedly a close second. The Hoffmeister Floral Co. showed a vase of Golden Wedding which were excellent. George & Allen captured the Sunderbruch prize with a vase of twelve blooms in variety. Under the rules of the new schedule the one who donates a premium is entitled to the winning exhibit, but Mr. Sunderbruch refused to accept, being of the opinion that people offering a premium should not be entitled to the flowers. Mr. George wished Mr. Sunderbruch to take the blooms and they had quite a dispute about it, which ended when Mr. Sunderbruch bought outright George & Allen's entire collection of show blooms. This firm also received the prize offered by J. C. McCullough for the best twenty-five lily of the valley.

Fred. Walz had a vase of Marechal Niel rose which were exceptionally large and in Hoffmeister's collection their new rose, Miss Clara Barton, made a good showing. Their American Beauties were also well done. A vase of Helen Blood-good grown by W. Robertson, gardener to Mr. Shmittlap, were well finished and deserve special mention. R. Witterstaetter had several vases of seedling carnations on exhibition, but it seems as though the public at large wanted to see chrysanthemums.

Nathan Smith, Adrian, Mich., had before the C. S. A. committee a vase of Shilowa, a dark velvety red flower, medium in size. In color this is one of the darkest red up to date, but whether it will take as a commercial variety is a question.

In the evening of November 12 the regular monthly meeting of the club was called to order by President Witterstaetter. Four new members were elected and the question came up as to what shall be done with members in arrears. The secretary has notified all delinquent members calling attention to the steps which had been taken by the society at the previous meeting and a motion was made that all members in arrears three years should be dropped at once and the balance given until the December meeting to save themselves; carried.

A little delegation made a run up to Indianapolis last week and came home well pleased with what they saw at the show. H. SCHWARZ.

TROY, O.—Harvey Fox is remodeling his house and making preparations for a big winter trade.

PORTLAND, ME.—The finest funeral piece ever seen here was the floral model of the steamer St. Croix supplied for the obsequies of John B. Coyle. It was the work of Joseph A. Dirwanger.

Bowling in Chicago.

The Chicago bowlers had as their guests at the last session, A. Herrington, of Madison, N. J., A. Dimmock, of New York, and J. F. Wilcox, of Council Bluffs. Two games were rolled at the usual alleys, John Degnan making the high score, 184.

Gotham Bowlers Organize.

The New York Florists' Bowling Club elected E. Leuly for president, C. B. Weathered for secretary and A. S. Burns for treasurer on Monday afternoon. The alleys now in use by the club are not entirely satisfactory and the committee will endeavor to secure better quarters. In the meantime practice games go on regularly every Monday evening except on club meeting night when they occur at 3 p. m.

Late advices are to the effect that the New York Club has changed its bowling quarters from Thirty-second street and Fourth avenue to Fifty-seventh street and Sixth avenue.

Detroit's New Bowlers.

Detroit florists are green at the game and none of them have rolled upon the alleys at which they will hereafter hold weekly practice until convention time. Under these conditions their first scores are not at all bad. Here they are:

Name.	1st.	2d.	3d.	4th	Av.
Dunn	145	141	158	135	145
Holznagle	121	148	111	126	127
Dilger	102	132	137	134	126
Rackham	129	106	176	92	126
Lohrman	80	95	165	69	105
Paulke	70	139	104	—	104

Beard	—	94	75	—	85
Pickworth	76	71	94	66	78
W. Watson	91	72	57	85	74

Pastimes at Flatbush.

The Flatbush Florists' Bowling Club under the leadership of D. Y. Mellis met the Royal Arcanum aggregation on Friday evening, November 11, and did them up for three straight games. Much of the glory belongs to Louis Schmutz, who made six consecutive strikes, and John Raynor never rolled with such vim before. The regular Thursday evening games of the club are full of enthusiasm over the great contest between the "Lobsters" and the "Clams" for a Thanksgiving dinner. Up to date the latter have the best of the argument. Wm. Nicholson, of Framingham, and M. A. Patten, of Lowell, Mass., were interested visitors last Thursday evening.

A Voice from Cleveland.

What's the matter with the local talent? Here are good alleys provided for them with every accommodation, but still they don't seem to be able to get out o' nights to bowl to any great extent. Have we forgotten that next year's convention will be held almost at our door and that it will be no trouble at all to put up a game there that would make barrels of trouble for those bowling sharps from foreign shores, who have got that bowling prize all done up in a nice package to take away with them next August? Wake up! Wake up! Come out and bowl and let these people know a thing or two!

There was not a very large attendance at the last club meeting and most of the evening was spent in bowling. Henry Kunz, of course, rolled way up at the top but he was pretty well hustled by Pentecost, Cushman and Graham. Fred Aul also bowled well and the general average was high so that there was plenty of competition to keep the interest up to the end. A.

Buffalonian Bowlers.

Last Friday night a dozen bowlers repaired to the Music Hall Bowling Alleys and rolled two games. W. J. Palmer, Sr., captained one team and George McClure the other. The former aggregation won by fifty-nine points although "the Hero of Omaha" was able to make neither the high score nor best average.

Name	1st.	2d.	Ave.
W. J. Palmer, Sr.	104	77	91

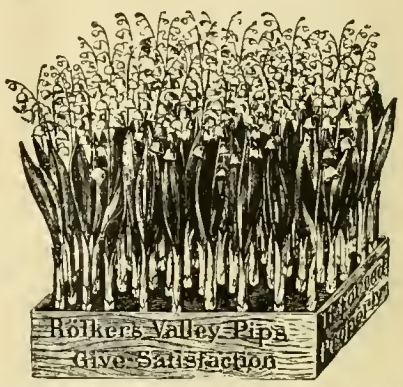
Philadelphia Sports.



The first match in the inter-city bowling tournament took place on alleys of the Florists' Club between the florists and the team from the University of Pennsylvania. The contest was very exciting after the first game, in which the florists obtained a lead of sixty-eight pins, mainly on Brown's 210, put up in faultless style. At the end of the second game the difference had been reduced to 26. The third game was very exciting. All played well, but Moore saved the game by making three strikes in the last two frames and adding fifty-seven to his score. The Florists' Club won out by thirteen points. Following is the score made by the florists:

Name	1st.	2d.	3d.	Total
Moore	145	139	175	459
Smith	109	142	165	416
Brown	210	125	145	480
Connor	147	122	103	372
Goebel	150	120	169	439
Habermehl	113	142	146	401
	874	790	903	2567

At the last monthly shoot of the Gun Club, on November 8, the following scores were made, twenty-five targets being thrown at known and twenty-five at unknown angles.

Name	Known angles.	Unknown angles.	Handicap.	Total
Burton	20	18	5	43
Smith	22	20	3	45
Anderson	23	20	3	46
Jones	15	13	13	41
Harris	14	10	13	37
Goebel	20	17	8	45
Ball	23	15	11	49
Engle	21	20	10	51
Westcott	10	12	20	42

TRADE IS GOOD.—CHEAP PRICES AND OTHER EVILS.—NO CHRYSANTHEMUM SHOWS THIS YEAR WHERE LAST SEASON THERE WERE SEVERAL.

Trade last week was good, and there was a good supply of flowers, but patrons desire to purchase at the lowest possible cost and no amount of artistic arrangement, or exercise of taste and skill obtains one cent more. Bridal bouquets are made up and sold at exactly the price of the cut flowers. It is the same way with the occasional basket made, but the basket trade has very nearly ceased and cut flowers alone are used on most occasions.

A growing evil is the free and gratuitous use of palms for decoration. One evening recently a florist had his palms at five different places and not one cent coming in for any of them. The florists also give away a large quantity of cut flowers, and there is a growing call for stock that is not strictly fresh. This is sold at a very cheap rate, or is given away, but does not interfere with the best trade, as there is always a good demand for first-class flowers.

Clarksville has just had a carnival and one of the features was a floral parade which was a very beautiful and artistic affair. The traps and carriages were exquisitely decorated for the occasion.

There have been no chrysanthemum shows in this vicinity this season. Last year there were several. M. C. DORRIS.

LAWRENCE, MASS.—Albert E. Moody's formal opening of his new greenhouse attracted a large number of admirers of fine flowers.

HYDRANGEA OTAKSA MONSTROSA.

An exceptionally fine lot of strong, heavy plants of this best of all Hydrangeas for Easter forcing. These plants have been grown in the open ground and are a grand lot of strong, thrifty plants which will produce from 6 to 10 large heads of flowers.

For the want of room to properly carry over we offer at

$3.50 per dozen.
$25.00 per 100.

HENRY A. DREER,

Important Notice.

To the Seed, Flower, Nursery and Allied Trades:

THE seventh edition of our Directory will soon be ready for the press. This book is in constant use by all the leading wholesale and retail seedsmen, nurserymen and florists of the United States and Canada, and there are some 13,000 of them. The names and addresses are in process of revision, and the new edition will be issued promptly on January 1, 1899. An advertisement in this publication will largely increase your trade; and to insure good position and display, we should have the order early. A copy of the book will be mailed free of charge to all advertisers.

Many of our patrons have expressed the highest satisfaction with the increase of business due to having their names on the alphabetical list in large type. This feature will be continued in the next edition at the small cost of $1.00. For $2.50, sent with order, we will place your name in large type and mail you a copy of the next edition. The book will save you many times its price in the course of the year.

Trusting to be favored with your commands, we are,
Yours very truly,

The American Florist Company,

CHRYSANTHEMUMS NOT IN HIGH FAVOR.—STOCK SHORTENED BY BAD WEATHER.—NO EXHIBITION THIS FALL.—A VISIT TO BUFFALO AND TORONTO.

There begins to arise the murmur that nearly always occurs about this time of year relative to the decadence of the chrysanthemum. We have had it with us for several years in varying degrees and with more or less foundation in fact. It is, of course, quite natural with a one season flower such as the chrysanthemum, that at times there should be more than the public requires. It does really seem, though, this time, as if the public really is somewhat sated by the chrysanthemum, and that the sale for them this year is indeed somewhat slower than in former seasons. This may be caused by what seems to be generally conceded to be a fact, namely, that chrysanthemums this year, to quite a general extent, seem to be rather inferior in quality as compared with other years.

The weather of late has been extremely bad, somewhat checking roses and carnations, a condition not regretted so far as the roses are concerned, but carnations have not at any time been superabundant.

There has been no chrysanthemum show here this fall, and there is little inclination on the part of the florists to regret it. Too small a part of the public takes any interest in them and too much work and too little appreciation about sums up the situation in the minds of local florists. Nor is there much belief in their value as an advertisement tending to increase the general purchase of flowers. Adam Graham and H. A. Hart took in the Buffalo and Toronto exhibitions, of which they speak favorably, especially the one at Toronto, which was highly meritorious in both the plant and cut flower sections.

The firm of Wilson Bros. has the sympathy of the florists in the loss of their father, who died suddenly. Mr. Wilson had been in poor health for a number of years. A.

ALBANY, N. Y.—The annual public chrysanthemum show made by Superintendent Egerton of the park department was held this year at the rooms of the Albany Historical Society. Being centrally located thousands of people visited the show, which was arranged so as to form a picture of unusual beauty.

THE AUTUMNAL MUSE.

OUR DEAR FRIEND.

BY WM. K. HARRIS.

The Soldier gives his life-blood, our country to save;
The Preacher gives us bliss beyond the grave;
The Doctor, to relieve our pains, responds to every call;
But "Money" is our dearest friend of all.

My Stock has Grown Very Corpulent.

Its growth has consumed my purse to a mere skeleton; and as I badly need my "dear friend" I will offer for the wanderer's return the following stock at 25% less than my usual price, for this month, November, only:

There are many dealers and growers in the trade that have but little idea of the beauty of the Rubber (**Ficus Elastica**) as it is grown by me. Having a large and fine stock of the most perfect developed specimens, I offer for a short time an opportunity for all to obtain at least a sample of how a Rubber should be grown.

Tree Rubbers, 5 to 6 branches 6 feet high worth $7.50 at $5.50. Same 4 feet high in 10-inch pots worth $5.00 at $3.50. Same 3 feet high in 10-inch pots worth $4.00 at $2.50.

Tree Rubbers in 8-inch pots, 4 to 5 branches, worth $2.00 at $1.50.

Straight Rubbers 5 feet high in 8-inch pots worth $2.00 at $1.50. Same 4 feet high in 7-inch pots worth $1.50 at $1.00.

A. J. BALDWIN, Newark, O.

Rochester, N. Y.

Poor business and bad weather could not prevent our florists from visiting the chrysanthemum show of our neighbors in Buffalo. Nine members of the craft started last Thursday on an early train for that place and on reaching their destination they rolled up their trousers and under the protection of their umbrellas, marched up Main street. The spacious quarters where the flowers and plants were exhibited were admirably adapted for the purpose, being located in the most central part of the city and if the weather had not been so unpropitious, the show might have been a great financial success. The exhibits, especially of specimen plants, were highly creditable to the growers and the whole was arranged in a praiseworthy, harmonious manner, but the attendance had been, up to that time, remarkably small.

Peter Barr, the eminent English horticulturist, was in town during the week, viewing the parks and inspecting the principal nurseries and greenhouses.

J. B. K.

ST. JOSEPH, MO.—J. N. Kidd has been holding his third annual chrysanthemum show in Odd Fellows' Auditorium which he rented for the purpose. He made a very creditable display and attracted a large number of admiring people.

FREDERICK, MD.—The annual exhibition of the Frederick County Horticultural Society was held November 8 to 12 and was very successful. There were numerous entries in each class, the principal prize winners being J. C. Hardt, O. P. Bennett, David Goff, Miss Minnie Miller, Silas Butler, C. Herman, H. C. Keefer and C. E. Kemp. Henry Fischer, of Baltimore, acted as judge.

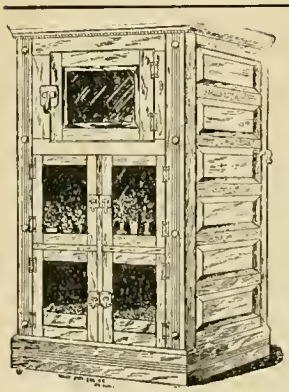
THERE ARE BUYERS
For all kinds of good stock advertised in
THE AMERICAN FLORIST.

Kansas City, Mo.

Chrysanthemums have invaded the flower stores, almost to the exclusion of other stock. The blooms are large and many hued, the consensus of opinion being that the stock is as good as in any former year. Prices are not high, good flowers retailing at $1.50 per dozen and choice blooms at $3 per dozen.

American Beauties are cheap, considering the size and quality of the buds. The best flowers have not brought over $5 per dozen at retail and from that figure the prices realized range downward in proportion to the length of the stems. Violets, the odor of which is largely imaginary and the size quite microscopical, are plentiful. Carnations are, as in other places, in short supply and growers are harvesting the 2-cent flowers of which we read so much. Of roses other than Beauties there is no over-stock and good flowers sell readily at fair prices.

The MODEL Extension Carnation Support



QUEENS, N. Y., Feb. 16, '97.
MR. THERON PARKER, Brooklyn, N. Y., Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention.
Very truly yours,
C. W. WARD.

FLATBUSH, BROOKLYN, N. Y., Feb. 18, '97.
MR. THERON PARKER, Dear Sir:—Your wire stake is certainly a gem Without hesitating we indoree it as an up-to-date carnation support. Yours truly,

Denver.

LARGE STOCKS OF VERY FINE FLOWERS.—THE GALLUP COMPANY HAS A FIRE AND DISPOSES OF ITS BUSINESS.

In taking a survey about the various greenhouses one is surprised to find such large stocks, all in fine condition, in a comparatively small city. The Park Floral Company, Mrs. R. Mauff and the Colfax Avenue Greenhouses might be proud to exhibit their chrysanthemums in competition with any eastern city. Our steady sunshine seems to give a richness of color which is hard to excel.

W. C. Bates, an old settler in Denver, has associated himself with Perry C. Gallup. They have leased the new store and connecting greenhouses of the Gallup Floral Company and will increase their stock and do their best to keep up the reputation for good work which the Gallups have enjoyed for twenty years. The latter firm has been led to think that the prophecy of hail stones and coals of fire has been visited upon them. Their extensive plant was destroyed by hail in the spring, and one night early in the present month fire broke out in a small range of hot houses at their home place. Fortunately there was no wind or the houses adjoining and the stables, with horses and vehicles, would have been consumed. The entire stock of one house was destroyed, including ferns, poinsettias, and a whole bench of rooted cuttings. G.

HAGERSTOWN, MD.—The annual chrysanthemum show of the local amateur growers proved a great success. Florists exhibited only roses and carnations, but they were fine.

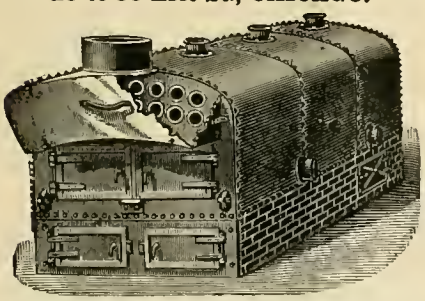
TRADE IS GOOD.—KASTING, OF BUFFALO, SUCCEEDS THE PITTSBURG EXCHANGE.—RANDOLPH & M'CLEMENTS CAPTURE THREE SPLENDID DECORATION ORDERS.

Trade during the past week has shown an improvement although prices have not advanced. Chrysanthemums are very plentiful, the late varieties coming in freely, and generally the quality is good.



Wm. F. Kasting & Co., Fred. Stokes, manager, have succeeded the Pittsburg Florists' Exchange at 444 Sixth avenue. Mr. Kasting is the well known Buffalonian. They have made arrangements with growers not only in this vicinity but with some of the most prominent growers in the west for supplies of cut flowers and a full line of florists' supplies of every kind will also be in stock. The well known reputation, push and energy of this firm assures the correctness of the prediction that they will secure their share of the trade of western Pennsylvania, adding one more first-class business house to Pittsburg.

Randolph & McClements report business very good last week. They were fortunate in securing the decorations for three of the largest affairs of the season, the ball given at the opening of the new Schenley Hotel, the banquet given by the Chamber of Commerce to Andrew Carnegie, and a banquet given by Mr. Carnegie, all of them held at the Schenley. The latter function was the most elaborate of all, the decorations being the finest Randolph & McClements have ever executed. The ball room was divided by a screen of smilax and palms extending from floor to ceiling, thus making a room just the right size for the purpose.

R. W. Greenlaw, representative of N. F. McCarthy & Co., Boston, visited Pittsburg and Allegheny for the first time this week. W. F. Kasting, Buffalo, paid us a flying visit on Monday. REGIA.

HARTFORD, CONN.—The annual chrysanthemum exhibition of the Connecticut Horticultural Society was held at Putnam Phalanx Hall on November 8, 9 and 10. In cut blooms A. N. Pierson was awarded five first prizes and two seconds besides first on display of roses. John Coombs took two firsts, one second and one third. Thomas Drysden had everything his own way in plants on which he took ten first prizes. The display of herbariums prepared by the school children was very interesting and creditable. Four medals were also awarded to children for well grown plants.

Another Thanksgiving.

The thirteenth bound volume of the AMERICAN FLORIST, with 1558 pages, twenty-five per cent increase over 1897, shows material cause for thankfulness. Its true friends, its old friends and new ones, have nobly stood by the old ship. The able bodied seamen, the rank and file of our subscribers, have steadfastly done their part. Our advertisers have shown their faith by largely increased patronage. Let us be truly thankful that, though the watch changed at night, or in the storm, an honest pilot has promptly laid firm and loyal hands upon the wheel.

THE EXHIBITIONS.

THE ELMIRA HORTICULTURAL SOCIETY.

The first chrysanthemum show of this society was a great success and the quantity of high class flowers on exhibition was a surprise even to the managers. Among the displays from out of town was an extensive collection from Cornell University, accompanied by C. E. Hunn, the grower, who exhibited a large number of new varieties. Mr. Hunn also acted as judge of the exhibits, assisted by C. W. Ward, of Cottage Gardens.

Mr. Ward brought a fine display of his unexcelled flowers, and his new yellow seedling, Admiral Dewey, attracted a great deal of attention. It is a Japanese reflexed, deep, clear orange yellow in color, as deep and clear as Thornden. The flower is very full and apparently is a good shipper as well as an exhibition sort. His seedling, Carrie Belle, is a delicate shell pink in color, Japanese incurved, well rounded in form and is a dwarf grower. Mr. Ward's vases of Eureka and Western King were among the most attractive in the hall.

Nathan Smith & Sons sent a splendid exhibit from Adrian, Mich., their samples of Pennsylvania, Intensity, Gurda and Thornden being especially fine. J. E. Anthony, gardener for Mrs. Magee, of Watkins, N. Y., brought a fine collection of pot plants, also foliage plants and a fine collection of cut blooms, his Silver Cloud being remarkable.

John Rudy, gardener for Hon. J. S. Fassett, exhibited a splendid lot of flowers. His Ivorys were almost perfect and Viviand-Morel, Chempwec and Frank Hardy were all well done.

The contest for the Eclipse wheel was very spirited. Grove P. Rawson, won with a yellow sport from Chadwick, of grand size, form and color. He was closely followed by Wm. Paul Binder, of Rider, Md., Nathan Smith & Sons and Geo. F. Atkinson, of Orange, N. J.

The other prizes were awarded as follows: Collection of twelve varieties, first, Rawson, with his new Eclipse, Wm. H. Chadwick, Viviand-Morel, Mrs. O. P. Bassett, Mrs. W. C. Egan, Niveus, Geo. West, Riverside, Miss Georgiana Pitcher, Silver Cloud, Chas. Davis and Mayflower. E. M. & H. N. Hoffman took second with Niveus, W. H. Lincoln, Pink Ivory, Modesto, Mrs. Geo. J. Magee, Queen, Chas. Davis, Philadelphia, Maud Dean, Georgiana Pitcher, Pitcher & Manda and Chempwec. Best six varieties went to Rawson with Eclipse, Chadwick, Modesto, Iora, Chas. Davis and Viviand-Morel. Rudy took second with Bonnaffon, Philadelphia, Viviand-Morel, Pitcher & Manda, Clinton Chalfant and Mrs. Murdock. Best six pink went to Rawson with Helen Bloodgood; Rudy second with Viviand-Morel. Best six yellow, Rudy first with Bonnaffon and second with Modesto. Best six white, Rawson first on Chadwick; C. W. Ward second with Eureka. Best six bronze or red, Nathan Smith & Sons, first with Nyanza; Rawson second with Hicks Arnold. Best vase, Rawson first with mixed varieties tastefully arranged. Best single bloom of 1897 introduction went to Rudy, with Chempwec, beating Chadwick and Frank Hardy.

The hall in which the show was held was admirably adapted for the purpose. The platform was filled with decorative exhibits by Mr. Rawson and brilliantly illuminated with incandescent lights. One of the alcoves was fitted up by E. M. & H. M. Hoffman as a drawing room, with mantle, rugs and furniture, ferns, palms and chrysanthemums. A well executed design representing a bicycle was exhibited by Mrs. H. D. Wells. Rawson and the Hoffmans also showed fine samples of their roses, carnations and violets.

Best of all, the exhibition was a financial success and the managers are already planning for the next one. H. N. H.

NEWPORT HORTICULTURAL SOCIETY.

Well indeed may the members of the Newport Horticultural Society be proud of their chrysanthemum exhibition for it was a grand one and a success financially. The hall in which the show was held was tastefully decorated and a large arch was erected at one end of the hall, measuring twenty feet at the bottom by twelve feet in height, and covered with Clematis paniculata, Asparagus plumosus and white and yellow blooms of chrysanthemums.

Between the columns of the arch a table was placed upon which seedling chrysanthemums and novelties of various kinds were exhibited. In the rear of the arch stood a permanent stage which had the appearance of a balcony and was prettily decorated with asparagus, chrysanthemums and electric lights. On the balustrade of the balcony stood two immense plants of Nephrolepis Bostoniensis.

The specimen chrysanthemum plants occupied a large space through the center of the hall. At one side and end groups of palms and chrysanthemums and groups of foliage plants were arranged. On the opposite side of the hall two rows of tables stood that ran the length of the hall and upon which the exhibit of cut blooms was made. Suspended from various points in the hall and looped to

PENNOCK BROS.' TABLE DECORATION AT THE PHILADELPHIA SHOW.

the center were rows of electric lights of red, white and blue.

The cut bloom exhibit was the center of attraction and was much admired. The flowers were of enormous size and showed to best advantage. The exhibition was advertised to run three days but an extra day was added. The specimen plants were moved from the center to the sides of the hall each evening at 8:30 and dancing continued until midnight.

On the fourth night of the show some of the specimen chrysanthemum plants and cut blooms were sold at auction, the plants bringing from $1 to $3 each. Cut blooms were sold for 25 cents per half dozen. The committee shut down on the cut bloom sale on account of the poor prices they brought and gave the remaining flowers away to their friends.

The judges on plants and flowers were James Wheeler, Brookline, Mass., Richard Gardner and Bruce Butterton, of Newport.

Among the principal exhibitors and prize winners were Chas. D. Stark, Andrew Meihle, Robert Laurie, James Garthley, John Barr, Wm. Donald, H. H. Rogers, J. B. Bailey, Alex. McLellan, Alex. Mackay, W. C. Russell, Farquhar Macrae, John Allen, Richard Gardner, Geo. Taylor and Jos. McLeish. J. J. B.

TABLE DECORATIONS AT PHILADELPHIA.

The decorated dinner table competition on the third day of the Philadelphia exhibition brought entries from Hugh Graham, Pennock Bros. and Joseph Kift & Son. Graham's table was eight feet in diameter, with a hollow center of about four feet, which was filled with specimen blooms of his yellow chrysanthemum, Pennsylvania. The flowers were cut and placed in moss, the heads of the blooms filling the space as would a low plateau, but having long stems the effect was loose and graceful and much more effective than the old style arrangement. Around the base of a tall, slender glass vase which rose out of the center were cypripedium plants in bloom. A few large sprays of oncidium, together with lilies of the valley, gave an air of daintiness and finish to the whole design. The vase was filled with fine specimen Pennsylvania chrysanthemums. Garlands of violets were entwined around the vase and carried out among the flowers at the base. A large bow of violet tafleta ribbon with long ends was attached midway of the vase, seemingly to hold the violets in place. Corsages of double violets and lilies of the valley tied with violet taffeta ribbon were the favors for the ladies and boutonnieres of the same flowers were placed for the gentlemen. The necessary china, glasses and silver, together with candelabra with yellow shades completed the decoration. This was one of the handsomest tables ever exhibited before the society and justly received the first prize.

Pennock Bros.' entry was arranged on a table six feet in diameter. The decorations consisted of Kaiserin roses, orchids and lilies of the valley. A tall vase of Kaiserins formed the centerpiece. Six glass vases set at regular intervals around the table contained six to eight cattleyas each. Favors for the ladies consisted of a half dozen flowers of Dendrobium formosum, with Adiantum Farleyense. One flower of same and lilies of the valley formed the boutonnieres. This, together with sprays of lily of the valley arranged radiating from the center on the cloth and the necessary tableware completed the decoration and received second prize.

Joseph Kift & Son's table was nine feet in diameter, with a four-foot hollow center which was filled with yellow chrysanthemums, Mr. Harris' Our Dear Friend, on long stems. Asparagus Sprengerii and croton leaves decorated the cloth. In the center was a tall silver vase filled with large white chrysanthemums. China, candelabra and silverware were also added.

These entries attracted considerable attention and were a great addition to the show, but competition of this kind should be made on tables of the same size and shape which should be specified in the schedule and supplied by the society.

K.

INDIANAPOLIS SHOW NOTES.

Fewer entries than last year were made for our twelfth annual flower show, and had it not been for the great efforts of some of our local florists, especially H. W. Rieman, a somewhat bare appearance of the hall could hardly have been avoided. The Chicago show being in the same week no doubt had something to do with this. Fears, too, that the

HUGH GRAHAM'S TABLE DECORATION AT THE PHILADELPHIA SHOW.

GENERAL VIEW OF THE INDIANAPOLIS EXHIBITION.

premiums might not be paid in full probably kept many away who exhibit mainly for what there is in it. But in spite of this we had magnificent exhibits of chrysanthemums, plants as well as cut flowers.

Florists unanimously pronounced as the finest in the hall seventy-five single stem plants each of Major Bonnaffon and Mrs. Robinson, exhibited by Crabb & Hunter; the uniformity and perfection of stem and flower caught the eyes of everyone. J. Heidenreich's twenty-five plants of Mme. Perrin were also much admired. W. H. Rieman and Hukriede & Son made good exhibits of specimen plants, and to the former went a well deserved first prize for the largest and best ten blooms of one variety for flowers of Mrs. H. Weeks. Stuart & Haugh took second in this class for Mrs. Robinson. They also received first for fifteen varieties, three blooms each, with a collection in which H. W. Longfellow, Bonnaffon, Mme. Perrin and Mrs. W. C. Egan were prominent. A few more striking features in the line of chrysanthemums rewarded with blue ribbons were twenty-five blooms of Mme. Perrin exhibited by J. Heidenreich, twenty-five Mrs. Robinson grown by H. Rieman, a fine vase of one hundred blooms of pompon varieties shown by Nathan Smith & Son, and a table of H. W. Rieman's seedlings. For the best group of fancy decorative plants the Bertermann Floral Company received first and Rieman second prize.

We had an elegant display of roses this year, though more entries might have been made. As usual the South Park Floral Company took first on most of their entries, and W. W. Coles, as usual, had the best of Kaiserins. Bertermann Floral Company took first and H. Rieman second on a display of roses, not less than 300 flowers.

Fred Dorner & Son, W. W. Coles, South Park Floral Company and Stuart & Haugh shared honors in the display of cut carnation blooms.

Financially the show was no success, and it will only be possible to pay fifty-five or sixty per cent of the premiums to Indiana exhibitors, while those outside of the state will receive premiums in full.

The entries and prizes were as follows: H. W. Rieman, forty-two entries, nineteen firsts, thirteen seconds, seven thirds. Bertermann Floral Company, twenty-four entries, ten firsts, five seconds, six thirds. Stuart & Haugh, Anderson, Ind., eighteen entries, eight firsts, six seconds, two thirds. E. G. Hill & Co., Richmond, Ind., seventeen entries, three firsts, four seconds, three thirds. Hukriede & Son, fourteen entries, one first, nine seconds, four thirds. John Heidenreich, nine entries, seven firsts, two seconds. M. A. Hunt, Terre Haute, Ind., two seconds. Nathan Smith & Son, Adrian, Mich., eight entries, three firsts, four seconds. South Park Floral Company, New Castle, ten entries, six firsts, one second. Mrs. Larson, seven entries, one second, two thirds. Crabb & Hunter, Grand Rapids, seven entries, four firsts. W. W. Coles, Kokomo, four entries, three firsts. G. Tielman, Marion, Ind., three entries, one first. F. Dorner & Sons, Lafayette, two entries, one first. W. A. Chalfant, Springfield, Mo., two entries, one third. H. JUNGE.

NORTHAMPTON, MASS.

Owing to a misunderstanding with the weather bureau the opening day of our show brought one of the worst storms of the season, and for a time it looked as if the exhibition would be a failure, but the growers of this vicinity were not to be baffled by anything so thin as water, and by mid-afternoon the exhibits were all in place.

As compared with previous shows the plants were not up to the standard, there being none that could be called first-class, but in artistic arrangement and nicety of detail this show far surpassed its predecessors. The front of the hall was occupied by a large and beautiful group of plants from the botanical garden of Smith College, and included the best chrysanthemum plants in the exhibition, some nice palms, dracænas and many others.

Alex. Parks made a fine triangular mound of palms, ferns and other foliage plants, interspersed with which were some nice chrysanthemums which showed up well among the green. This group won many words of praise for its artistic arrangement and the fine health of the plants.

Donald Macgregor was, as usual, the largest exhibitor and showed a square pyramid that contained some specimen adiantums that would cause one to go far to find their equal. While the chrysanthemums in this group were not what Mr. Macgregor usually shows they were covered with nice bloom and stood erect with scarcely any staking. A nice specimen of Pandanus Veitchii was in his collection.

The N. L. Hospital showed a collection of chrysanthemums which had some good blooms, but the plants were rather tall, owing to the limited space in which they were grown. Frank Hardy and Black Hawk showed up quite well and will evidently be more extensively grown here next year.

A feature of the show which attracted considerable attention and gave opportunity for the study of botanical names was the private collection of ferns of E. J. Canning, which contained all our native species.

In cut blooms the only exhibitors were Messrs. Parks and Macgregor, both of whom made fine showings of standard varieties. In carnations the same gentlemen had it out between them and both showed nice blooms of Flora Hill, Tidal Wave, Jubilee and others. Mr. Macgregor showed his pet seedling, which he exhibited at the Boston show. It is of the color of Tidal Wave at its best, but, unlike that variety, it is borne on long stiff stems and shows its deep color to the last.

Owing to bad weather the first day's attendance was just three paid admissions, but on the second day the sun shone and people came in sufficient numbers to make the show a financial as well as floral success. G. W. THORNILEY.

NEW YORK GARDENERS' SOCIETY.

Following is the prize list of the New York Gardeners' Society's flower show, held at 64 Madison avenue, New York Saturday, November 19, 1898:

Chrysanthemums: Twenty-five blooms in twenty-five varieties, first, I. L. Powell, Milbrook, N. Y. Display of pompons,

first, Wm. Harvey, Rye, N. Y. Twelve blooms, twelve varieties, shown on boards, first, Jos. Dexter, White Plains, N. Y. Six blooms, six varieties, first, W. C. Russell, Milbrook, N. Y. Six blooms Jerome Jones, first, Wm. Turner, Tarrytown, N. Y. Six blooms Major Bonnaffon, first, Geo. Winslade, Mamaroneck, N. Y. Six blooms Golden Wedding, first, W. C. Russell.

Six blooms, white, first, Wm. Duckham, Madison, N. J. Six blooms, bronze, first, Geo. Winslade. Six blooms, crimson, first, Alex. McKenzie, Blauvelt, N. Y. Six blooms, yellow, first, W. C. Russell. Six blooms, pink, first, Peter Duff, Orange, N. J. Six blooms any other color, one variety, first, W. C. Russell. Twelve blooms, twelve varieties, first, John G. McNicoll, Lawrence, L. I. One bloom of new variety not yet in commerce, first, W. G. Gomersall, Fishkill-on-Hudson, N. Y. Six blooms of variety not yet introduced in commerce, first, C. W. Ward, Queens, L. I. Six blooms, Frank Hardy, first, Andrew Laaffe, Irvington, N. Y. Collection of pompons, first, A. D. Rose, Jersey City, N. J. Twelve plants in 6-inch pots, first, John G. McNicoll.

Collection of cut flowers, chrysanthemums excluded, first, I. L. Powell. Best seedling carnation, first, W. C. Russell. Display of carnations, first, W. C. Russell. Best twelve American Beauty, first, I. L. Powell. Best twelve Bride, first, John Downing, Oceanic, N J. Best twelve Bridesmaid, first, John Downing.

New rose, Lady Dorothea, certificate of merit awarded to John Dunlop.

At the close of the show the prizes were presented, and several speeches were made.

BROCKTON, MASS.

The first exhibition of the Florists' and Gardeners' Club was a grand success and creditable in the highest degree to those who as officers and committees have worked so hard to bring it about. It was essentially a commercial florists' exhibition, but few private establishments being represented with the exception of that of Mr. Oakes Ames from which came a noble table of rare orchids and a grand group of decorative plants, not for competition, and whose head gardener, R. M. Grey, served as a judge, in company with Farquhar Macrae and A. H. Fewkes.

The hall was well filled with groups effectively placed, the responses to the committee's requests having been unprecedentedly liberal. Besides the large Ames group there was another of decorative plants from Copeland & Cooper which received the first premium. Thomas Greaves was the principal prize winner in the chrysanthemum plant classes but Jas. Garthley and Wm. Keith took first and second on single specimen. In the cut flower classes there were numerous entries and an enormous aggregate display of superb blooms. Among the prize winners were W. N. Craig, who took one first and three seconds, Farquhar, who took three firsts, James Garthley, who took one first and two seconds, S. S. Peckham, Geo. Hollis, Mann Bros., Wahan Conservatories, A. M. Bridgeman, A. Packard, John McFarland, A. J. Fish, Copeland & Cooper, B. L. Clark and B. Allen.

Carnations were shown in great abundance. C. W. Graham took one first, Thos. Greaves three firsts, Mann Bros. two firsts and three seconds, Dooley Bros. two seconds and other contributors were Mrs. F. Rumrey, S. S. Peckham, G. Lester Hollis, C. W. Graham and Thos. Greaves. The prizes for table decoration were awarded, first to Copeland & Cooper who used American Beauty roses, and second to B. Ellis Eaton who used orchids. For mantel decoration H. E. Barrows was first and B. Ellis Eaton second, both having used mainly roses. There were also many baskets, wreaths and other florists' productions shown, besides violets, geraniums, etc., in large quantities. The stage was effectively hanked with plants behind which the orchestra was stationed. The public patronage was large, much better than the promoters had dared to hope, and the generous action of the club in extending a free invitation to the school children was commended by the local papers in such an appreciative manner that there is no doubt the people will remember the club kindly when it again asks for their support.

WINONA, MINN.

This year's chrysanthemum show was the best on record, the plants and blooms being much superior to those of past years. All the local florists and some private growers sent fine exhibits, notably those from Youmania, Siebrecht, John Wunder and the Woodlawn Greenhouses. All the leading varieties of chrysanthemums were shown, including Modesto, Bonnaffon, Western King, Maud Adams, Golden Wedding, Cheabeague, Philadelphia, Viviand-Morel, Eugene Dailledouze and The Bard.

CHRYSANTHEMUM META.

CHRYSANTHEMUMS.

CHRYSANTHEMUM META.

Meta, John N. May's new white chrysanthemum with pale lemon yellow coloring at the base, is represented in the accompanying illustration. It has been certificated at Philadelphia, Boston, Chicago, Morristown and Orange, N. J., and has attained an average growth of from three to three and one half feet, with foliage well up to the bloom. The first flowers were cut October 20 and the last were cut November 17 in first-class shape. Most of the blooms were ready by the earlier date, but many were left on to see how long they would keep in good condition.

WORK OF THE COMMITTEES.

BOSTON.—John N. May, Summit, N. J., exhibited 12-95, Japanese incurved, white with slight cream tinge; scored commercial scale 77, exhibition 79 points.

PHILADELPHIA.—John N. May exhibited 12-95, Japanese incurved, creamy white: scored commercial scale 86 points. H. Tong, Erie, Pa., exhibited No. 4, Japanese incurved, white and very delicate blush; scored commercial scale 86 points. Nathan Smith & Son, Adrian, Mich., exhibited Idavan, Japanese incurved, delicate pink, center creamy white; scored commercial scale 85 points.

CINCINNATI.—H. Tong exhibited No. 4. Japanese incurved, between white and blush pink; scored commercial scale 78, exhibition 80 points.

CHICAGO.—John N. May exhibited No. 12, Japanese incurved, white; scored commercial scale 92 points.

NEW YORK.—C. W. Ward, Queens, N. Y., exhibited David S. Ward, Japanese incurved, white; scored both scales 86 points. Rough Rider, by the same

SOME OF THE PLANTS EXHIBITED AT BUFFALO.

grower, Japanese incurved, pink; scored commercial scale 76 points. Also Admiral Dewey, Japanese reflexed, chrome yellow; scored commercial scale 74 points. Geo. Gibson, E. Islip, N. Y., exhibited Mrs. Bradish Johnson, Japanese, pink; scored commercial scale 70 points. A. Herrington, Madison, N. J., exhibited Florham, Japanese, close incurved, yellow; scored commercial scale 73 points.

ELMER D. SMITH, Sec.

CARNATIONS.

CULTURAL NOTES.

November 26.—Bursted calyxes afford quite a problem for they mean a serious loss to the grower whose plants thus misbehave. Mixed in with good flowers bursted blooms spoil the whole lot and if rubber bands are put around them it is only a matter of time until the grower finds his flowers down to the lowest notch of the market. If from any cause they are part of the cut it is far better to bunch them separately, taking for them whatever the market will allow.

Before discarding a variety prone to split its calyxes it is well to be sure that the bursting is not the result of some fault in your method of culture instead of a fault of the variety itself. Flora Hill, the first year of its introduction, was condemned by many growers on account of its propensity to burst, but to-day no careful grower would take the bursted calyxes it produces into account when considering the value of the variety.

Growers of seedlings should be careful not to introduce a variety that does not have a good calyx, for, while it may be handled successfully by a few careful growers, it gets into such a variety of hands and houses that it will likely meet with general condemnation. The American Carnation Society recognizes the value of a good calyx and gives fifteen out of 100 points to the calyx in judging a new carnation. The introducer of a variety should judge it just as severly before he risks his reputation by sending it out.

Aside from an inherent tendency there are causes which will lead any but those having exceptionally strong calyxes to burst. First of these is an irregular or a continued low temperature. Firing up to 55° one night and letting the temperature fall to 40° the next will invariably produce split calyxes. The same rule applies to dark weather; during such a spell the houses should be kept a little warmer than their usual night temperature and if it continues for any length of time it is well to do a little extra firing during the middle of the day and ventilate for a few hours.

Dark weather having a tendency to produce split calyxes it is a good plan to wash the roofs of the houses about twice during the season so that the plants may have all the light possible. A boy at the end of a hose and a man with a mop can get over considerable roof in a day. To make the job complete it should be done outside and inside, choosing a clear day for the inside work so that the injury to the plants would be reduced to a minimum. If you think this would not pay, try it on a small section of glass and see the difference even where you think the roof is comparatively clean.

An excess of fertilizer in the soil will cause some varieties to burst while the reverse will cause the trouble in others; the same applies to an excess and a lack of water. Both these are matters which vary with the soil and require watching.

Another cause of split calyxes is over-propagation. Robbing the plant of too many cuttings, and thereby its growing and working foliage, will often produce an increased growth in the leaf petalage of the flower such as to burst any but the strongest calyx. This weakness seems to carry over with the cuttings taken from such plants the latter end of the season and that is probably one reason a new variety will sometimes burst badly the first season and eventually come out all right.

If, in selecting our varieties, we choose such as have long calyxes with the corolla deeply indented and then grow them in a good light house, giving careful attention to the details of heat, water and nourishment, bursted calyxes need not be a part of our winter's crop. On the other hand, if we attempt to grow them in a dark or shaded house, in uneven temperature, we can expect a goodly number of bursted ones.

ALBERT M. HERR.

ROSES.

CULTURAL NOTES.

November 26.—As the days are now becoming very short, with only a limited amount of sunshine even at the best, a careful watch should be maintained that the soil is not over-watered, as such a condition will materially check the plants and, moreover, will have a tendency to produce a very soft growth. It is better to err on the side of too little rather than too much moisture in cloudy weather.

Care should be exercised to keep the temperature at night as low as is consistent with the general health of the plants. Maintain an average of 56° for all true teas. For some of the hybrid teas, such as Meteor, a few degrees higher is necessary to develop the flowers nicely; American Beauty will also bear a slightly warmer atmosphere. Give all the air possible during the day; syringe when the weather will permit, but only in the morning. Where a good crop is now showing and it is desirable to hold as many as possible on the plants for Christmas, a reduction in the temperature of 2° or 3° at night, with a corresponding reduction in water, will greatly aid in attaining this object. Another advantage will be gained in the quality of the blooms.

Where the houses were planted in May or June and on the bench system, an application of weak liquid manure will help to make the buds swell to a larger size, but care must be used not to overdo it. It is far easier to prevent greenfly than to destroy them after they have gained a foothold and by applying tobacco in whatever form may be found best, regularly once a week, they can be kept in check; in fact, they can usually be kept out of the greenhouse altogether by persisting in this method. Once let these pests get a good foothold and they will do more damage to the plants than a dozen applications of tobacco will cost.

Mildew should certainly be entirely destroyed by this time; there is very little reason for ever having much of it. The most prolific cause of it is injudicious ventilation. If careful watch is kept on the airing of the greenhouses, never allowing the temperature to run up more than 5°

or 6° above the night range without giving a crack of air, increasing the air as the temperature rises, and reducing it in the same proportion in the afternoon, there is very little opportunity for mildew to get a footing. Another advantage of such treatment is that the general health of the plants will be much more vigorous if, in addition to this, all the dead and decaying leaves and weeds are kept cleaned away.

Tying, disbudding, etc., will also need careful attention at this season, as straight long stems have become an absolute necessity and anything else will hardly sell at any price. JOHN N. MAY.

New York.

FACTS AS TO FLORAL FASHIONS.—INFORMAL DECORATIONS FAVORED.—THE CHRYSANTHEMUM'S TRIUMPH.—INDIFFERENCE TO FANCY NAMES.—"MAKING" BOUTONNIERES.—USE OF AUTUMN FOLIAGE.—THE GARDENERS' SHOW.—A HANDSOME WINDOW.—LOCAL LINES.

Just what particular styles in floral decoration, if any, will prevail in the metropolis for the coming season, is not yet apparent. The fall has been unusually favorable for country life and many of the ultra-fashionable folk who are supposed to have a hand in setting the styles are still out of town, taking advantage of the exceptionally fine weather. Most of the fashionable events have taken place at Tuxedo and similar resorts and everything done, so far, in floral decoration has been characterized by the utmost simplicity. Indeed, it is but natural that this should be the case in these days of long-stemmed high-grade flowers, which require no artificial accessories and which to distort or cut is simply to mutilate.

As to colors for special uses entire freedom of choice exists. Harmony with the surroundings is the prime requisite and the artistic decorator is guided in his work by the draperies and other furnishings of the room. If he has true artistic perceptions he will be sure to please; if not, his efforts can only result in dissatisfaction and disappointment. Chrysanthemums have enjoyed a steady popularity this year although not at fancy prices excepting for a limited quantity of extra select stock and it would seem that they have emerged from the precarious position into which they fell with the disappearance of the "fad" on which they thrived for a number of years and have now reached a level where they are likely to stay permanently. The chrysanthemum has won on its merits; it has simply proved itself too useful for all decorative purposes to be discarded and those who have been predicting its utter humiliation are not likely to see their predictions verified. The experience of this season teaches this, if it teaches anything, and that the chrysanthemum is assured of a steady demand as a staple in its season, hereafter, for every purpose for which flowers are used, is very evident.

The quantity of chrysanthemums disposed of this year through legitimate trade channels in New York City has been very large. The number of varieties offered has been limited as compared with the time when a grower's special pride was his long list of fancy names. As to the public, they have ceased to take any great interest in the name or origin of a variety; if it is a good round full flower, of clear decided color, with rich foliage and stems sufficiently stiff, it needs no name; if it lacks in any of these essentials the most popular name on earth will not make a single customer for it.

The use of chrysanthemums on dining tables in public places has been very general and it is rare that one enters a hotel or cafe of either high or low degree without finding chrysanthemums present in some form. They have been used largely for boutonnieres also. Pink Ivory makes an ideal boutonniere without any fixing up. A prominent Broadway florist was seen recently making them up for this use and was asked why he spoiled an already perfect boutonniere by the addition of a galax leaf and purple tin foil. His reply was that the public had not yet got sufficiently educated up to understand that and that if some "manufacturing" was not spent on the flower to "make" it a boutonniere they would think they had not got their money's worth. So it seems there is still something for even New York flower buyers to learn.

He is a daring operator who will risk mixing chrysanthemums with other flowers or foliage in decorative work for it is rarely that anything can be used to advantage in combination with them. Autumn leaves, especially mahogany tinted oak foliage, are always safe, however, and make a grand effect when used among chrysanthemums. Advice to floral decorators to make use of autumn foliage and other wild outdoor products in preference to commercially grown stock is neither judicious nor fair as a rule in a journal supposed to be devoted to the welfare of the overworked florist who under present conditions needs all the encouragement that can be given him, but this suggestion as to the rich effect of autumn foliage sprinkled among chrysanthemums, cannot interfere with the use or sale of any greenhouse product, and it may bring in many a new customer for chrysanthemums.

The second annual chrysanthemum exhibition of the New York Gardeners' Society was held at 64 Madison avenue on Saturday, November 19. The display was a rich one, reflecting great credit on the many skilled gardeners who brought their products here in friendly competition and on the committee in charge, Messrs. Withers, Donlan and Marshall, who had worked so industriously in preparing for the event. Besides being a good exhibition this affair was also very much of a reunion among old friends whose opportunities for meeting together are rare and who took advantage of the occasion to rehearse old scenes and to firmly cement new friendships. The schedule comprised twenty-six classes.

Small & Sons' window on Broadway is one of the handsomest orchid decorations imaginable. A large branching tree stump, constructed of cork, which reaches to the top of the window is hung with a profusion of Dendrobium Phalænopsis, Vanda cœrulea and oncidiums with adiantum foliage and the base is banked with masses of adiantum plants among which are plunged two handsome specimens of Begonia Gloire de Lorraine.

The front of Siebrecht & Sons' Fifth avenue store is filled with a forest of home-grown kentias and other neat little palms of the most useful varieties, and they are good.

The first Paper White Narcissi and Roman hyacinths appeared at Raynor's on November 14.

C. W. Ward's new yellow chrysanthemum Admiral Dewey shows up well in John Young's window. The color is fairly dazzling.

Jerome Suydam is bringing in mignonette nearly as big as himself.

A ladies' club has been organized in New York for the purpose of analyzing and studying orchids.

Mrs. Weigert, of Forty-ninth street and Ninth avenue, has opened a branch store at Eighty-fourth and Lexington avenue.

Philadelphia.

TRADE IS GOOD AND PROMISES TO HOLD OUT.—STOCK SCARCE AND PRICES ADVANCING.—THE LIBERTY ROSE.—A CALIFORNIAN VISITOR.

The hustling time of the year for the city florist has arrived and things are booming. The store men appear to have all the orders they can handle comfortably and at the same time have difficulty in getting flowers of the kind they want. This season's debutante list is a large one and the demand for choice flowers for their coming-out teas will keep all hands busy for the next month. These orders tax the originality of the florist, as in the numerous clusters sent there must be as much difference as possible and yet retain their excellence. Nothing is too good for this work.

The dull weather of last week shortened up the crops considerably and as a consequence prices advanced. American Beauties are scarcer but have advanced more on account of the season than because of extra demand. Prices range up to $4 per dozen but $4 per dozen stock is generally cut to order as the growers do not like to cut so deep just yet. Teas, such as Brides and Bridesmaids, bring $4 to $6 per hundred.

Robt. Scott & Son are sending in good blooms of the new rose, Liberty. It is a beauty and the Meteor is left far in the rear, vase for vase on the counter, but bench for bench in the greenhouse may be another story. We are assured, however, by Mr. Scott that it is even more prolific than Meteor and that "bullheads" are unknown. It can be grown successfully in the same heat as ordinary teas, which is another important item.

Carnations are also jumping and $1.50 per hundred is asked for anything worth having. Chrysanthemums are still holding out, Bonnaffon being in good shape, with Mrs. J. Jones, Maud Dean, Ivory, Niveus and Golden Wedding. Prices range from 75 cents to $2 per dozen. Violets are typically modest these days and very retiring. Their price has advanced to $1.50 for good stock and it is very scarce at that. A few Paper White Narcissi are in at $4.

Chrysanthemum plants are selling well and house plants are also in demand. Good Boston ferns are asked for but much of the stock is just short of being first-class and lacks the finish that makes this plant so desirable.

S. W. Kirkpatrick paid this city a visit last week from his distant home at Gilroy, California, where he is engaged in the fruit growing industry. He has also risen to the dignity of sheriff of his county. Mr. Kirkpatrick was at one time in the nursery and florist business at Collegeville, Pa., and afterwards was connected with C. H. Grigg at Twelfth and Chestnut streets.

H. H. Bayersdorfer & Co. have their driver decked out in a fine navy blue suit, silver buttons, cap with name, etc. He is now quite in keeping with the establishment. K.

THE DALLES, ORE.—Mrs. A. H. Tackman has embarked in the florist business with a neat greenhouse.

Subscription $1.00 a Year. To Europe, $2.00.
Subscriptions accepted only from those in the trade.

Advertisements, 10 Cents a Line, Agate
$1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

DURING the week the palm swindler confidenced Frederick Rentschler, Madison, Wis., and M. A. Kinney & Co., Milwaukee, Wis.

AS USUAL the sharp freeze has caught some perishable stock in transit, though we think less than usual, warning having come a month since.

THERE is widespread regret at the death of A. W. Livingston, which occurred November 10. A complete account of his life will appear in our columns later.

JOHN G. ESLER, secretary of the Florists' Hail Association, has dislocated his right shoulder by falling from a four foot platform. The accident was caused by a misstep in the dark.

MAVOURNEEN, exhibited before the C. S. A. committee at Philadelphia, by John N. May, scored 83 points on the exhibition scale, not 33 as a typographical error made Secretary Smith state in our issue of November 12.

SEVERE weather has about closed green picking for the season, though some Indian pickers may continue until deeper snows come. The exact amount yet to be marketed is difficult to estimate, but there is surely no over supply.

GASTON BEYER, an orchid grower of Hamburg, Germany, says in *Die Gartenwelt* that after ten years of experiment with all kinds of fertilizers, it is his opinion that with very rare exceptions the best results are to be obtained in orchid culture without the use of artificial manures.

IN OUR ACCOUNT of the recent Poughkeepsie flower show we added two lacking names of judges as given by a contemporary. The use of these names, which were misspelled, is objected to as seriously as we regret their inaccuracy. The one correct name we had from the judge himself. Other details in our account not found in the previous one plainly refute the claim of our contemporary.

> A Mountain was once greatly agitated. Loud groans and noises were heard; and crowds of people came from all parts to see what was the matter. While they were assembled in anxious expectation of some terrible calamity, out came a Mouse. —*Æsop's Fables.*

The American Florist Company's Directory.

The final corrections are now being made for the next edition of our directory of florists, nurserymen and seedsmen, to be issued January 1, and we trust our readers will promptly inform us of any business changes which have come to their notice within the past year. Advertisements and orders for the use of large type in names of alphabetical list should be mailed as early as possible.

The Advertiser's Best Medium.

AM. FLORIST CO.—Please change advertisement now in, as per printed copy enclosed, and have it occupy half a page. In the last two issues, where I tried to see which paper gave the best returns, eighty per cent of the sales said "Saw advertisement in the AMERICAN FLORIST."

H. F. LITTLEFIELD.

Worcester, Mass., November 7, 1898.

Florists' Flower Shows.

This is the season of the year at which the enterprising florist takes advantage of the fine showing made by his chrysanthemums to invite his customers to inspect his greenhouses or his store. Among those who gave creditable shows during the mid-days of November were:

I. L. Pillsbury, Galesburg, Ill.; Irvine Floral Co., Bay City Mich.; L. Z. Farwell, Freeport, Ill.; A. C. Lamprecht, Ashland, O.; Geo. E. Buxton, Nashua, N. H.; John Bensted, Racine, Wis.; Hamilton & Plummer, Kewanee, Ill.; Nanz & Neuner, Louisville, Ky.; Fred J. King, Ottawa, Ill.; Joseph Kift, West Chester, Pa.; B. F. Crum, Joplin, Mo.; J. E. Matthewson, Sheboygan, Wis.; Long & Hudson, Janesville, Wis.; W. M. Lott, Warren, Pa.; Boehringer Bros., Bay City, Mich.; E. R. Gesler, Galesburg, Ill.; H. K. Brainard, Thompsonville, Conn., and E. B. Beals, Greenfield, Mass.; W. L. Rock, Kansas City, Mo.

Celery Pests.

ED. AM. FLORIST:—Herewith I enclose some insects which are destroying my celery, also geraniums. They work below the soil. The celery was growing satisfactorily until about the middle of October, when the outside leaves began to die. I then examined the plants and found them cut off at the base with many of these insects among the leaves. You will oblige by giving the name of the insects in an early issue of the AMERICAN FLORIST, stating also how to get rid of them. The soil in the garden is good and manured every year. How would a dressing of lime act upon these worms?

P. J. W.

The "insects" prove to be young millipedes, or thousand-legged worms, hence not true insects. We get many inquiries about how to control these pests, and several years ago we made many experiments to discover some practical method of destroying them, but had to give up, beaten. We know of no application which can be successfully made to soil which will kill the millipedes and not injure vegetation in the soil. It is said that many of them can be trapped by laying boards, etc., in infested localities; the millipedes will gather under these, where they can be collected and killed. None of the small common millipedes infesting soil in the north are poisonous as some suppose.

M. V. SLINGERLAND.

Calla Culture.

ED. AM. FLORIST:—Please advise me through your columns as to the best modern method of growing callas, giving temperature, etc. SUBSCRIBER.

The above is somewhat indefinite. The question is sometimes asked in a similar way by those who are anxious to have their callas to bloom in the window, how it may be done. We will presume information is sought along that line. The first essential is to give the calla generous treatment. It must have rich soil, and it should be supplied with abundance of water when well started into growth, and the temperature at night may be from 55° to 60°, nor will any serious injury be done if 65° is reached occasionally. If the above conditions are complied with there should be no trouble in coaxing the calla to bloom. But if side shoots which have sprouted from a flowering plant are taken in hand it may take the whole winter to grow them sufficiently strong to warrant us in expecting them to bloom. Should this be the state of affairs, when springtime comes and all danger from frost is over, they should be planted out of doors in a not too dry situation and allowed to take care of themselves until the middle of September, when they may be taken up and potted; and if the undersigned is not very much mistaken they will bloom during the ensuing season without fail.

E.

Perplexed by Condensed Stem.

ED. AM. FLORIST:—I have a twenty-horse-power horizontal steam boiler which stands on the top of the ground, on the same level with my greenhouses. The fireplace is in the ground, but on account of water I cannot lower the boiler. Under these conditions I wish to know how the condensed steam can be made to return to the boiler? Will it be necessary to have a steam pump for that purpose? If the flow pipe is run into the greenhouses overhead, with returns underneath benches, would the condensed steam enter the boiler as in heating by hot water? How could I best utilize this boiler, by steam or hot water heating?

S. F.

For the returns to carry the water back to the boiler, either a pump or a steam trap will be necessary, but neither will work well without carrying rather more pressure than will be required for heating the greenhouse. In order to have the returns free from water it is desirable to have the lower part of the coils at least two feet above the level of the water in the boiler, and in a large range of houses considerably more than this will be advisable. If hot water is used the returns can be carried at a considerably lower level, especially if a very hot flow pipe is used, and unless there are conditions that would make it impossible to use hot water, I would recommend that it be employed instead of steam. If the boiler is in good condition a closed pipe may be used which will require but little more radiation than will be necessary for steam. L. R. TAFT.

Heating Greenhouses for Lettuce Culture.

ED. AM. FLORIST:—I have two equal span houses running north and south, each 22x144 feet, connected, with no partition wall underneath the gutter. The height at ridges is from ten to eleven feet; walls four and a half feet high. I desire to keep the temperature at from 50° to 55° when the thermometer is at zero outdoors. There are no benches in the houses, only ground or solid benches for lettuces; the paths are along the sides of the houses. I now wish to know the best way to heat these two structures. So far I have no apparatus, but can readily purchase a twenty horse-power horizontal steam boiler. The houses are on level ground and I would like to have boiler on the same level. Can it be so placed either for steam or hot water? Firing with soft coal, could the apparatus be so arranged as to dispense with a night fireman, or so as not to demand

attention more frequently than every six or eight hours at night? I have a large quantity of 1½-inch and 1¼-inch pipe. How many runs or coils of these sizes would be necessary in each house? I could probably place the pipes so that the lowest run would be three feet from the ground level. If a boiler pit is unavoidable, how deep should it be? L.

It will not be advisable to put in a steam heating apparatus unless a considerable difference can be secured between the level of the water in the boiler and the height of the lower portion of the return coils. While there is always considerable risk from leaving the fire at night without an attendant when steam is used, with a boiler of ample capacity a hot water system will maintain an even degree of heat for six or eight hours. Even with hot water it will be best to have the returns even with or above the top of the boiler, but with an overhead flow good results can be obtained without this, especially if a closed system is used. While it would be desirable to use four 2-inch overhead flow pipes, 1½-inch pipes would answer, provided five are employed. Fifteen 1¼-inch returns may be arranged partly upon the side walls and partly upon the purlin posts, the latter at a height that will bring them well above the beds. L. R. TAFT.

Boston.

THANKSGIVING WEEK.—COLD WEATHER, FIRMER PRICES.—LOCAL TRADE GOOD.—CHRYSANTHEMUMS SELLING FREELY.—PAPER WHITES AND ROMANS MAKE THEIR APPEARANCE.—AN EXHIBITION.—RUFFIANS WELL PUNISHED.—MANY LOCAL NOTES OF INTEREST.

Thanksgiving week is here and the customary bustle incident thereto is noted in and about the wholesale establishments. Prices have not advanced much, about one cent on roses and half a cent on carnations on an average being a fair estimate as to the rise in prices up to Wednesday morning. Weather reports and predictions, however, indicate the near approach of wintry weather and it would not be surprising if the balance of the week should see a yet further stiffening of prices. Shipping trade seems good—fully up to the average—for the local New England trade. Outside of that territory the shipping trade of Boston is of little importance now. All the local retailers are active and the order books show a rapidly lengthening list of orders for family reunions and dinners, not baskets, cornucopias or eagles, but plain boxes of flowers to be laid at random on the table cover or arranged in bowls and vases on tables and about the room. Truly, the wire design maker has a discouraging struggle with fate nowadays, and the man he must blame for it is the expert and ambitious grower who has now brought his average product to such a high degree of perfection that "designing" is no longer necessary to patch over the defects in his flowers and in such a quantity that prices have now got where it is cheaper to buy good stock and use it as it is than to buy poor stock and "doctor" it up.

Chrysanthemums are not expensive, but the consumption of them is enormous and the aggregate returns for chrysanthemums must certainly compare well with returns a few years ago, when prices were much higher and the product much smaller. Ivory and Pink Ivory have an enormous sale and enter into almost every transaction of any extent. Pierce, alone, sells an almost incredible number every morning and he is only one of many, although the largest of our local chrysanthemum growers. Paper White narcissi, Roman hyacinths and stevia are seen in small bunches here and there, reminding us that the winter season is really here. Outside of these nothing is seen out of the usual run of stock as it has been coming in for a month past.

A small exhibition was staged at Horticultural Hall last Saturday. George McWilliam showed some more of his lovely seedling dipladenias, and for one named Elizabeth K. Whitin a silver medal was awarded. He also exhibited three seedling cypripediums. C. G. Roebling was given a certificate of merit for Renanthera Lowii, a flower spike six feet in length. There were a number of other interesting things from various contributors. The display of children's herbariums takes place on Friday and Saturday of this week.

The two ruffians who assaulted and robbed Jackson Dawson one night in October, have each been sentenced to state's prison for a term not exceeding eighteen nor less than fourteen years. Much gratification is felt over the severity of the penalty imposed, which ought to have a repressive effect on such outrages in the future.

W. E. Doyle failed to get the coveted Temple Hall non-partisan nomination for mayor of Cambridge at the caucuses on Monday evening.

The annual reunion of the employes of the Joseph Breck & Sons Corporation was held at Berkeley Hall on the evening of November 18.

The suit of W. W. Edgar against the Jos. Breck & Sons Corporation appealed by the defendent from the Superior Court is now on before the Supreme Court.

W. J. McGarry, of Charlestown, and Geo. E. Doherty have opened a flower store at 834 Washington street under the firm name of W. J. McGarry & Co.

The employes of Waban Rose Conservatories surprised Mr. John McGrath with a present of a Morris chair last Friday evening.

On Saturday night the greenhouses of H. Dumeresque, at Chestnut Hill, were broken into and a quantity of chrysanthemums stolen.

Chas. R. Langer died at his home in South Boston on November 16, aged 33 years, 8 months, 8 days.

Geo. Gill died on November 18 at Medford, aged 74 years, 6 months. The funeral took place on Sunday, November 20.

Visiting Boston: W. Th. Goethe, of Prussia.

Chicago.

BRISK THANKSGIVING TRADE.—FLOWERS IN SHORT SUPPLY AND PRICES NO OBJECT TO MOST BUYERS.—WILL DISCUSS A SPRING SHOW.—JOTTINGS.

There has been no over supply of stock this week and quantity and quality have ruled the market, not price. There have been too few good and medium Beauties and the price for the better grade has held strong at $8 a dozen. Good teas have sold very readily at from $6 to $8 a hundred and very few have gone below 4 cents or 5 cents each.

The best feature of the week has been the brace in the price of chrysanthemums. The figures have been back to the points they frequented a year or two ago. This is partly due to the approach of the end of the cut, but more to the extra demand for Thanksgiving and the scarcity of really fine flowers, the exhibition grades which were so plentiful two weeks ago. Carnations have been in fair supply this week, but the prices have held their own. Violets were rather short and sold well. Thanksgiving holly is fairly good and small lots sold readily.

At the next meeting of the Florists' Club, December 2, Emil Buettner, will present his ideas of what Chicago should have in the way of a spring flower show and the methods he would pursue to make such an exhibition a success. It is a very interesting subject and one which will doubtless attract a large attendance.

A. G. Prince brought in the first Harrisii of the season on Wednesday, November 24.

H. Bickford has opened a retail store in the Grace hotel on Jackson boulevard, the first door west of the Union League Club.

Kalous Bros., have opened a well appointed retail store at 100 Twenty-second street, between Michigan avenue and Cottage Grove.

G. S. Snedeker, who has been with A. McAdams, Fifty-third and Kimbark avenue, leaves November 28 for Melbourne, Florida.

John Schneider, a Kansas City retailer, was in town this week, and when he returned home on Tuesday he took with him 600 chrysanthemums from Reinberg, Budlong and Poehlman.

F. W. Taylor, of Omaha, who was a visitor this week, reports that the Trans-Mississippi Exposition authorities have paid a dividend of seventy-five per cent. and expect to pay from five to fifteen per cent additional.

The Shaw Banquet at St. Louis.

The ninth of the annual banquets provided for in the will of the late Henry Shaw, to be given to the florists, market gardeners and nurserymen of St. Louis, was held at the Mercantile Club November 19. The decorations were very appropriate, and small tables were scattered through the large room, each table providing for six guests.

Professor Trelease welcomed the guests in a few well chosen words and delegated the position of toastmaster to Professor Engler, of the Washington University, who is also connected in a professional capacity with the Shaw Botanical Gardens. The toasts had a bearing on the wider teaching of horticulture in the schools and universities of the state. About the only guest whose remarks did not tend in this direction was W. N. Rudd, president-elect of the Society of American Florists, who spoke of the society and its work, detailing the various points of interest developed during the successful meeting held at Omaha, and also of the effort all should make to attend the meeting at Detroit next year.

J. B. Lamm spoke of the life and works of Henry Shaw. He made a strong plea for the necessity and utility of the study of horticulture, and also spoke of the connection between this study and nature as seen by school children. A letter was read from J. Newton Basket regretting his inability to attend, but strongly favoring the teaching of horticulture to children and enumerating its benefits.

F. L. Solden, who has charge of the public school system of St. Louis, spoke of the manner in which the introduction of the new study would conflict with the established order, seeming to think that there would be very little friction between the two. He spoke very highly of the importance and necessity of the knowledge of plants and related subjects. The

principal difficulty to be overcome in introducing it into the public schools would be in keeping it from becoming a literary study, the idea being to make it as much of a natural study as possible, or, in other words, as much of an object lesson as permitted. This can only be done by having the student see plants, flowers, trees and other objects. He spoke also of the beauty that is opened to children by having them know and appreciate the beautiful work they see surrounding them.

L. A. Goodman, of the State Horticultural Society, said the trouble to be overcome at present in introducing this study is to find teachers that know enough to teach it, or how to teach it. He bewailed the general ignorance of horticulture among teachers.

W. S. Jackman, of Chicago, who is professor of natural history in the Cook County Normal School, and who was introduced as a teacher of teachers, spoke very feelingly of the benefits to be derived through the introduction of this subject in the schools. He spoke of the ignorance generally prevailing among children in the city in regard to flowers and natural beauty, saying also "that grown people could not realize the pleasure and beauty that was open to a child when properly instructed in regard to flowers and plants; that he was introduced into a new world."

Levi Chubbock, editor of *Colman's Rural World*, compared our advantages with those enjoyed in the older countries, taking as illustrations Germany and England. His remarks tended rather toward agricultural pursuits than that of horticulture. He showed that we were very much behind in this matter, although rapidly advancing in knowledge.

J. R. Kirk, Superintendent of Public Instruction of the State of Missouri, was the last speaker. He claimed that one-third of the present studies could be eliminated with benefit to the students, and the place supplied with something on the order of the subject under discussion. R. F. T.

Buffalo.

TRADE NOT BRISK.—STOCK AND ITS QUALITIES.—KASTING'S JOURNEYS.—DEATH OF PROF. HINMAN.—JOTTINGS.

Chrysanthemums are still with us but, like some of our bowlers, have seen better days. C. G. Guenther, of Hamburg, N. Y., still sends in some fine Beauties. Good violets are not plentiful.

Wm. F. Kasting returned from Pittsburg Tuesday and left for New York Friday to assist a friend in getting married.

There was no meeting of the Florists' Club last week, as the members were too tired to start in on settling up, and President Scott was laid up with a severe cold caught at the flower show, but with no blue ticket on it.

We regret to record the death of J. E. Hinman, a florist on Elk street. Although not in business a great while, he was well liked by those who had the pleasure of his acquaintance. Previous to his going into business he was principal of one of our largest schools, but owing to ill health was obliged to seek more active work. The business will be continued by Mrs. Hinman.

Roman hyacinths made their appearance November 22. Next will be Lilium Harrisii.

Prof. Cowell called last Saturday and looks fine after his trip to Chicago.

W. A.

Detroit.

BREITMEYER'S FALL OPENING WAS THE EQUAL OF MANY A CHRYSANTHEMUM SHOW.—THOUSANDS ATTRACTED.

John Breitmeyer & Sons gave their fall opening this week and made the finest display ever seen in Detroit. The mirrors around the store were framed with golden ladders and decorated with asparagus and cosmos. Vases six feet high filled with pink and white chrysanthemums stood in the corners of the store and large baskets of violets adorned the counter in front of a large mirror. A dinner table, changed each day, made a beautiful display, and wreaths of smilax suspended from the ceiling and studded with electric lights hung in the windows. The entrance to the conservatory was arched with bark to which were attached all the varieties of orchids which could be found in flower. Small ferns were placed among them and colored electric lights made the effect beautiful at night. Three thousand chrysanthemums were displayed and among them Rough Rider and Admiral Dewey caught the crowd. Western King, Mrs. H. Weeks, Philadelphia, Mme. Perrin, Sunstone and Mrs. O. P. Bassett were very fine. A number of pots of pompons were placed among them and the visitors made many comments on the contrast. Some very fine anemones were shown and the ladies appeared to be very much interested, as some of the other florists have since been asked for them. Hidden from sight a mandolin orchestra played afternoon and evening and added very much to the pleasure of the occasion. The show drew a large number of visitors and Mr. Breitmeyer estimates that nearly 10,000 people visited the store in three days. Wednesday was rose day and 1000 Beauties and Meteors were displayed. R. F.

NEWS NOTES.

BUCHANAN, MICH.—Frank A. Stryler is running a commercial place here.

BANGOR, ME.—W. L. Clement, of Stillwater, has leased the place on Main street, formerly occupied by Modery Bros., and will run it as a florists' store.

BRANDON, MANITOBA.—It will no longer be necessary for Brandon people to send to Winnipeg for flowers, as Mr. Mansoff is now prepared to supply the local market.

LOGANSPORT, IND.—Gustave H. Minx, florist at Longcliffe Hospital, who was formerly in business at Lebanon, was married on November 15 to Mary Brenneke of that place.

READING, MASS.—The tenth annual chrysanthemum exhibition at Hoskins & Giles has been on for the past week and has been favored with a very large attendance of the public.

INDIANAPOLIS, IND.—A little son has arrived at the home of John Grande. The palm swindler made his appearance in this city recently and succeeded in making Frank Saak the victim of his well known trick. H. J.

TITUSVILLE, PA.—Wm. Bay, on November 18, gave a chrysanthemum show at which he awarded a prize to the school child who grew the best plant from one of a thousand which he distributed in the spring. As an advertisement and interest awakener the idea was eminently successful.

MILLBROOK, N. Y.—The chrysanthemum show of the Millbrook Horticultural Society was held on November 10, 11 and 12. It was a gratifying success, eclipsing in some features the recent exhibition at Poughkeepsie. W. C. Russell, gardener to C. F. Dieterich, and James Blair, gardener to Ogden Mills, were winners of some of the best prizes in the chrysanthemum and cut flower classes. Memorial hall is an admirable exhibition room and the grand groups of decorative plants from I. L. Powell and W. C. Russell that filled the stage and made a background for the showy chrysanthemums were exceedingly effective. The display of roses, violets and carnations was very superior. The May cup was won by B. Willig with a fine display of violets. Gustav Thommen contributed a beautiful pyramid of begonias and flowering plants. J. N. May's new carnation Melba was shown.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ALBANY, N. Y.—Geo. H. Price succeeds Price & Reed in the seed business.

R. H. SHUMWAY is still on crutches in consequence of his recent accident.

HENRY A. SALZER is in Idaho looking after his interests in the gold mines.

L. L. MAY & Co. have added another bag filling machine to their establishment.

READING, Pa.—The stock and fixtures of the Dwight Seed Co. at 843 Penn street, have been sold to Chas. J. Dwight.

COLUMBUS, O.—Chas. A. Sloan and F. A. Briegel have purchased the business of the Columbus Seed Co., and will continue under that name.

VISITED CHICAGO:—Mr. E. Schaettel passed through here on November 21 enroute to New York. He will sail for Paris on the French liner La Tourraine, December 1.

THE Salzer Seed Company, says the St. Paul *Pioneer Press*, has shipped grass seed to the Rice Lake sufferers, by order of Secretary Wilson on an appeal from Congressman Jenkins.

LONDON, OCT. 31.—The 1898 crop of canary seed in Turkey is said to be 70,000 bags and has been sold. Re-offerings of it at higher rates. Wisconsin green peas higher. Scarlet runner beans higher. Increased continental demand for red clover.

DENVER, COLO.—The Gallup Floral and Seed Company is the name under which P. C. Gallup has reorganized the Gallup Floral Co. Commodious quarters at 1460 Cleveland Place have been secured and the firm intends to handle seeds and florists' supplies as well as cut flowers and plants.

Retail Onion Seed Prices.

The retail prices of the leading varieties are now as follows:

	Per lb.
Red Wethersfield	$1.50
Extra Early Red Flat	1.60
Southport Yellow Globe	1.75
Yellow Globe Danvers	1.50
Yellow Flat Danvers	1.40
Yellow Strasburg	1.50
White Portugal	2.50
White Globe	2.75
Southport Red Globe	3.00
Early Red Globe	2.50
Prizetaker	1.75

Seedsmen's Competitors.

The *Conservative*, published at Nebraska City, Neb., prints the following in its issue of November 17:

There is a great and constantly growing area of land in Nebraska and other states cultivated by seedsmen. The crops of cucumber, onion, radish, beans, peas, muskmelon and other seeds matured each year on the commercial seed plantations in the American union aggregate a value of many millions of dollars. As a rule the seed growers of this country are honest, enterprising and highly respectable men. But each year they meet, as their competitors, congressmen and senators who, at government expense, gratuitously distribute among a small per cent of their constituents a few hundred tons of seeds. The packets contain about one cent's worth of seeds. The packages contain five packets. The voter who is tickled with five cents' worth of garden seeds and rejoices at being so well remembered by the statesman who sends them, is too simple to be allowed any part in a self-respecting government of the people, by the people, for the people.

Among many hoary humbugs in this form of government not one is so markedly a development of senile dementia. No other perpetrates more injustice and nourishes more favoritism.

Should Customers Pay for Catalogues?

A prominent eastern seed merchant writes suggesting the propriety of charging a nominal price for catalogues, the amount to be deducted from the first order of a given value. In these times of small profits the publication and free distribution of expensive catalogues becomes a serious item, and yet the custom has become so firmly established that any change must be approached with caution. Many European houses adopt the plan of sending catalogues free only to regular patrons, charging all other applicants a nominal price, and some follow the course proposed by our correspondent. We shall be pleased to hear from those interested with a view to the solution of this problem.

NO. TONAWANDA, N. Y.—C. J. Pult is about to organize a company to be known as The Florists' Supply Co., with office at his present address, corner of Division and Christiana streets, where he will handle glass, pipe, fittings and other material required by florists. They expect to commence business about December 1.

36 Cortlandt Street, New York.

Do you Ship Onion Sets?
Hercules Ventilated Barrels are RIGHT for Shipping any Product requiring ventilation.
We sell thousands to large shippers of produce and onion sets. The Hercules is the only barrel which can be shipped knock-down and does not require a cooper to set them up. One man can set up 75 to 100 Hercules barrels per day. Every shipper can be his own cooper and **save money.** We ship the barrels knock-down, with heads and hoops complete and ready to be set up. Fourth-class rates apply in less than car lots.
We furnish our set-up outfit for $2.00 and refund the $2.00 when you have purchased 500 barrels.
Write for sample barrel and prices.

288 W. 20th Place, CHICAGO.

San Francisco.

AN OVERSTOCK OF CHRYSANTHEMUMS.—THE STATE OF THE MARKET.—SHOW OF THE SANTA CRUZ FLORAL SOCIETY.—JOTTINGS IN THE TRADE.

Trade in this city has been rather poor for the past few weeks. As usual at this time of the year we are overstocked with chrysanthemums and when they hold sway it is rather difficult to dispose of other stock. The weather has not been at all favorable to the chrysanthemum this season, that is, outdoor-grown stock. Mrs. Henry Robinson as a rule has done poorly but Major Bonnaffon is as fine as ever. The same may be said of Dailledouze. The wholesale growers have experienced a very fine shipping trade, sending out many thousand chrysanthemums, some going as far as Butte. Prices range from about $3 to $6 per 100.

Some magnificent Flora Hill, Mayor Pingree and Minnie Cook carnations can be had. These three varieties bring from 75 cents to $1 per dozen at retail. Roses are going slowly. Beauties are of good quality but prices are ruling rather low. The heaviest demand is for Brides and Bridesmaids. Violets are very poor and do not ship well, for which the growers blame the very dry season. The plants seem to be invariably covered with red spider. There seems to be a very healthy demand for young palms, particularly kentias, and the supply is very limited.

The Santa Cruz Floral Society has just closed its annual chrysanthemum show and while the attendance was not what it should have been, yet it proved very satisfactory. Thos. Thompson made the largest exhibit, composed chiefly of well grown palms and ferns. He also showed some of his famous carnations, which were all that could be desired, and seedling dahlias, many of which will prove decided acquisitions. Mr. Leedhorn, well known among us as an authority on bulbs, particularly narcissi, made a very interesting display of tuberous begonias and dahlias, a new red dahlia being particularly fine. Mr. Leedhorn's display was not for competition and neither was that of Mr. Thompson. Of the amateurs Dr. Parker made a fine show of decorative plants and cut blooms. Mrs. Rennie captured nearly all the prizes for cut blooms.

Mrs. Lena McCoy, of Tacoma, Washington, is in town visiting the growers and looking at the winter prospects for cut flowers.

Chas. C. Navlet, of San Jose, who has a branch store in Sacramento, is about to open another in Stockton.

The J. B. Kidd Company has been incorporated and is now doing business at 312 Market street.

San Francisco is not to have a fall show this season, which is much to be regretted.

Sidney Clack is sending in some fine lily of the valley which brings readily 75 cents to $1 per dozen. METEOR.

Bridgeton, N. J.

Mr. and Mrs. S. Edwards celebrated the golden anniversary of their wedding, at their home, 478 Irving avenue, on November 16. Mr. Edwards will be 88 years of age on December 24. He did a thriving business as a florist in Bridgeton for many years, and his son, D. B. Edwards, is a well known florist of Atlantic City.

Wm. Henderson, who is an enthusiastic hybridizer and raiser of chrysanthemums, has a beautiful exhibition open to the public in his greenhouses at Cedarville.

HOLLY=VAUGHAN'S XXX BRAND

AND

Bouquet Green.

THE Holly situation changes nearly every year. For the last three years they've begun to bring it into the country towns like potatoes. Every man has taken to cutting his own—or some other man's—holly, and packs it well, badly or indifferently, or any old way. The result is very bad for the retail florist. When we first started the Holly business, in 1880, our buyer contracted for a man's grove and cut the best and sorted it himself, and established Vaughan's XXX Stock as a brand worth having. It is nearly 20 years old—almost of age—and has held its own well. But we wondered why so many culls came our way (to sell to peddlers at half rates) and this fall our Mr. Vaughan located this town market Holly system and cut it off from our man. We are buying and packing our Holly in the woods ourselves and it costs more money, but it is worth to the retailer a lot more than it costs. **A good case of Holly is easily worth Ten Dollars, while cull stock can't be given away.**

We can suggest delivery dates which will keep you in good supply on the best days for selling Holly. Our prices are not advanced. How much can you use?

Vaughan's Seed Store, 84-86 Randolph St., CHICAGO. 14 Barclay St., NEW YORK.

Wisconsin is the HOME of BOUQUET GREEN. Please remember that we are in Wisconsin.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

D. S. LAKE, Shenandoah, Ia., is building a cellar 56x110 for the storage of nursery stock.

WIRT BROS., Alpha, Ill., report a good season and are remodeling and enlarging their nursery office.

NOBLESVILLE, IND.—Charles Simmons, of Sheridan, has entered the employ of J. Phelps & Son.

WOOD & FORTNEY, Schoolcraft, Mich., sold at auction their personal property and nursery stock on November 17.

LOS ANGELES COUNTY, California, is sending George Compere to Hawaii in search of a parasite which will destroy purple scale in nurseries and orchards.

THE SOUTHERN NURSERY CO., of Winchester, Tenn., has purchased the Price Luner farm of 265 acres at Adairsville, Ga., which they will set to peaches, apples, quinces and plums.

THE Lily Orchard Co., Bloomington, Ill., has increased its capital stock from $11,000 to $150,000 and proposes to greatly increase its orchards. H. S. Watson is president and manager.

ROCHESTER, N. Y.—Joseph H. Dodge, of the nursery firm of Geo. Moulson & Co., was married on November 15, to Miss Elizabeth McGuire. The house was beautifully decorated with plants and flowers.

DANSVILLE, N. Y., nurserymen, of whom there are twenty-seven, have enjoyed a splendid fall trade and so heavy have their shipments been that they have experienced difficulty in securing cars to move the stock.

Pittsburg.

THE GREAT CHRYSANTHEMUM SHOW AT SCHENLEY PARK.—MANY NEW VARIETIES.—HIGHLAND PARK ALSO MAKES AN EXHIBIT.—SPLENDID NEW MARKET HOUSE SHELTERS NINE FLORISTS.

Notwithstanding that Pittsburg has no competitive chrysanthemum show this year, it has a display that for extent, number of varieties shown and general excellence, has not been excelled by any of the numerous shows throughout this country. At the Phipps conservatories in Schenley Park, Wm. Falconer superintendent, the exhibit is one of over 10,000 plants, more than 300 varieties, very many of them with from three to six flowers to a plant, and arranged so that the beauty of each one can be fully appreciated, the space occupied being large enough to admit of display without crowding. Superintendent Falconer had the economic plant houses cleared for this exhibition, retaining only the bank of exotics, ferns, etc., with the waterfall and pool facing the entrance, which completely prevents seeing any of the chrysanthemums until you pass beyond it, where the center house with its two wings are one mass of beautiful colors.

Highland Park, Geo. W. Burke, superintendent, has also a chrysanthemum show, but owing to the very limited space in the small greenhouses connected with this park, it is impossible to have anything like the extensive exhibit at Schenley Park, although for its size it is equally meritorious. This year Superintendent Burke has grown only the older varieties, such as Mrs. Henry Robinson, Ivory, Mutual Friend, Queen, John N. May, Major Bonnaffon, Eugene Dailledouze, Mrs. Geo. H. Morgan, Viviand-Morel, Maud Dean, Mrs. Irving Clarke, Oakland, E. M. Bigelow, and F. H. Spaulding. W. B. Ague has charge of this branch of park work and has succeeded with very limited accessories in giving a first class exhibit. Plans are under way for better and up-to-date houses for Highland Park, and then Pittsburg will be able to give two large flower shows at the same time.

On Saturday, November 19, the opening of the Liberty Market in the East End took place. It is one of the finest market buildings in the world, and nine florists have taken stands in it, in which the refrigerating is done by pipes through which chemically cooled brine is forced. They are as follows: A. M. Elliott, formerly of Elliott & Maginess; Chas. T. Siebert, of Stanton avenue; Fred M. Welfer, Greenfield, avenue; H. B. Zieger, Aspinwall; W. H. Senior, West End; Baywood Nurseries, B. Frosch, manager; Miss Anna Klopfer, Allegheny; Jos. T. A. Varnhagen, South Euclid avenue, and Harry Baxter, Aspinwall.

All of them expressed satisfaction with the opening day. This is the first attempt at starting a market so far from the regular one in the main part of the city, but the population in the East End is fully great enough to warrant it.

W. D. Huscroft, of Wheeling, W. Va., and Geo. L. Huscroft, of Steubenville, Ohio, were in the city the early part of the week. REGIA.

DETROIT, MICH.—Moses Larges, well known in the trade here, died November 5. The business is now in the hands of his sons.

SOUTH BEND, IND.—Tippecanoe Place, the home of Hon. and Mrs. Clem Studebaker is the scene of an annual chrysanthemum show given by the ladies of Milburn chapel. The blooms supplied for the function November 16 were very fine and reflected much credit upon Peter Reese, the grower.

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The "GARDENERS' CHRONICLE" has been FOR OVER FIFTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, much of the information furnished is of such general and permanent value, that the 'GARDENERS' CHRONICLE" is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

American Florist Co.,
CHICAGO.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

H. F. A. LANGE, of Worcester, Mass., has returned from a trip into the wilds of Maine, bringing with him two deer and a caribou.

R. WITTERSTAETTER, president of the Cincinnati Florists' Club, has returned from a very successful hunting trip through Kentucky.

PROVIDENCE, R. I.—A bowling match between Peter Burns, A. M. Rennie, Alex. Miller and John Macrae has ended after much hard labor on the part of the participants. Five strings being rolled, Burns could not score a 100; John Macrae made 135. Rennie was second best and Miller third.

NEWPORT, R. I.—Bowling is too commonplace a pastime for the Newport gardeners. Nothing less than a cake walk is any attraction to them. One of these grotesque affairs closed the chrysanthemum show last week. J. J. Butler was chief showman and the couples in his retinue were Messrs. Laurie and Radford, Maher and Taylor, Westley and Nicol and Watterson and Johnson. The three first named couples won the cakes with unprecedented evolutions. The cakes turned out to be made of wood and metal and required a force of mechanics to cut them up.

Pittsburgers to Bowl.

During the winter the members of the Pittsburg Florists' Club will meet each Thursday evening for bowling practice, and a team will doubtless be organized to contend for the Evans trophy at Detroit next August.

At Richmond, Ind.

Among recent visitors to this city were two members of the Chicago Florists' Bowling Club, and they were invited to show their skill on a local alley, with the following result:

Name.	1st.	2d.	3d.	4th.	Ave.
J. S. Wilson	113	136	141	163	138
E. G. Hill	76	98	88	123	96
J. A. Evans	60	98	96	103	89
M. Barker	78	57	61	87	69

Bowlers at Indianapolis.

It is said that the most pleasurable part of the Indianapolis show programme was the entertainment given visiting florists by the local club, the principal feature of which was bowling. J. Hanson, Theo. Bock, of Hamilton, Ohio, and Albert Sunderbruch, of Cincinnati, won the leading prizes, but enough trophies had been provided that no one went empty handed.

H. J.

Twin Cities Will Bowl.

A. S. Swanson, of St. Paul, is trying to organize a bowling club in the twin cities. Eight of the fourteen members present at the last meeting of the Florists' Club announced their desire to join and a total membership of twenty or twenty-five is anticipated. Buffalo, Philadelphia and St. Louis are hereby warned to look out for their laurels at Detroit next August.

FELIX.

New York.

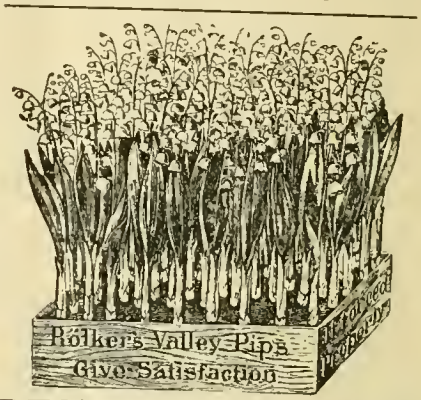
The bowling meeting of the New York Club on Monday evening was well attended and the new alleys at 1011 Sixth avenue were very satisfactory. P. O'Mara made the best score, 217; others made from 150 to 170. A challenge was issued to the Gardeners' Society for a match game on the afternoon of December 12. Lawrence Haffner offers a prize for the best score made in one game on that afternoon. A rousing time is promised.

Chicago Bowling Score.

At the meeting November 18 Capt. J. S. Wilson made the high average, 157. There were ten players in the game. Here is the score:

Name.	1st	2d	3d	Av
J. S. Wilson	162	170	140	157
G. L. Grant	188	145	123	152
E. F. Winterson	114	149	177	147
Walter Kreitling	166	149	125	147
George Stollery	114	142	163	140
John Degnan	127	132	147	135
C. W. McKellar	110	166	111	129
Alex. Henderson	124	139	104	122
A. Lange	104	125		115
Jas. Hartshorne	113	100		107

Convention City Bowlers.



At their second evening's practice the Detroit bowlers manifested considerable improvement. Here are the figures:

Name.	1st.	2nd.	3d.	4th.	Av.
Holznagle	154	156	143	121	144
Paulke	115	121	128	142	127
Flowerday	154	148	122	81	126
Beard	88	127	151		122
Rackham	95	104	115	131	111
Watson	85	122	112	126	111
Dilger	111	70	106	140	107
Sullivan	82	115	118	96	103
Lohrman	109	98	90	86	96
Pickworth	78	98	91	113	95
Coryell		130	53	100	71

R. F.

Flatbush Bowling.

There was a great time on the alleys Thursday evening, November 17. Six games are to decide whether the "Clams" or the "Lobsters" are to pay for the Thanksgiving supper and the "Clams" had already two games to their credit from the previous meeting. Mr. Riley is captain of the "Clams" and his retinue consists of Louis Schmutz, Eugene and Paul Dailledonze, Papa and Alfred Zeller. The "Lobsters" who, under the leadership of Tom Brennan, are Messrs. Raynor, Prosser, Mellis, Werner and Henry Dailledouze, lined up with desperation in their eyes and managed to capture the first game but in the second their opponents proved too much for them and the best they can do now is to tie the series by winning the two remaining games, a feat which they hardly dare hope for. D. D. L. Farson, J. H. Troy and W. J. Stewart were visitors and Mr. Troy won the "pot" in the first game with a score of 172. In the second Alfred Zeller won and in the third he and Tom Brennan were tied with a score of 181 each. They rolled off and the pot went into Brennan's pocket. Mr. Farson gave an interesting demonstration of several styles of Philadelphia rolling. Dan is always interesting in whatever line he performs.

Cleveland.

A WEEK OF POOR BUSINESS.—A CRAPE CHASER MEETS WITH A MERITED REBUKE AT THE HANDS OF A FLORIST.

There is a universal complaint regarding business during the past week, nearly every one uniting in the opinion that for all around dullness it has been the worst for some time. It may be that people are saving their dollars in order to spend them with us at Thanksgiving. There is, of course, an ample supply of pretty much everything and a surplus of chrysanthemums. The rather pleasant, warm and bright weather we are having does not tend to greatly improve the situation.

It grieves me greatly to have to record the lamentable calamity that lately befell one of our most prominent and persistent crape chasers. In the pursuit of his occupation he called at a house the deceased occupant of which had been a relative by marriage of a local florist and it happened that the said local florist was in charge of matters in general, and also that this said person was unknown to the genial crape chaser. He got out his book and proceeded to expatiate after the manner of his kind, the auditor listening with eager attention but preserving his incognito. The gentleman enlarged upon the merits of his wares, the cheapness thereof and the fine attributes of the deceased "whom he (perhaps) knew well." The unknown mildly responded that there was a florist in the neighborhood who had always been satisfactory in other matters; why not go to him? To which was returned the statement that "He was only in a small way, good enough to buy bedding stuff of but on an occasion like this"—and so on. "Allow me to introduce myself. I am the florist you are discussing so eloquently," was the rejoinder, and then followed the most beautiful calling down and the discomfited departure of the "chaser." All of which is very sad, don't you know. A.

NYACK, N. Y.—A deer which had escaped from the Tuxedo Park preserve, in trying to return to the park by leaping over the high wire fence, plunged down on the greenhouses of George Stewart, which are located near the entrance to the park and broke in most of the glass on that side of the house.

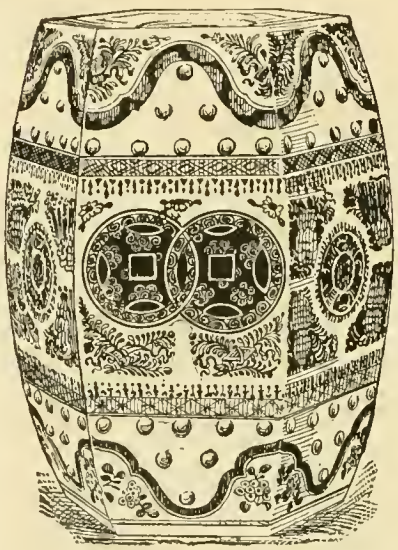
TRADE IS GOOD IN THE NORTHWEST.—VIOLETS AND CARNATIONS ARE SCARCE.—HIERSEKORN STARTS A BRANCH.—MINNESOTA FLORISTS ELECT NEW OFFICERS.

While we have had no exhibition to help matters along, nearly everyone has enjoyed a good trade and both growers and store men are wearing pleasant smiles and preparing to offer thanks for prosperity, past, present and prospective.



In cut flowers chrysanthemums take the lead, though Beauties, violets and carnations are also in good demand. Outside of chrysanthemums and white roses, the supply is not equal to the demand. Carnations are backward, the only one now to be seen in quantity being the Daybreak, and while a great many more violets were planted than in former years the cut is wholly inadequate.

Otto Hiersekorn, who has been doing business on East Seventh street for a number of years, has opened a branch store on East Fourth street, a little away from the business center, but in a location where a good trade will undoubtedly be established, as he is a hard-working, painstaking and artistic florist.

The Society of Minnesota Florists held a meeting in Minneapolis on Saturday evening, November 19, electing the following officers: E. Nagel, president; Aug. Vogt, vice-president; S. D. Dysinger, secretary; Aug. S. Swanson, treasurer; and Messrs. Busch, Will and A. W. Lemke, executive committee. The treasurer's report showed a balance of $24 on hand. Admission fees and membership dues were suspended for three months and an invitation extended to all florists in the state to join the society. Future meetings will be held the second Saturday of each month. FELIX.

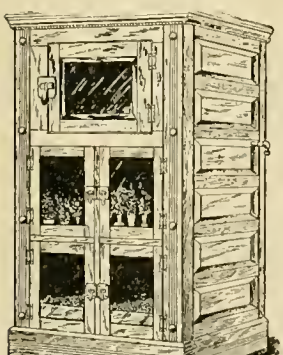
THE AMERICAN FLORIST.

Kansas City.

NO CHRYSANTHEMUM SHOW THIS YEAR.—THE HAIL STORM RUINED THE STOCK.—BUSINESS GOOD.

For the first time in four years Kansas City is without a chrysanthemum show, and the supply of the big blooms is, moreover, inadequate to meet the demand. This is the direct result of the big hail storm last May which broke thousands of lights of glass, ruined much stock and broke several florists financially. Every firm here was a heavy loser in that never-to-be-forgotten storm and three firms went out of business as a result of it: E. E. Heite and James Payne did not rebuild their crushed houses and Probst Bros. sold their establishment. The Heite Co. had a large area of glass. The others were mostly insured in the Florists' Mutual.



Retailers all report an encouraging demand for cut flowers. Chrysanthemums and carnations are scarce but American Beauties and other roses are quite plentiful and violets are in quantity to meet the present call.

George M. Kellogg, of Pleasant Hill, who recently opened at 609 Grand avenue, is well pleased with his venture.

JOLIET, ILL.—Joseph Labo, gardener at the Illinois penitentiary, has been making a splendid showing of chrysanthemums upon the second floor of the Joliet Dry Goods Co.'s building.

JEFFERSON CITY, MO.—Albert Ramet's chrysanthemums have been very fine this year, he having a big crop of blooms seven and eight inches in diameter. His varieties were Pres. Smith, Dailledouze, Viviand-Morel, Dr Callendreau and Mrs Bergmann. His carnations are also doing well and in that line he has a few each of many varieties.

HAMILTON, ONT.—The first flower show of the Hamilton Horticultural Society was held the past week at 128 King street. There was a fine display of chrysanthemums, roses, carnations and potted plants despite the fact that there were no cash prizes. Simon P. Stipe acted as superintendent and George Reeves, of Toronto, was the judge.

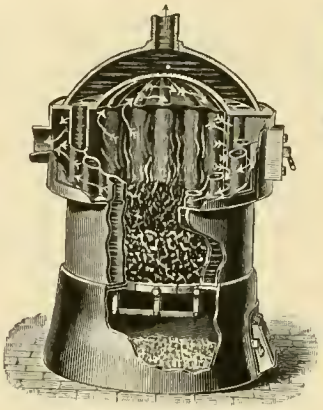
PARK BOARD WILL BUILD A RANGE OF THOROUGHLY MODERN GREENHOUSES.—EVERYTHING UP-TO-DATE.—A PARK FOR A CENTENNIAL.

The park board will soon close a contract for the erection of quite an extentensive range of greenhouses. This will consist of three growing houses 20x125x 11 feet, with a palm house in front 30x62x25 feet with curvilinear roof and vestibuled entrance, and a potting house 30x62 feet fitted up with an office, also a basement the full size of the potting house, divided off with rooms for storage, heating apparatus and coal. The range will be constructed of steel and iron and heated with hot water. The growing house benches will be of iron with tile slab bottoms. There will be a double line of ventilating sash operated by improved apparatus on each house. It has been the aim of the park board to build as near an indestructible range as possible, using no wood except cypress sash bars and doors. They think it will be a model range of houses, and those who have seen the plans agree with this view. It will be erected at Walbridge Park, a point admirably located for the distribution of plants to the other parks.

The Ohio State Centennial Committee has chosen Bay View Park at Toledo as the site for holding the Ohio centennial in 1903. The park contains three hundred acres and is situated at the head of Lake Erie, overlooking that beautiful body of water. It is in the city limits, accessible by boat or street cars, and in all respects an ideal location. The centennial is to commemorate the one hundredth anniversary of the admission of Ohio as a state.



Providence, R. I.

There were a few things at our recent show that deserve special mention. Among them were a vase of Meteor, Bridesmaid and Kaiserin roses and a vase each of Daybreak and Mrs. Geo. M. Bradt carnations that were especially fine, grown by S. J. Reuter, of Westerly.

Ladies night at the last meeting of the Florists' and Gardeners' Club was well attended, about one hundred being present. A musical with refreshments and dancing occupied the time till midnight. Farquhar Macrae contributed two large vases of chrysanthemums which were divided among the ladies on retiring.

Geo. C. Pierce, of Edgewood, has bought a farm at Whitehorse, N. H., and will make it his home. Ill health compelled him to make the change from greenhouse work.

John Severin has opened a flower store on North Main street. LITTLE RHODY.

TRADE AND THE MARKET.—JOTTINGS PERSONAL AND OTHERWISE.

Trade has been good, with a steady increase in the call for good stock. The Cincinnati Cut Flower Company reports a big shipping trade. Violets are improving in quality and prices have moved a step upward. A scarcity has been felt in Beauties. Carnations meet with a steady demand. Chrysanthemums are still plentiful with the exception of good white.

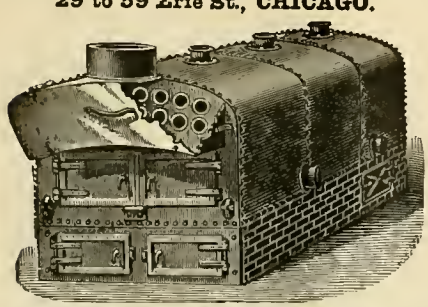
H. Tong, manager of Massassanga Gardens, Erie, Pa., had a seedling chrysanthemum before the C. S. A. committee here on November 19. The flower is large and graceful, Japanese incurved; color delicate pink shading to white.

Mrs. Mamie Weeks, the Covington florist, was quietly married on November 7 to Geo. Hussey, an advertising agent of the C. H. & D. R. R.

Charles Gardner celebrated his twenty-fifth wedding anniversary at his Newport home on November 20. Mr. and Mrs. Gardner were the recipients of many beautiful presents. H. SCHWARZ.

Rochester, N. Y.

Since last report the flower trade was more active, though prices are still low, even for the very best stock. A vast number of chrysanthemums are in sight, roses and carnations are quite plentiful and violets are coming in more freely.



Geo. Keller is busy planting his last batch of violets in benches where he had his earlier chrysanthemums. From the houses planted first he is now picking good sized flowers, though the plants are slower in their growth this year.

At Schlegel's the violets look as healthy as ever; they have grown them in the same old houses for the last fifteen years. Geo. Savage, at Kimball's, has put up a cozy and very neat little violet house where he formerly had a heated frame and his plants are as vigorous and healthy as any in town.

Alfred Dimmock was a visitor here last week, but good salable blooming plants of Acalypha Sanderi are too high priced as yet for our slow town. J. B. K.

PORTSMOUTH, N. H.—The annual exhibition of chrysanthemums at the Frank Jones conservatory was visited by thousands of people during the five days it lasted. It was the best exhibition ever given here and the gardener, Mr. Patterson, has every reason to be proud of its success.

Hitchings & Co.

ESTABLISHED 50 YEARS.

HORTICULTURAL ARCHITECTS AND BUILDERS

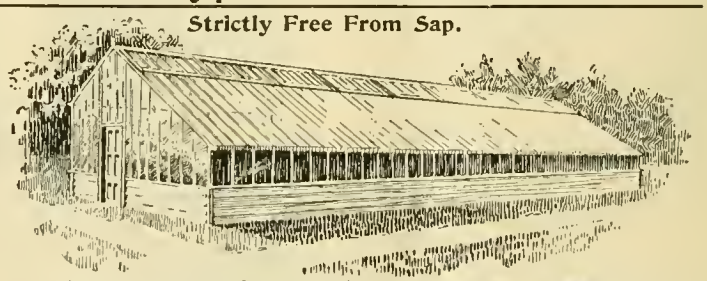
AND LARGEST MANUFACTURERS OF

GREENHOUSE HEATING AND VENTILATING APPARATUS.

THE HIGHEST AWARDS RECEIVED AT THE WORLD'S FAIR FOR HORTICULTURAL ARCHITECTURE, GREENHOUSE CONSTRUCTION AND HEATING APPARATUS.

Conservatories, Greenhouses, Palm Houses, etc., erected complete, with our patent Iron Frame Construction. Send four cents postage for illustrated catalogue.

233 Mercer Street, NEW YORK.



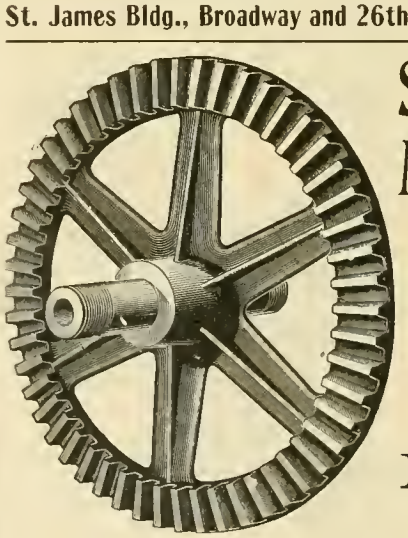
LORD & BURNHAM CO.

HORTICULTURAL ARCHITECTS AND BUILDERS

LARGEST BUILDERS OF GREENHOUSE STRUCTURES.

Red Gulf Cypress Greenhouse Material

Strictly Free From Sap.



LARGEST STOCK OF AIR DRIED CYPRESS IN THE NORTH.

Write to New York Office for circular and estimates. Send 5 cts. postage for latest catalogue of Greenhouse Heating and Ventilating Apparatus. Send 4 cts. postage for Catalogue of "Patent Iron Construction." Write for circular of Hot Bed Sash and Frames.

New York Office: St. James Bldg., Broadway and 26th St.

General Office and Works: Irvington-on-Hudson, N. Y

Standard Ventilating Machine....

HAS POSITIVELY NO EQUAL FOR

STRENGTH, DURABILITY ...AND NEATNESS

Guaranteed for 10 years. Has a solid wheel and shaft cast in one (malleable iron). No slipping on Line Shaft as the case with all others. Catalogue free.....

E. Hippard,

YOUNGSTOWN, OHIO.

When writing mention the American Florist

Boilers

OF HIGH GRADE..

Greenhouse Heating.

[Paper read by Henry W. Gibbons, of New York, at the November meeting of the Morris County Gardeners' and Florists' Society, Madison, N. J.]

The ultimate results of a greenhouse heating apparatus depend not so much upon the nature of the heating medium used, whether it be the old-fashioned flue heat, hot water or steam, as upon the proper proportioning and distribution of the radiating surface, and on the arrangement and proportioning of the pipes used for distributing the heating medium.

In considering the providing of a heating apparatus, the question which first arises is, of what nature shall it be, radiation from flues, hot water or steam? And in this connection also arises the question of cost. The least costly to install but the most costly to maintain, and at the same time the least effective in its desired results, is the flue system, so I will not devote much time to this, except to suggest that where such a system is desired make the flue, whose length should not exceed seventy-five feet, of 12-inch salt glazed drain tiles, the joints being well filled with good cement mortar, and give the flue an upward grade from the furnace to the opposite end of not less than one inch in five feet, and as much more as circumstances will allow, in order to secure a quick draught, and also a direct rise of about three feet from the furnace before starting off on the run.

The question of the superiority of either of the other two systems requires much consideration before reaching a decision, as the advantage of the one or the other depends very largely upon the particular requirements of the grower, the extent of the houses to be heated, and other points of which I will speak later.

We will first consider steam as the heating medium, its advantages and disadvantages. This system has these very desirable features—its comparatively low cost of installation and, what is of vastly more importance, a perfect and prompt control of its circulation and consequent heat radiation. With this system, unless steam is formed in the boiler, no heat is given off in the greenhouse, and as, in a well proportioned boiler, steam may be produced very quickly it will readily be seen that with this system heat may be promptly produced, increased and diminished at the will of the person in charge, which in this latitude of sudden rise and fall of outdoor temperature, are points of immense importance.

The pipes used for circulating steam through the greenhouses, being of small diameter, 1-inch or 1¼-inch, the requisite amount of radiating surface can be readily distributed so as to produce the desired warmth throughout all parts of the house. In the matter of regulating the heat in the more steady winter weather, the heating medium being distributed through a large number of small pipes, and all or most of these pipes being fitted with valves, the proportion of effective radiating surface and the consequent temperature of the air within the greenhouse is under the most absolute control of the person in charge.

These two objections to steam heat are raised by advocates of the hot-water system: First, the fact that if from any cause the fire should die down below the intensity necessary for the production of steam, heat ceases to circulate in the houses, which condition on a winter's night would be fatal to the stock within the houses. This objection is entitled to some consideration in connection with small greenhouses on private estates where the gardener is too often coachman and general utility man, and as such has duties more important to the immediate convenience of his employer which often prevent him giving the requisite attention to his greenhouse fires. But in connection with commercial ranges of any extent, or the larger private ranges, where duties other than the legitimate ones of his profession are not imposed upon the gardener or person charged with the proper care of the fires, this objection carries no weight.

The other objection is the slight increase of fuel consumption. This is the case with small houses, and particularly where boilers of inadequate capacity are used, but on larger ranges, and particularly where boilers arranged for the consumption of the cheaper grades of fuel are used, the point of fuel economy is on the side of steam heating.

The hot water system of heating, which consists of a circulation of hot water through pipes within the greenhouse, has claim to two good points: First, should any accident happen to the fire in the boiler the heat contained in the body of water within the pipes is often sufficient to maintain a safe temperature in the house even after the fire has become very low or out entirely, and also that so long as there is any fire in the boiler its radiant heat is carried into the greenhouse; therefore the temperature of the air within the greenhouse is less liable to be materially affected by any temporary variations in the intensity of the fire, which is a great advantage on small places where the management of the fires is liable to neglect.

The objection to the hot water system is that the temperature of the radiating pipes is so slow to respond to the desires of the operator, the heat contained in the large body of water preventing

the prompt cooling of the pipes when desired, and the body of water also being so slow in responding to increased firing, thus preventing a sudden increase in the temperature of the pipes.

The heating by hot water, however, is effected by two methods, one in which the water is circulated through large cast iron pipes, usually four inches in diameter, for which the advantage claimed is steady heat under fluctuating conditions of fire, which, however, is more than counterbalanced by the absence of prompt and perfect control. This system is, however, the most costly to install. The other system is that in which the water is circulated through small pipes, which, requiring a lesser quantity of water, modifies both the advantages and objections present in the other method.

After carefully considering all points I place the several systems in the following order of merit: For general commercial work and in large private ranges, where fires will receive reasonable attention, steam is preferable. Next in order of preference I would place hot water in small pipes, occupying, as it does, a position midway between hot water in large pipes and the steam system, both in its advantages and disadvantages, and also in cost. The third position is occupied by hot water in large pipes, this being, however, preferable on places where the attention to fires is liable to be variable; also for use in small greenhouses.

On large ranges, even when the regular heating system consists of a hot water plant, the installation of a small steam boiler connected to one coil of 1-inch pipe in each of the houses will be found of immense advantage, especially in rose houses. I doubt if there is a rose grower present who heats by hot water who has not felt the want of such an addition to his heating plant, especially during fall and spring months, when the weather conditions are such as to favor mildew, the conditions of steam heat and the possibility of evaporating sulphur on the heated pipes giving him one of the most powerful weapons for warding off this semi-annual pest.

We will now consider the distribution and arrangement of piping best suited for the several systems. I prefer to carry steam direct from the boiler to the highest point, and then descend on a continual down grade back to the boiler, making an entire circuit of the house with at least one 1-inch pipe, but preferably with two, and arrange such other coils as may be necessary in the most convenient positions for securing the desired temperature in all parts of the house. The object of making one circuit of the house is that in mild weather a little heat can be added, which will effect all parts of the house as evenly as possible, which could not be done with a flow and return coil under each bench, as when the radiation from two pipes would be ample to produce the desired temperature, this heat would necessarily be given off on one side of the house to the neglect of the other. This single circuit pipe is also very convenient for the sulphuring operation to which I just referred.

In steam heating, the coils are preferably of 1-inch and 1¼-inch pipes, and all coils should be valved so as to admit of the most absolute control. In installing a steam heating plant the most vital point, as regards its perfect working, is to arrange for perfect and positive drainage of all pipes; if this point is attended to a noiseless and perfect circulating system is easily provided.

In a hot water plant it is very necessary to provide mains of ample capacity to return the water to the boiler as rapidly as the boiler is able to heat it to a temperature of about 200°, and make all runs from the mains as direct as possible. Mains should have a grade upwards from the boiler of about one inch in five feet, if possible, and running pipes, one of one inch in ten feet or not less than one inch in twenty feet. Expansion tanks should not be placed at the far or upper ends of the runs, as they not only occupy much valuable bench space, but add the risk of damage to plants in case of a sudden splash-over of the hot water, and allow of an escape of steam, which if retained in the pipes would add to the temperature of the radiation from the pipes. A short standpipe should be placed at the upper end of all runs, and fitted with a valve for the relief of any accumulated air and the expansion tank may be placed at any convenient point in the workroom with a connection to the return pipe of the boiler only, and be fitted with a gauge by which the height of the water is readily observed by the attendant. Where 2-inch pipes are used, the tank should be placed at as great a height as convenient, so as to increase the pressure of the water in the pipes and thus allow of the water being raised to a temperature approaching very nearly the boiling point, a great advantage in very severe weather.

Whether it be a steam or hot water heating system, I am somewhat in favor of a little overhead heating surface, not necessarily for regular winter firing, but for use on those damp, foggy days when bottom heat is not required, but when a little overhead warmth to temper and dry out the atmosphere is much to be desired.

We now come to the question of boilers. The purchase of a boiler for heating the new houses causes the average greenhouse man more worry and anxiety than any other feature in the necessary equipment of his houses, but if he will give due consideration to these few vital points the question becomes an easy one to solve. In the first place, the question of first cost must become secondary, that of heating results and fuel economy being of primary importance. A direct and upward travel of the fire and products of combustion means a quick travel and consequent loss of heat into the chimney, so I would say positively, avoid such boilers as have only a direct and upward travel of the fire. Horizontal travel of fire heat is slower and therefore more effective, and in boilers having such direction of fire travel a longer flue surface is possible, and therefore the heating surface and consequent fuel economy is increased. Downward travel of the fire heat is, however, still slower than the horizontal, and consequently boilers in which such travel is provided in reasonable extent are much to be desired. Also bear in mind that the lower surface of horizontal flues is of little, and under the ordinary conditions of cleanliness, of no value, the side and top surfaces of such flues being the effective ones; therefore a deep vertical flue is of more economic value than a wide and shallow one. A deep firebox is desirable, as are also ample fire doors, and doors which will give free and unobstructed access to all parts of the flues for the purpose of cleaning For this purpose holes just large enough to admit a brush are of no practical value; the means of access must be such as to render all parts of the flue visible.

When dealing with a manufacturer or dealer who is thoroughly experienced in and conversant with the requirements of greenhouse work, you will be safe in accepting his advice as to the size of boiler necessary, but in other cases it is safer to get the boiler at least one and sometimes two sizes larger than the published capacity would indicate that you require My reason for this warning is that most boilers on the market are intended for dwelling heating or similar work, in which a high chimney is provided, and in connection with which a sharp, bright fire is carried, with continual replenishment of fuel, whereas in

CHARLES A. SAMUELSON'S EXHIBIT AT THE CHICAGO SHOW.

greenhouse heating the boiler has to do its hardest work at night, with a slow, deep fire and little attention.

CARNATIONS.

CULTURAL NOTES.

December 3.—Occasionally one encounters a grower who, after spending considerable time and money in the production of good blooms, will almost ruin them by his system of packing for shipment. First-quality blooms, when sent direct to the retailer, should be packed almost the same as roses. A very suitable box for this purpose will be thirty-six inches long, twelve inches wide and not less than six nor more than eight inches deep.

In packing such a box, when it will be delivered within six hours from the time it was packed, it will not be necessary to make any provision for keeping the flowers fresh, excepting in warm weather when a little ice can be put among the stems. For a short run, and where your former experience is a guarantee of careful handling, the blooms can be packed with the heads all one way, taking care to pack the box full enough so that they can not jostle too much and become bruised. Where there is the least doubt as to their being handled with the best of care it is better to pack them from both ends of the box, and when it is filled take a handful of damp moss and throw over the ends of the stems in the center of the box, covering this with a piece of paper to keep it from getting among the flowers. Then take a piece of inch square pine and, pressing the moss and stems tight with it, fasten either with screws or nails through the side of the box.

Commission houses do not care to have the flowers come to them packed singly on account of the extra labor involved in the handling and counting. The bunches of twenty-five blooms require, if anything, more careful packing to avoid bruising than do boxes of flowers which are not bunched. For bunched flowers a larger box is packed to best advantage and ten inches is a good depth, as this allows a double layer of bunches without crowding. The box should be long enough to pack from both ends.

In packing the box, unless it is to go a very short distance, wrap the ends of the stems in wet moss and when you have one layer packed cut a piece of lumber to press tightly on the moss-wrapped portions of the bunches and fasten it through the sides of the box. Pack another layer with the wrapped portion of the stems on the piece just nailed in, repeat the nailing down operation and you have a box that can be sent anywhere and handled in almost any manner without injury to the stock.

Wrapping as a protection from frost should be on the outside of the box and should be well done as it frequently happens that, while the best of care may be taken during transit, they are on the delivery wagon for an hour or more on a bitter cold morning. I find that newspapers tacked around the box, varying the thickness according to the state of the weather, and these covered with stout wrapping paper and the whole tied with strong twine, keeps my flowers all right, with no loss to record for the past two years. ALBERT M. HERR.

CARNATIONS REGISTERED.

The following carnations have been registered under the regulations of the American Carnation Society:

By the American Rose Co., Washington, D. C.—Mephisto.—Color of Portia; flowers very large, broad petals, great depth of form, borne on extra long stiff stems; never bursts calyx; free and early bloomer. Luna.—Color purest white; flowers of largest size, borne on very long, wiry stems; narrow foliage like McGowan but exceedingly strong, vigorous growth; very prolific bloomer and unusually fragrant; never bursts calyx. Potomac.—Color pure salmon pink, under artificial light taking an intense fiery depth; very broad petals; narrow grass-like foliage, very robust habit and a profuse bloomer.

By Peter Fisher, Ellis, Mass.—Mrs. Thomas Lawson.—Color dark pink; flowers of immense size, borne on an exceedingly long and strong stem and with an excellent calyx; vigorous growth and a free and early bloomer. The Maine.—Color white. (No further particulars)

By Henry Eichholz, Waynesboro, Pa.—Admiral Dewey.—Sport of Armazindy; white spotted and striped pure pink; can be used as a delicate pure pink; stem very stiff; flower extra large, calyx good, flower nicely fringed and scented.

By Fick & Faber, 1401 Woolsey street, San Francisco, Cal.—Vice Admiral Schley.—Color pink. (No further particulars.)

By M. Wieland, 1913 Maple avenue, Evanston, Ill.—Evanston.—A sport from Tidal Wave in color bright red; a very free bloomer.

By Elmer J. Weaver, Bird-in-hand, Pa.—S. S. Pennock.—Deep pink, very full and of good size, stem and calyx; habit good and a free and continuous bloomer.

By J. M. Gasser, 101 Euclid avenue, Cleveland, Ohio.—Merrimac.—In color a trifle darker than Tidal Wave; flower of fair size on a stiff wiry stem and with an excellent calyx; plant in habit resembles a William Scott, easy of propagation and an exceptionally free bloomer.

ALBERT M. HERR, Sec'y.

SEMPLE'S ASTER.

Semple's Asters.

Good samples of this popular aster are shown in the accompanying illustration. These flowers were grown from seed sowed during the latter part of April, and they measured five and three fourths inches in diameter, with stems three feet long. John Cook, of Downer's Grove, Ill., was the grower.

ROSES.

NAME OF ROSE.

ED. AM. FLORIST:—Please inform me in your next number as to the name of the enclosed rose, stating also whether it is a good variety for forcing and what care it should have. C. S.

Replying to the above inquiry, as near as I can judge by the condition of the flower sent—it was practically dried up, and only three small leaves came with it—I think it is Mlle. Alice Furon. This is a very nice variety but does not bloom free enough for general cultivation for winter blooming. JOHN N. MAY.

TOO MUCH FERTILIZER.

ED. AM. FLORIST:—What is the best course to pursue with roses which have been given too much fertilizer? The plants are in benches and exhibit general debility, the leaves turning white and dropping. INQUIRER.

Physicians, when called upon to treat cases where the patients have been indulging in too much stimulant, invariably prescribe a very different diet, and where the patients can be induced to give up the stimulant entirely and be content with plain, wholesome food and drink, they, as a rule, regain their full health and vigor unless the disease has taken too strong hold of their system.

"Inquirer" should put his plants on a low diet, give them only sufficient water to maintain what root action they have and to retain their foliage, and give them all the fresh air possible without overdoing it. If the stimulant was in the form of mulching, it should all be taken off and if any of the roots are on the surface a little fresh soil should be spread over them. Keep the night temperature down to 56°, with a little fire heat; syringe lightly overhead every fine morning. Continue this treatment till the plants show that they are regaining their lost vigor. When this comes they should get a more liberal portion of water, but nothing else till the soil in which they are growing is well filled with active working roots. JOHN N. MAY.

Carmody's Eloquence.

At the opening of the twelfth annual festival of the State Florists' Association of Indiana at Tomlinson Hall, Indianapolis, November 8, President J. D. Carmody made the following interesting address:

The scene before us to-night is one that should inspire all with a desire to know something about the design of the Great Creator in giving to man this wonderful production of nature, and my remarks on this occasion will be simply to call your attention to the unwritten history of flowers and later on how this nation should utilize some of them in an ideal way as well as for decorative adornment.

Flowers conspicuous in graceful form and glowing colors are not necessary to the production of either seed or fruit, for many plants, trees and shrubs go through the routine of growth and reproduction without noticeable bloom. The fig family produces fruit without flowers to herald its presence and, by the way, I am inclined to believe it was a fig that Eve ate in the Garden of Eden instead of an apple as many would have you to believe, for apples are preceded by blossoms and I am of the opinion that flowers were an afterthought of the Creator and not in existence till after the advent of woman. In proof of this opinion we argue that nothing is created before a demand exists. Woman—the flower of the animal kingdom—was not created till man found out there was something lacking to make his happiness and misery complete. God listened to his tale of woe and made woman, and she seems to fill the bill.

The florist knows that without woman for a patron it would be useless to grow flowers and certainly he is not more wise than the Creator. Therefore having made woman to please man, flowers were made for woman's better enjoyment and happiness, and were further utilized in the general plan of reproduction in botanic structure. Thus to woman, I believe, the world is indebted for the floral kingdom and all the ideal conceptions that follow in the train of poetical thought which ever hovers around objects of beauty, grace and grandeur. From flowers poets have received inspiration that gave birth to grand expressions of praise to the Creator. Mythology has created a coterie of sprites, gnomes and fairies who dance attendance to a queen of all the flowers. Nations have selected special favorites which are recognized as the tutelar flower of their land and their people do homage to its presence at home and abroad.

All the world accepts the rose as the flower of England; the shamrock belongs to Ireland, the thistle to Scotland, the iris to France, the cornflower to Germany and in this hall we are assembled to do honor to Japan through the homage we bestow on her national flower, the glorious chrysanthemum. While nearly all other nations have their national flower to love and cherish, we, who believe our nation the grandest on earth, have to borrow our neighbor's children to pet when our hearts are filled with a desire to magnify the choicest gift of God to man, flowers the after thought of the Creator.

Is this as it should be? Are we as a people the money-worshippers the Spanish call us? Are we devoid of all sentiment and love of the beautiful in nature? Heaven forbid! 'Tis only the voice of ignorance that makes such assertions. Our institutions of benevolence denote our charity and kindness of heart. Our conservatories of music and the arts bespeak our culture. Our frequent flower shows occurring at stated periods all over the land and the grand parks in our larger cities evince great achievements in the line of floriculture.

We are a people that loves flowers and uses them to a great extent for decorative purposes. But how few of us are versed in the language of flowers. The sentiment of flowers is too much neglected. How grand it would be to have one flower recognized as the ideal flower of Indiana. At home and abroad, wherever that flower was seen, it would brighten the eye and quicken the pulse of the Hoosier. If in a foreign land, he would take it to his heart and exclaim, "This is the flower of my native land; God bless it and my own sweet home!" If I could have the selection of that flower, it would be the large white field daisy, common all over our state, yet loved by all, finding a place in the palace of the rich as well as the hovels of the poor.

If you will hear with me a few minutes longer I will relate in verse my experience among the fays and fairies who surround the castle where dwells the queen of all the flowers, while the subject of a national flower was being discussed by the queen and her subjects:

THE NATIONAL FLOWER.

Fair Flora heard it whispered round,
That mortals who dwell on Freedom's ground,
Thought to choose from out her subjects fair
One flower, so grandly beautiful and rare,
And yet so kindly loved and widely known,
That all who tread this earth should own
The magic of its gentle sway,
And sing its praise in gladsome lay.
At home, abroad, on land and sea,
Pride of the nation this flower should be;
Wove in the flag, 'mid stars 'twould wave,
"O'er land of the free, and home of the brave."
And every patriot's heart would swell
With joy and pride, as he'd hear them tell,
Columbia's brow with beauty is crowned,
Our long sought gem at last is found.

Pleased was the goddess to hear the news,
And, bathing afresh with glistening dews
Those loved attendants by heaven sent
To bless and beautify this continent,
She breathed to them what she'd learned
In evening zephyrs, that gently turned
The quivering leaves, and lulled to rest
Helpless birdlings in their downy nest.
And to aid dull mortals in their choice,
To flowers gave a mortal's voice,
And bade them speak their own sweet will
From out the wood, glen or hill,
Where'er their rootlets sought and found
A welcome from coogenial ground.
"But hark ye, subjects mine, while I express
Those attributes they must first possess
Who would woo and win such great renown
To wear in Freedom's land the only crown.

To alien blood you may not own!
Nor can you in other lands be known
To hold that grand imperial name
That crowns with honor, rank and fame.
Ye must dot the soil from sea to sea,
From northern lakes, to southern lee,
And every state that helps create,
This happy land, so free and great,
Must know thee well and love thee too,
Else to thee they'll ne'er be true.
But mark me well, if thou thrive best
On, hill, or dale, or on the quiet waters rest,
Be thou proud and high as oaks do grow,
Or meek and humble as the grass below,
Thy mission is a noble one and grand,
And through untold ages this free born band
Shall look to thee, bright tutelar star,
To guide through earth, to heaven afar."

Myriad was the floral throng
That listened to the goddess' gentle song,
(For in song she ever chants her tidings),
But many shrank still closer to their hidings
In the glens and dells, or 'neath the heather,
Too modest, or too listless, to endeavor
Their claims to press, while others, all too proud,
Tossed their haughty heads and in voices loud,
Rejected with disdain this mortal mission;
Deeming it beneath their spiritual position
To share with mortals ideal fame,
E'en for a grand immortal name.

At length spake the rose—of all the flowers queen—
"We've adored thee, gentle goddess, long as we've
been
Loving subjects in thy beauteous realm.
Thy words are wisdom, and o'erwhelm
Thy subjects with their sublime import.
It grieves me much that a foreign court
Doth my firm allegiance claim,
Else with joy and gladness would I aim
To win, and winning, regally wear,
The royal prize that waits the pure and fair.
'Tis true they come not empty, who receive
Adoration from these mortals. We believe
The grace and beauty they possess,
Fit recompense for every fond caress
They give, receive, yet all honor hold
Which makes the glory e'en two-fold."

Then to mortals she gracefully turned
Her queenly face and calmly said, "I've learned,
Most noble nation of the earth,
'Tis in thy heart to honor floral worth.
If this be truly thy intent
A boon I crave, that I present
The flower of all the world most divine;
Her form doth grace and loveliness combine;
Her breath adds incense to the summer air.
Modest is she, and in beauty none compare
With my sister, Lily of the Waters.
Nymphæa she is called by earth's fair daughters,
For as a nymph she floats on every flood
That mirrors heaven's arch and verdant wood
Within this continent. White as the driven snow
She sits, the emblem of purity below;
Glorify her beauty, deify her name,
Emulate her virtue in your strife for fame."

With these words the rose departed,
The lily hid her modest face,
The golden rod seemed broken-hearted;
Others drooped in sad disgrace.

Flora closed her courtly session
From mortal eyes discerning,
Leaving them in hot discussion
As to the flower most deserving.

CHRYSANTHEMUMS.

NAME OF CHRYSANTHEMUM.

Replying to "C. F. P.," we have to state that we fail to recognize the variety, as no foliage is sent with the bloom. The style of the flower reminds us very much of the California variety, Buff Globe. C. W. J.

WORK OF THE COMMITTEES.

The committees of the Chrysanthemum Society of America held their last sessions for the year in their several cities on November 26 and entered the following records:

NEW YORK, N. Y.—John Lewis Childs, Floral Park, N. Y., exhibited White Maud Dean, white, pink tinge, incurved, Japanese; scored commercial scale 85 points.

BOSTON, MASS.—Grove P. Rawson, Elmira, N. Y., exhibited Eclipse '98, light yellow, incurved, Japanese; scored both scales 94 points.

PHILADELPHIA, PA.—Nathan Smith & Son, Adrian, Mich., exhibited Nagoya, yellow, Japanese, reflexed; scored commercial scale 87 points. Xeno, by same grower, pink, Japanese, incurved; scored commercial scale 89 points.

CINCINNATI, O.—John N. May exhibited Adula, white, incurved, Japenese; scored commercial scale 85 points. This is the same variety that was exhibited as 12–95 at Boston, Philadelphia and Chicago November 19. Nathan Smith & Son exhibited Xeno, pink, Japanese, incurved; scored commercial scale 85 points.

CHICAGO, ILL.—Nathan Smith & Son exhibited Xeno, pink, Japanese, incurved: scored commercial scale 89 points.

ELMER D. SMITH, Secretary.

OBITUARY.

ALEXANDER W. LIVINGSTON.

The pioneer seedsman of Ohio, Alexander W. Livingston, died at his home in Columbus at midnight November 10, aged 77 years. He came of Scotch-Irish parentage, and was born October 14, 1821, at Reynoldsburg, Ohio, ten miles east of the capital city. His parents were Ohio pioneers, and his early life was filled with the hard toil of pioneer farming. The surrounding country being at that time almost a wilderness his parents were able to give him but few advantages. His opportunities for getting an education were very limited, attending public school a few winters only, after he was 10 years of age. He had a keen eye and a ready mind, and from his early years trained himself in the study of nature's methods of work, and was soon recognized among neighbors and friends as an authority on plants, weeds, etc., on account of the accuracy of his observations.

When he reached his majority he went to work on his own account by the day, job, or any other way. During this time he worked four months for a neighboring gardener and seed grower, who had at that time a limited box commission seed trade. This short experience, no doubt, gave him a taste for what was to be his life work, and was the only opportunity that he had of benefiting by the direct instruction of others in seed growing. At the age of 23 years he married a woman who was to him a helpmeet in the full sense of the word. They began life together on a leased farm of 113 acres, where they lived for eleven years, and where their family of seven sons and three daughters began to be gathered about them. Here also enough money was saved to purchase a farm of fifty acres, and a large amount of experience accumulated in the growing of vegetables and seeds, as he had been engaged while on this farm in seed growing for the trade, trading in stock and general farming.

Soon after purchasing his new farm he quit general farming altogether and devoted his entire time to the seed business, having bought out the box commission seed business of his former employer. This business he continued until 1877, when, after severe losses for two years, he changed his mode of operating from a commission business to growing and selling seeds direct to the growers, issuing a seed catalogue annually from that time until the present date. In 1877, in order to obtain better business facilities, he removed to the city of Columbus, where he founded the business now carried on by A. W. Livingston's Sons. Here he lived the remainder of his life with the

THE LATE ALEXANDER W. LIVINGSTON.

exception of about ten years, between 1880 and 1890, which time was spent in establishing a seed business at Des Moines, Iowa, and which is still carried on by one of his younger sons.

Most of the time that Mr. Livingston was engaged in the seed business he conducted experiments with new varieties of vegetables, striving always to produce those of real merit. He was always deeply interested in tomato culture and enjoyed relating his first experience in becoming acquainted with the vegetable which he afterward made famous by his experiments. He was but 10 years old at the time, and, gathering a few wild tomatoes in a fence corner, where he had found them, took them to his mother, who informed him, as was the general opinion at that time, that they were poisonous and could not be eaten. As soon as he engaged in the seed business he began giving much of his attention to the improvement of the tomato. For many years he was unsuccessful, but, persevering, finally succeeded. His aim was from the first to grow a tomato that would be always smooth in contour, uniform in size and fine in flavor. After repeated failure he finally hit upon the theory that the vegetable kingdom was like the animal kingdom, and that by selecting the best plants each year the standard would be raised until the result desired would be obtained.

The theory put into practice was successful, and after many years of experimenting the first perfect tomato was obtained. It was named the Paragon, and soon became famous the world over. Up to that time tomato culture had not been of any particular interest. With the discovery of the Paragon soon his other smooth varieties followed, and in time tomato culture began to be one of the great enterprises of the country. Since that time Mr. Livingston discovered many other superior kinds of tomatoes (Honor Bright being his last introduction) and some of them developed to meet the conditions of climate and soil in different parts of the country. He was very successful and his discoveries became so popular that his name soon became a household word and was known throughout the land at the time of his death. Besides being the originator of many of the standard tomatoes of the day, he engaged in raising many other varieties of vegetables; notably melons, sweet corns, cucumbers, etc. His development of a perfect tomato was the attainment that made him famous, however, and he will long be remembered for that discovery.

Mr. Livingston was one of the foremost men of his community in all matters of public interest. In hospitality, needed improvements, larger educational facilities and disinterested liberality he took a place in the front rank. Although not a member of the American Seed Trade Association, when able to attend its meetings he took a lively interest in its deliberations. He was much interested in Farmers' Institute work, attending meetings nearly every week for several winters past in different sections of the country. His motto in business was, "Give every man the worth of his money."

A widow, five sons and three daughters mourn his loss. He was twice married. He is dead, but his works live after him.

New York.

BUSINESS UNPRECEDENTEDLY DULL.—STORM AFFECTS FLOWER SALE.—FERNS SELLING LOW.—GLASS SUFFERS FROM SNOW.—FINE GERANIUMS.—VISITORS.

Not for a long time has there been so general a feeling of dejection in the cut flower trade as is manifested this week. It extends all through the list, retailers, growers and wholesalers all agreeing that the present distress is unprecedented for the season. Looking for the cause, several contributing factors are disclosed. In New York City, Thanksgiving Day has never amounted to much as a flower holiday. Notwithstanding this, it appears that a large quantity of flowers in the aggregate, were held over by growers in anticipation of a better sale on Wednesday and Thursday, some parties sending in three times their usual cut. This would, in itself, have made trouble but when Wednesday and Thursday showed up in a soaking rain storm the result can be imagined. Friday accomplished nothing and on Saturday the blizzard arrived, since which time severe weather has prevailed, while in the meantime receipts have been piling up with no visible or imaginable outlet. The crop of many growers in now fully on and this makes the situation very discouraging especially when it is considered that the first half of December is always a tough period when money is spent very spar-

ingly, so that no relief is in sight until the holidays come. Ten dollars a thousand for roses is a tough nut to crack at the first of December, but that is considered a good sale to-day. The depression extends to all lines of cut flowers although chrysanthemums are well on the wane and not seriously in the way.

Plant trade moves rather slowly with lower prices prevailing on most staple varieties. Small ferns, while moving in enormous quantities, are being sold this fall at figures that seem absurdly low and leave but little, if any, margin for profit.

The appealed suit of Bridgeman against Thorley on a claim for one-eighth interest in the business during seven years of service was decided in the Supreme court on Thursday in Bridgeman's favor. The amount involved is about $30,000.

C. W. Ward's geranium houses are a brilliant and inspiring sight at present. There are about eighty varieties, including all the newest and best of the European introductions.

Clucas & Boddington have received a large shipment of Asparagus Sprengerii from Italy in apparently perfect condition.

H. A. Bunyard has received a large order from Sydney, N. S. W., for his florists' cabinets.

A number of reports have come in of glass broken in by weight of snow during the recent storm. Greenhouse owners take notice.

Two handsome specimens of Cocos plumosus, twenty feet high are among the decorations of Small & Sons' store.

Paul Berkowitz, of Bayersdorfer & Co., was in town Monday bound for the Hub.

Visiting New York: J. C. Vaughan, Chicago; Stephen Hoyt, New Canaan, Conn.; Edwin Lonsdale, Robt. Craig and John Burton, Philadelphia.

Philadelphia.

THE VIOLET SITUATION IN THE QUAKER CITY.—ROSES AND CARNATIONS ADVANCE IN PRICES.—GONTIERS IN DEMAND.

Violets may have been plenty in this city at one time, but it was not during the early part of the past week. There are a few bunches of the southern stock to be had, but as these are seldom sweet they are not much sought after. Monday and Tuesday before Thanksgiving day found a good demand for violets but none were to be had, while on Wednesday "the woods were full of them," and the demand was not large enough to use them all. Many of the bunches of fifty were very small, being made for the most part of partially opened flowers which had neither fragrance nor beauty. The loss in such cases generally falls on the grower, who in his eagerness to get an advanced price for a larger quantity often fails by reason of the low standard of his flowers and an overstocked market. Orders from headquarters to rush along the stock for an eager market seem to have but little effect on the grower, who thinks he knows best, and finds out his mistake too late. Such holding back of stock is a great detriment to the business as the retailer, on account of the apparent scarcity, is afraid to take orders, when, if he knew the true state of affairs, he could act intelligently and everyone concerned would be benefited.

Roses have been fairly plentiful but the demand has been good and even at the advanced price few if any remain unsold. All varieties here have taken a jump in price. Brides and Bridesmaids are much improved since the weather has set in cold, the difference in size and color over a week or ten days ago being very marked. Meteors have not showed up at all well this fall and even at this late date they are far below form. There is but little variety in the teas. La France, Carnots and Gontiers are conspicuous by their absence. Gontiers are in demand, $4 being easily obtained for all the stock in sight.

Carnations have also joined the high price crowd and good stock sells readily for $2 per hundred. A little more silica in the stems would help most of them, as many otherwise good flowers have not the strength of stem to hold them up.

Wm. J. Baker's new wagon is all right. It has ball bearing wheels, the printing is in good taste and everything about the vehicle is strickly up-to-date. K.

Boston.

GREAT THANKSGIVING TRADE.—THE BLIZZARD CONSIDERATELY KEPT AWAY UNTIL IT WAS ALL OVER.—ENORMOUS SHIPMENTS TO NEW ENGLAND POINTS.—FINE EXHIBITIONS OF CHILDREN'S HERBARIUMS.

Boston has just had a blizzard experience unique for November, and which we have no desire to see repeated in November or any other time. It was very thoughtful of it to stay away until Thanksgiving was all over. Thanksgiving was pretty tough as to weather, we thought at the time, but in the light of the visitation of three days later it seems to have been lovely. Boston is always favored with a big flower trade at Thanksgiving. It rivals Christmas when they buy flowers as they did this year. Trade was good all through the week, but it reached its culmination on Wednesday, when it seemed as if every village in New England was clamoring for American Beauties, Meteors, chrysanthemums and carnations. The capacious refrigerators of the city wholesalers that had been packed to the doors steadily for weeks, were actually emptied clean before Wednesday night and many an order had been turned back because there was nothing within reach to fill it with. The city trade was large; the country trade was prodigious. Welch Bros. shipped no less than sixty-five boxes of flowers on one train alone—the 11:30 a. m. going northward, Wednesday. Prices did not advance greatly until Wednesday when it became evident that the supply was short and that buyers were ready to stand a sharp advance rather than to be turned down. Yellow chrysanthemums were in lively call and flowers that had gone slowly at 75 cents per dozen up to that time, brought $2 a dozen without a protest. American Beauties doubled up; in fact all kinds of roses did, when of good quality. As usual the refuse remained till the last, buyers being unwilling to touch it at any price until they had to take that or nothing. Many more carnations could have been placed, especially the colored varieties, for which there was a continual hunt for two days. Dark weather and the stimulus to cut closely for Thanksgiving left the supply very short for the succeeding days and so the famine continued and good prices have prevailed ever since.

The exhibition of herbariums by the children at Horticultural Hall last week was a record breaker, there being over two thousand one hundred specimens exhibited, filling the two halls completely and excluding quite a number of mounts for which there was no room. The work, done by children from seven to sixteen years of age, was really marvelous, many of the most difficult species being preserved in perfect form and color and beautifully mounted, with the botanical and common name and habitat neatly inscribed on each. The display attracted many visitors, who wondered at the skill and patience shown by the little ones and enthusiastically commended the committee of the Horticultural Society who have put into operation this beautiful and healthful nature study.

James Delay & Son have secured the privilege of a flower stand in the new South Union Station which is soon to be opened.

In town: S. S. Skidelsky, Philadelphia, Pa.

Albany, N. Y.

Among the various points of interest about the capital of the Empire State, the floral establishments located on Pearl street are by no means the least attractive, and those who contemplate a visit to the metropolis to study up-to-date methods of conducting flower stores would do well to stop over at Albany and call on Goldring Bros., H. G. Eyres and Whittle Bros.

Goldring Bros'. greenhouses are located at Slingerlands where they have three houses of American Beauties that are beauties indeed. Not a plant but what is healthy, thrifty and well developed, not a bloom but what is perfect and borne on a long, stiff stem. Their Meteors and Bridesmaids may well rank with what is generally called choice stock. Of carnations they grow four houses, confining themselves to the standard varieties. A white seedling of their own, named Catherine Goldring, looks quite promising. It possesses size and fragrance and is a free bloomer. Bulbous stock is grown at this establishment in large quantities and what is rather unusual is the sight of Roman hyacinths in bloom at this time. The bench of Swanley violets was fairly covered with a mass of white blooms, both flowers and foliage being perfect, and the same holds true as regards their Marie Louise and Farquhar.

The Davidson greenhouses, one of the oldest establishments in the city, are closed and will likely be torn down in the spring.

Peter Barr, the famous horticulturist from London, has been recently entertained by Sam. Goldring, who has known Mr. Barr for many years. HOMO.

Worcester, Mass.

Trade on the whole remains rather quiet with a plentiful supply of good blooms of carnations, roses, chrysanthemums, violets and Roman hyacinths. Chrysanthemums are going a little slow, but by dint of easy prices we have not yet had any especial surplus. The Harvard-Yale foot ball game caused quite a little run on crimson chrysanthemums, and violets, but not nearly so much as in former years.

F. B. Madaus is receiving congratulations upon his marriage to Miss Minnie Judge.

C. W. Menck, for many years in charge of the bulb department at H. F. A. Lange's establishment, is the happy father of a son.

In town: D. M. McRorie, representing W. A. Manda. A. H. L.

THE AMERICAN FLORIST

Subscription $1.00 a Year. To Europe, $2.00.
Subscriptions accepted only from those in the trade.

$1.00 per inch. Cash with Order.
No Special Position Guaranteed.

Discounts, 6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

Holly and Greens—Special Telegram.

NEW YORK, Dec. 2.—The heavy snows along the Atlantic coast have hindered holly cutting, and the quality has also deteriorated; there may be a scarcity of this as of bouquet green.

THE fraudulent check works nearly as smoothly as the palm swindle. Look out for them both.

CORRESPONDENTS in nearly all sections of the country report exceptionally good trade Thanksgiving week. Christmas trade prospects are highly encouraging.

PELARGONIUMS have not decreased in price: $4 per hundred was intended in S. D. Brant's advertisement last week, which appears again in this issue, instead of $3 per hundred.

THE family of Mrs. Theresa Loeb have donated $1000 to the National Farm School at Doylestown, Pa., for the erection of a structure to be known as the Theresa Loeb Memorial Greenhouse.

THE executive committee of the Society of Danish Gardeners has passed a resolution to the effect that young men entering the profession in Denmark shall serve an apprenticeship of five years in not more than three situations. At the expiration of this term each apprentice will receive a journeyman's certificate from the society.

DAN'L B. LONG, of Buffalo, N. Y., has sent us some very attractive calendars, designed for distribution by florists among their patrons. The designs show considerable artistic skill, and the names on the samples show that they have already met with wide approval in the trade. In a miscellaneous assortment we find represented such floral concerns as Palmer and Anderson, of Buffalo; E. G. Hill & Co., Richmond, Ind.; Jos. Kift & Son, Philadelphia; George M. Kellogg, Kansas City, Mo.; and W. J. Smyth, Chicago.

WE are in receipt of the ninth announcement concerning garden pupils in the Missouri Botanical Garden. From this we learn that two scholarships will be awarded by the director of the garden, prior to the first of April next. One of these may be awarded on the nomination of The St. Louis Florists' Club. The other will be awarded on examination. Vacancies which may subsequently arise will be filled annually, after published announcement. Applications for these scholarships, to receive consideration, must be in the hands of the director not later than the first day of March. The preliminary examination will be held on Tuesday, March 7, at the Botanical Garden, St. Louis, at 10 a. m. If there are more than two applications, the examinations will be competitive and held at the same place on Friday and Saturday March 10 and 11. Full particulars may be had on application to Prof. Wm Trelease, Missouri Botanical Garden, St. Louis, Mo.

Defective Packing and Shipping.

The transportation of floral products from the greenhouse to the commission man or retailer does not as a rule receive the consideration which its importance demands. Whether it be cut flowers, plants in bloom, or decorative ferns and palms, the greatest care should be taken to guard against every possibility of harm, so that nothing short of a railroad disaster or runaway team would interfere with their safe delivery. Some successful growers, after bringing their stock to the highest state of perfection, have been guilty of gross negligence in this respect. They have packed pans of cyclamens and other plants in the bottom of a box, nailed the cover on top, marked it "This side up with care" and let the express company do the rest, a course which generally results in a hash of soil, broken pots, leaves and flowers. A box that is not to be turned upside down should never be closed on top, as otherwise it is invariably toppled over, and the express company cannot be held responsible if the box remains intact. Plants in bloom, such as lilies, roses, etc., should have the flowers protected, or in nine cases out of ten they will arrive at their destination in a bruised and comparatively useless condition, and thus at last become a loss to both grower and purchaser, where a little forethought and care in packing would have made them a source of profit to all concerned. Plants with soft foliage, such as the Boston fern, are frequently ruined in delivery, where through carelessness in tying, or in leaving the plants loose to be whipped about in an open wagon, the tips of the fronds receive irreparable injury. Cut flowers are often rendered almost unsalable in the same way, and too frequently any old box, no matter what previous service it has seen, is employed for their shipment, a proceeding which accounts for the varied fragrance of spices, tobacco and soap which characterizes stock of the same kind from the same grower. Many flowers are packed immediately after cutting, when they should be placed in water for a few hours or, better still, over night. In consequence they are soft and easily damaged A chapter could also be written on the cutting and picking of flowers, a correct knowledge of which seems to be lacking in many establishments of the highest character in other respects.

The American Florist Company's Directory.

The final corrections are now being made for the next edition of our directory of florists, nurserymen and seedsmen, to be issued January 1, and we trust our readers will promptly inform us of any business changes which have come to their notice within the past year. Advertisements and orders for the use of large type in names of alphabetical list should be mailed as early as possible.

Catalogues and Cut Flower Price Lists Received.

Vaughan, McKellar & Winterson, Chicago, Ill., florists' requistes; Daniel B. Long, Buffalo, N. Y., florists' calendars; Ellwanger & Barry, Rochester, N. Y., novelties, trees and shrubs; Cincinnati Cut Flower Co., Cincinnati, Ohio, cut flowers; Holton & Hunkel Co., Milwaukee, Wis., cut flowers; A. C. Prince, Chicago, Ill., cut flowers; Ellis & Pollworth, Milwaukee, Wis., cut flowers; Wm. F. Kasting, Buffalo, N. Y., cut flowers; W. A. McFadden, Cincinnati, Ohio, cyclamens; Rudolph Kircher, Wandsbek-Hamburg, Germany, plants and seeds; Albert Cauchoix, Orleans, France, roses; The Rosary Flower Co., New York, N. Y., plants and flowers; W. W. Barnard, Chicago, Ill., Christmas decorations; Vaughan's Seed Store, Chicago and New York, Christmas decorations; Welch Bros., Boston, Mass., cut flowers; Wm. F. Kasting & Co., Pittsburg, Pa., cut flowers.

Florists' Flower Shows.

Florists whose enterprise has led to profitable public displays of their chrysanthemums in the past few days are: Miss Tinnie K. Freeman, Orleans, Mass.; A. J. Taylor, Burlington, Vt.; John J. Arnold, Homer, N. Y.; P. Finn, Carthage, Mo.; John G. Sholl, Burlington, N. J.; Christ. Winterich, Defiance, Ohio; N. J. Burt & Co., Burlington, Iowa; B. Schroeter, Detroit, Mich.; C. Scrim, Ottawa, Ont.; A. L. Harmon, Iola, Kas.; Broadway Greenhouses, Toledo, O.

Greenhouse Building.

New Brighton, N. Y.—N. Muller, one conservatory.

Brattleboro, Vt.—P. S. Chase, one greenhouse.

Bristol, Conn.—T. L. Thomas, house 15x65.

Williamsport, Pa.—D. E. Gorman, four commercial houses.

Newton, Mass.—Fannie C. Coburn, conservatory 20x75.

Springville, N. Y.—Geo. Staffinger, one commercial house.

Lowell, Mass.—H. B. Greene, three commercial houses.

Collamer, Pa.—L. D. Miller, three commercial houses.

Waterloo, N. Y.—E. Smith, two greenhouses.

Wolfboro, N. H.—G. P. Gridley, house 27x60.

Newton Center, Mass.—W. A. Sanderson, one greenhouse.

Westbury, N. Y.—Luessen Hotel, one conservatory.

Oswego, N. Y.—Peter Salter, one greenhouse.

Islip, N. Y.—C. D. Moss, one greenhouse.

Oswego, N. Y.—Peter Salter, one greenhouse.

Columbus, Miss.—Adolph Dieterich & Co., two houses 16x75, one house 22x140.

Doylestown, Pa.—National Farm School, one greenhouse.

Detroit, Mich.—City parks, show house 30x114, propagating house 40x125 and four smaller houses, potting shed 24x114.

Keeping Hardy Cut Ferns in Winter.

ED. AM. FLORIST:—Please give full particulars of the best method of keeping or storing hardy cut ferns in winter and oblige. SUBSCRIBER.

Pack in boxes, 3,000 to 10,000 in each, with holes bored in the sides, top and bottom, say four or five one-inch auger holes on a side. Pack with damp, fresh sphagnum between each thousand and around the sides, and then place boxes in cold storage at a temperature of 30°. I have five millions of them now packed and stored in this way. L. B BRAGUE.

Grevillea Robusta.

ED. AM. FLORIST:—You will oblige very much by giving the best method of propagating Grevillea robusta. J. K.

It may be that there are other methods of propagating Grevillea robusta, but I have always grown it from seeds sown in spring, employing a light compost and a temperature of about 50°. GROWER.

Wholesale Prices.

ED. AM. FLORIST:—Through the AMERICAN FLORIST we desire to be protected from the practice of the wholesale cut flower dealers in sending out price lists on cards, without envelopes, thus giving to the public, through postoffice employes, the wholesale prices on cut flowers. We are in receipt of a mailing card 5½x11 with prices in large figures which can be read plainly by any person handling it; hereafter we will consign all such price lists to the waste basket and hope that other retailers will do the same, only patronizing those who send their prices under the cover of an envelope.

Yours, RETAILER.

Culture and Propagation of Araucarias.

ED. AM. FLORIST:—You will oblige by giving in the AMERICAN FLORIST the best soil and temperature for araucarias. Are the plants of these from cuttings any better than plants from seeds, as I see stated in some of the catalogues. P. F.

In reply to above, the araucaria is not at all particular as to soil, provided it is sweet and porous; nor is it so very nice as to temperature. It will thrive, all other things being equal, in as many different degrees of temperature as any other popular decorative plant with which I am acquainted. The higher the temperature in which it is grown the longer will be the joints between each whorl of branches. Plants from seeds are not nearly so satisfactory as are those from cuttings. Seedlings are too "leggy" to make satisfactory plants, without some manipulation. If "P. F." is catering to a local trade his best plan will be, in my judgment, to buy as many plants as he thinks he can sell to his customers to advantage, charge a reasonable profit, and let some other florist wrestle with the problem of propagating the Araucaria excelsa. E. L.

Chicago.

CHRYSANTHEMUM CROP HAS NEARLY ALL BEEN HARVESTED.—THE ROSE MARKET.—VIOLETS ARE SELLING WELL.—NOTES AND COMMENTS.

The chrysanthemum cut has nearly reached its close although some very fair Mrs. Jerome Jones and Modesto are still coming in. The season's production is estimated at twenty per cent in excess of last year's in bulk, but it is considered rather doubtful if the cash returns were any greater. The stock moved very slowly at times this season and the high grade blooms were not sought with such avidity. Commission men consider that the man who made most for his work was he who grew three or four blooms to a plant, obtaining for them 75 cents to $1 a dozen.

The scarcity of American Beauties becomes more acute each day and prices hold very stiff. There is an ample supply of other roses, pinks being over-abundant and whites in only fair demand. Meteor is too dark colored because of the weather. There is a difference of opinion between growers and buyers as to what constitutes first quality stock and it is only the extra select which commands a ready sale.

Carnations were short in the early part of the week, but the quantity of flowers in the market materially increased in the last three days. A notable feature is the increased demand for the novelties and fancies. Violets are in excellent demand and the supply of good stock is inadequate.

Harrisii lilies at Prince's, the only ones which have thus far reached this market, have this week fallen from $3 to $2.50 per dozen.

There is complaint from growers that consignments to this market November 23 did not bring expected returns, nor much more than half the figures realized for either the first two days or the last day of the week. For this, however, the growers must assume responsibility as many of them held back their crops until Wednesday in anticipation of high prices, with the result that the heavy receipts broke the market. Had the week's supply been evenly divided every one would have been better pleased.

At the meeting of the Florists' Club last evening there occurred a very interesting discussion as to the advisability of holding a spring flower show. Emil Buettner, the warmest advocate of such an exhibition, introduced the subject.

Frank Benthey & Co. will on Monday open a commission house at 37 Randolph street. Mr. Benthey has been with S. B. Winter prior to embarking for himself.

John Richter, Duluth, Minn., well known in the trade here some years ago, was on November 30 married to Miss Yahnke, a former employe of Phil. Hauswirth.

Klehm's Nurseries will in the future sell their product on consignment, discontinuing their counter at Kennicott's.

A. L. Schmidt, one of the new proprietors of the Reissig greenhouses at Riverside, and a Miss Gulden were married Thanksgiving week.

W. A. Reiman, of Vincennes, Ind., has been visiting his brother here for a day or two and has inspected various florists' establishments.

One wholesaler has estimated that the aggregate of business done in 1898 by Chicago wholesale and commission men will approximate $800,000.

Mrs. Hood, wife of W. C. Hood, late gardener to George and Robert Scott, Lakeside, Ill., died of dropsy Nov. 28.

C. A. Samuelson has the flower booth at the Jewish Bazaar at the Auditorium this week.

Richmond, Ind.

The firm of E. G. Hill & Co. has made this city so famous in the world of floriculture that one instinctively turns first to the establishment of this concern. But there is so much on this place to interest the average florist that one must make a separate story of it.

Passing for the time to other prominent growers, Mrs. E. Graves is found busy with her carnations and violets. The former grown here all summer indoors have given entire satisfaction, and Painted Lady was noticed in remarkably good form. Carnations planted in the benches after early chrysanthemums have not been a success, and Mrs. Graves will hesitate about repeating the experiment. A few roses are grown, mostly Bridesmaid, but violets and carnations are the principal market crops.

George R. Gause succeeded in closing in his extensive new greenhouse plant just before the first cold snap of the season came on. The houses are already well filled with promising young stock, and although a late start was made, indications point to a good business before the season closes. Mr. Gause still takes great interest in Rex begonias, and his stock of many leading varieties is both large and good.

Beach & Co. have a large retail trade, and carry a general stock useful in that line of business. One Rex begonia grown here in a basket was a marvel of luxuriant health, showing well the adaptability of these plants to conditions other than those generally advocated. Some plants in twelve-inch pans of Begonia Bertha McGregor, also of the Rex section, were remarkable for their vigor and attractiveness.

Fulle Bros. make roses and carnations their specialties, and they are having much success with them. These young men were formerly with E. G. Hill & Co., and the progress they are making speaks well for their early training.

Mr. Evans, at the Quaker City Machine Works, reports an excellent business in ventilators, and his employes are rushing out machines to fill many orders still in hand.

Holyoke, Mass.

E. H. Howland gave a chrysanthemum show at his greenhouses which was well attended. His chrysanthemums in general, and those grown upon single stems in particular, were exceptionally fine this season, and were well worth seeing. Specimens of Bonnaffon, Mrs. Robinson, Wanamaker and others would compare well with the best of their kind exhibited in Chicago, New York and Philadelphia. G. H. Sinclair, who is a successful all around grower, is Mr. Howland's foreman. Two seedlings of their own, one pink, a cross between Jas. Lewis and Maud Dean, and the other one, white, a cross between Mutual Friend and another good variety, are decidedly meritorious. Most likely Mr. Howland will put them on the market. HOMO.

Rochester, N. Y.

The past week, with its blustering cold, was up to the average financially. Trade Thanksgiving day was fully as good as usual; stock was in splendid condition and amply sufficient for the demand. Violets were the only scarce article, yet their price was not advanced.

Chas. Vick, of Jas. Vick & Sons, is laid up with a very sore foot. A shotgun did the mischief while he was hunting rabbits.

Geo. Keller had for Thanksgiving a fine lot of Primula Forbesii in full bloom, which found ready purchasers and which should be more generally introduced in the plant market. The flowers are not very large, but are produced in great profusion and in uninterrupted succession. J. B. K.

GLOVERSVILLE, N. Y.—E. M. Giddings has leased his place on North Main street to Schefler & Stout and will move to Corfu where he will engage in business. Both Mr. and Mrs. Giddings will be greatly missed from Gloversville where they have made a host of warm friends.

WITH THE GROWERS.

AT BASSETT & WASHBURN'S, HINSDALE, ILL.

There is always much to interest visitors at such an extensive establishment as that of the above concern. Roses are the main crop here, and there is a vast array of houses of them in the best of health. The American Beauties are exceptionally fine, some 60,000 plants being grown. In one small house this variety is planted in solid beds, somewhat after the method adopted by several Philadelphia growers, and Mr. Bassett thinks well of the plan. The plants certainly look well, producing strong stems of great length.

Other roses extensively grown are Meteor, Bride and Bridesmaid. Several houses of Bridesmaid grown for summer blooming have been carried over, as it was too late to plant young stock when the crop had been taken from the older plants. Mr. Bassett is not yet fully satisfied as to the wisdom of this course, but is of the opinion that next year he will take up such stock and replant it in fresh soil. One house contains a trial lot of grafted Bridesmaid, but beyond affording longer stems, at this establishment they have not up to the present time shown any marked advantage over own-root plants.

Next to the American Beauties perhaps the greatest feature of this place is the carnation house 52x600, containing 30,000 plants. Most of the standard varieties are grown in quantity, and all appear to be doing well with the single exception of Triumph. This variety develops grass far out of proportion to the number of flowers it yields at this season. In spring it blooms more freely but this gives little comfort to the grower who is looking to his plants for a holiday crop. Compared with leading standard sorts in the same house, the new Mary Wood hardly deserves the reputation of shyness in blooming which some growers have given to it. Further experience with it, however, will more fully enlighten us on this point. One section of a bench was devoted to plants grown in the same position all summer, but these so far do not show any appreciable advantage over the general stock taken from the field. Another portion of the house contains a small patch of Portia, employed to fill out a bench when the stock of standard varieties had become exhausted. Nothing could more fully emphasize the progress made with carnations than the comparison of this old-time favorite with its modern companions.

Bassett & Washburn usually have a few Harrisii lilies in bloom for the chrysanthemum show, but this season their plants are so late that it is now doubtful if they will be in for Christmas, although some 40,000 are grown. There is comparatively little disease among the plants. Lilium longiflorum is also grown in quantity, and the general stock includes such sundries as lily of the valley, mignonette, asparagus, smilax and adiantum. Violets have been tried extensively, but as they have not proved a success, their culture has been almost entirely discontinued. The proprietors of this establishment are firm believers in drain-tile bottoms for benches in which planted out stock is grown, evidence of this fact being furnished in nearly every house. The tile invariably employed is heavy and three inches in diameter, and it insures to the roots plenty of air and prevents injury from over-watering.

NEWS NOTES.

DAYTON, OHIO.—J. B. Heiss is the latest victim of the palm swindler. His loss is upwards of $150.

GERMANTOWN, PA.—A blaze in the greenhouses of Frank Gummey did $100 damage on November 16.

LYONS, IA.—A chrysanthemum show was given November 16 as a benefit to Company L., Forty-ninth Iowa.

OMAHA, NEB.—S. B. Stewart met with an accident on November 28. A large vase fell from a shelf and smashed two of his toes.

SEATTLE, WASH.—Mrs. Lena McCoy held a highly successful opening of her new artistic flower store November 17, 18 and 19.

NICHOLSVILLE, KY.—Louis Moore, florist at the State University at Lexington, and May Alloway were married November 23.

SHARON, PA.—John Randall has gone to New York City. A son of Chas. Heinz was badly hurt November 15 while at work in the iron mill.

QUEENS, N. Y.—Chas. H. Allen had three greenhouses damaged by the recent heavy fall of snow—from eighteen to twenty inches on the level.

MILFORD, CONN.—O. H. Nye gave a public exhibition of chrysanthemums at his place of business on November 17, 18 and 19, to which 500 invitations were issued.

FRANKLIN, MASS.—Walter Slade was victimized the other day by a man who collected from him $3.50 to pay for a directory advertisement. The man afterwards proved to have been a fraud.

BENTON HARBOR, MICH.—J. H. Brumby has sold his interest in the Twin City Floral Co., and has taken charge of the private greenhouses and grounds of F. C. Austin at Harvey, Ill.

HINGHAM, MASS.—At the regular meeting of the Agricultural Society which was held during the time of the chrysanthemum show, Mr. John Farquhar, of Boston, gave a very interesting lecture upon his recent visit to Japan.

JEANNETE, PA.—Edward J. Koerbel, of the firm of Koerbel Bros., died November 20, of heart disease. He was 38 years of age and left a father at Pittsburg and three brothers, one here, one at Steubenville, Ohio, and one at St. Louis.

BINGHAMTON, N. Y.—Barnes & Moore suffered a loss of $1000 by fire November 23 in their house of bulbs and chrysanthemums. The fire started at 3:50 a. m. and is supposed to have been of incendiary origin. One house, uninsured, was entirely destroyed.

CRYSTAL SPRINGS, MISS.—The fourth annual exhibition of the Chrysanthemum Club opened November 17 with thousands of blooms on display. The judges were W. H. Cassell, of Canton, Miss.; Capt. W. J. Brown, Jr., Jackson, and Mrs. J. D. Granberry, Hazlehurst.

GALESBURG, ILL.—November 16–19 I. L. Pillsbury turned over his greenhouses and office to the ladies of the Christian church who gave an entertainment and flower show, receiving all the admissions and a per cent of the sales. The greenhouses were illuminated by electricity.

BOONEVILLE, N. Y.—Henry Russell's greenhouse was destroyed by fire for a second time on November 23 and this time there was no insurance.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

R. W. CLUCAS, of Clucas & Boddington, is on a trip south.

VISITED CHICAGO: Lester Morse, of C. C. Morse & Co., Santa Clara, Cal.

THE contractors for the government seed orders are reported making progress.

WM. HAGEMANN, of Philadelphia, has lately returned from the North Carolina tuber district.

ONION SEED prices, wholesale, on California stock seem to be from 15 to 20 cents per pound lower.

CINCINNATI.—Fire in the store of C. F. Wilder, 219 West Sixth street, resulted in a loss of about $35 November 18.

VISITED NEW YORK:—C. W. Crossman, of Rochester, N. Y.; E. B. Clark, Millford, Conn.; Hagemann & Meyer, of Phila.

SINCE pumpkins are used for Thanksgiving dinner tables as flower vases, seedsmen must grow and offer a strain of handsome and suitable shape.

NEWARK, N. J.—Rowe & Null is the title of a new seed establishment in this city. The Chas. H. Rowe of the concern was formerly with Johnson & Stokes, of Philadelphia.

EXTRA EARLY VALENTINE, Black Wax and one or two other beans are hardly to be had from seedsmen at any price except when bought in a general order with other stock.

THE will of the late K. Pahn Lee, of the firm of Henry & Lee, New York, was filed at White Plains, N. Y., November 22. He left an estate of $10,000 to his relict, Elizabeth S. J. Lee.

LATE advices from Delaware are to the effect that select holly will be somewhat scarce. Bouquet green is still being held at stiff prices, and, judging from present indications, it will be scarce throughout the season.

DENVER, COLO.—Mr. J. C. Bowman having resigned from his position with Barteldes & Co., H. Warnecke and C. R. Root are named as the future managers of the concern, with J. M. Wiesel as assistant manager.

Onion Seed Prices.

Our item of last week was hardly clear. We intended the types should say these are the *suggested* prices. Latest views are as follows:

	Per lb.
Red Wethersfield	$1.50
Extra Early Red Flat	1.60
Southport Yellow Globe	1.75
Yellow Globe Danvers	1.50
Yellow Flat Danvers	1.40
Yellow Strasburg	1.50
White Portugal	2 25
White Globe	2.50
Southport Red Globe	3.00
Early Red Globe	2.50
Prizetaker	1 75

The Rocky Ford Musk Melon.

Because of the interest excited among the seed trade by the demand for and sale of this new melon, the AMERICAN FLORIST has secured two articles on the subject, one from Mr. Roland Morrill, the Michigan melon grower, the other from Mr. Frank T. Emerson, the Nebraska vine seed grower. A careful perusal of each will disclose radically different opinions as to why the Rocky Ford melon has attained its present fame and our readers must judge for themselves wherein lies the true secret of success. The statements of each writer must stand or fall on their own merits. Mr. Morrill's statement is given herewith; that of Mr. Emerson will appear in a subsequent issue.—ED.

I.—AN INTERVIEW WITH MR. MORRILL.

"The seedsmen are much interested, with the truckers of the country, in the new musk melon known as Rocky Ford. You as an experienced melon grower for the Chicago market should be able to give us some explanation of its phenomenal success. Do you consider it a distinct variety, or does its success in your opinion depend on other causes?"

"In the first place, I do not find it to be a new variety at all. My information and experiments show it to be a good strain of our old Netted Gem, partly oval and partly round, but mostly running to the oval type. The local conditions seem to be entirely responsible for its uniform high quality as it is simply nothing more or less than the Gem grown to perfection. I have tested seed grown at Rocky Ford and planted in Michigan, and find it to be identical with the strain already grown by the Michigan growers. In fact I am reliably informed that a large amount of seed has been sold to Rocky Ford growers from seed selected on my own farm within the last three years. In 1897 seed was brought from Rocky Ford to Alton, Ill., and proved of no better quality than home grown seed of the Gem planted in the same field, both appearing to be identical and inferior in quality. If it were true that this melon is a distinct variety, it should show such merit when grown elsewhere from Colorado seed. My information is that the locality known as Rocky Ford has a soil admirably suited to the melon. It has a perfect climate, dry and sunny, and the growers being provided with means of irrigation, and having acquired a good knowledge of the business, the conditions are nearly ideal for producing a first-class melon. I am also told that the soil is of a loess character similar to that of the Missouri hills, and is a mixture of sand and red clay, having some shale admixture, and probably of volcanic origin, although this is entirely a matter of information. It is said that a difference of fifty or sixty miles from this favored locality in Colorado produces a melon considerably inferior to that known as the Rocky Ford type. Another element which contributes to the success of these growers is the dry climate, which is not favorable to the propagation or spread of fungus troubles and the vine grows to perfection, holding a healthy active foliage to the end of the ripening period and thereby insuring a perfect finish in quality—a condition not found in any other melon-growing region with which I am familiar."

"What are the soil conditions conducive to growing perfect melons?"

"A light sandy or gravelly soil of fair fertility, high in potash and phosphoric acid, without excess of nitrogen, extremely nitrogenic soil growing a large melon of rather inferior quality."

"Do the conditions you have described account fully for the uniform sweetness of these melons?"

"Yes, I think so, and I think they would hold good in any locality, from the fact that Michigan produces a melon fully equal to the Rocky Ford when the season conditions are favorable. In fact, in 1898 the melon vines of Michigan were free from fungus troubles and the Gem melons shipped to the Chicago market were pronounced equal or superior to the Rocky Ford."

"In what season did the sale of this melon first become important in eastern markets?"

"This melon was known to a few dealers and growers in 1896 but came into prominent notice as a market melon in 1897, when it captured the best trade in many of our eastern cities, and was offered only in limited quantities. In 1898 it was offered much more liberally in the large cities but did not hold the relatively high price which it did in 1897. The conditions in 1897 were especially unfavorable for melon growing in the middle states, their quality being generally unfavorable, while the Colorado melon appeared upon the market with uniform high quality and captured the best trade right from the start and realized very high prices. They came upon the market in 1898 in much larger quantities with the reputation of 1897 to introduce them. In 1898 the melons grown in the middle states, having much more favorable conditions than in 1897, were of uniformly good quality and the difference in price between the two disappeared. In fact our home grown melons, Netted Gem and Osage, held their quality throughout the season and sold equally well with the Rocky Ford."

"Why do Michigan melons and those from other localities vary in quality from season to season, and why do they deteriorate during the season?"

"This is a matter understood by nearly all melon growers and is simply a question of retaining a healthy foliage, plenty of moisture without excess and sufficient fertility to maintain a crop and vigorous, healthful vines to the end of the ripening period. When conditions are unfavorable a fungus growth known as 'blight' attacks both melon and cucumber vines, beginning at the center of the hill and spreading outward, causing a lack of perfect nutrition, or assimilation of the sap, and the melon having made its growth will probably have the appearance of a good melon but the perfect finish is lacking from the above named cause. We find that we have no trouble in maturing an entire crop of perfect melons if we can keep the foliage healthy to the end of the season."

"What further conditions have a bearing on the general question of uniformity in this melon?"

"Freight rates cut an important figure in this proposition. The shippers to distant markets soon learn that it only pays to ship the best; consequently they assort much more carefully than growers who sell in nearby markets. Were it otherwise their reputation and prices would soon be gone and their profits consumed in freight rates. Another point which seems to be in favor of these Colorado growers is the fact that they have an organized association, having competent management, and these ideas of careful sorting and correct marketing are enforced upon them. It is the same condition which has given California fruits their reputation for reliability.

"It is now eight years since you perfected the Osage; what can you say of this melon now?"

"For this latitude when kept pure, the Osage is in my estimation still far the best melon grown. The largest and best restaurants in Chicago use this variety almost exclusively, and it is served on the leading hotel tables under its own

name. Carelessness in growing has worked some injury to this variety, as we see many badly mixed lots on the market. Where pure and grown to average weight of five or six pounds, it certainly has no superior."

"Please name in their order the three best selling melons for the Chicago market."

"The first and second places are occupied by the Osage and Netted Gem, with honors about equally divided. The third would be occupied by the old Hackensack. If for home use, I would add the Petoskey or Paul Rose to the list, which as it becomes known will easily command a leading place on the market."

Montreal.

The eleventh annual chrysanthemum show of the Montreal Gardeners' and Florists' Club is now a thing of the past. The following is a complete list of the prize winners:

A. Pinoteau, city gardener, received first for a group of chrysanthemums and foliage plants on thirty-five feet of space and first for group of chrysanthemums only on thirty-five feet of space.

George Pascoe, gardener to Robt. Reford, first for six specimen plants (winning Strathcona cup). First for six Primula Sinensis, third for twelve specimen blooms, third for three blooms white, first for three blooms red.

C. A. Smith, gardener to T. A. Dawes, second for six specimen plants, first for six plants in 6-inch pots, first for twelve plants in 5-inch pots, first for six solanums and second for three specimen blooms, white.

W. Harobin, gardener to R. S. Reid, second for twelve plants in 5 inch pots, second for specimen tree fern, first for six palms and first for vase of chrysanthemums.

Joseph Bennett, first for one hundred mixed ferns in 3 inch pots, first for fifty ferns in 4 inch pots, first for twenty-five ferns in 5 inch pots, first for twelve Bride roses, first for twelve Bridesmaid, first for twelve Morgan, second for twelve Meteor, first for twelve American Beauty, first for twenty-five white carnations, special prize for new red carnation, a sport from Mrs. Bradt; first for twenty-five blooms light pink with Daybreak, first for twenty-five Scott, first for specimen Nephrolepis exaltata.

Fred. Bennett, gardener to Robt. McKay, first for three specimen ferns, second for specimen fern, first for specimen hanging fern, first for three specimen palms, first for specimen palm, second for six solanums and first for two pots of callas.

Thos. McHugh, gardener to Forest and Stream Club, second for twelve specimen blooms, first for six blooms distinct varieties, first for three blooms white, first for three blooms pink and second for vase of chrysanthemums.

W. J. Wilshire, gardener to R. B Angus, first for twelve specimen blooms, second for six blooms, first for the largest bloom in the show with a monster bloom of Madam Carnot, first for specimen tree fern, first for six orchids, first for three orchids, first for one orchid, second for hanging fern, second for three palms.

John Stenning, gardener to D. Yuile, first for specimen epiphyllum.

H. Phillips, second for specimen palm.

Walter Wilshire first for basket of flowers, second for twelve Bride roses, second from twelve Bridesmaid, first for twelve Meteor, certificate of merit for his bunch of seedling carnations and third for vase of chrysanthemums.

The judges on the different classes were: Groups and chrysanthemum plants, J. Bennett and T. McHugh; miscellaneous plants, John Doyle and J. Eddy; cut chrysanthemums, Geo. Copeland and Geo. Robinson; roses and carnations, A. C. Wilshire and C. A. Smith; made up work and decorations, James McKenna.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

UECKE & STILSON is the name of a new nursery firm at Corwith, Iowa.

A NEW nursery is to be established at Hartford City, Ind., by a Mr. Alexander.

F. J. MANAHAN, the landscapist, is not connected with the Lake Geneva Floral Company.

LA MESA, CAL.—Guy P. Hawley, who had extensive horticultural interests here, died at El Cajon, October 28.

L. G. BRAGG & Co., Kalamazoo, Mich., have enjoyed a very fine nursery trade this season.

HARRY BALSLEY, park commissioner at Detroit, has asked his city council for $20,000 for new greenhouses at Belle Isle Park.

A TWELVE THOUSAND tree orchard is shortly to be planted by Wm. R. Keefer at Keefer's P. O., Franklin county, Pennsylvania.

AFTER a residence of thirty years at Bement, Ill., Frank H. Smith, the one armed nurseryman, has gone to Tallapoosa, Ga.

THE Vicksburg Nursery Co., Schoolcraft, Mich., has dissolved, Mr. Fortney going to Dayton, Ohio, where he has bought an undertaking business.

COLUMBIA, MO.—The forty-first annual meeting of the Missouri State Horticultural Society will be held here December 6-8. A strong programme has been prepared.

NEWPORT, R. I.—James McLeish, president of the Newport Horticultural Society, has six houses of grapes nearly ready for market. Each house yields an average of 1,500 pounds.

NORMAL, ILL.—During November the nurseries in this vicinity have been rushed in making fall deliveries. The Phœnix Nursery Company is the largest shipper. Business has been very good this season.

T. C. WHITE, treasurer of the Californian Rasin Growers' Association, with sixty packing houses, handling the crops of 2000 growers, has reported the season's receipts up to October 29 to be $1,105,240.

THE Evergreen Nursery Co., Evergreen, Wis., has shipped 12,000 trees from its nursery to a buyer at Hexham, England. The company also has an order for 400 pounds of native tree seed from a firm at Grasstabartz, Germany.

Transplanting Sequoia Gigantea.

ED. AM. FLORIST:—You will much oblige by giving particulars of the best time and way to transplant a specimen of Sequoia gigantea ten feet high, with a spread of eight feet. I have been told that it is next to impossible to move this tree successfully when it has attained any considerable size, and would like to be certain in the matter. A. R. M.
Larchmont, Wash.

The Sequoia gigantea, like its close relative, Taxodium distichum is inclined to make but few roots. Left to themselves both these trees make a few strong descending roots only, and, as with all similar rooting trees, they are hard to transplant. The taxodium, which is the well known deciduous cypress, transplants fairly well, because it is deciduous. The sequoia being evergreen makes it necessary to use more care in its removal than the cypress requires. A sequoia ten feet high with a spread of eight feet, must be a beauty, and it is worth a good deal of care to be successful in its removal. The best way would be to prepare it a year in advance, by root pruning and top pruning it. Dig a trench around it at a distance of two or three feet from the trunk, digging down to a depth of about three feet, cutting off all large roots met with and what may be found by undermining the ball at the bottom. Cut the roots with a sharp knife, with the slant from the underside. Then fill in the trench, with the same soil, if good, or with soil made good by adding manure.

At the same time prune the top in well. This top pruning compensates for that of the roots and at the same time increases the number of twigs, and old planters all aver that a large number of twigs surely indicates numbers of roots, and this I believe to be true. The tree should be treated this way in early spring, then let alone until the following spring or even the August succeeding the following spring, which would be about sixteen months in all, when the chances of a successful transplanting would be very good indeed. Should it be impossible to wait so long, there is nothing to do but prune the top closely, but not lower on a branch than its live foliage, as evergreens of this character do not break fresh buds well from hard wood; get all the roots possible and plant firmly. Early fall is to be preferred for the work.

JOSEPH MEEHAN.

GLEN COVE, N. Y.—Felix G. Mense, who was long superintendent of the C. L. Perkins estate, is now shipping large quantities of fine violets to the New York market.

POLO, ILL.—M. E. Miller's boiler broke down and he had hard work saving his stock. Fortunately many of his best plants were busy taking prizes at near by flower shows.

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The "GARDENERS' CHRONICLE" has been FOR OVER FIFTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, much of the information furnished is of such general and permanent value, that the 'GARDENERS' CHRONICLE" is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, $4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

THE florists of Richmond, Ind., are talking of forming a bowling club. Stranger things have happened than would be the return of that Evans cup to the Hoosier state.

With Chicagoans.

But four bowlers rolled three games at the last session of the Chicago Bowling Club. Captain J. S. Wilson was "the whole thing," making both the high score, 197, and the best average, but E. F. Winterson was only one-third of a point behind on the average.

Bowling at Detroit.

After only three games of practice the following score seems quite creditable.

Name.	1st.	2d.	3d.	4th.	Av.
Dunn	133	150	166	162	153
Breitmeyer	124	150	152	156	148
Holznagle	133	131	165	137	142
Rackham	138	125	136	99	123
Ferguson			94	136	115
Watson	92	100	118	134	111
Coryell	124	116	73	118	108
Flowerday	111	118	72	118	105
Pickworth	107	80	108	124	103
Dilger	83	78	119	121	100
Beard	94	120	92	84	98

R. F.

Shooting in Philadelphia.

The Gun Club held its regular monthly shoot for the president's medal on November 22, and the following scores were made. Mr. Engle was winner with thirty-four targets broken; Anderson was second with forty and Harris third with thirty-seven. The gunners have a curious method of handicapping, a sort of progressive scale which compels the scratch men to be on edge all the time or else fall behind in the scoring.

Name.	Unknown angles.	Known angles.	Total.
Smith	21	17	38
Harris	20	17	37
Engle	19	15	34
Jones	14	15	29
Styer	17	13	30
Bell	19	18	37
Westcott	10	13	23
Ball	15	16	31
Anderson	19	21	40
Cartledge	24	23	47

In a team match at known angles, twenty-five targets, Anderson's team won: Anderson, 21; Bell, 24; Allen, 19, Harris, 19—total, 83. Cartledge's team: Cartledge, 20; Engle, 17; Ball, 20; Jones, 10—total, 67. K.

Cleveland Bowling.

The meeting of last Monday night was fairly attended and the bowling all around was pretty good, the scores of H. Kunz and A. Graham being the highest in single games. They made 184 and 174 respectively. The team scores were not extraordinary but the games were very even and hotly contested, the winners of the first game having but fourteen pins the better of it. The "Cushmans" also took the second game from the "Pentecosts" by a score of 573 to 561. The third game, however, went to the other side, also by a rather close score. For averages Cushman led with 143, but was closely pushed by Kunz with 141. There ought to be a greater effort on the part of all the florists to get out and bowl, as the team that goes to Detroit will be chosen by the highest scores made. We ought to be able to make it warm for somebody up the lakes but to do it we have got to have the bowlers.

A.

New York.

The attendance on last Monday evening at the alleys was very slim but it comprised some of the cream of the craft and they had a big time. The treasurer being absent, collections were made on the "go as you please" plan, and if that gentleman finds a deficiency recorded against that particular occasion, when he next appears, it will at least be a satisfaction to him to know that nobody suffered from either hunger or thirst during his absence.

Philadelphia Pastimes.

It was Philadelphia against Omaha on the alleys last Monday night; that is, the stay-at-homes versus the team that went to Omaha. A couple of weeks ago the difference between the teams at the end of three match games was 13 pins in favor of the Omahas. Monday night they gained 113 additional points, making the difference 126. Smith was again high man. The following is the score:

OMAHA.

Name.	1st.	2d.	3d.	Total.
Brown	146	138	172	456
Westcott	158	163	155	476
Craig	102	134	113	349
Habermehl	160	128	142	430
Smith	133	179	174	486
Longinotte	134	177	158	469
Team	833	919	914	2666

PHILADELPHIA.

Name.	1st.	2d.	3d.	Total.
Connor	95	162	133	390
Anderson	171	136	165	472
Walker	125	179	129	433
Moss	138	125	159	422
Baker	142	140	102	384

Team	844	892	815	2553

K.

Pittsburg.

BUSINESS NOT UP TO LAST YEAR'S RECORD. —ROSES AND CARNATIONS SCARCE.— JOTTINGS.

Business has been fairly good but not up to former Thanksgiving trade. The stock of flowers was good with the exception of roses and carnations; these were somewhat scarce and prices stiffened a little.

The Pittsburg Cut Flower Company report a good business. The retailers are alive to the advantages offered.

The new venture of the market in the East End has, for the florists, been fairly successful.

Geo. W. Duff, North Highland avenue, has closed his place and will take a rest.

Charles Siebrecht, of Siebrecht & Son, New York, was a visitor this week.

REGIA.

St. Louis.

GOOD THANKSGIVING TRADE.— PRICES SHARPLY ADVANCED FOR THE OCCASION. —NOTES.

There was a good supply of all kinds for Thanksgiving, but prices were advanced sharply for that occasion and report has it that some of the wholesalers had quite a lot of stock left on their hands. California violets sold for $1 per hundred for Thanksgiving, but have dropped back to 50 cents. Carnations have dropped from 2 cents back to 1½, fancies selling at 2 cents to 3 cents. Roses are much more plentiful and of very good quality. Romans and narcissi have made their appearance. Lily of the valley is being held at 4 and 5 cents; those having a call for anything over 100 get it either from Chicago or Cincinnati.

Judging from appearances stock is to be more plentiful from now on than it was last season, and the indications are that prices will be considerably lower after the holidays than they were last year.

Show matters are being straightened out rapidly and inside of a week the committee will know just where it stands.

R. F. T.

Northampton, Mass.

Thanksgiving day opened in old fashioned style with rain and snow which made the work of delivery decidedly unpleasant and probably diminished the sum total of receipts, but it was a busy day after all and most of the stock was cleaned up before night, only a few chrysanthemums being left. Violets were in great demand and the supply gave out early. Roses and carnations were also in good demand and only a few culls were left. As compared with last year the increase was about ten per cent in total sales.

G. W. THORNILEY.

PATERSON, N. J.—At the meeting of the Florists' Club on November 16 a resolution was unanimously adopted condemning the methods of "crape chasers," who have brought the business into disrepute in this city.

LONG DISTANCE 'PHONE, 14.

Council Bluffs, Ia.

H. H. Frey, the senior partner in the firm of Frey & Kastner, 1250 East Pierce street, died at St. Bernard's Hospital, November 22, as the result of a scalding received the day previous while working about the greenhouse boilers in company with an employe named Edw. Williams. From the account given by the latter it seems that the two were endeavoring to open a valve to direct the steam to another channel but that the valve stuck and Frey struck it with a hammer to cause it to loosen. Without warning the valve burst, permitting the steam to rush forth and envelope the unfortunate men. Williams escaped with some severe burns, but Mr. Frey was so terribly scalded that he lived but a few hours. The physicians stated that fully one-fourth the cuticle of his entire body was destroyed.

H. H. Frey was the son of C. H. Frey, the leading florist of Lincoln, Neb., with whom he was in business prior to a year ago when he purchased the junior interest in the firm of McPherson & Reed, Mr. Kastner soon joining him in taking over J. R. McPherson's share in the establishment, which is the largest here, with the exception of that of J. F. Wilcox. This fall Frey & Kastner made a considerable addition to their greenhouses and opened a well appointed store at 4 Perle street. They faced bright business prospects. Mr. Frey's remains were taken to Lincoln for burial. He leaves a young wife.

LILY OF THE VALLEY, SPIRAEA, DIELYTRA, GLADIOLUS COLVILLEI ALBA AND RUBRA.

CHICAGO, 84-86 Randolph St. **VAUGHAN'S SEED STORE,** **New York,** 14 Barclay Street.

Helpful Reminders.

The last few weeks chrysanthemums have been given the advantage over other stock because they were nearly ready for market. The care of a plant which will not bring returns for six months is not so graciously given as to that which is soon to be in demand. Geraniums, cannas and verbenas have been squeezed so closely as to invite decay, and even palms, ferns and other plants have been too crowded. If you have a certain space devoted to chrysanthemums that are out by November 30 and poinsettias that are out December 25 have something ready to replace them, but it must be stock that need not form its shape and develop until after the required space is available.

If you have 200 stock plants of geraniums under a bench waiting to occupy the space that has been given fifty chrysanthemums, all well and good, but only the geraniums should have been held out of position; the whole stock should not have been crowded indiscriminately because a few were soon to leave; let only those be crowded that are being held in readiness for the particular space.

Your begonias, palms, ferns, acacias, cyclamens, primroses and such plants as develop at various times for the market must not be inconvenienced in the least now; any deficiency in light, soil, water or temperature means deformity and depreciation of value.

Geraniums, fuchsias, bamboos, papyrus, grevilleas, ferns, begonias, dracænas and plants which are semi-dormant now, but which will soon start fresh growth, would best have the old soil shaken out and re-potted. They should be carefully cleaned and pruned into shape.

There is no more desirable flower for retail trade than the pansy. The temperature and air for violets suits them, but the soil should have more sand and manure than violets are given.

Do not water pot plants with a hose now. The man who manages the watering pot should be the first to detect all errors, as he has the best opportunities to see when a plant is in need of any special attention. Almost all insect pests are chargeable to the man who does or should do the watering. C. B. W.

HOLYOKE, MASS.—G. W. Thorniley, gardener at the Northampton Insane Asylum, will read a paper on begonias at the December meeting of the Horticultural Society.

GREENCASTLE, IND.—A. M. Troxell, of Knightstown, has moved to this city and opened a flower store. Mr. Troxell was for four years superintendent of the Soldiers' Orphans Home at Knightstown.

MORE FLOWERS THAN BUYERS.—THE GARDENERS' CLUB MEETING.—BINDER CUTS BIG VEINS.

Flowers are plentiful and more than equal to the demand. Violets continue to improve in quality, but not in quantity. Owing to the cloudy weather there is only about one-half of the demand available. Beauties are plentiful, but Bridesmaids are very scarce. Local lily of the valley is not in as yet although retailers have a good demand and are well supplied with northern stock. Chrysanthemums are getting scarce and choice varieties are bringing better prices.

The Gardeners' Club held its regular meeting on November 28 and Thos. C. Stevenson, of Govanstown, gave an interesting description of his methods of growing violets.

Wm. Paul Binder has met with a serious accident, having cut two of the leaders of his left hand. A. R. J.

Buffalo.

EVERY ONE IS SATISFIED WITH THE THANKSGIVING TRADE.—AMERICAN BEAUTIES VERY SCARCE.

Bad weather ushered in a beautiful Thanksgiving Day and trade was all that could have been asked. Inquiries at the various stores elicited the information that each one had all the business he was able to care for. In most cases a large increase over last year was reported.

Roses took an upward shoot the day before Thanksgiving and the qualities, except of Meteor, went the other way. American Beauties were very scarce, the supply not being enough to fill orders. From 25 cents to 35 cents was the price. Carnations and violets are scarce and there is no over-stock of chrysanthemums. W. A.

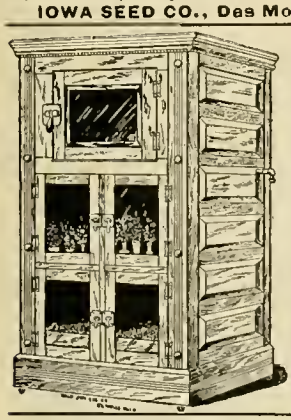
THE AMERICAN FLORIST.

New Rochelle, N. Y.

On Sunday morning, November 27, between ten and eleven o'clock, during the fierce storm, a section of the large dome house of Messrs. Siebrecht & Son at Rose Hill was blown in. This house is about twenty-five feet high and contains principally Australian tree ferns, some of which weigh over half a ton each. Most of the plants were saved by being dragged back into adjoining houses and into that part of the house which was still intact. A number of men were summoned and a temporary wall or partition in the shape of a barricade was put up in quick order. During this time the wind was so high and terrific that some of the men who were up on ladders were in imminent danger of being blown down. All the men, including Mr. Siebrecht, Sr., were severely frozen and suffered a great deal, but the house was put into safe condition. The corner posts, which were of the best 6x6 timbers and bedded into a three feet high brick and Portland cement wall, were twisted like whips, so strong was the gale. The rebuilding of the damaged house was begun on Monday morning and before next Sunday is expected to be completed. The total damage will be in the neighborhood of $1000.

POTTSDAM, N. Y.—Robert Lane, of Gloversville, has leased the Garden street greenhouses of Dr. Best and will conduct a florist business there.



SAUGATUCK, MICH.—At last Saugatuck has a greenhouse, T. W. Leland having converted a building 12x60 into such a structure and filled it with a general stock.

GOLD FISH

Make an elegant side line for florists. They are hardy, can be kept in greenhouse or any ordinary room where it does not freeze hard enough to break the glass aquarium containing them. They require little care, and a dime's worth of food will last 100 fishes two weeks. They make a beautiful window or counter display, and there is a good profit in handling them, as we can furnish medium sized fish, such as retail at 25 to 35 cts. each, wholesale for $1.20 per doz.; $7.50 per 100. Fancy fishes higher. Buckets to ship in, 6 quart (will hold one dozen) 20 cts extra. Large cans are returnable. Terms, Cash with order. Ask for retail descriptive catalogue and wholesale price list of Fancy Fish, Cage Birds, and all supplies for them. We ship everywhere.

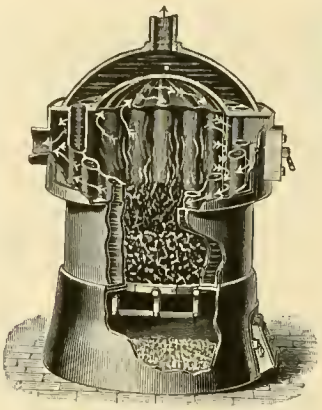
THANKSGIVING TRADE GOOD.—GREAT SCARCITY OF CARNATIONS.—CHRYSANTHEMUMS NEAR AN END.

There seems to be a quite general opinion that Thanksgiving business was fully as good as in former years, while with some the report is that trade was quite noticeably improved. Good flowers of all kinds sold very well, although the chronic scarcity of carnations was even more evident than at other times.

The chrysanthemum as a factor in the situation is very nearly a thing of the past for the season of 1898. There are of course plenty of late ones still to be had, but they open more slowly now and will be all absorbed from this time without effort. White and yellow are generally the most plentiful. Pink, indeed, is and has been for some little time, rather hard to get.

The advance guard of the French bulbs has already appeared in the shape of Paper White narcissi and a few Roman hyacinths. The latter have not so far been particularly good and have only brought about 3 cents.



As an instance of the relative scarcity of roses and carnations it may be mentioned that a local grower of both, having an order for a quantity of red carnations had to substitute Meteor roses at the same rate. A.

Nashville, Tenn.

Chrysanthemums were pre-eminently the Thanksgiving day flower and yellow ones were almost at a premium because of the foot ball game. The annual Thanksgiving eve balls, caused a brisk demand for American Beauty and other roses. Violets are scarce but are good in quality. We have no home grown lily of the valley as yet, and hyacinths have not been allowed to come on. American Beauty is off crop here now and stock is being shipped in from Chicago.

Franklin, Tenn., had a very successful chrysanthemum show last week. The exhibitors were entirely amateur but the flowers were really excellent. Curry & Co. and Joy & Son, of this city, sent complimentary boxes of cut flowers. The attendance was excellent, and the visitors carried little note books, taking the names of fine and striking varieties, from which it may be argued that there will be a show there next year with a greater display than ever. M. C. DORRIS.

TORONTO.—Chrysanthemums are still the rage and take precedence over roses, although the latter are in good demand and are not too plentiful. Violets are selling well and some fine Californias are being received. S. P.

IMPROMPTU EXHIBITION OF OUTDOOR-GROWN CHRYSANTHEMUMS.—TWO NEW STORES WELL LOCATED.

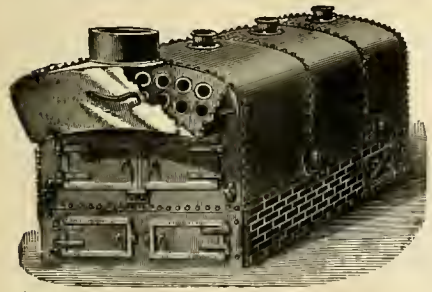
At the last meeting of our Horticultural Society there was a very creditable informal exhibit of chrysanthemums. D. Nesham brought some very nice flowers of Black Hawk, Modesto, and Mutual Friend. E. Valdejo, among a dozen large and beautiful blooms, had some Jessica, Mrs. Robinson and Marie Anderson which were very fine. He found this latter sort very good. Paul Abele, of Abele & Bros., had also some very nice specimens. Of many varieties, Nemesis and Mayflower were acknowledged to be the best for the first of November. Our chrysanthemums are all outside grown and some sorts which can be found very good in the north may turn out to not be of much value with us. But with all this disadvantage we can raise beautiful flowers, perfect in shape and color; large, heavy blooms, strong stems, deep green foliage and of a keeping quality really astonishing. There seems to be no end to their freshness and durability.

Chas. Eble is to move to a more spacious quarter. He will be located only a few doors from Canal street on Baronne street.

W. Eichling is also going to open a new branch store on Camp street near Common. M. M. L.

Cincinnati.

SATISFACTORY THANKSGIVING TRADE.—STOCK CONDITIONS.—COMMENTS.



Thanksgiving is past and our retailers as well as wholesale houses report a satisfactory business. The surplus of mid-season chrysanthemums is gone and choice blooms of late varieties bring fairly good prices. Roses are greatly improved and there are enough of them. Violets will be as popular as in former years, judging from present indications. Carnations are none too plentiful and some growers predict a scarcity for some time to come.

J. M. McCullough's Sons and J. Chas. McCullough have already made preparations for their immense Christmas trade.

Saturday, December 10, should see a large attendance at the Florists' Society meeting as there is much important business to be transacted. H. SCHWARZ.

WABASH, IND.—E. F. Overman supplied the roses, carnations and other cut flowers for the recent annual flower show at Logansport. His blooms were good.

Farmers' Institutes.

[Read before the Florists' Club, of Philadelphia, Tuesday evening, December 6, 1898, by G. C. Watson.]

No doubt many of you are wondering more or less what earthly interest a farmers' institute can have for a nurseryman, seedsman, or florist. Some of you may even not know what a farmers' institute is. I must confess that when I first heard the title I, myself, imagined a farmers' institute to be an establishment for the care of the aged and infirm. It took me quite a while to get it through my head just what the institution stood for, but now that I do know something of the splendid work that is being done through this medium, I feel that every one of us in any way connected with the agricultural interests of the state of Pennsylvania should be interested and should co-operate to help the work along.

Broadly speaking a farmers' institute is a peripatetic agricultural school, and, broadly speaking, we are all farmers. Agriculture includes horticulture, floriculture, arboriculture and several other cultures of lesser importance, and it is not material what particular branch one belongs to, whether it be cereal farming, stock farming, dairy farming, truck farming, or flower farming; in either case, we are all interested in the progress of our state along these lines.

This being granted I crave your attention for a few minutes to state some particulars of the origin and progress of these institutes, and to suggest that the forces at work might be turned to the advantage of your individual specialties, that is, if you are wide awake, and no one can say that our progressive members need any eye openers.

The state of Massachusetts claims the honor of being the first to start these institutes in the year 1859. Michigan and Iowa were very close seconds, in 1861 and 1869. Pennsylvania followed in 1877. From that year until 1895 they were maintained by the State Board of Agriculture, and since the latter date by the Department of Agriculture. The legislature made its first appropriation in aid of the institutes in 1885, amounting to $1,000; advancing it to $3,000 in 1887, $5,000 in 1889, $7,000 in 1891, $9,500 in 1893, and $12,500 in 1897.

In 1885 there were twenty-three days of institutes held—in 1897 this had increased to 385 days. Eighty-two lecturers were on the list for 1897, constituting an array of talent second to none, and of which our great commonwealth may feel justly proud. All of them are men of exceptional ability and specially qualified to furnish the latest scientific facts, each in his particular branch or subject. These lecturers are missionaries employed by the commonwealth to carry the light into every county within her borders. They tell all who will come to listen all that they have found out from years of study and experiment, on the farm, at the experiment station, and in the laboratory. They labor unceasingly in the interests of the agriculturist, studying new problems as they arise, suggesting remedies, teaching new and better methods. They furnish the farmer, the gardener and the florist with a fund of scientific knowledge that is no mean substitute for a course at an agricultural college. And above all, and more than all, they act on our Peter Waybacks and Paul Tumbledowns as a vivifying force—a revival meeting in agriculture—by going among them and stirring them up.

There is nothing so effective as oral teaching. You may print books by the million, but it is another thing to get people to study them. You can throw wagon-loads of information at people and they will go on unheeding. But go to the individual and get him to tell his troubles. Get him interested by showing him some way to overcome one or two of them. Show him where further information is to be gotten, and you have started him in a direction that is going to develop the man, and, with him, his resources. Every community is made up of individuals, and the problems have to be studied from the individual standpoint. The institute missionary goes into every little community in the state, and starts a revival meeting for better farming, better gardening, better roads and brighter homes. He hunts up the most forward and progressive people in each locality and gets them to help him. He gets them to tell their experiences, their successes, their failures, in open meeting; he encourages them to ask questions and does his best to answer them. And all free! No collection is taken up when the congregation is stirred to the proper temperature. The state provides for all that, and it is only costing the commonwealth $12,500 a year to keep these eighty missionaries in the field for 385 days every season! Why, it cost that much recently to build a stucco arch across Broad street for a forty-eight-hours raree show that is already almost forgotten!

There are some things that this great state of Pennsylvania can do, however, that will challenge the admiration of the world, and one of them is to produce a citizen like Professor John Hamilton who can take this $12,500, and keep eighty agricultural missionaries in the field for 385 days with one half of it, and pay

hall rent, light, heat, printing and other local expenses with the other half. It is scarcely believable, but it's a fact. The work that is being done is really beyond price to the state, and it would be cheap at ten times $12,500. He's certainly a wonder, this Professor Hamilton. Our New York friends opened their eyes when the late Colonel Waring showed them how to keep their streets clean. Waring was a "dandy," but expensive. Hamilton's a "Jim Dandy" and he can do more with a dollar than even Wm. J. Bryan or Edward Atkinson I fancy there has been nothing like it since the widow's "cruise of oil." Joking aside, however, let's hope our lawmakers will make it at least $25,000 next time. Even double that amount would be a good investment. If Prof. Hamilton has anything to do with such a sum, won't there be an awakening among the tillers of the soil? There will be a flood of good teaching unparalleled in the history of great floods. Moses striking the rock will not be a circumstance to the Professor with this fifty-thousand-dollar sledge hammer letting loose the floods of learning!

From what I have said, you can form some idea, although this is but a boiled down account of what the farmers institutes—or agricultural revival meetings, as I think they ought to be called—are doing. But I must not impose on your patience too long, and I will only trespass on your time with a few words more to state something about the Philadelphia meeting which takes place on January 17, in Horticultural Hall, and to ask all of you, individually and collectively, to be present on that date, at the morning, afternoon and evening sessions, to help make the day a success and a credit to the Florists' Club and the Horticultural Society, the two organizations that are responsible for inviting the "missionaries" to come here to tell us all they know. And when you come, come primed with questions that you wish answered; questions on soils, fertilizers, insects and fungus diseases. These men have been busy studying all these problems for our benefit, but it will take questions to bring out just the information you want. With all their learning, they are not mind readers, and if you want to know, you must speak up.

At this date the committee has not the full programme made up, but I can announce the following, and due notice will be given of the others:

Enos H. Hess, of State College, Pa., whose subjects are: "Commercial Fertilizers and Their Uses," "Results of Experiments with Commercial Fertilizers, Barnyard Manure and Lime," and "Effects of Lime upon the Soil." J. S Woodward, of Lockport, N. Y., who talks on "Chemicals and Clover in Soil Renovations." "The Leaf; Importance of Keeping it Healthy," and "What Ails Our Orchards? Remedy." John Gould, of Aurora, Ohio, who discusses "New Ideas in Creamery Work and Dairying," "Ten Years Experience with a Silo" and "Economy in Corn Culture."

Several of the following speakers are also expected: Hon. Thomas J. Edge, secretary of agriculture, Prof. John Hamilton, director of institutes; Major Levi Wells, dairy and food commissioner; Dr. H. T. Fernald, economic zoologist; Dr. Leonard Pierson, state veterinarian; Dr. J. T. Rothrock, commissioner of forestry; Geo. G. Hutchinson, dairy and food department.

The committee are arranging to have some local talent to speak on timely and interesting subjects in addition to those I have just mentioned, and will spare no effort to make the day worth your making considerable sacrifice to be present. They want you all to be on hand, and to bring all the farmers, florists, truckers, dairymen, nurserymen, seedsmen and gardeners, with their families and retainers, that you can lay your hands on and induce to come with you. All are very welcome and there will be no admission fee and no collection. And don't forget that there will be three sessions, forenoon, afternoon and evening.

I, Austria; II, Austria, half Parthenope; III, Parthenope

A SPORTIVE CANNA.

Canna Sports.

The editor of *Indian Gardening*, the excellent representative of horticultural interests in Peninsular India, has been good enough to send us the drawing from which the illustration shown here has been taken. It affords an excellent example of that dissociation of previously mixed elements, to which we have often alluded, as one of the principal causes of sports. In the specimen figured of Canna Parthenope, we have on one and the same spike flowers of the yellow Austria, figure I, the yellowish-scarlet Parthenope, III., and parti-colored flowers, II., half belonging to one variety, half to another. One side of the rachis of the spike was green, the other side reddish. The Austria occurred on the green side, the Parthenope on the red side of the stalk.

The flowers were thus arranged:—First pair, one pure Austria, and one-half Austria, half Parthenope; second pair, one dimidiate flower, and one pure Parthenope; third pair, one pure Austria, and one half-and-half. The leaves did not differ from those of Parthenope.—*Gardeners' Chronicle.*

Officers-Elect of the "Pioneer Florists' Club of America."

The Florists' Club of Philadelphia was the first organization of its kind in this country, being founded in 1885. It has the further distinction of being perhaps the most successful florists' club in America. I have pleasure in sending herewith a photograph of the club's officers-elect for 1898-99, and I feel sure the readers of the AMERICAN FLORIST will be pleased and interested in these counterfeit presentiments. A glance at these strong and masterful-looking faces will partly explain the reason for some of the club's remarkable success.

W. K. HARRIS, PRESIDENT.

William K. Harris, the president, is a typical American; tall, sinewy and spare, the symbolical Uncle Sam to the letter. He is well known in the trade generally, having a unique and strong personality which, with all its genuineness, has a dash of the grotesque that immediately arrests the attention of the most casual observer. His appearance in an amateur dramatic performance as "Bardolph" at one of the meetings of the S. A. F. was a never-to-be-forgotten sight, and is commemorated in a fine drawing which now adorns the club room. He is a self-made man—and is not ashamed of his handiwork—having risen to his present commanding position in the trade entirely by his own efforts. This is finely illustrated by the way he holds the gavel in the picture. A fine vein of sentiment runs through his make-up and comes periodically to the surface—usually strongest when limping Winter strikes his tents and Easter, fresh and smiling, reaches the classic precincts of Darby Road, or in midsummer when the S. A. F. puts on its gossamers and goes off somewhere for a halcyon and vociferous time, or in the fall, when the rubber has made his full growth and is ready to be driven to market to help pay the rent. Like another great poet (the late Mr. Tennyson) "the Deacon," as he is now affectionately known to a large clientage, has a keen eye for the dollar, and those who read his advertisements must not suppose that it is the usual kind of poet they are dealing with. Mr. Harris is now serving his second term as president and fills that important office with great credit. He takes keen interest in all that goes on, and it's rare if a day

John Westcott. J. Wm. Colflesh. Wm. K. Harris. Edwin Lonsdale.

OFFICERS-ELECT OF THE PHILADELPHIA FLORISTS' CLUB.

passes without a meeting between him and Mr. Westcott at the club room. The hour is 4 p. m., and whoever is late—well, he treats, that's all.

JOHN WESTCOTT, VICE-PRESIDENT.

John Westcott, the vice-president, is one of the squarest men that Providence ever allowed to adorn a beautiful world for well nigh sixty years. He is still in the prime of vigor, hearty and healthy, and enjoys all the good things of this life as they come along with a zest that is envied by many men only half his age. If there is one thing that distinguishes him more than his squareness or his picturesqueness it is his usefulness. His dynamic force is something wonderful. No labor is too hard or too irksome for him. The spirit of the noble Six Hundred animates his soul, and it is do or die with him at all times. No half-measure will suit John Westcott. Like Charles Bradlaugh, his motto is "Thorough," and he lives up to it. Mr. Westcott was one of the founders of the Florists' Club of Philadelphia, and he has been one of its main bulwarks ever since it started. The club is more to John than church or chapel, more than lodge room or party caucus, and I verily believe that if Mrs. Westcott were not the exceptionally charming lady that she is it would be more to him than wife or weans. That the club has been so successful is largely due to the unique and powerful personality of Mr. Westcott, and everybody hopes he may long be spared to continue his earnest efforts for the advancement of its interests. To quote Law's spirited description:

"There's Westcott, pushing, get-there John,
with steam in wondrous store,
The more he finds there's work to do, he always
works the more,
The King of Dandy Fishermen, the Waretown
Commodore."

In work or play, a rare philosopher, a steadfast friend, a charming companion, good-hearted, generous to a fault, and, as I said before, one of the squarest men that Providence ever planted on His footstool. May his shadow never grow less, and may his tribe increase and multiply.

J. WM. COLFLESH, TREASURER.

When you reflect that Mr. Colflesh was considered by the members of the florists' club to be the only man they unanimously wanted to fill—and fill adequately—the chair left vacant by the late Thomas Cartledge, the most beloved and honored for his uprightness—the reflection will reveal the high place the present treasurer holds in the estimation of his fellow craftsmen for his integrity of character and honest worth. He has a commanding presence and a fine open face that at once commands confidence and respect. Although his beard is tinged with grey of late, he is still youthful at heart, and enjoys a day on the shooting grounds with the other aristocrats, or an evening at the bowling alleys with the other democrats, as well as any one, and he is no "has been" at either game neither! Mr. Colflesh is a native born American, and in conjunction with his next door neighbor, Mr. Harris, he holds the native end up in good shape against the aggressiveness of the Scotch, English and Dutch craftsmen who sometimes imagine they are Robert the Bruce, Queen Victoria and Emperor William all rolled into one, to judge by the way these foreigners try to gobble the good things sometimes.

EDWIN LONSDALE, SECRETARY.

Mr. Lonsdale, "The Brave Old Duke," is so well known to the horticultural trade of both hemispheres, that it is almost superfluous to say anything of him in connection with his present office—one of many he has filled and is filling with credit. I think this photograph is a very good likeness and reflects his genial personality most happily. If I am not mistaken, Edwin was the first secretary of the Philadelphia Florists' Club, and took a most active part in its foundation. He has held many offices since, among others that of president of the S. A. F., and still continues to give his best efforts to the advancement of horticulture wherever he thinks the work will tell. He steals many a precious hour from his own business to devote the same to the general good. Few men, under the circumstances, would do as he has done and is doing. But he has his reward. For, after all, the most precious thing to strain for in this world is the respect and esteem of one's fellowmen, and few men are appreciated for public spirit and work well done in their sphere as is Edwin

Lonsdale. In his serious moments who can be so dignified as he, and in his playful hours who so witty and genial? His is, indeed, a most lovable personality, and I consider it a precious privilege to be counted one of his many friends.

Taking these four men as a whole, I think the Philadelphia Club has good reason to be proud of them; she will be well represented during 1899, and I hope she may be equally fortunate during all the years to come. G. C. WATSON.

Philadelphia, Dec. 6, '98.

CHRYSANTHEMUMS.

WORK OF THE COMMITTEES.

NEW YORK, N. Y.—Hewey A. Molatsch, Brooklyn, N. Y., exhibited J. M. Keller, clear, bright yellow, Japanese; scored commercial scale 87 points.

CHICAGO, ILL.—Nathan Smith & Son, Adrian, Mich., exhibited Stelleta, yellow reflexed Japanese; scored commercial scale 93 points.

ELMER D. SMITH, Secretary.

TWO OF THE NOVELTIES.

Our illustrations show two of the new varieties which were prominent at the recent meetings of the chrysanthemum society's committees. Both were exhibited by John N. May, of Summit, N. J., and their merit is well shown by the rating accorded them by the experts. At Philadelphia, November 5, Mavourneen, pink, scored 85 points commercial scale and 83 points exhibition scale; at Chicago, November 12, 84 points commercial scale. Silver Wedding, white, scored 90 points commercial scale at Boston November 12, and on the same date at Chicago 83 points commercial scale.

CARNATIONS.

CARNATIONS REGISTERED.

The following carnations have been registered under the regulations of the American Carnation Society:

By W. R. Shelmire, Avondale, Pa.—Duke of York.—White, very slightly penciled with light pink; large perfectly formed flowers; stems long and very stiff; does not burst the calyx; plants very bushy, large and healthy; grows strong in the field, comes in bloom early and flowers continuously. Liberty.—Dark pink, rather bordering on red, bright and brilliant; not extra large but of good size and does not burst the calyx; flowers early, freely and continuously; good stem but not so tall in growth as some of the larger kinds; plant vigorous, healthy and bushy. ALBERT M. HERR, Sec'y.

CULTURAL NOTES.

December 10.—Two more weeks and Christmas will be here with all its hustle and bustle. To the grower this means one of the few times in the year when he can depend on selling all his stock at a reasonable profit. Everyone naturally wants as many and as good flowers as possible to meet the demand and it behooves us all to give a little extra attention to the stock. Two applications a week of liquid manure, providing the plants are in condition to make use of it and the soil is not already filled with fertilizers, will help matters somewhat. The gradual increase of the temperature will also assist in bringing out a few extra flowers.

In applying liquid manure it is well to know your variety, as some sorts will not stand an extra amount of feeding. Scott is one that can easily be almost ruined in this way, and there are others that behave in the same manner. I have a pink that was producing what might be called "super-extra" flowers but when we gave the plants a mulching the flowers at once deteriorated and soon were not even good. There is, however, not much danger in giving the plants two or three applications of liquid stimulant between now and Christmas.

The increase of temperature should be gradual, not over 2° each twenty-four hours, until you have the average temperature of the houses 8° or 10° higher than ordinary. I do not really advise this as the proper thing to do, but where there is a heavy crop of buds on the plants it pays well for the extra trouble it makes and if the extra heat is given as above stated and immediately after Christmas taken off in the same manner, 2° every twenty-four hours, there is little or no damage to the stock.

Unless there is a large number of well developed buds on the plants I would not attempt forcing in any way, and if you give the houses the extra heat be careful to have them on the dry side. If there is a good crop of buds on the plants the forcing will be apparent in the production of blooms, but if there are but from one to three buds to a plant the forcing energy would go into the young shoots and the results would not pay for the cost, part of which would be the danger of weakening the young growth of the plant and thereby getting the January flowers weak stemmed and possibly small in size.

Disbudding should be attended to to-day and at least once more next week, as the flowers are not only bettered but the stems are strengthened and careful disbudding will also bring the flowers out quicker, this now being quite an important item.

It seems needless to caution you against pickling any of your stock, yet there are some growers, who ought to know better, who will no doubt hold their stock either on their plants or in their cellars until it is practically too old to sell. There ought to be a law prohibiting the sale of flowers that are too old to keep, just as, in some cities, there is a law prohibiting the sale of fruit that has passed into the stage of decomposition. I know, and so, no doubt, does every reader, of instances where parties have bought carnations for some special occasion and before the day was over they were not fit to look at, or roses the petals of which fell off as soon as they were taken out of the box. This nearly always is the fault of the retailer, who, while he cries to the grower, "do not hold your stock," is at the same time holding his own stock just as long as he possibly can. The retailer who sells carnations at the prices ruling for the holidays, knowing that they will not keep over the day, ought to be made to serve a year at hard labor; the wholesaler should receive the same sentence if he sells old stock to the store man and the grower should always be reached by sending back to him upon receipt all stock that has passed beyond the stage of freshness. ALBERT M. HERR.

CHRYSANTHEMUM MAVOURNEEN.

ROSES.

CULTURAL NOTES.

December 10.—Now that we are fast approaching Christmas roses will be in great demand and this is very apt to induce many growers to force them a little harder for the last two weeks pre-

ceding that day. This and kindred methods are very detrimental to the grower's best interest. Blooms produced by this method, and often kept in storage for days so as to have an extra quantity for Christmas, are of poor quality and the public is beginning to understand this, consequently are yearly buying less, and if this method is persisted in it will deter a great many who would otherwise be liberal buyers from purchasing flowers at Christmas. Several such cases have come under my own observation in the past two or three years, and the experience of the retail florists more than confirms my statement, so that the quicker such methods are stopped entirely the better it will be for all concerned, but more especially for the growers, as it is on them the reaction will first strike.

As the shortest and generally the most cloudy days of the whole year are now practically here, it is better to run the night temperature in tea rose houses a little below the regular temperature of 56°, rather than above it; this, in conjunction with all the air possible by day, will produce the best grade of flowers, providing all other conditions are favorable, such as watering when necessary. Just as soon as the soil begins to feel a little hard they should have a liberal watering, and then be allowed to go till again in the same condition. It will often happen that one part of the house will need water when another part does not; two or three minutes examination will indicate these differences very plainly and water can be given accordingly.

Careful syringing should always be attended to at all favorable opportunities and always before noon of each day so as to allow any surplus moisture to dry off before night. Another important factor is to keep all dead leaves carefully cleared away, and where the last mulching is getting used up by the roots, another thin coating of not over half an inch of well rotted manure should be evenly spread over the surface. At this season this is much safer than using liquid manure as each watering will carry a small portion of the fertilizing qualities of the mulch down to the active feeding roots, and in such form as can be best utilized by them. This applies to plants that are in active growth and have roots working throughout the soil, but where plants are not making any active growth it would be better not to mulch at present, but first get the plants in good health by reasonable treatment.

JOHN N. MAY.

CHRYSANTHEMUM SILVER WEDDING.

Chicago.

CROPS AND THE MARKET.— AMERICAN BEAUTIES AND VIOLETS SCARCE.—O. P. BASSETT WEDS.—BUILDING PROJECTS.—JOTTINGS AMONG THE TRADE.

It has required an expert salesman to dispose of the bulk of the stock which has come into the market this week but of the better grades there has not been nearly enough to supply the demand. Last week pink roses could scarcely be given away while of whites there were too few; this week this story was reversed. Of Beauties the supply is sadly inadequate and those growers who are cutting any considerable number of blooms are looking forward to a merry Christmas.

Carnations are in fair supply and excellent demand, each day's cut being absorbed this week at fair figures. Chrysanthemums are nearly gone. Romans and Paper Whites and lilies of the valley are all in demand. Good stock of each is in the market.

Violets are scarce and high priced for the season. Last week the supply and price fluctuated strangely, one day good flowers being worth $2 per hundred and the next bringing only from 40 cents to $1, but this week the demand has been steady and strong.

O. P. Bassett and Mrs. M. Katherine Parsons were married Tuesday afternoon, December 6, at three o'clock at the home of the bride's mother, Mrs. M. E. Andrews, in Berwyn. The ceremony was performed by Rev. W. E. McLennan, pastor of the Methodist church of Berwyn, and was private. Mr. and Mrs. Bassett will spend the winter at the Lexington hotel.

Chicago's big growers, who have passed through attacks of the building fever are again showing marked symptoms of relapses. Wietor Bros., George and Peter Reinberg and J. A. Budlong are all figuring on extending their establishments in the spring and Bassett & Washburn will, in all probability, build a few houses.

Lloyd Vaughan, of Vaughan, McKeller & Winterson, who is on the road at present, writes his partners that he finds business good in every town he visits and the obesity of his letters shows that orders are coming his way.

There will shortly be rooted cuttings by the hundreds of thousands for sale in Chicago. Because of the prospects for a season of much building more cuttings than ever before are being made.

The local police have apprehended a German gentleman who has negotiated valueless checks and drafts in a score or more of cities and who a few months ago induced H. F. Halle, 548 West Madison street, to cash a check for $25.

The Mrs. Bradt carnation seems to be gaining favor with buyers and good blooms of it bring 6 cents each, but the growers and commission men take exception to it because of the brittleness of its stem.

C. S. Stewart, formerly with Vaughan, McKellar & Winterson, is now with Benthey & Co., who have a very tasteful place at 41 Randolph street.

Lawrence P. Kelley, who has been with Kennicott Bros. Company, will on January 1 become manager for S. B. Winter.

Visitors: L. E. Coleman, Belvidere, Ill.; Wm. L. Hucke, St. Louis, Mo.; J. E. Yeats, Champaign, Ills.; E. Haentze, Fond du Lac, Wis.; Geo. Souster, Elgin, Ill.; Geo. Peterson, Burlington, Ia.

Rochester, N. Y.

Business during the week was quite satisfactory. Carnations were not overplentiful, but excellent in quality; violets sell well if they are good in color and size; roses are to be had in adequate quantities, although the demand has increased materially during the week; Romans and Paper Whites have all been used up clean.

On December 2 a circle of friends was invited by George Ellwanger, to gather in observance of his eighty-third birthday and all his old associates were there, doing honor to the venerable host. Mr. Ellwanger is remarkably active for his years, hale and hearty as ever, and attends to business matters every day.

THE AMERICAN FLORIST

Subscription, $1 00 a year. To Europe, $2 00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

Holly and Greens—Latest Dispatch.

NEW YORK, Dec. 9.—Bouquet green unusually scarce east and west; choice holly likely to advance later.

WE hazard the statement that there has never been a plant grown in this country in jadoo that has not been *better done* in soil at a fraction of the cost.

READERS of this journal cannot fail to see in the reports of many fires, since cold weather came, a convincing argument for the value of the Florists' Mutual Fire Association.

THE Flower City Plant Food Company, of Rochester, has been incorporated at Albany, N. Y., with $10,000 capital. The directors are John C. Kalbfleisch, Rochester; W. S. Randolph, Medina, and Robert H. Vincent, Clifton Springs.

IN our issue of November 12 an error was made in connecting the name of Frank T. Monahan with the Geneva Floral Co., Lake Geneva, Wis. Mr. Monahan is manager of the Williams Bay Floral Co., and undertakes landscape work in his own name.

MANY of our advertising patrons have suggested a change on the lines made with this issue in the arrangement of advertisements. We are always anxious to conform to the wishes of our advertisers when their demands do not encroach too far upon the rights of those—the best patrons of florists, seedsmen and nurserymen—who purchase the AMERICAN FLORIST for its practical information.

A Trade Paper's Duty to its Subscribers.

We see in the columns of two florists' papers continually flattering notices of jadoo. From these it would appear that this article is of immense value to the commercial grower. This we do not believe. We have made diligent inquiry and have failed to find any prominent commercial grower in this country using it to any extent. Is there such a one? This article has been on the market for two years and if it is an economical fertilizer at the prices charged some of our acute growers would know it. It has seemed the duty of the AMERICAN FLORIST to acquaint its readers, as it has done in former issues, with the intrinsic value of this article as a fertilizer, deeming the interests of its subscribers paramount to advertising patronage under such circumstances. Our contemporaries seem very willing to accept such advertising and to further endorse the claims made therein with reading notices purporting to be news matter.

New York.

NO IMPROVEMENT IN CUT FLOWER MARKET.—PLANT TRADE ALSO DULL.—IMPORTERS' TROUBLES.—MORE POINSETTIAS THIS YEAR.—PLANTS FOR CHRISTMAS AT KELLER'S.—ORCHIDS NOW IN MARKET.—MR. ZELLER TO ADDRESS THE FLORISTS' CLUB.—A CHRISTMAS AUCTION.—FROZEN FLOWERS.—FINE VIOLETS AND CARNATIONS.

The stagnation in the cut flower market still continues with little prospect of improvement until Christmas. The first half of December is always dull, but the unlooked for trouble this year was that the latter half of November, contrary to precedent, was equally unproductive. Retailers are as dispirited over the present conditions as are the wholesalers, and this is the most convincing evidence possible. While a factor in the local situation has been the inclement weather yet the earnest investigator will look deeper for the cause of this continual complaint of bad business in the metropolis where, as is well known, money is spent more freely for flowers and other luxuries than in any other place in America and he is sure at the end to come to one conclusion, that is, that the production of flowers for this market has increased far too rapidly for the requirements and is now away beyond the power of wholesalers, retailers and Greeks combined to distribute it. Of course, this fact is not new but its reiteration seems to have had but little effect on the increase of facilities for augmenting the output. With good roses selling, as they have for the past few days, as low as five dollars a thousand, however, it must be that the limit has been reached. For December, such figures beat the record.

The plant dealers are not very happy either. They have worry at both ends, now, for their trouble begins in earnest when the goods reach port and the appraiser gets his grip on them and ends not until the plants are flowered, sold and the money collected. Much of the inconvenience and loss experienced in plant importation is undoubtedly due to the stupidity or indifference of the shippers on the other side but it is not all owing to this cause and it seems an outrage that our importers' interests and welfare should be subject to the momentary whims of good or ill temper of a single individual with whom, in his arbitrary periods, the word of American florists of untarnished reputation counts for nothing whatever.

Years ago the poinsettia was grown largely for Christmas in this market, but its sale fell off until it was rarely seen. Last season, however, it showed signs of returning popularity and the demand was met with difficulty. There is not likely to be any trouble this year to satisfy all calls, for there are several big lots of this showy plant at the various plant growing establishment where the "tip" of last season was promptly acted upon. J. M. Keller has some arranged, five or six small plants in a 10-inch pan, which should find a ready sale as table ornaments. Mr. Keller advises that only young plants of poinsettia should be grown in pots and the old plants set in benches.

Among other Christmas plants which Mr. Keller has to show are marguerites, Begonia incarnata improved and cyclamens. The much-praised Papilio cyclamen, of which the seed costs twenty cents a kernel in France, comes pretty near being a humbug if the specimens Mr. Keller has raised are a fair sample of the variety. Quite a number of azaleas will be in for Christmas, of which Simon Mardner is decidedly the best. Primula obconica improved shows flowers almost equal to Sinensis and Mr. Keller believes this species will eventually outdistance Sinensis as a flowering plant. He has a grand display of Dendrobium Phalænopsis in bloom. A house of dracænas of the terminalis type attracts the eye; the best variety is Lord Wolseley; it is tougher than terminalis but it is not possible to get the canes yet in quantity.

Dendrobium Phalænopsis appears to have made a place for itself as a florists' flower; it is seen in considerable quantity in the leading stores here. Associated with oncidiums and vandas it makes a graceful effect in window and mantel decoration. Cattleya labiata is all through and the cattleyas now coming in are Trianæ. It is time for Cypripedium insigne but they are not in the market heavily as yet, although the plants in the various greenhouses are full of bloom. The unprecedentedly low figure put on them by one grower is responsible for this. The others are waiting for him to get through or get tired but he claims to be able to supply all demands until next May.

Mr. Charles Zeller, the veteran florist of Flatbush, will entertain the New York Florists' Club at its meeting on the evening of Monday, December 12, with an account of the changes and advancement which he has seen in commercial floriculture during the past forty years. Election of officers will also take place on that evening and it being the last meeting for the year 1898 the entertainment committee announces that light refreshments will be served. In the afternoon the bowling regulations will be decided and officers elected, at the alleys on Sixth avenue.

Cleary & Co. have arranged for a Christmas sale to take place on December 19. The stock will consist of seasonable flowering plants such as cyclamens, azaleas, etc., and palms and ferns.

In the cold weather of last week a good many flowers were delayed and frozen in transit to New York. Newport flowers suffered especially in this respect.

M. J. Moore's violets at Ford Bros.' are dazzlers. With such blooms and such bunching the top price comes easy.

Dailledouze Bros. and C. W. Ward are showing the world how to grow carnations.

Chrysanthemums are still plentiful.

Philadelphia.

EXCELLENT BUSINESS.—GOOD STOCK SELLS AT GOOD FIGURES.—SCOTT NOT IN EVIDENCE.—FLORA HILL'S WEAK STEM.—FLORISTS' CLUB MATTERS.—PENNOCK'S RECENT IMPROVEMENTS.—JOTTINGS.

Business despite the bad weather still continues brisk and of fine roses there are not near enough to go around. There seems to be plenty of room at the top and this extra select stock will command a ready sale at good prices for a long time to come. Brides and Bridesmaids are now seen in good shape but are still a trifle under size and not quite right in color. The bad weather of the past week has no doubt much to do with the color, as there has been but little sun. Beauties are scarce and there is a great demand for the special grades.

There are not so many Scott carnations this season, as many growers have a pet pink one of their own that they think as good or better than this favorite. Many growers are trying Victor and Triumph, both of which are showing up well. Flora Hill is a great disappointment on

account of its extremely weak stem; the flowers are fine and large, although not strictly white. There is a very ready sale for all good carnations.

Chrysanthemums are about done and those who make a specialty of these flowers are not very hilarious over the season's business but think it is about as good as last year.

The December meeting of the Florists' Club was quite well attended. George C. Watson read a very interesting paper on farmers' institutes. Several new members were elected and one was turned down, presumably because he is of the Greek persuasion. We are sorry that such a prejudice exists. An honest and upright man is an ornament to any club, no matter what his nationality may be. This nominee has conducted a small store for two or three years and is well liked by those who have had dealings with him. He was immediately renominated by John Westcott and with such a doughty champion will no doubt be successful. Matters of the coming meeting of the carnation society were discussed and committees appointed to attend to the details. The use of the club room was tendered the society for its meetings. The exhibition will be held in the meeting room of the horticultural society, a large room on the first floor. Mr. Herr says that everything points to the best meeting the society has ever held. The paper for the next meeting is to be prepared by A. Blanc on "Novelties of recent introduction and comments thereon."

S. S. Pennock now has his cold storage plant in full operation and is very well pleased with the results. At present running the machine two hours in twenty-four is sufficient to maintain a temperature of 40°, which is, he thinks, the proper degree. The machinery, driven by electricity, is in the basement but the storage rooms are on the first floor. They are 10x11 and 11x11 and are eleven feet high. They are fitted with slat shelves three and a half feet in depth. The floor space together with that of the shelves is 800 square feet. The space between the shelves is from thirty to thirty-six inches, so it will be seen that an immense quantity of stock can be properly cared for. Beginning with last Monday Mr. Pennock will keep his establishment open continuously from 12 a. m. Monday to 12 p. m. Saturday. He will receive the greater part of his flowers in the evening, and the night force will sort and grade them so that orders can be filled as early as required the next day. This innovation will certainly be appreciated by his customers. K.

Boston.

MEETINGS OF THE MASSACHUSETTS HORTICULTURAL SOCIETY, GARDENERS' AND FLORISTS' CLUB AND FORESTRY ASSOCIATION.—BUSINESS DULL.—FUNERAL OF A PORTLAND VICTIM.—DAMAGE BY STORM.

At the December meeting of the Massachusetts Horticultural Society a communication was presented from Mrs. Jerome Jones with a check for $1000, to establish the Henry A. Gane Memorial Fund, the income from which is to be devoted to prizes for chrysanthemums originated by the late Mr. Gane. On the exhibition table were blooms of Cypripedium Sanderianum from C. G. Roebling and of Cypripedium insigne var. Schroderianum from J. E. Rothwell, to each of which a certificate of merit was awarded. The prize schedule for 1899 was presented and duly accepted.

The Gardeners' and Florists' Club met on Tuesday evening and listened to a short paper on the June bug by James Wheeler. The discussion that followed indicated that this pest has been making trouble for everybody here in recent years, outside and under glass. Mr. Dawson spoke of the value of the electric lights as bug destroyers and thought that the protection afforded to vegetation through this agency was much greater than people realize.

The Massachusetts Forestry Association met at the rooms of the Appalachian Mountain Club on Saturday. The topic for discussion was the purpose and value of pruning forest trees. Jas. H. Bowditch donated the sum of $100 to the association. A local paper speaks of this body as composed of "college professors, tree wardens and amateur foresters."

Business is dull generally and stock is accumulating badly again in wholesalers' hands. No relief from this condition is looked for until the holiday rush sets in. Holly is arriving in very fine condition.

Geo. W. Delaney, well known as an employe in several of the city flower stores, was lost in the Portland disaster. His body was among those recovered and the funeral took place on Sunday.

Chas. Ingram has taken a partner, J. W. Lynes, in his business at Reading. They have bought the old Proctor greenhouses and removed them to their own place.

W. W. Rawson, at Arlington, and John D. Twombly, at Winchester, suffered severely by damage done to their greenhouses by the big storm. Many trees on the Common and in the parks were uprooted and broken.

Visitors in Boston: Paul Berkowitz, Philadelphia; Lyman B. Craw, representing Lord & Burnham, New York; H. F. A. Lange, Worcester; Jos. Fuller, Leominster, and Peter Byrnes, Wickford, R. I.

OBITUARY.

BALTHASSAR JACOBS.

The remains of the veteran florist of Canton, Ill., were, on December 2, followed to their last resting place by a cortege which was evidence of his high standing in the community. Balthassar Jacobs was born at Ensheim, Germany, November 25, 1827. He immigrated in 1850 and after some years in Buffalo, N. Y., and Polo, Ill., took up his residence at Canton. He and Annie M. Walters were married in 1877; they had six children, five of whom survive. His demise was occasioned, after but a few days illness, by pleurisy. The business will be carried on by Mrs. Jacobs and her sons.

CHRISTOPHER YOUNG.

The pioneer florist of St. Louis passed quietly away on the morning of December 4. He was seventy-eight years of age. Mr. Young was born in Easthourne, England, and came to America thirty-three years ago, embarking, almost immediately, in the florist business at St. Louis. By industry and thrift he built up a fortune estimated at $250,000. Mr. and Mrs. Young, but recently celebrated their golden wedding. They have five sons and two daughters. The sons are John, James, Henry, William and Charles Young all connected with the C. Young & Sons Co., which has, at Forest Park, one of the largest establishments in Missouri. The daughters are Mrs. Wm. Ellison and Mrs. Dr. Helwig. The interment took place at Bellefontaine.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By first-class fireman and steamfitter. Address Y N, care Am. Florist.

SITUATION WANTED—By all-round workman on or before Dec. 1st. Good fireman, propagator, etc. Address N Y, care American Florist.

SITUATION WANTED—By young man of 22, as grower or assistant on commercial or private place; single. 7 years experience; south preferred. AMERICAN, care Am. Florist.

SITUATION WANTED—By a single man of good habits, to learn the florist business, a place where partly vegetables are grown preferred. EDGAR EASTERDAY, Nokomis, Ill.

SITUATION WANTED—By gardener Jan. 1st; capable of taking charge of park or large private place; water and tropical gardening specialties. A. J. SEIDERS, Drawer 8, Austin, Tex.

SITUATION WANTED—By an industrious young man who has had 4 years' experience in roses, carnations, violets and 'mums, after Jan. 1, 1899 Address J C, care American Florist.

SITUATION WANTED—Single man, 41 years old; 7 years' experience in roses, carnations, 'mums and general stock; 4 years in last place Good references. Address F F, care American Florist.

SITUATION WANTED—By a strictly temperate florist with excellent recommendations; good greenhouse builder, painter, glazier; 15 yrs. exp. with gen'l stock; designer. PRACTICAL, care Am. Florist.

SITUATION WANTED—By practical florist of 15 years' experience; good cut flower grower, roses, carnations, violets, etc; competent to take charge, sober and reliable; single. Best of references. Address B B, care Am. Florist.

SITUATION WANTED—By German grower, age 32, married; 8 years in commercial place; 7 years as private gardener. Prefer private place. Grow flowers and vegetables both under glass and outdoors. Good references. Address GARDENER. Tivoli, N. Y.

WANTED—Salesmen to sell flower pots as a side line on commission. CAMBRIDGE TILE M'FG CO., Covington, Ky.

WANTED—Foreman in our seed order filling department. State experience, references, age and yearly salary wanted. Steady position for an energetic, sober, experienced helper. J. C SUFFERN, Voorhies, Ill.

FOR SALE—Greenhouse, with Hitchings, heater, used one season; good town. Ill health cause for selling. MRS. J. W. RIDER, Crothersville, Ind.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE—Store and two well stocked greenhouses; 50 minutes' ride from center Chicago; horse and wagon, coal and kindling, tools and sashes on place. $1000 will buy. Proprietor suddenly taken ill. Address B I, care Am. Florist. Chicago.

FOR SALE.

A well established and paying florist's business, with 10 to 30 acres of land, 17,000 square feet of glass. Good residence and houses for help. Situated near one of the largest cities in California. Ill health and desire to retire from business cause for selling. For full particulars address

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

LESTER MORSE, of C. C. Morse & Co., has returned to California.

JOHN BARCLAY, the well known traveler, is now with Vaughan's New York house.

HEAVY storms have caught sweet corn crops west and east, and the prices are advancing.

THE Cox Seed Company have located their New York warehouse at 34 Gansevoort street.

BROOKLYN, N. Y.—The Brown Bag-Filling Machine Co. will put in a machine here for a proprietary house.

THE lawsuit of S. Y. Haines with C. H. Lippincott, of Minneapolis, Minn., has terminated in favor of the former.

GILBERT H. HICKS, who was an expert in the seed work of the Department of Agriculture, died at Washington, D. C., December 5.

CHAMPAIGN, ILL.—A pure food and pure seed conference, taking in the entire state, will be held at the University of Illinois December 13.

CHICAGO VISITORS:—J. M. Kimberlin, of Santa Clara, Cal., was in the city December 6, enroute to St. Louis; Albert McCullough, of J. M. McCullough's Sons, Cincinnati.

IT is reported that a large sale of seeds was consummated in New York the past week by Chas. P. Braslan, of the Braslan Seed Growers Co., presumably for the government order.

As predicted early in the season, bouquet green has become very scarce, the supply at present not being equal to the demand. Evergreen wreathing is accordingly advancing in price, and the demand for it is brisk. As also foretold with regard to holly, choice Delaware stock is quite short.

The Rocky Ford Musk Melon.

Because of the interest excited among the seed trade by the demand for and sale of this new melon, the AMERICAN FLORIST has secured two articles on the subject, one from Mr. Roland Morrill, the Michigan melon grower, the other from Mr. Frank T. Emerson, the Nebraska vine seed grower. A careful perusal of each will disclose radically different opinions as to why the Rocky Ford melon has attained its present fame and our readers must judge for themselves wherein lies the true secret of success. The statements of each writer must stand or fall on their own merits. Mr. Morrill's statement appeared in our issue of December 3; that of Mr. Emerson is given herewith.—ED.

II.—MR. EMERSON'S VIEWS.

Away out in Colorado, about fifty miles east of Pueblo and more than 2,000 miles distant from the Atlantic coast, a few farmers a number of years ago planted a small acreage with water melons for the Pueblo, Colorado Springs and Denver markets. The undertaking proved a financial success and thus the little town of Rocky Ford laid the foundation for the fame for which it has since become celebrated as a melon growing center.

The demand for melons grown in that locality increased each ensuing season and created a corresponding increase in the number of growers who, to guard against the cutting of prices among themselves, as well as to advance and protect their interests in other directions, formed an alliance, or union, known as the Rocky Ford Melon Growers' Association. Several years ago the association conceived the idea of also growing musk melons upon a limited scale for its local market and selected for the purpose Burpee's original oval type of the Netted Gem variety which they found to be very early, exceedingly productive and generally of good quality, although as with all musk melons there was always a certain percentage of the crop that were inferior in quality and not sufficiently long keepers to answer for shipping purposes.

To overcome these objections the Colorado melon growers, with the proverbial energy of the "audacious Westerner," went to work with an enduring patience, care, labor and skill that was indefatigable, experimenting with specimens selected for the purpose until finally, by operating and applying "the doctrine of evolution" they succeeded in developing a fixed strain which while apparently resembling the parent stock in shape, size, etc., far surpassed it in productiveness and shipping or lasting properties; and in regard to eating quality it has been pronounced, wherever tried, as excelling in flavor and sweetness any other green-fleshed commercial variety.

This is a fact that precludes any argument. Four years ago the so-called Rocky Ford musk melon was unknown. A year later a stray lot would now and then be occasionally heard of. Two years ago seed dealers in Boston, New York City and Rochester, N. Y., were inquiring, "What is this Rocky Ford musk melon that came in on our market this season, and where is it grown?" During this present season it is safe to state that there is hardly a city of any importance whatever as far east as Portland, Me., wherein this musk melon has not been sold at prices ranging from two to three and four times higher than local stock, which certainly should be to any one indisputable proof as to its superlative quality.

There has never before to our knowledge been so systematic a process of developing, advertising and so successfully and profitably marketing anything in fruits or vegetables in this country as has been demonstrated by this association with the Rocky Ford melon. From but an exceedingly small acreage, devoted to the production of this melon, only a few years ago, the association has increased the acreage to an extent that is simply wonderful, no less than 6,400 acres having been planted with this one variety at Rocky Ford and its vicinity the past season. It is reported on good authority that the association made one contract alone to furnish 800 carloads to one commission firm last spring at 97½ cents per crate, each carload containing 465 crates. Think of it! 292,000 crates containing forty-five melons each and realizing for the growers the sum of $284,700 from this single contract.

Who in the face of such a result gained by the co-operation of a number of growers can contradict the benefit that might accrue if similar associations were formed by seed growers in every special line? Would we not, by paying our growers higher prices, obtain seed crops of better quality, with a possibility of increased profits to ourselves? Rocky Ford musk melons sold on the Chicago market the past season at $1.50 per crate in competition with Michigan, Illinois and Indiana Gems at 20 cents per basket, which was equivalent to less than 60 cents per crate for the latter. Can there be any stronger additional proof required as to the superior quality of the Rocky Ford? It can be no ordinary musk melon that will stand shipment over 1000 miles in August and September and then sell for twice the price of home grown stock.

It is interesting to note the progressive and aggressive energy which has been devoted to the creation of new markets by this association. Several carloads of melons would be shipped to a city, where the Rocky Ford was comparatively unknown, with instructions to the consignee to go on the open market and for the purpose of introducing the melons to give away a number of crates of same to each of the larger buyers. Of course such gifts would be accepted without hesitation and on such days the local market would fall flat, and the gardeners being unable to sell out would haul their melons home again disgusted. The next day every hotel, restaurant and other large consumer of musk melons would have no other kind but the Rocky Ford and there are many instances where it is known that they paid as high as $3 per crate rather than buy local stock at any price.

While this method of forcing sales may be considered a form of piracy, the end desired by the association was attained; but the gardeners who were compelled to lose thereby *will remember the Rocky Ford musk melon* when making their seed purchases next spring, and will gladly pay a high price to obtain the seed. During three days of last September at the Omaha Trans-Mississippi Exposition the Rocky Ford Melon Growers' Association disseminated nineteen carloads of melons free to thousands of visitors from all over the world, simply as a practical advertisement to lovers of melons. Considering the value of the melons—cost of crates, freight charges, time and labor required in handling the melons on the grounds—could any form of advertisement be any more strikingly noticeable and permanently effective!

It has been suggested that the superior qualities contained in the Rocky Ford musk melon are owing to the climate and soil of the eastern part of Colorado. This idea is erroneous as a comparative test has satisfactorily demonstrated during the past season, at Waterloo, Nebraska. The superior qualities referred to are the direct result of a rigid system of selection of the fruit. The association employs inspectors who pass judgement on every melon as to size, shape, etc., prior to crating. The melon must be oval, small, well netted and solid and firm at the blossom end, this last indicating keeping quality; but even with the foregoing points in its favor, if there can not be faintly discerned beneath what might be termed the transparent green color of the seam between the lobes, a *golden tint*, irregularly formed (like the border of a piece of lace work) and following the contour of the ragged edge of the netting, where it joins the dividing seam, then experience has proven that the melon is most liable to be defective, and it is rejected as not being up to the standard required; and *therein lies the secret of the success* attained by the association in sustaining, by constant

vigilance in the selection of seed stock first, then of the crop itself, the reputation of and ever increasing demand for the Rocky Ford melon. Climate and soil are elements to be considered in growing all crops, but in this case the results are owing to brains and good management.

Last spring seed of the Rocky Ford known to be selected with extra care by the local Rocky Ford growers sold at $5 per pound. Owing to the increased acreage there was not a sufficient quantity obtainable to supply the demand and the association purchased several hundred pounds of what it was assured by certain eastern dealers to be seed of the true oval type of Netted Gem musk melon. When the time for harvesting and shipping the crops arrived it was found that a large proportion grown from this outside seed purchased by the association consisted of melons that were much too large and very badly mixed with round shaped melons, and the eating quality was so inferior that they were rejected by the inspectors. It has been reported that the seeds of some of these rejected melon crops were saved and that they have been offered for sale to the seed trade. If these reports are true, it is to be deeply regretted that the growers should have permitted themselves to adopt any such reprehensible methods, for although the disseminating of seed of such inferior stocks would undoubtedly tend to enhance the value and increase the sale of the genuine Rocky Ford strain, it would mean a severe loss to many hard-striving market gardeners throughout the land, whose crops would be found unsalable in their local markets, in competition with shipments received from Rocky Ford.

Too much care therefore cannot be exercised by the seed trade in supplying themselves with the true Rocky Ford type. That it should be generally catalogued by the seed trade needs no recommendation. No other melon has ever had anything like the extent of practical advertising that has been directed into such close touch with the consumer and with such remarkable force in every melon market of the country, especially in the north; and if it is catalogued and brought to the attention of market gardeners there will be, in our opinion no difficulty in obtaining ready sale for all the available supply of seed at prices ranging several times higher than the prices obtained for the best of all the other early green fleshed musk melons yet introduced.

Cincinnati.

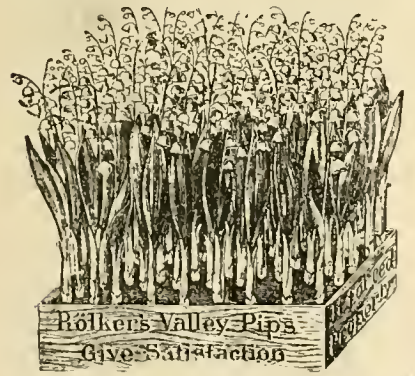
THE BUSINESS SITUATION.—HAPPY HYMENEAL HAPPENINGS.—JOTTINGS.

Business the latter part of last week was very satisfactory, but the first of this week started out rather poorly. Violets at present are very scarce and there are not enough American Beauties to meet demands. Tea roses, carnations, lily of the valley and bulbous stock is plentiful enough to go around.

Wm. Turner, foreman for Julius Peterson was quietly married November 30 to Miss Dollie Carr, of Westwood. Ed. Freis, of Newport, was showered with congratulations at the market upon his marriage to Miss Hagedorn.

A. L. Vaughan, representing Vaughan, McKellar & Winterson, of Chicago, was a caller this week. H. SCHWARZ.

Nashville, Tenn.



The social wheel is still turning at a lively rate, with a corresponding activity in floral circles. American Beauty is an easy favorite, with the supply just about equal to the demand. All roses are rather off crop now but with a prospect of coming in plentifully for the holidays.

An event of the week was the visit of Geo. H. Cooke, decorator for Small & Sons, Washington, D. C., who came out with the bridal bouquets and decorations for the Studds-Eastman nuptials, which were the most elaborate ever consummated here. Mr. Cooke arranged the house decorations most lavishly and artistically but the church decorations were of palms arranged by a local florist.

Violets have been very scarce, with small prospect of a plentiful supply, as the weather continues unfavorable. Violets are grown here in cold frames, which has its disadvantages, for, when a freeze sets in, it is impossible to open the frames to get at the blossoms. M. C. DORRIS.

PAOLA, KAN.—A. Roth has just completed a house 20x60 for carnations.

AURORA, ILL.—Winnie Smith, daughter of W. L. Smith, is the successful society writer upon the *Beacon*, the leading evening paper of the city.

Do you Ship Onion Sets?

Hercules Ventilated Barrels are RIGHT for Shipping any Product requiring ventilation.

We sell thousands to large shippers of produce and onion sets. The Hercules is the only barrel which can be shipped knock-down and does not require a cooper to set them up. One man can set up 75 to 100 Hercules barrels per day. Every shipper can be his own cooper and **save money.** We ship the barrels knock-down, with heads and hoops complete and ready to be set up. Fourth-class rates apply in less than car lots.

We furnish our set-up outfit for $2.00 and refund the $2.00 when you have purchased 500 barrels.

Write for sample barrel and prices.

With Colorado Horticulturists.

The Colorado Horticultural Society held a not largely attended but most instructive convention at Denver November 28-30. Among those in attendance were: A. F. Baird, Baldwin, Mo.; J. Ball, Arvada; W. J. Sawyer, Hotchkiss; S. M. Carlzin, Montclair; J. P. Kernochan, Delta; J. C. Kassin, Rocky Ford; W. T. Lambert, Sedalia; C. W. Steele, Grand Junction; J. S. Ibbson, Wheat Ridge; H. C. Sherman, Sterling; B. F. Rockafellow, Canon City; J. E. Payne, Cheyenne Wells, Colo.; W. M. Davis, Wheat Ridge; J. F. White, Arvada.

Exterminating Gophers.

ED. AM. FLORIST:—I am about to take possession of a piece of prairie land which is badly infested with gophers. Can you kindly tell me how to exterminate them quickly and cheaply? The land in question has been unoccupied for years. A. R. M.

Larchmont, Wash.

The best and most effective method of destroying pocket gophers and most burrowing animals is by the use of bisulphide of carbon. This poison is cheap, easily obtained, and if applied thoroughly the results are usually satisfactory. A fresh hole should be selected or a burrow opened near a point where a fresh hill has been thrown up. A bunch of cotton, waste, rags, or similar material, saturated with two tablespoonfuls of bisulphide should then be thrust well down into the hole and the opening closed. The gas which is formed soon fills the hole and will penetrate to the more distant parts of the burrow and suffocate the occupants. On sloping ground the poison should be introduced at the highest point since the gas being heavier than air flows, like water, to the lowest part of the hole. The main difficulty in using this poison is that the burrow may be long or may be filled with earth and the animal will be beyond the reach of the fumes. In this case the bisulphide should be introduced at several points and if necessary the operation should be repeated. Crude bisulphide specially prepared for this purpose can be obtained from some manufacturing chemist. It has a powerful odor, is inflammable and more or less explosive. Care should therefore be taken when handling it, not to open it near a light, but otherwise no danger attends its use. JAMES WILSON.
Sec'y of Agriculture.

Washington, D. C.

Europe Fears San Jose Scale.

On December 1 the government of France promulgated a decree prohibiting the importation of American fruits, shrubs and trees. This action was taken as a safeguard against the San Jose scale, which now infests thirty-eight states in the union.

"This action by France," says Dr. L. O. Howard, of the Bureau of Entomology of the Department of Agriculture, Washington, D. C., "is in line with the steps taken by other European countries. It will be remembered what a storm of protest arose when Germany, about a year ago, took the initiative in this matter and absolutely prohibited the entry of American fruits and trees. We came near making an international matter of it. Later she modified her decree so as to permit the importation of fruit after careful inspection, but refused to recede in regard to trees. Soon Austro-Hungary followed with a similar decree. Then came Canada, Switzerland, and Holland while Sweden and Great Britain began to investigate. Now it is France's turn."

These prohibitory enactments are of paramount importance to American horticultural interests and demand measures commensurate with the exigencies of the case. Experiments at Washington, conducted in the presence of the representatives of foreign governments, prove that the San Jose scale is harmless when taken into the human stomach and that the insect cannot survive the processes employed in drying fruit. This, coupled with the fact that experience records no case of trees becoming infested through fruit shipped to foreign markets, will doubtless result in all governments following Germany's lead in removing, under a system of inspection, the embargo placed upon American fruit and fruit products. But what of the nursery interests?

The American Association of Nurserymen has placed the stamp of its approval upon the Barlow bill, introduced at the second session of the present congress, which provides for a governmental inspection of fruits and fruit trees, and authorizes the fumigation or destruction of infested specimens. Every person who would not see the markets of all Europe closed to our nurserymen should accord the legislative committee his assistance in urging its enactment into law.

BOONVILLE, N. Y.—Henry Russell's greenhouse was damaged by fire on the night of November 23.

CROMWELL, CONN.—About 500 lights of glass were broken in the greenhouses of A. N. Pierson by the storm November 26. Henry Weiddermire also lost some glass.

NEWPORT, R. I.—Thomas Beattie, before leaving for his new place in Pomfret, was tendered a farewell reception by members of the Florists' and Gardeners' Association and St. Andrews' Society on November 24 at Mercury Hall. Mr. and Mrs. Beattie were presented with a handsome parlor clock.

Wm. L. Hucke	74	74	...	74

Philadelphia Pastimes.

The bowlers are having a merry time on the alleys these days, or rather nights. Last Saturday evening saw the usual crowd of enthusiasts bowling away as if something of importance was at stake, instead of which each man was only trying to make a better score than his opponent so that he might make him the subject of his good-natured raillery and, incidentally, save his tickets. Scores ran high; 170 and over was a common figure and three scores of over 200 were made: Kift 201, Moore 206, Moss 211. Three 200 games in one night is a pretty good record and it shows that the boys are improving.

On Monday evening last another match between associate and active members was played and resulted in a Waterloo for the Associates, they being defeated by 248 pins. The score follows:

ACTIVE MEMBERS.

Name.	1st.	2d.	3d.	Total.
Westcott	167	177	160	504

Fun at Flatbush.

The great contest between the "Clams" and "Lobsters" has not yet been settled owing to the absence of leading spare-makers on the last two Thursday evenings. At the last meeting John Walker, of Philadelphia, illumined the alley with his presence and had no difficulty in rolling up a big score. Tom Brennan made the record for the evening with a score of 201 which won for him a generous "pot." Had he been as successful the previous Thursday John Raynor would not have got away with that fifteen pound turkey. The only man who ever forgot to take the "pot" when he had won it was Louis Schmutz, but he found it there just as he left it, when he returned the following week, a tangible testimonial to the scrupulous honesty of the Flatbush bowling fraternity.

ESTABLISHED 1866 **EMIL STEFFENS** SUCC.TO N. STEFFENS. AND STEFFENS BROS.

MANUFACTURER OF

FLORISTS WIRE DESIGNS & SUPPLIES

335 EAST 21ST ST. NEW YORK CITY.

Nashua, N. H.

Geo. E. Buxton recently removed his flower store to the Odd Fellows' building, one of the most imposing structures in town, his store being one of the finest and best equipped places of the kind in the state of New Hampshire. His carnations are in excellent shape, Scott, Daybreak, Flora Hill and Mrs. Bradt looking exceptionally fine. Mr. Buxton reports an improvement all along the line and especially in the demand for cut flowers.

August Gaedeke & Co. are as busy as the proverbial bees. The genial August is decidedly original in his ideas, being never satisfied unless his designs, decorations, or whatever he may be engaged upon, bear the stamp of originality. The most noteworthy social event of the season was the Campbell-Staples wedding and the floral decorations were by far the most elaborate ever seen in this town. As masters of the ceremony A. Gaedeke & Co. were complimented on all sides.

HOMO.

HUDSON, MICH.—Philip Thomas has greatly improved his greenhouses and stock and has a model establishment.

FREEPORT, ILL.—John Bauscher, Jr., has purchased the large boiler formerly used by the Henney Buggy Company and will use it to heat his greenhouses. He is building a fine new boiler house.

BROCKVILLE, ONT.—J. Hay & Sons recently gave a show at their greenhouses, corner King and Bethune streets, to which a large number of people were attracted by neatly printed invitations.

Successful Growers

Know that they can dispose of all their Surplus Stock by advertising in the American Florist. TRY IT NOW.

Worcester, Mass.

The worst blizzard since 1888 struck us on November 26. Twenty inches of snow fell on the level and the northwest gale, which accompanied it, piled the snow into drifts fifteen and twenty feet high. Nearly all the growers report a slight loss of glass. C. D. Thayer is the heaviest loser, the weight of the snow causing one of his houses to collapse. The appearance of the greenhouses on Monday morning was unique, reminding one of the frosted Christmas cards. Some of the smaller establishments were entirely covered and had to be shoveled out. The old style gutter houses were damaged greatest and this storm proved conclusively that this style of house is not fitted to stand the heavy fall of snow that we get.

The Worcester County Market Gardeners' Association held its annual meeting December 2 for the election of offices: President, J. Lewis Ellsworth; vice-presidents, H. A. Cook, A. S. Wolfe, R. H. J. Forbush, and J. H. Record; secretary and treasurer, H. R. Kenney. There was a lengthy discussion on the question of inviting the florists to unite with the market gardeners and a committee was appointed to confer with them.

A. H. L.

Indianapolis.

The monthly meeting of the Florists' Club took place Wednesday, December 6. Election of officers for the coming year resulted as follows: President, J. Clay Powers; vice-president, Frank Alley; secretary and treasurer, Fred. Huckriede.

KELSEY'S BRILLIANT SOUTHERN GALAX LEAVES and LEUCOTHOE SPRAYS....
— FOR —
XMAS and the HOLIDAYS

Introduced by Harlan P. Kelsey. Nothing else will take their place.

Can be had of all leading Wholesale Florists who are supplied by me, or write or wire me direct. Be sure to ask if they are Kelsey's, and so get the finest colored and firmest leaves. Used out of original cases—no rehandling.

For all the finest floral decorations. Nothing equals Galax for wreaths, crosses and all funeral designs, as they remain perfectly fresh outside without care. Use the small green leaves with violets. Nothing else so cheap, lasting, beautiful and easily handled. Remember the long, wiry stems.

In early December and during the winter I will have a large supply in Boston direct from my Highlands Nursery in the Carolina mountains placed in cold storage, packed in original cases as below, and can ship promptly from Boston on order by mail or wire. I reserve right to ship from either Boston or North Carolina unless ordered to contrary.

PRICES: GALAX, large or small, either color, per 1000 $1.25; 5000 or more at $1.00 per 1000. TERMS CASH.

LEUCOTHOE SPRAYS, per 100 $1; per 1000 $8.
Case A.—5000 Galax, assorted sizes and colors.
Case B —Same as A. with 200 Sprays.
Case C.—10 000 Galax, ass't sizes and colors.
Case D —5000 Galax, large bronze.
Case E.—5000 Galax, small bronze.
Case H.—5000 Galax, large green.
Case I.—5000 Galax, small green.
Case L.—5.0 Leucothoe Sprays.
Order cases by letter, or larger quantities by 1000
Cases A $5, and B $7 are very popular. Try one or more for sample.

Large orders may be shipped by freight at a great saving, if time permits, direct from my Highlands Nursery. Be explicit in shipping directions, or my best discretion is used. Telegraph orders save time. Large orders may be shipped direct from my Highlands Nursery.
Address Telegrams and Letters to the introducer,

VERBENA KING

Has a song to sing, and here it is. To Jan. 1st we will sell our fine **MAMMOTH VERBENAS**—well rooted—at 60c. per 100, $4.00 per 1000, and they are fine. Don't be deceived in buying 1898 seedlings with any old name given them, as they may be quite seedy by spring. We guarantee every one of ours to please you.

HELIOTROPE, 10 named vars. at 80c. per 100. $6.00 per 1000.

COLEUS, 40 best vars., all true to name, 70c. per 100, $6.00 per 1000.

AGERATUM, Cope's Pet, blue, Lady Isabel, white, 50c. per 100, $4.00 per 1000.

Remember, we pay mail or express charges on all rooted cuttings. THAT CASH PLEASE.

TESTIMONIAL.

MR. C. HUMFELD.

Dear Sir:—The Verbenas I bought of you last spring, I wish to say they grew finely and produced the largest and most beautiful blooms of any in this vicinity. I have recommended you to several florists. Yours,

Fairfield, Conn. W. H. EVERETT.

C. HUMFELD, Clay Center, Kan.

HOLIDAY TRADE IS VERY GOOD.—HARRISII LILIES ARE BADLY DISEASED.— NOTES AND COMMENTS.

The home cut was insufficient for our Thanksgiving needs and several large shipments came in from Chicago and Milwaukee. Since then trade has been fair, the usual quiet after a holiday being hardly noticeable. American Beauties are in good demand with higher prices prevailing each week. Violets are more popular than ever with an insufficient supply of home-grown stock. The demand for carnations is increasing and good stock is worth almost as much as roses. Brides and Bridesmaids are in good supply while Meteors and Wootons are about equal to the demand.

Harrisii are late this year and are badly diseased, more than fifty per cent of the stock being infected.

Bouquet green and holly are livening up the store windows fully a week earlier than usual. The former article is reported very scarce. There seems to be a fair supply of choice holly.

The next meeting of the Minnesota Florists' Club will be held December 10 in this city. FELIX.

BENTON HARBOR, MICH.—The Twin City Floral Company has received a fine lot of palms from Chicago and has put in a stock of gold fish and aquariums. They are equipped for and expect a large Christmas trade.

VAUGHAN'S SEED STORE, Gen'l Western Agents, 84 Randolph St., CHICAGO.

Tacoma, Wash.

Lena W. McCoy's modern establishment at 917 Pacific avenue was destroyed by fire on the morning of November 27; loss $2,000 with no insurance. The fire was started by the furnace used in heating the greenhouse and both that structure and the store were wiped out. This loss necessitates the closing of the Seattle store which Mrs. McCoy opened November 1. She has found a temporary store next door to the burned building.

ST. JOHNS, MICH.—Knapp Brothers have established a greenhouse here and are building up a fine patronage.

ALDEN, N. Y.—Harry Tanner's greenhouses were ablaze the other night and narrowly missed destruction.

BANGOR, ME.—W. I. Clement, proprietor of the Stillwater greenhouse, has opened a store on Main street.

Butted Glass.

This is no longer an experiment, it has come to stay. There are various ways of making Butted Roofs, but the best way is with the

Clipper Bar.

With this bar you can make a roof that is absolutely free from drip, and glass cannot be torn out by the wind. Butted glass makes a tight roof, a warm house and saves fuel. It lasts longer, looks better and costs less than the old-fashioned roof. But do not think that this is the only bar we sell, for it is not; we furnish what people want and there is nothing in greenhouse material that you cannot get from us, and all of open-air-dried Cypress clear of bright sap, stained sap, knots and all other defects.

ROSES.

CRIMSON RAMBLER FOR EASTER.

ED. AM. FLORIST:—Will you or some brother florist tell me through the columns of your paper of the best way to treat the Crimson Rambler rose in order to have it in bloom for Easter? Are cuttings from three year-old and four year-old roses as good as those taken from younger stock? B.

The first question is presumably from one who has not yet taken any steps towards preparing the Crimson Rambler rose for Easter. With plants from open ground taken up at this time, or any time before the ground is frozen so hard as to prevent taking up, the lifting should be carefully done, the roots cut as little as possible and the plants potted at once, allowing the roots no opportunity to get dry, a condition which might cause the bark to shrink. They should be potted in good rose soil—the addition of 1-25 fine ground sheep manure is a great benefit, as it makes the foliage larger and of a deep rich green color. After potting they should be kept for six weeks or more in a night temperature of about 45°. The pots should then be pretty full of active working roots and the temperature may be raised to nearly 50° at night and so maintained until the clusters of buds appear, when if necessary to get them to bloom at the required date the temperature may be raised to 60° at night. Under the foregoing treatment they should bloom in about sixteen weeks from the time of potting. As the blooms remain after being fully opened in good condition for three or four weeks, it is better to have them opened considerably in advance of Easter. For three or four weeks after potting they should be frequently syringed with water to keep the bark from shrinking and the buds full and plump. Two-year-old plants are much better than one-year-old as at the latter age the wood is not strong enough to produce large clusters of blooms. The two-year-old plants properly grown should have from three to six stems five feet long and as thick at the bottom as one's little finger. It is better to cut the wood back only a foot or so, as it will bloom freely almost to the tips. The plants may be very prettily arranged by bending the stems over, which will cause the lateral eyes to break freely, and these eyes will all produce beautiful clusters of bloom. A plant of the Crimson Rambler in bloom is one of the most beautiful things imaginable. This variety is a very valuable addition to the list of Easter plants and it is also, now that its reputation is established as a hardy climber, one of the most salable of plants. During the bedding out season, in addition to the plants we forced last year, after lifting them from the open ground, we grew a number of plants in seven and eight-inch pots under glass in summer. This is the most expensive way of growing them, but there was some recompense for the extra trouble in larger bunches of bloom.

I believe it is quite possible to have pot-grown plants in bloom for Christmas, but to accomplish this the plants should get a rest from the middle of August to the middle of September, by turning the pots on their sides and then withholding water as is the custom with the growing of Magna Charta, Jacqueminot, Mrs. John Laing and other hybrid roses for blooming at that time. Would it be any trouble to sell Crimson Ramblers, well-bloomed, for a big price at Christmas? Well, I guess not. And somebody will yet do it as the plant takes very kindly to the forcing process when properly prepared. As an experiment last year we put several plants in February in a temperature of 65° to 68° and they bloomed famously, and were not pot-grown either, but they had been well rooted in a night temperature not exceeding 45° 50°.

In answer to the second question we would say that it would make no difference whether cuttings were taken from three year-old, four year-old or younger plants, providing the wood was in a healthy condition. If hard wood cuttings are taken at this period of the year they should be rooted in a cool house with a night temperature of 35° to 40°. A little bottom heat would be beneficial, but the tops must be kept cool. If soft wood from indoor growth in the winter is used they will root freely in the ordinary rose cutting bench. The variety is not at all difficult to propagate.

ROBERT CRAIG.

ROSES DROPPING THEIR GREEN LEAVES AND DYING BACK.

Notwithstanding all that has appeared on this subject at various times in the columns of the AMERICAN FLORIST, yet the trouble must be frequent, as I have received three samples of diseased leaves and branches from different parts of the country, and several personal inquiries from others regarding the trouble.

The cause of this disease is very simple. A damp, stagnated atmosphere combined with a low temperature repeated two or three nights will invariably produce it and in some positions more readily than others. Usually the damage is done in weather that is generally considered not cold enough to require any fire heat,

oftentimes when the temperature in the greenhouses does not fall below 60° without fire heat; this, in conjunction with a humid atmosphere, will cause a heavy dew to settle on the foliage with small beads of moisture hanging all around the edges of the leaves. When the sunlight first enters the house in the morning this will look very attractive, but let it be repeated two or three times and then when the sun strikes well on the young leaves and branches they will begin to wither and by the middle of the day, if bright, many of them will drop off and the stem will have a blackened appearance, frequently for eight or ten inches back from the tops. This means that every shoot will die back that far, and the entire crop of flowers is thereby ruined; and what is still worse, the health of the plants will receive a general check, in fact, root action is so badly impaired that it will take several weeks of careful nursing to get the plants back into healthy, working condition.

When this trouble appears, cut all the diseased shoots back to healthy leaves; clean every diseased leaf and branch off and burn them; then syringe lightly overhead for two or three weeks, but hold the soil as dry as possible consistent with retaining what healthy foliage there is left; give plenty of air during the day and a little gentle fire heat at night; if very mild, leave a crack of air on all night; do not syringe or water the plants under any circumstances after 1 p. m. Returning vigor to the plants will be readily detected by their breaking into new growth; this will indicate the time for a little more generous treatment, but in this go carefully till your plants show plainly that they have gained active root action again.

As a safeguard against this trouble, never allow the atmosphere in your rose houses to become saturated with too much moisture; even in quite mild weather put on just fire heat enough to keep the dews from settling on your plants; if too warm leave air on all night. If you must be without fire heat under such circumstances, withhold considerable water, or in other words, let the soil and also the house be quite on the dry side at all times and leave a crack of air on even if the temperature goes down to 53° or 54° during the night. You of course will not get as many blooms under this treatment, but you will have the satisfaction of keeping your plants healthy and when the fire heat is put on a fine crop of first quality blooms will be produced if other treatment is consistent. The above disease may be classed as an aggravated case of anthracnose.

JOHN N. MAY.

[The above article by Mr. May answers the queries of "J. F." and "Grower."—ED.]

HOG MANURE FOR ROSES.

ED. AM. FLORIST:—Kindly state what value hog manure possesses, also whether decayed corncobs are of any utility in a stiff, yellow loam to be used for general greenhouse purposes. W. B.

The value of hog manure depends entirely upon the class of bedding and the quantity used; also, to a large extent upon the nature of the food given them. Presuming that they have been fed upon corn or other grain and that only a very limited amount of clean bedding, such as straw of wheat, oats or rye, has been used, the manure will be of fair quality for greenhouse purposes, but before it is used for roses it should be thoroughly composted with the soil. Its fertilizing qualities, even at its best, are of a very poor grade compared with manure from well fed cows or horses, and when hogs are bedded down with any rubbish, such as corn stalks or rough grass, it is worse than useless for any kind of greenhouse work, as the weeds will cause more trouble than the fertilizer is worth. I have never used it in greenhouse compost, but some years ago, being short of other manures, I used three or four loads to finish dressing a piece of ground in the open air where I wanted to plant a lot of roses, and although the proportion of manure was nearly doubled where this was used, yet the result was in no way comparable with that where other fertilizers were employed. In another case I used some for top dressing for roses in the open air with very poor returns; in fact, the benefit did not pay the additional expense incurred.

Replying to "W. B." regarding decayed corncobs, there are no fertilizing qualities whatever in these, but they might, if thoroughly broken up, be of some benefit in making a heavy clay loam somewhat lighter. If corncobs could be ground up and used as bedding under horses or cows they would be valuable for such a purpose, as they would then take up most of the ammonia and other properties from the animals and impart it to the soil when used. Another quality such bedding would have would be that they are absolutely free of weeds and in a fine state could be used in any form for greenhouse purposes either to mix with the soil for planting or as a mulch.

JOHN N. MAY.

M. A. PINOTEAU.

Honors For a Canadian Florist.

M. A. Pinoteau has been created a chevalier of the Ordre du Merite Agricole for his services to horticulture, the honor coming to him upon the recommendation of the Minister of Agriculture of the Republic of France. It is the first time in history that this decoration has been bestowed upon a Frenchman whose work has been accomplished out of France, for Mr. Pinoteau is superintendent of Logan Park, Montreal, Canada. His nativity was at Villeneuve-sur-Cher, France, in 1855. He pursued a course in the College d'Horticulture of the Department of the Berri and came to Montreal in 1874. From 1882 to 1889 he was a member of the staff of Mount Royal Park. In the latter year he was appointed to his present position, where he has charge of the growing of plants for the twenty-six public squares of the city. He is doing that which makes the French order a well merited tribute to his attainments and this year provided nearly a half million plants for the city squares. Mr. Pinoteau is a member of the Montreal Horticultural Society and of the Montreal Florists' and Gardeners' Club, and at all times has shown himself an enthusiast in the advancement of the art of the culture of flowers.

The Christmas Greens Industry.

Some western features of this department of the trade are shown in the accompanying illustration, but this very inadequately represents the importance of an industry which has developed to an enormous extent within a few years. When Capt. H. Schunemann, one of the Chicago pioneers in the business, began gathering greens some twenty years ago a dozen barrels of lycopodium was all that could possibly be disposed of during the entire season. To-day, however, with several thousand tons of this material he is unable to supply even his regular customers.

"The materials now used as Christmas greens," says a western dealer, "may be mentioned in order of relative importance about as follows, viz., holly, lycopodium (known also in different localities as bouquet green, ground pine, club moss, etc.), mistletoe, laurel, and cedar clippings. Other articles hardly coming under the same head, and yet of similar utility, are wild smilax, needle pines, outdoor palm leaves, Florida moss and galax leaves. All of the last mentioned class come from the south. The smilax, palm and galax leaves are handled almost exclusively by the cut flower trade, wholesale and retail.

"Lycopodium has been in common use by florists and decorators, east and west, so long that the memory of man runneth not back to the time when it begun. Choicest Eastern Vermont, Northern New York and Pennsylvania picked stock has been usually handled in large sugar barrels, tied in carefully arranged bunches weighing, say, perhaps, from one-half to one pound each. These bunches are packed in the barrels in layers with roots toward the center. Such care is usually taken in the packing that the stock reaches the market in splendid condition, but the quantity is always limited and the price twenty-five to thirty-five per cent higher than Wisconsin and Michigan stock. Lycopodium, as handled in the west, comes almost entirely from northern Wisconsin, and is gathered from the north end of Lake Michigan, in the vicinity of Sturgeon Bay, west nearly to St. Paul. The green belt in that state where lycopodium is picked annually moves northward as the country becomes settled and as the woods and swamps are depleted. This plant seems to flourish best in moist, shaded localities, and when plucked out by the roots, as is done when gathering, is not replaced by new growth of its kind. More open situations and dryer ground produce lycopodium of a lighter and yellowish color inferior to that found in the first named locations.

"The first purchaser of 'moss,' as lycopodium is known in this district, is the country store-keeper in towns usually containing from one hundred to five

SOME PHASES OF THE GREENS INDUSTRY IN THE WEST.

hundred inhabitants. The best swamps or woods available for picking may be from five to twenty-five miles from this little town and railway station, but the country store-keeper has customers who are new settlers in this outlying country and such of them as have large families of children have become green pickers. Annually young men, and older men, living in the towns and out of mill work or timber cutting will take up this work if prices are well advanced and start out with a camping outfit for a two to four weeks' stay in the woods. This class of pickers will only undertake the work when the store-keeper is prepared, by reason of favorable contracts with the greens jobber in larger cities, to offer high prices. At present this class will seldom undertake the work at less than two and one-half to three cents per pound net, while the farmers and children will often gather the material at prices varying from one and three-fourths to two and one-fourth cents per pound in cash or in "store pay." Other desirable pickers are bands of Indians available in certain localities. They gather the finest green, but are unreliable, as the whole tribe may shift their location at any time, and one week may bring in five tons of green and the next vanish entirely. This is very certain to be the case if the Indian agent pays them during this time.

"The output of lycopodium in 1896 and 1897 exceeded the demand and many jobbers, as well as country store-keepers, found themselves overstocked and during December selling the article at cost or less, but the present season conditions have changed materially. Jobbers, timid at former losses, have made such contract offers to the country stores that the latter could not stimulate their customers to extensive picking. The result of this, coupled with inclement weather and a short picking season, was a much reduced total output of the green, probably thirty or forty per cent less than the average supply. The jobbers are usually in the habit of taking advance orders from florists and consumers on a basis of twenty to thirty per cent advance over the first cost of the article, but the present year has seen December prices about two hundred per cent over cost with very little stock on hand with which to take advantage of these fancy figures. A careful estimate of the average season's output of Wisconsin green might probably be from three to four hundred thousand pounds, say thirty-five ordinary carloads. Chicago is probably the central shipping market for this article at present, although Milwaukee, St. Paul and Minneapolis also handle good quantities when a liberal supply is available. Detroit, Cleveland, Buffalo, Pittsburg, St. Louis and New York City are large users of lycopodium. A few dealers in these cities buy from the greens district, but most prefer to contract regularly in advance each year with jobbers.

"The use of holly in a commercial way is comparatively recent and has grown from a very small beginning to its present proportions within fifteen years. Until within the last five years most of the holly was handled by wholesale seedsmen and florists. Since that time the sale of it has been taken up by the produce commission houses in various large cities, tripling the volume but reducing materially the quality of the stock handled. Delaware and Maryland furnish the best stock of what is known as eastern holly, while Tennessee and some other parts of the south ship what is usually an inferior quality into the western markets at low prices, mainly through produce commission houses. Holly is almost always packed in uniform cases, 2x2x4 feet, but this season a short case has been invented by southern shippers to economize in quantity and aid the seller in cutting prices. The best eastern or Delaware holly is handled by local buyers who have annual customers for their stock and are responsible to them for the careful execution of their orders, while farmers and local commission buyers of holly, who dispose of the same through produce commission houses, avoiding the personal responsibility to the

consumer, are apt to be less considerate of their obligations and seldom put up extra choice, well-berried, green leaved, solidly packed cases. It is as true in this case as in hundreds of others that the best results follow where the producer is known to be directly responsible to the jobber or consumer, and from whom he expects a steady and reasonably profitable patronage. The florist who is a true merchant will call and make his contracts with responsible dealers or commission houses whose pickers have an established record and whose stock has neither been 'pickled' nor 'salted.'

"This season has been, owing to the severe storms of both rain and snow, a very difficult one for the cutting of holly in Delaware. The first ten days in December is the most critical period in cutting and packing this stock, and during this time heavy snows fell in the Delaware woods and the rain filled the most available swamps where the finest holly can be cut with water two or three feet deep. For this reason much high-ground holly, inferior in color of leaf, shape of branches and in berries, was necessarily thrown on the market to fill orders. When the water receded the better berried stock was available, but this condition came about too late for the most distant shipments, and much of the holly in the open market December 15 to 20, will be found of medium quality only Well-berried stock will probably be available the week before Christmas, but hardly in sufficient quantity to materially reduce the price. Now as to the care of holly after it is in the hands of the retail florist, most of your readers are aware that freezing, while packed in cases, damages the holly but little, provided the same is allowed to thaw out in a very cool and preferably dark place, not allowing the temperature to exceed 45°. If, however, frozen holly is shipped in warm express cars the foliage may turn black in a night and the holly be ruined. Holly in cases and holly wreaths, as soon as made up, should be kept in a cool, damp and dark place, at least until the active demand is on and the exposed stock is carted away each day. Holly wreaths, as all know, exposed to the air of a warm, dry room will be out of first-class salable condition in a few hours. This also applies to the fine wreaths of laurel and to some extent the mistletoe.

"The eastern cities, New York and Philadelphia, use foreign mistletoe from England and France, brought over in the fast Atlantic steamers. The berries are much larger than those of the American mistletoe grown in Tennessee, Kentucky, Arkansas, Texas and New Mexico. It is usually shipped in crates of about one hundred and twelve pounds, and its sultry quarters on shipboard often cause the loss of the leaves, without which the stock looks very bad indeed. The choice article sells at wholesale in New York from December 15 to 25 at $12 to $20 per hundred pounds, according to quality. The best article, when in fine order, is that received from France. The western states use probably not more than eight to ten thousand pounds of American grown stock from the localities named above. It is sometimes shipped in light boxes containing about twenty-five pounds, sometimes in barrels containing from fifteen to twenty-five pounds, and sometimes in light paper-lined crates made of lath and containing about one hundred pounds. Because of its liability to damage from frosts, there is no small amount of dissatisfaction and trouble often arises in marketing this stock, and florists who buy it for the first time are generally losers on their investment until they have learned from experience when to receive and offer it, what prices to charge, bearing in mind that one lot of good stock received at the right season should bring very high prices to recoup them for former losses on lots frozen or roasted in the hands of the transportation companies, or for future lots that are liable to be. To consider the perishable, the transitory nature and short demand for this stock and how to sell it at a profit could well occupy a couple of columns in your paper.

"Cedar clippings are now but little used during the holiday season, but on other occasions, where open air decorations are needed, they are frequently made into roping or wreaths in the same manner as the lycopodium. Laurel from Maryland and Virginia is used mostly in eastern states for wreaths and like decorations. It is handled both through the wholesale floral commission trade and to some extent through produce commission houses who make a specialty of this class of holiday stock. Its use in the western states up to the present time has been very limited indeed. Wild smilax, handled in light cases, usually in three sizes, is shipped by express, mostly from Alabama and Georgia. It is as liable to damage from freezing as mistletoe. It is confined largely, now, to the wholesale florists, most of whom find it almost as necessary an adjunct to their business as are the native ferns and galax leaves, the latter also from the south. Florists in our smaller cities who have not yet used the wild smilax and galax leaves would do well to make a trial of them at the first opportunity. They are available in many ways for effective and profitable work."

SECTIONS OF CHRYSANTHEMUM STEM SHOWING THE WORK OF WHITE ANTS.

HARRISBURG, PA.—G. Hansen has purchased the Paxton Greenhouses, 30,000 feet of glass, of Carl E. Taube. Mr. Hansen was formerly employed in the National Greenhouses at Washington and has since conducted a retail store in Center Market.

CHRYSANTHEMUMS.

NOVELTIES AT WABAN CONSERVATORIES.

Madame Philip Rivorie is a glistening white chrysanthemum and a great improvement on Nivens. It is rather tall but the flower is well supported.

Rustic is a grand globular, bronzy incurved Japanese, but near enough in build to be included in the truly incurved group. When the National Chrysanthemum Society of England has included Major Bonnaffon and Pride of Castlewood, they might find in this a valuable addition. It is a dwarf, stiff grower, with beautiful foliage.

Yellow Fellow is bronzy, tall, long-necked and rather disappointing. We have a new incurved in Mme. Ferlat, of the largest size, pure white in color. Frank Hardy here forms immense flowers; the second crown bud is best; the third hangs its head. Pennsylvania is an attractive yellow. Its color is just what Philadelphia lacks to make it valuable commercially.

The creamy tinted Mrs. O. P. Bassett, is just as lovely as Mrs. Henry Robinson. Alongside of Philadelphia one cannot discern the difference in color. Robt. Carey is a noble white, an irregularly incurved Japanese, and a most graceful flower, better as an exhibition variety than Mme. de Galbert. Mrs. Weeks is a lovely flower, grand for exhibition but too soft commercially.

Autumn Glory, salmon pink, is beautifully tinted, "deeper in the depths" as our color authority, Mr. Matthews, would say. It is very nearly but not quite reflexed. The merits of Jeannie Falconer have evidently been overlooked. Its reintroduction as Peter Kay has drawn attention to it. Major Bonnaffon has a decided rival for the exhibition tables. It is a light yellow, of perfect build, lighting up wonderfully. Princess of Wales is a grand white reflexed.

T. D. H.

WHITE ANTS.

White ants are becoming one of the common and, as my experience goes, the worst enemies of the chrysanthemum grower. Their work is the most destructive and impossible to detect until the plant is practically dead. They begin when the young plants are set in the benches and never let up until the flower is cut. Entering the stalk at the very base of the root, they eat out the entire woody substance, leaving only a thin shell, and, if the plant has root and vigor enough, their presence may not be known until they make their appearance through the very topmost tender shoot. I have often discovered them creeping out through an open flower. The illustration shows two sections of a stalk of Modesto. The plant gave a full-sized perfect flower with five-foot stem. The presence of the white ants was not known until the flower was cut. I split a portion of the stalk and the two sections were tacked to a piece of cardboard and photographed.

During the warm days of summer, when a plant shows a tendency to wilt, while others nearby are standing crisp and stiff, the probabilities are if you press the stalk firmly it will collapse like a soft cane. I have become so accustomed to this pest that the moment a plant shows a disposition to wilt I remove it with about a trowel full of earth, and find from one to fifty of the little white destroyers. Out of a house of sixteen hundred plants this season only about

ESTABLISHMENT OF AUG. GAEDEKE & CO., NASHUA, N. H.

one thousand were left to bloom, and while I have no way of ascertaining, I can safely say that two hundred of those remaining have been more or less injured. I have tried everything that has been suggested or that I could myself imagine to destroy them after they have been discovered in the beds, but nothing has worked. The only sure way to avoid them in the future is to stop growing the queen of autumn, and I am unwilling to try this remedy.

I know they attack decaying wood and seem to breed in it, but this is not always the cause of them. Compost made from manure containing sawdust, or other woody substance, is sure to breed them, and sometimes they exist from no cause. This season my benches were made of fresh cypress lumber; my compost was two years old and, so far as I could see, without a trace of them, and yet I harvested the largest crop of white ants I have ever known. I shall not undertake to even suggest how they may be gotten rid of when once in the soil after planting, but I shall take a few precautions another season by removing every particle of soil from the benches and allowing them to become perfectly dry. Then I shall treat the exposed wood to a bath of pure kerosene oil, and then a thick coat of whitewash. My compost, as it is being mixed preparatory to putting into the benches, I shall subject to a bath of live steam. This I propose to do by having the mixing done near my steam-plant, on which I shall carry a high pressure, say 100 pounds. A careful man will stand by the mixer with a steam hose connected to the boiler, playing on the heap as each shovelful is thrown on. If the woodlice bother me after that I shall patiently wait for the more successful experience of some fellow-sufferer, and devote my energy to the study of mealybugs, which, by the way, are a good second in the list of troubles of the chrysanthemum grower on the Gulf coast.

F. P. DAVIS.

WORK OF THE COMMITTEES.

Special sessions of the committees were held December 10 and the following records made:

BOSTON—Nathan Smith & Son exhibited Queen of Plumes; delicate lilac-pink, Japanese incurved, hairy type; scored exhibition scale 87 points.

CHICAGO—Nathan Smith & Son exhibited Superba pink, Japanese incurved; scored commercial scale 83 points.

A Cozy Establishment.

Our illustration represents the floral establishment of August Gaedeke & Co. at Nashua, N. H. We reproduce it because so many of our florists in small cities and suburban places seem to lose sight of the advantages of an attractive exterior as well as convenient interior arrangements, and this tidy little place may be useful and suggestive to some of our readers. It was built in 1889 by Judge C. W. Hoitt, who was conducting a flower business at that time, and was sold by him in 1893 to August Gaedeke, who had been employed on the place as foreman for four years. The range comprises a fine rose house, two chrysanthemum houses, carnation house, violet house and plant house. Over the office, which shows in the picture, is a dormitory, and directly in the rear is a making-up room beneath which is the boiler room. The grounds are about half an acre in extent, fronting on Concord street and opening at the rear on Granite street, thus giving a back entrance for all necessary teaming. Mr. Gaedeke has associated with him his brother Rudolph, who is as expert a grower as August is a salesman and designer.

CARNATIONS.

CULTURAL NOTES.

DECEMBER 17.—Right now is a good time to decide what varieties to plant next season. If a sort does not give a fair percentage of its blooms for the holidays it has to have some very good points otherwise to make it good commercially.

In white I know of nothing that quite equals Flora Hill for the size and quality of blooms as well as the number produced. Its one and only fault is its lack of stiffness in the stem, which can be partly overcome by adding a little lime to the soil and growing cool. Next to Flora Hill for quantity and quality of bloom comes Evelina. This variety has failed in some places, and almost so with me, but I recently visited a house of 2500 of this variety and I would unhesitatingly include it in my next list. Genesee is making a fine growth and a few good flowers, but there is too much grass and not enough bloom. Alba Superba gives some excellent blooms on stiff stems and enough of them to make it a good commercial sort. Jack Frost has size but bursts the calyx badly, so that it can hardly be called first-class, except for a retail man who makes up designs. New York and White Cloud I have seen in good shape at several places.

I should place Triumph at the head of the list of pink sorts. Its one fault is its habit of cropping, but if properly handled the first crop will be in for Christmas and the next one can be regulated to come for Easter, with enough flowers between these dates to about pay for the room taken up. The dry summer has been a bit hard on this variety. Victor has made a host of friends and undoubtedly deserves them. Daybreak, its parent, is in such demand this winter that any one who can do it well should grow

it extensively. Francis Joost is a good light pink, very free in bloom and with a good stem, but is not so large as good Triumph. Argyle has more size, is darker in color and will no doubt become a standard sort. New York, another dark pink, will meet with popular approval on account of its freedom of bloom and the good quality of the flowers produced.

Jubilee maintains its good record, although with some growers it is not satisfactory early in the season, this being made up for later. Bon Ton is full of promise as a good commercial sort. Fire Fly, while not so good a scarlet in color as the others, has freedom of bloom and good healthy growth in its favor. Wellesley is a brilliant scarlet of good size, good stem and freedom of bloom, all commercial points being in its favor. Red Jacket is an exceedingly large, full flower on a good strong stem and will be a good one to grow.

Gold Nugget fulfills all its promises, and, while not so large as Mayor Pingree, its freedom of bloom and other good points make it the leading yellow sort. Pingree is fine in every way, especially in size and stem; the freedom of blooming comes nearly up to the mark. Eldorado has made its record and has by no means lost its reputation.

Thos. Cartledge has freedom of bloom and every other commercial point in its favor; it has not met with favor in some sections on account of its color, but in other sections it is in great demand. Mrs. Bradt stands at the head of the variegated list on account of its size and stem; every grower should have it. Armazindy has met with universal favor and deserves it all. Lily Dean has also met with approval. Empress gives good promise but whether it will pay commercially or not is still a question.

ALBERT M. HERR.

TIDAL WAVE AND OTHER VARIETIES DEFORMED.

ED. AM. FLORIST:—Enclosed herewith you will find sample stems of Tidal Wave carnations which appear to be afflicted with some disease. The plants are very fine, but the flower stems grow up to some height and then curl over to such an extent as to prevent the proper development of the blooms. Any information on this matter, with cause and remedy will be much appreciated. J. M.

Replying to the above and also to a similar query from "Subscriber" I must say that unfortunately the specimen branches were too dry to be of much aid in a diagnosis of the case, but from the description of the trouble I should imagine that one of three things was the matter, or possibly a little of each. Either the soil was too rich, too wet and had become soured, or the house has been too dark and the temperature too low. If the soil is too rich the only remedy is to withhold a portion of the water and thus counteract the effects of a surplus of solid nourishment. If the soil has been too wet and has become sour an application of air-slaked lime and the withholding of water will straighten matters out in a short time. If the trouble has been with the temperature the remedy is easy. If the plants are on a dark bench see that the glass is washed clean, as light and heat will probably be the two most effective elements in regaining health. Do not go beyond 55° at night but until you are rid of the trouble allow the day temperature to run as high as 80°, if the weather is bright.

ALBERT M. HERR.

A Dainty Booklet.

I send you herewith copy of Mr. Battles' booklet. I consider this one of the daintiest and most original things for the retail trade that I have ever seen. The cover is ivory, the illustration in scarlet being a facsimile of Mr. Battles' style in doing up his cut flower boxes. Narrow red tape is used instead of string, the ends being sealed with red sealing wax. There are seventy-four pages, 2⅞x4⅞ inches, eight pages of which are text suggestions about flowers, etc., the balance, plain white for memorandum purposes. The text is full of snap and incisiveness. A great deal is said in a very small space,

THE BATTLES BOOKLET.

just enough to make the average reader appreciate every word. This matter is so good that I make some extracts from it for the benefit of your readers.

G. C. WATSON.

A SUGGESTION.

Many patrons keep a supply of their visiting cards at our store, subject to their order. This is convenient when you order by telephone, or if you do not happen to have a card with you.

FLOWERS ON ICE.

We wish particularly to emphasize the fact that flowers, to give satisfaction, should not be kept on ice. A large, handsome ice chest is an evidence of weakness rather than of strength.

RIBBON EFFECTS.

Our ribbon effects, to which we give particular attention, are produced by an artist in that line. We use in our work, ribbon of the highest grade, and in some cases, manufactured exclusively for us.

DINNERS AND LUNCHEONS.

We have ideas on the subject of decorating tables, and shall be glad to offer suggestions, to give estimates and to send perfectly competent and reliable men to arrange flowers, thus relieving you of any anxiety at the "last moment."

LONDON AND PARIS.

Possibly it will interest you to know that we have correspondence with probably the best florists in London and Paris to whom we can cable and have flowers delivered the same day. If we have time to write, it is a little less expensive. Our registered cable address is "Battles."

ANOTHER SUGGESTION.

Many patrons favor us with a standing order for flowers to be sent to their homes, some once, others twice a week, Wednesday and Saturday. We should be glad to serve you in this way; often we can be very generous in filling such orders, and especially so when our patrons understand that not all of the flowers are quite up to our highest standard.

HAND BOUQUETS.

Our creations for "The Assembly" have been known and favorably commented upon for years. The possibilities in arranging flowers into harmonious combinations as to color and form are unlimited, therefore the conventional bouquet of the past is rarely suggested by us. We are particularly successful in our bouquets for debutantes and bridal parties. It is always a help to us if we can see or know the color of the gown.

BON VOYAGE.

Should you wish to send flowers to friends going abroad, we can do it for you. Of the many hundreds of orders of this kind entrusted to us, we have never, up to this writing, made a mistake. It has been necessary to send one of our employes to New York as many as four times in one week. Ordinarily, however, we can deliver them at less cost. Frequently, we fill hampers with fruit and flowers. Occasionally, we pack flowers in several boxes, marked for each day that the vessel is out. The steward takes care of these and delivers them on the days specified.

A FEW BUSINESS METHODS.

The florist business of to-day has developed to such an extent that it has become necessary for the growers in order to meet competition to become specialists. Some grow roses, some violets, others orchids, lily of the valley, carnations, etc., etc. As a retailer, I am convinced that he is strongest who is a factor with the leading growers. In order to procure the best flowers it is necessary to buy in quantities, pay the top price for selected stock, and meet obligations promptly. A large part of our success is due to persistently following out these principles. Quite as important is the taking and filling of orders. This we do with the strictest integrity, carefully selecting, packing and promptly delivering. When there is a doubt about an order it is our policy to err in favor of the purchaser rather than ourselves.

Rochester, N. Y.

We are having regular old fashioned winter weather. Delivering has been done by sleighs for over a week now. Some of our florists are discontent with the early setting in of such severe cold, which compels them to use extra precautions in wrapping up plants and flowers.

Sales during the week have been slightly improved. Prices for flowers are stiffening up. The cloudy weather has cut down the supply from local growers, though we cannot say that there really exists a scarcity in any line as yet. From the present outlook flowering plants will not be plentiful at Christmas. J. B. K.

New York.

CLUB MEETING.—AN ENTERTAINING OCCASION.—INTERESTING TALK BY CHAS. ZELLER.—SOME CARNATION HISTORY.—ELECTION OF OFFICERS.—INTERESTING EXHIBITION.—STATE OF TRADE.—BEAUTIES UP, HYACINTHS DOWN, VIOLETS STATIONARY.—HOLLY AND GREENS.—PERSONAL PARAGRAPHS.

The New York Florists' Club met on Monday evening, December 12. It being the last meeting for the year 1898 the committee thought it would be pleasant to give to the proceedings more of a social character than usual and their efforts in that direction were unexpectedly successful. The attendance was very large and all seemed to enter enthusiastically into the spirit of the occasion. There was an interesting display of flowers and plants, a delightfully reminiscent talk by Charles Zeller, election of officers for the coming year and pertinent discussion on a number of subjects and then the cigars and some refreshments were passed around while a number of members successfully entertained their fellows with song and story.

Mr. Zeller said that he was proud to be recognized as the pioneer gardener of Flatbush. He recalled the conditions prevailing here forty-seven years ago when there were but twelve or fifteen florists, all told, in the vicinity of New York and compared their primitive methods of building and heating greenhouses with the improved methods now in use. Their facilities for marketing their product were of the same character as their conveniences for raising it, but they had ambition, courage and industry and their successors have carried on the work with the same energy and enterprize so that now in looking back over the period of years the development seems astonishing and the quality of the product has advanced in like manner. He referred appreciatively to the social and educational advantages now offered, the societies, the bowling clubs, the trade papers, etc., and felt sure that notwithstanding the apparently too-rapid increase in greenhouse building the practical gardener if industrious and equipped with a good foundation of practical training, would always manage to pull through, however the storm should blow.

Mr. Zeller was listened to with close attention and all would have been glad to hear more from him. Doubtless his natural modesty prevented his referring in detail to his own part in the development of New York floriculture. He might, without undue egotism, claim to be the father of the carnation industry of America for, if I am not mistaken, it was he who introduced to this country La Purite and DeGraw, the two original stand-bys of American carnation growers. These were undisputed occupants of the field until Peerless and Edwardsii made their appearance, the latter contributing early to the conditions that were later on to necessitate the formation of the nomenclature committee of the S. A. F., for Peerless and Edwardsii were one and the same variety sent out without name from the establishment of of John Henderson and re-introduced under conflicting names by a New York and a Philadelphia grower respectively, the flowers coming white with one and pink mottled with the other, the difference owing probably to something in the soil.

Mr. O'Mara made a report of progress on behalf of the committee to whom were referred the complaints of custom house detention of plants and bulbs and was glad to say that assurances had been given by the collector of the port as well as the chairman of the U. S. Senate investigating committee that no effort would be spared to remove all causes for complaint in this direction. The election of officers was a simple matter, there being no contest for either position. The list is as follows: President, Wm. Plumb; vice-president, J. H. Troy; secretary, John Young; treasurer, C. B. Weathered; trustees, Messrs. J. H. Taylor, W. H. Siebrecht and Julius Roehrs.

W. A. Manda made an extensive exhibition of new and rare plants, Lehnig & Winnifield showed a group of remarkably well grown cyclamens one year old in 6-inch pots; J. H. Roehrs brought specimens of Acalypha Sanderiana; A. Herrington a handsome specimen of Cypripedium Leeanum Masserelianum and John N. May a vase of his pink seedling carnation Melba, all of which were given special commendation by the exhibition committee.

Not much change is noted in the cut flower market. The price of American Beauties has been doubled but except in the case of the finest selected blooms, which are scarce, the increase can hardly be said to be operative and much of the stock hangs fire until it is blue and has to go in with the culls. Quality has fallen off and the stems especially show decided weakness of late. Chrysanthemums still remain but they are practically friendless and no one wants them so late. Violets are stationary; all movements to advance rates on them have been fruitless, so far. Carnations are apparently in short supply and Roman hyacinths are too plenty, with prices cut down one-half and stock accumulating. It is whispered that storing for the holidays has already begun in the out of town cellars.

Holly was scarce early in the week and there was something akin to a scare for several days, but the "bottom dropped out" and at present writing it can be bought very low. On bouquet green and roping high prices prevail and the stock in sight is very small. Immortelles are in full supply and cut rates are demoralizing the supply men.

J. A. Penman, whose office at 7 Warren street was drenched out during the recent big fire, has located at room 610 Electrical Building, 136 Liberty street, and "Nicholson's Dictionary of Gardening" still waves.

James Purdy has just been drawn on the jury. Such is fate for one wholesaler at Christmas.

M. A. Hart shows violets now in glass topped boxes. Many advantages too numerous to mention.

E. C. Horan is headquarters for poinsettias now. They sell well this year.

They say that the cypripedium war will be renewed with vigor next season.

The grand divertisement by Messrs. Logan and Cottam at the last club meeting was inimitable.

Alfred Dimmock sails on Saturday, December 17, on the Umbria for England.

Visitors in town: Robert Craig, Philadelphia, and F. R. Pierson, Tarrytown; Mr. McBurnie, Atlanta, Ga.; H. H. Battles, Philadelphia; John Reck, Bridgeport; John Cook, Baltimore, Md.

CHESTER, PA.—Brinton & Smith have added two houses 16x100 to their establishment. Their principal attention is given to geraniums, carnations and mushrooms.

Chicago.

A PERIOD OF REMARKABLE FLUCTUATIONS IN THE MARKET.—A CHRISTMAS WARNING.—A SPLENDID WEEK ANTICIPATED.—COLUMBUS CALLS ON CHICAGO.—FINE VIOLETS.—WIETOR BROTHERS' BUILDING PROJECTS.—PERSONAL AND OTHERWISE.

This has been a week of remarkable fluctuations in supply and demand, unsatisfactory alike to grower, broker and retailer. One day the supply would be large and the demand small, while the reverse would be true of the succeeding twenty-four hours, only to have the first condition return with the following day. There has been a somewhat larger proportion than usual of poor stock.

Next week will, however, be one of the best on record unless the growers choose a repetition of the experiences of Easter and Thanksgiving and destroy the equilibrium of the market by holding their stock until Friday and Saturday. Christmas coming on Sunday will be observed on Monday although the retailers expect Saturday to be their big day, but shipping will begin Tuesday and will be rushing Wednesday and Thursday. Commission men are advising their growers to send in their cut at the usual rate, assuring a splendid average for the week, rather than hold the stock for a big price at the end of the selling period, a course which worked many growers' undoing at each of the last two important holidays.

Frank Danzer, representing A. W. Livingston's Sons, Columbus, O., was in town Wednesday in search of 5,000 carnations, nearly as many roses and a goodly number of palms.

Some of the best violets of the year are finding their way from Crabb & Hunter, Grand Rapids, Mich., to the retailers everywhere through the medium of the Kennicott Bros. Co.

Wietor Bros. have purchased ten acres of ground from their father and are planning to put up 200,000 feet of glass in the spring. They built 125,000 feet last season.

James C. Thompson, who has been employed in various city establishments, is recovering his health. He spent six months of this year in the Cook County Hospital.

A buyer was in the market this week in search of 1000 Christmas Harrisii but the total cut of all the local growers will not much more than reach that number.

J. R. Leesley, 2476 Lincoln avenue, has been at West Chicago moving some trees, averaging over a foot in diameter, upon the Ely estate.

Lloyd Vaughan, of Vaughan, McKellar & Winterson is at home from his tour in the successful quest of holiday orders.

Last evening was retailers' night at the Florists' Club and as a consequence there was one of the liveliest sessions of the season.

W. J. Smyth is receiving his 1000 violets a day, for the entire season, from one of the Oconomowoc growers.

Mrs. Frederick Dickinson has been elected president of the Chicago Flower Mission.

H. M. Clair and Prof. F. W. Taylor, of Omaha, and George Souster, of Elgin, Ill., were among the week's visitors.

Prof. John Craig, of Ithaca, N. Y., was a visitor on Friday.

CHATHAM, N. J.—John Garretson, of Philadelphia, is now foreman of the rose growing establishment of A. P. & S. Lum.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

CHRISTMAS comes on Sunday this year and does not break the business week, which should prove a profitable one to the wide awake florist.

WHOLESALE prices of from nine cents to twelve cents per pound are reported on bouquet green. This is probably high water mark for some years in this stock.

REV. DR. JOSEPH KRAUSKOPF, president of the National Farm School, Doylestown, Pa., has received a donation of $1,000 from Mrs. Z. Eisner, of Philadelphia, for a memorial greenhouse, the third to be given the institution this year.

MR. LOUIS MENAND, the veteran florist of Albany, N. Y., has kindly favored us with a copy of the new edition of his "Antobiography and Recollections." Many interesting reminiscences and experiences may be found in its pages, and Mr. Menand's numerous friends in the trade will look upon the appearance of the volume as a welcome token of the author's continued good health and activity.

The American Florist Company's Directory.

The final corrections are now being made for the next edition of our directory of florists, nurserymen and seedsmen, to be issued January 1, and we trust our readers will promptly inform us of any business changes which have come to their notice within the past year. Advertisements and orders for the use of large type in names of alphabetical list should be mailed as early as possible.

Relentless Europe.

We find the following in a recent issue of *Viola*, a Scandinavian journal of horticulture published in Stockholm: "The Society of American Florists has recently decided to change its name to Ornamental Horticulturists. On account of the ambignous meaning of this name a number of the papers have humoronsly alluded to it, wondering if the members of this society are hereafter to be known not only by their skill in their profession but also by their handsome and ornamental personal appearance."

Catalogues and Cut Flower Price Lists Received.

Iowa Seed Co., DesMoines, Iowa, birds and gold fish; Chas. D. Ball, Holmesburg, Philadelphia, Pa., palms; Lee, Watkins & Co., Evergreen, Ala., evergreens; Letellier Sons & Co., Caen, (Calvados) France, trees and shrubs; W. A. McFadden, Cincinnati, Ohio, cut flowers; A. G. Prince & Co., Chicago, Ill., cut flowers; Cincinnati Cut Flower Co., Cincinnati, Ohio, cut flowers; Welch Bros., Boston, Mass., cut flowers; Francis Brill, Hempstead, L. I., N. Y., garden seeds; The Howard & Willet Drug Co., Augusta, Ga., seeds; J. C. Groenewegen, Boskoop, Holland, cut flowers; Wilhelm Pfitzer, Stuttgart, Germany, seed novelties; Bateman Manufacturing Co., Grenloch, N. J., farm and garden implements; Wm. F. Kasting & Co., Pittsburg, Pa., cut flowers; Holten & Hunkel Co., Milwaukee, Wis., cut flowers; Bassett & Washburn, Chicago, Ill., cut flowers.

Greenhouse Building.

Toledo, Ohio.—Sarah G. Joehlin, range of four houses to cost $4,500.

Haverhill, Mass.—C. H. Kaulbach, one greenhouse.

So. Sudbury, Mass.—H. N. Eaton, one forcing house.

Webster, Mass.—Mrs. A. L. Converse, two houses 16x60, with office and packing room.

North Middleboro, Mass.—Rev. Joseph Jenks, greenhouse 20x100.

Kingston, Pa.—Geo. E. Fancourt, range of commercial houses.

Ardisia Crenulata.

ED. AM. FLORIST:—Please tell me through your columns the native country of Ardisia crenulata, and the temperature in which its berries color best. A.

This plant is a native of Mexico. The berries color best and remain longest on the plants in a night temperature of 40°, rising 10° to 20° during the daytime.

GROWER.

Woodlice or Sowbugs.

ED. AM. FLORIST:—Will you kindly give, in your next issue, the best method of getting rid of woodlice in a violet house? The tops of the buds have been entirely eaten off, although the plants are otherwise fine. A SUBSCRIBER.

If "A Subscriber" refers to the pests known in European gardens as woodlice and in this country as sowbugs, they may be expelled by placing gas-lime about their haunts. Slices of carrot poisoned with some arsenite are also said to be efficacious. G.

Caladiums and Hydrangeas.

ED. AM. FLORIST:—Kindly advise me how to keep caladiums over winter. I have a lot of clumps with six or eight large tubers to each and would like to know whether they should be divided or allowed to remain intact. Should the tops be cut off short or allowed to remain? The tubers were lifted when the leaves had been pinched by frost. How should Hydrangea Otaksa and H. Hortensia be treated now? Should they be allowed to remain dormant and started later on, or how? G. K.

Your correspondent, "G. K.," means Caladium esculentum, I presume, in the above inquiry. If that is what is intended, no trouble will be experienced in keeping the tropical plant indicated under a rose house table where the night temperature is not lower than 55°, provided there is not too much drip from the stage above. Shorten the tops to within a few inches of the crowns and allow the tubers to remain intact until early spring, when they may be divided, potted and given an opportunity to grow, ready for planting outdoors, or for spring sales, as soon as the weather is favorable.

Hydrangea Otaksa and H. Hortensia should be allowed to remain dormant until within ten weeks or three months before they are needed to be in full bloom.

L.

Lilacs and Hydrangeas.

ED. AM. FLORIST:—I shall be pleased to learn through your columns the best way to treat hydrangeas from this time onward to have them in bloom for Easter (April 2), also whether lilac Charles X can be successfully forced for Christmas.

G. O.

I will endeavor to inform "G. O." with regard to my method of treating hydrangeas for early flowering (which is the best I know of after thirty years' experience in forcing them) from this date, December 15, until April 1, at which time I expect to realize on the fruits of my labor by a generous gift of beauty that will soon be turned into a pecuniary blessing. Supposing that "G. O.'s" hydrangeas have been grown in pots during the summer—as mine always are, for I think it much preferable to planting them in the ground and lifting and potting them at the approach of frost in autumn, particularly for early forcing—they are taken from under the bench of a cold house—where they were placed early in October from a frame outside, where they had been during the summer—and placed upon a table. They are kept at a temperature of 50° at night, and day, if possible, and allowed to become quite dry until about January 10, that they may drop their leaves and plump up their flowering buds. They are then given a liberal watering and the temperature is raised to about 60° for two or three weeks, when the temperature is again raised to 65° or 70°. About March 1 the flower buds should show to about the size of a nickel; but if they do not so develop, the temperature may be increased to 75°. At this stage give plenty of water, and shade slightly to prevent the foliage from being burned by the sun, which is apt to occur and spoil the plants. Bright, clean, perfect foliage is a garnish which adds beauty to the whole.

To force lilacs into bloom by Christmas, take imported plants of Charles X that have been grown in pots, put them into a temperature of 80°, and shade to darkness December 1. Give plenty of water and then you will have the name of lilacs at Christmas, but a sad reality.

WM. K. HARRIS.

Perplexed by Condensed Steam.

Referring to the inquiry of "S. F.", page 523, regarding the return of condensed steam to his boiler, the writer had a similar experience and could not even get sufficient pitch to use the closed hot water system. As a steam trap requires at least forty to sixty pounds of steam, that was out of the question and the only way seemed to be the use of an automatic pump and receiver. The pump can be bushed (reduced) at the water end so that a steam pressure of twelve to fifteen pounds will operate it and I would particularly suggest that the exhaust pipe be carried on an incline from the outlet in the pump instead of up through the top of the building as is frequently done. The pump, working at intervals, will then rid itself of the condensation much easier. A pump alone, pumping from the return coils, is a nuisance, as it is pumping steam much of

the time. We had to do it until the receiver was installed and were thankful when we could stop it. If the valves are set accurately, so that the pump will start when steam is admitted, it gives very little trouble and keeps up a circulation of hot water. Different pump makers have different forms of receivers, some horizontal, others perpendicular. We are using the Worthington duplex pump and receiver. If "S. F." is not familiar with them any of the pump catalogues describe their operation. Care must be taken to keep the water to a good height in the boiler, as when the pump stops working through insufficient steam pressure, the receiver first, and then the pipes, gradually fill with the condensed steam and lower the water in the boiler correspondingly. Above all have a pump that works perfectly, without any sticking or catching on center as it will make no end of trouble. F. C. CURTIS.

Sandy Creek, Me.

OBITUARY.

S. B. DUSTIN.

Samuel B. Dustin, for thirty-eight years a gardener at Utica, New York, died on November 25, aged 65 years.

MRS. BEHEN.

Mrs. Hannorah Behen, mother of Thomas Behen, of the firm of John H. Orth & Co., 416 Market street, McKeesport, Pa., died very suddenly December 6 from congestion of the lungs. She was 51 years of age and is survived by six children.

JOHN SCHANTELMIER.

John Schantelmier, the veteran florist of Chattanooga, Tenn., died December 12 after a protracted illness at the family residence at St. Elmo. He was a native of Germany and 70 years of age. He leaves a wife but no children. Mr. and Mrs. Schantelmier have resided at Chattanooga since 1870. The interment was at Forest Hill.

MRS. WHITE.

Mrs. John White died on December 12. This news will bring to many a florist and gardener memories of visits to Pittsfield, Mass., made pleasant by the ever ready hospitality and uniform kindness of the lady whose death is thus announced. Nothing was ever too good for one of the craft if he happened within the reach of Mr. and Mrs. White's welcome and to Mr. White the sympathy of many friends will be extended in this bereavement.

EMILY NEIDNAGEL.

Miss Emily Neidnagel, who has been in charge of Julius Neidnagel's Main street store, Evansville, Ind., died December 1 after six weeks illness with typhoid fever. She was twenty-four years of age and is survived by her parents, five brothers and one sister. The obsequies took place December 3 and were largely attended. The floral tokens were profuse, noticeable among them being a huge bouquet of Bridesmaid roses from Bassett & Washburn, Chicago.

DES MOINES, IA.—I. W. Lozier now has seven greenhouses and has opened a down town store in charge of his son, A. G. Lozier.

EDGEWOOD, R. I.—George Pearce, for a number of years engaged in the florist trade here, has removed to New Hampshire for his health.

Philadelphia.

AS SANTA CLAUS APPROACHES PRICES BEGIN THEIR UPWARD MARCH.—SHORTAGE IN SEVERAL LINES.—STORAGE FACILITIES.—POPULAR PLANTS.

As Christmas approaches so do the prices strengthen and as the demand is not so extraordinary as to account for the advance the growers give as a reason that the figures have to be moved up gradually so that the difference will not seem so great at Christmas, when the climax is reached. The best Beauties are bringing fifty cents straight. Carnations are bringing $2 on an average for fair stock; the quality is about up to the average for the season, although it would seem as if the stems were a little weaker. There are no Harrisii lilies in this market as yet. Cattleyas are very scarce, those in the market coming from a distance. Good violets are still scarce. Many lines appear to be short, although the last few days have been clear and growers say their houses are looking well. The storage facilities are no doubt being tried if not taxed. How would it do if the florists' clubs were to offer a prize for the longest kept presentable flowers? It would be interesting to know how long flowers can be kept and yet appear to be in a salable condition.

There will be the usual lot of Christmas plants. Of the foliage plants Boston ferns and Dracæa terminalis are leaders with araucarias and livistonias good seconds. There are not so many plant baskets filled here as might be and more of this work could be made up to advantage. K.

Baltimore.

As a forerunner of Christmas business has been very slow, thus giving our retailers a chance to decorate and prepare for the expected rush. Stock is at present plentiful, though in no case over-abundant. Violets are now in great demand and very scarce, bringing wholesale 75 cents and $1 per hundred.

John Barclay was in town this week in the interest of Vaughan's Seed Store, New York. A. R. J.

NIAGARA FALLS, N. Y.—W. J. Biggar is about to increase his glass.

COLUMBUS, O.—Charles Wolf has opened a flower stand in the Union depot.

SARANAC LAKE, N. Y.—H. B. Tremble has opened a flower store in the Bassett building.

OXFORD, O.—Lawrence Castigan is in charge of the new greenhouse at the Retreat.

UPTON, MASS.—H. O. Harrington will in future devote practically all his establishment to carnations.

HOPKINTON SPRINGS, MASS.—G. W. & W. A. Temple have planted with carnations a house 45x176 formerly used for cucumbers.

TOUGHKENAMON, PA.—Simon Pyle suffered a loss of $2,000 by fire caused on the morning of December 4 by a defective flue in his boiler room.

COUNCIL BLUFFS, IA.—M. H. Frey, who recently met death by an accident to his boilers, was a son of H. H. Frey and a brother of C. H. Frey, of Lincoln, Neb. The employe, Williams, who was injured in the accident, is recovering and the physicians hope to save his sight.

MENOMINEE, MICH.—Lewis Zechetto, a florist from Paris, has opened a store at 419 Main street.

NORWALK, CONN.—Samuel J. Banks has taken a lease of the McKay greenhouses in East Norwalk.

TURNER, ME.—Mrs. S. L. Goodspeed has purchased the greenhouses and stock of Gilman T. Brown and will remove them beside her own at Turner Center.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By all-round workman on or before Dec. 1st. Good fireman, propagator, etc. Address N Y, care American Florist.

SITUATON WANTED—By gardener and florist, with first-class references; 16 years in this country; single. German. Address GARDENER, 1617 N 5th St., Philadelphia.

SITUATION WANTED—By florist and gardener, bedding plants, ferns and cut flowers; energetic and sober; 13 years' experience; widower. W. J. PACKHAM. 515 W. Utica St., Buffalo, N. Y.

SITUATION WANTED—By a strictly temperate florist with excellent recommendations; good greenhouse builder, painter, glazier; 15 yrs. exp. with gen'l stock; designer. PRACTICAL, care Am. Florist.

SITUATION WANTED—By a young man (Belgian), 10 years' experience; good propagator; thoroughly experienced in stove and flowering plants, also carnations and roses; Chicago preferred. K L K care American Florist.

SITUATION WANTED—By American grower, married, 7 years in commercial place, 3 in nursery; prefer private place; grow flowers and vegetables both under glass and outdoors. Good references Address J S B, Andalusia, Bucks Co., Pa.

WANTED—Good, second-hand hot water boiler, heating capacity, 12-1400 running feet 4 inch greenhouse pipe. JOS LABO, Joliet, Ill.

WANTED—A good, all-round florist, single, sober and reliable. Must give references Good wages to the right man. Address, stating wages, O. L. BAIRD, Dixon, Ill.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE—Store and two well stocked greenhouses; 50 minutes' ride from center Chicago; horse and wagon, coal and kindling, tools and sashes on place. $1000 will buy. Proprietor suddenly taken ill. Address B I, care Am. Florist. Chicago.

FOR SALE One Peter Smith (Boston) cast iron Boiler in first-class condition, also 2000 feet of glass, mainly 12x16, some 12x18 and some 12x12, and 300 feet of 4-inch pipes and fittings. A bargain. For full particulars write to

HOLTON & HUNKEL CO. P. O. BOX 103. Milwaukee, Wis.

FOR SALE.

A well established and paying florist's business, with 10 to 30 acres of land, 17,000 square feet of glass. Good residence and houses for help. Situated near one of the largest cities in California. Ill health and desire to retire from business cause for selling. For full particulars address

LOCK BOX 720, Los Angeles, Cal.

FOR SALE.

100 nice, made-up SEED BOXES OR DRAWERS holding from 10 to 14 qts. of seeds, with or without shelves; also have 50 Electrotypes for Catalogue use, as good as new, and one hose success tread power with pumping attachment for pumping water. For full particulars address

BOX 4, Station D, Milwaukee, Wis.

FOR SALE AT A BARGAIN.

Nine (9) greenhouses, about 21,000 feet of glass, well stocked with Roses and Carnations in first-class condition, also large stock of Bedding Plants; houses heated with steam, a new boiler; one heavy wagon and one spring wagon. Also 2¾ acres of land, or 14 lots. In a flourishing town of 8000 inhabitants, situated in central Ohio; no competition. Part cash; the rest on first and second mortgage. Address

GREENHOUSES, care Am. Florist.

Detroit.

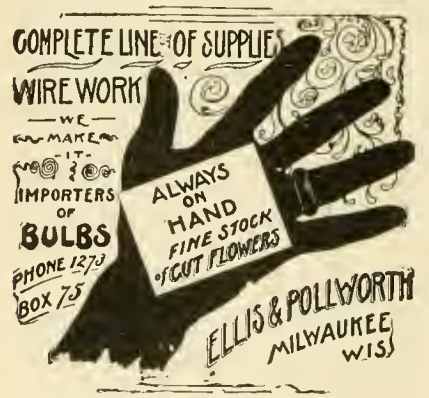
THE WEATHER, TRADE AND STOCK CONDITIONS.—GEO. HEINL A VISITOR.—CLUB MATTERS.—HOLZNAGLE READS A PAPER ON CHRYSANTHEMUMS.

Severe winter weather is here and chrysanthemums are about used up, which makes the rose growers feel a little better although they are complaining about low prices. Carnations are scarce but some very good stock is coming from Rackham and Holznagle.

George A. Heinl, of Toledo, O., was a visitor last week and with a party of the local florists visited the Pontiac Floral Co., at Pontiac, and found some very fine Meteor and Bridesmaid roses and a good lot of Brides, which will, however, be late for Christmas. They also have some fine violets.

B. Schroeter had a job of decorating a store recently that used up a large quantity of holly and bouquet green.

John Breitmeyer & Son are sending in very good poinsettias.



The Florists' Club is progressing finely as new members are coming in every meeting. F. Holznagle read a paper at the last meeting giving his experiences in growing chrysanthemums. The president appointed committees to prepare for the meeting of the Society of American Florists. The boys are very enthusiastic over this and expect a large attendance. We also anticipate an extensive trade exhibit as we already have several inquiries for space. R. F.

Orange, N. J.

The meeting of the New Jersey Floricultural Society was held on December 5; President Malcolm MacRorie occupied the chair. The nomination and election of officers for 1899 took place and resulted as follows:

For president, Peter Duff; vice-president, John Hayes; treasurer, George Smith; secretary, Joseph B. Davis.

The annual dinner will be held after the installation of officers on January 6. D.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

BERMUDA growers report the acreage of Lilium Harrisii planted this season about half of that planted in 1898.

A FIRE in the railroad warehouse at Mountain View, California, December 10, damaged several thousand pounds of Red Wethersfield onion seed.

S. F. WILLARD, Wethersfield, Conn., secretary and treasurer of the American Seed Trade Association, was a Chicago visitor this week, as were Preston King, of Minneapolis, and M. Kurzeveil, of the Iowa Seed Co., Des Moines, Ia.

Onion Seed Prices.

There remains much uncertainty as to the prices which will be made in the forthcoming spring catalogues. The same distrust of competitors that always prevails will doubtless cause most dealers to put their prices as low as their own contracts and present trade prices will allow them to go and make a fair profit. Taking into consideration the fact that some houses own '96 and '97 crop onion seed at from 20 to 30 cents per pound, it will be possible for them to make their average cost for the season from 40 to 50 cents; on this basis may we not well conclude that onion will be offered as low as $1 per pound?

The Rocky Ford Melon.

Mr. Paul Rose says: "I do not believe that the soil at Rocky Ford has anything to do with success in melon growing at that place. It is a fact that south of central Indiana sweeter and better melons can be grown on clay soil than on light ground. Growers claim their vines on such soil hold up, remain green and free from blight longer. I consider the altitude of great importance. You must grow melons on high airy land and in my judgment the altitude of the Rocky Ford melon district has much to do with the success attained there. Seed from Rocky Ford melons has been planted by me in Indiana but the product was no better in any way than our own strain of Netted Gem. The melon growers at Vincennes, Ind., claimed that melons from Rocky Ford grown seed were better and perhaps sweeter than their own strain of Gem produced, but I don't think they had a choice strain of Gem originally."

Fortin Lily of the Valley.

This lily of the valley, judging from its external appearance, is evidently not a descendant of the Hamburg or Berlin garden varieties, but resembles the wood lily of the valley in leaf and pip. The bells of this kind, however, are double the size of the others, and often as many as twenty-five bells are produced on one stalk. The color is a beautiful pure white, and the fragrance is fully as strong as in the other sorts. The root action appears to be quicker than with the Hamburg or Berlin varieties, pips planted in the fall of 1897 having run through the entire bed in May, 1898. It would, therefore, not be unreasonable to expect to obtain flowering pips of this kind in two years, and this would be another advantage.

For early forcing the Fortin lily of the valley cannot be used, as I have never obtained flowers of it before February 1. The flowering pips are very large and vigorous and the planting pips also larger and stouter than those of other varieties; it is therefore advisable to plant them farther apart in order to obtain a large number of bells. When they were planted close together the stalks did not produce over fifteen to eighteen bells. The Fortin lily of the valley comes nearest to the Dutch variety which is used to produce the clumps in Holland, but the bells are much larger and hang somewhat closer together. The Fortin does not seem to be subject to the various kinds of fungus diseases which in other varieties so often influence the yield.—*G. Frahm in Die Gartenwelt.*

Indianapolis.

TRADE SLOW BUT EXCELLENT PROSPECTS FOR CHRISTMAS.—CARNATION EXPERIENCE.—THE ROSE SITUATION.—VIOLET GROWERS UNSUCCESSFUL.

Ever since Thanksgiving business has been very slow, even for this time of the year, when everybody is saving for Christmas. In general florists will this year be better prepared than usual to meet a heavy holiday trade. Cut flowers are of superior quality and excepting violets are plentiful. Carnations, especially, are doing very well and growers will have a good supply of fine flowers for next week. Most of them, by the way, will come from field grown stock. Pot grown plants furnished good flowers during the early part of the season, but judging from present appearances field culture will prove in the end the most profitable method. For pink Albertini and Scott are still leaders, while Daybreak is slowly falling behind. Jubilee is practically the only scarlet grown in this vicinity. For white Flora Hill is most extensively planted; Uncle John and Lizzie McGowan are disappearing. Many are trying Evelina and White Cloud; so far both have made a very good showing; Evelina seems to be the most prolific bloomer, and White Cloud is slightly better regarding stem and shape of flower.

There are also good Christmas prospects for the rose growers. Bride, Bridesmaid, Meteor and Perle are the only varieties grown in quantity. Testout and Siebrecht have entirely disappeared, and of Beauty, Kaiserin and Carnot there are not enough plants in any one establishment to cut a dozen flowers a day.

There were enough violets planted here to more than supply this city, but only a very small number had any success. John Hartje is one of the few. With the exception of some hundred pot plants his violets are doing fine, especially Princess of Wales and Farquhar.

Regarding pot plants, florists do not seem to expect any increase over last year's business. For blooming plants azaleas and cyclamen are favorites, while primulas and bulbous stock are less grown. H. JUNGE.

Germantown, Pa.

Interested as to what flowering plants are to be offered for sale for the rapidly approaching holidays, I first called upon David Cliffe, who is located on Johnson street, near to Main street, as it was at one time called, now Germantown avenue, quite convenient for prospective customers, either retail or wholesale. I found some begonias, though they were not large enough to be sufficiently attractive to sell on sight. The cyclamens were also small, and the Chinese primroses will be too late for the gay and festive Christmas time. The foreman explained that their local trade demanded more of the smaller sizes of flowering plants than larger ones. My own impression is that are always some few customers in every locality who would buy choice grown plants for Christmas presents and for home adornment if they were put before them in larger sizes and in an attractive manner. Some of the brilliant bracts of the poinsettia in pots attracted my attention. The star pot-plants for Christmas trade here, on the occasion of my visit, were some Solanum capsicastrum, popularly known as the Jerusalem Cherry. Quite a number of this showy berried plant were grown last year and many more could have been sold than they had. They are prepared for an increased demand, having many more than they had last year. They were grown planted outdoors all summer, lifted in the early fall, and are now salable plants in 5-inch and 6-inch pots. Their carnations for cut flowers are the picture of health; so also are their Bride, Bridesmaid and Meteor roses.

Albert Woltemate, also located in Germantown, a few blocks below on Main street, was next visited. It proved to be one of Mr. Woltemate's busy days, so that I did not have as much talk with him as I could have wished. Albert says some of the trade papers may assert what they please about the demand for chrysanthemums being on the wane, but he does not know how he could get along in his business without them. He is always sorry when they are gone. He has a fine lot on hand in pots in a cool house at this writing, so that he will not run short immediately. Late, good varieties are what suit him best. He had a fine plant of E. M. Bigelow which he thought well of for late work, as the deep red incurved flower was in excellent shape at the time of my visit. First-class late whites seen to be scarce. He had some plants of saintpaulia, which, if in larger sizes, ought to be good for sale at Christmas. He had also quite a variety of begonias, but these plants were hardly large enough to be as attractive as a begonia may be grown for this season of the year. Albert is an enthusiast on orchids; he has a number of plants of Vanda cœrulea, with which he is experimenting. His Lælia purpurata growing in plain peat moss with charcoal and crocks are doing finely. Most of his orchids are growing in more or less peat moss. He has a lot of Araucaria excelsa, both large and small. The larger sizes would make aristocratic Christmas trees.

Some blocks nearer the city is located George E. Campbell, who has a house full of chrysanthemums in pots. George says there is not as much money in these autumn queens as there was a few years ago. Competition in his immediate neighborhood is so keen that there is very little profit in them any more. He also has a house full of both white and yellow marguerites, which will apparently be about right for Christmas. A house of Bride and Bridesmaid roses for cut flowers was in fine shape. This is Mr. Campbell's first experience as a rose grower for cut flowers and he may well be gratified with the results.

I was surprised not to find some well grown Begonia incarnata plants at any of the places visited on that day. Last year I was attracted by an illustration in the AMERICAN FLORIST of this begonia and what was there called "Begonia incarnata improved." I had for years

known the old variety and decided to try some of the improved sort, which I did, and it certainly is a gem for Christmas. I have seen advertised Begonia incarnata gigantea. It would be interesting to know if the "gigantea" and the "improved" are identical. Can some of your readers throw some light upon this subject? E. L.

DIXON, ILL.—O. L. Baird, who has the largest establishment in this section, is adding a new boiler to his equipment.

DOVER, N. H.—Chas. A. Rand's greenhouse was destroyed by fire on the morning of November 27. Loss about $1000.

OCONOMOWOC, WIS.—C. B. Tremain is building up a flourishing business and is daily shipping a large cut of choice carnations and other stock to Milwaukee.

Do you Ship Onion Sets?
Hercules Ventilated Barrels are RIGHT for Shipping any Product requiring ventilation.

We sell thousands to large shippers of produce and onion sets. The Hercules is the only barrel which can be shipped knock-down and does not require a cooper to set them up. One man can set up 75 to 100 Hercules barrels per day. Every shipper can be his own cooper and **save money.** We ship the barrels knock-down, with heads and hoops complete and ready to be set up. Fourth-class rates apply in less than car lots.

We furnish our set-up outfit for $2.00 and refund the $2.00 when you have purchased 500 barrels.

Write for sample barrel and prices.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

GREENINGS are selling on the Liverpool apple market up to 22s. per barrel, $5.28.

ALVIN H. DEWEY, Rochester, N. Y., is now with the Brown Brothers Company.

A. L. QUAINTANCE has assumed charge of the Georgia Experiment Station at Griffin.

ELLWANGER & BARRY recently shipped 102,000 Downing gooseberries in one order from Iowa.

THE largest apple at the Trans-Mississippi Exposition weighed twenty-four ounces. It was a Wolf River.

J. H. DODGE, of Moulson & Co., Rochester, N. Y., and Miss Elizabeth. McGuire were recently married.

THE P. J. Berckmans nursery at Augusta, Ga., recently shipped a $2000 order to South Africa. It was mostly plums.

THE city of Joliet, Ills., is to have two new parks of a combined area of eighty-five acres, of which Mary V. Fish donates twenty-five.

THE Minnesota Horticultural Society has offered a prize of $1000 for the origination of an apple possessing certain prescribed merits.

C. B. KURTZ, a Kansas City nurseryman, has offered prizes to the fifty school children who shall write the best essays upon Ulmus Americana.

O. H. GALLUP, of Palermo, Cal., reports that the Yellow Transparent is as good an apple for California as it is for cooler western states.

G. M. CHASE, son of G. H. Chase, of the Chase Nursery Co., Maldin, Mass., and Miss Anna B. MacKeown, of Boston, were married early last month.

H. F. HILLENMEYER, the Lexington, Ky., nurseryman, has presented the city of Danville, Ky., with a number of shade trees for distribution among the citizens.

THE partnership existing in Parry's Pomona Nurseries, has been dissolved because of the death of Wm. Parry. J. R. Parry has sold his interest in the business to C. H. Parry.

WILLIAM FALCONER, superintendent of Schenley Park, Pittsburg, sailed from New York, December 10 for Jamaica in search of economic plants for the Phipps conservatory, which already has one of the finest collections in the United States.

Phlox Decussata Varieties.

On looking over our notes on phloxes we see that many of the new French varieties improved very much in color and habit as the season advanced. The dwarf varieties as a rule, and a few of the taller varieties, seem to have the habit of branching the panicles indefinitely. Some that started to flower early in August were making quite a show the first week in October and the panicles in some cases were over a foot in diameter. In this respect among the dwarf varieties we noticed Albatre, Fantaisie, Rodin, Suffrage, Thebaide and Torpilleur. Among the tall varieties we noticed Le Mahdi, Lumineux and Lord Rayleigh.

For the best six of the new dwarf varieties we should select Albatre, Jungefrau, Rodin, Suffrage, Thebaide and Torpilleur. For the best nine we should add Argon. Fantaisie and Fantome.

From the new tall varieties we should select for the best six, Coquelicot, Fiancee, Le Mahdi, Lord Raleigh, Lumineaux and Mars la Tour. For the best twelve we should add Amphitryon, Derviche, Fernand Cortez, Huxley. Mme. Miolan–Carvalho and Wm. Ramsay.

All the above have been described in former notes. Among the varieties we imported for extra large panicles, we noticed nothing very striking in that respect, but another season, when the plants are well established, the panicles may be much larger. Bicolor, in having more open flowers, is an improvement on James Bennett, but the color did not seem quite so good.

In the older varieties we should select for the best six, Commonwealth, dark crimson, shading to almost pure white; General Chauzy, bright salmon red; Independence, white, extra early and continuous; Iris, purple red, shaded violet blue; James Bennett, clear light flesh-pink, dark crimson eye; Saison's Lierval, pure white, small pink eye.

For the best twelve we should add Coccinea, bright, deep crimson; Czarina, white, later than Independence; Mrs. Dwyer, white, large crimson center; Mme. Meuret, salmon red, rather; early Oracle, light pink, crimson eye; R. P. Struthers, bright salmon, dark crimson eye.

For the best eighteen we should add; Cross of Honor, each petal rose-lilac with distinct white margin; Dedham, white shaded pink, small pink eye; Le Feu de Monde, bright red shaded salmon, later than Mme. Meuret; Mme. P. Langier, bright salmon pink; Ornament, clear pink; Pantheon, clear pink, light center.

For the best twenty-four varieties we should add Alexander Shearer, very bright red; Ixion, white shaded pink, dark pink eye, extra late variety; James Galloway, cherry red; Le Solil, clear pink, light center, extra early and continuous; Le Vaughan, lilac rose, crimson eye; Richard Wallace, white shaded violet, violet red eye.

Le Solil, Independence, Le Vaughan, Le Feu de Monde and Mme. Meuret are somewhat dwarfer than the others, but none of them are so dwarf as the new dwarf varieties. R. N.

Massachusetts.

Buffalo.

TRADE IS GOOD.—FLOWERS WERE SNOWBOUND.—EXCELLENT CHRISTMAS PROSPECT.—CLUB MATTERS.—JOTTINGS.

Trade last week was on the improve. Sunday we had snow, Monday fine; Tuesday and Wednesday we had a whole lot of things. Snow in the east and south stopped all trains and all we could do was to telephone out ten miles and know where the trains were, while the largest reception of the season was scheduled for Wednesday afternoon and it was a hustle to get flowers that were ordered, but I am happy to say that the decorator is still alive.

All are making preparations for a good Christmas. Holly will be in good demand but indications point to a scarcity of pine, and if the weather keeps as it is carnations and roses will be sold by the ounce and not by the hundred. The only time a look can be had of the different store and greenhouse men is at Kasting's in the morning; at other times they seem to be meditating on what they did in other years, while at their country greenhouses they are sitting up nights with their carnations and violets.

Kasting has discarded coal in his wholesale house and now heats with natural gas. Any day now you can get natural, illuminating or the other, furnished by the morning delegation.

The club has taken a little vacation after the show, but will get together after the holidays, when a subject will be introduced and debated that will be interesting to all, especially to the retail trade.

Phil. Scott has had a visitor, but not a welcome one. It was a carbuncle on his neck, but it is better now and he says that was the best place for him to have it as he has more room there. W. A.

Oshkosh, Wis.

The florists of this city will nearly all have chrysanthemums for Christmas, so late is the cut holding on; John Nelson has many blooms not yet ready. Mr. Nelson has nearly everything in his stock, including good blooms of narcissi and hyacinths, callas, azaleas, violets, carnations and roses.

Ferd. Flister also has a well grown general stock but his particular pride is a lusty young banana tree. John S. Wood makes a specialty of carnations and also grows violets well.

Isaac Miles and H. J. Brenneke each have nicely kept, modest establishments in which they will cut some very fine roses, carnations and violets for Christmas.

WARE, MASS.—F. A. & H. A. Tucker have rented a portion of Ruggles Bros'. store as a branch of their floral business.

THE New Jersey Floricultural Society has invited a bowling team from the New York Gardeners' Society to participate in its annual dinner January 6 and roll a match game.

Pastimes at Orange.

The New Jersey Florists' Bowling Club has been indulging in steady practice once a week since last September. Here are the scores for the game of December 9:

Name.	1st.	2d.	3d.	Ave.
Walter Gray	146	154	178	159
George Smith	154	96	153	134
Joseph Manda	118	128	151	132
F. W. Massmann		91	163	127
Geo. Van Qualm	126			126
John Scroll	114	118	136	123
James Wood	87	129	149	122
Henry Bohsen	98	109	105	104
Wm. Grant	87	119	92	99
August Meyer		92	105	99

With Cleveland Bowlers.

Last Monday evening witnessed the first competition for the new gold badges provided for those who can prove their superior skill on the alleys. The badges are very pretty in design and well worth contesting for. One is for the individual making the highest score of the evening in one game. The other goes to the proprietor of the highest average. Mr. Henry Kunz didn't do a thing but walk off with both of them. There was a fair attendance and interest was keen:

Name.	1st.	2d	3d	Ave.
Henry Kunz	144	145	188	159
Pentecost	137	173	132	147
A. H. Graham	150	156	112	139
A. Hart	164	120	122	135
J. Wilson	87	156	151	131
A. Graham	113	156	107	125
C. J. Graham	124	122	125	123
Stephan	90	150	107	116
H. Hart	81	98	146	108

A.

Florists Defeat Gardeners.

Monday, December 12, 1898, was a great day for the New York bowlers. Not for years has such an enthusiastic assemblage of the florist bowling element been seen here and the wisdom of the club's generous appropriation for the encouragement of this feature was apparent to all who looked in upon the jovial party at Brinkana's alleys on Monday afternoon. The four alleys were all kept busy and were pronounced to be all right in every requirement by the twenty-five or more participants in the various games that were rolled. An informal challenge had been issued to the Gardeners' Society, to meet the representatives of the Florists' Club and this contest was the big event of the day. The two clubs lined up as follows:

Florists—T. Roehrs, Burns, Hafner, Penman, Atkins and T. Lang.

Gardeners—O'Mara, Logan, Plumb, Troy, J. Manda and Bartholomew.

When the smoke had cleared away it was found that the florists were victors in two games out of three by a score that gave a substantial margin but was not remarkable. Lawrence Hafner's trophy, a silver match box, was won by Theo. Lang, with a score of 185.

With Chicago Bowlers.

A meeting of the Chicago Florists' Bowling Club was called to decide in regard to prizes for ensuing games and the members voted to issue a gold medal for the highest average score made during twenty-four games to be played from the beginning of the new year. Also a gold medal to be given to the member making the highest individual score during above mentioned time. Members must play at least sixteen games to be eligible in this competition. It was also decided that games played on Florists' Club meeting night would not count in this competition. It was further agreed to play match prize games on Thursday night instead of Friday night as heretofore. George Asmus was elected to membership, bringing the roll up to fifteen.

Following is the score rolled, after which Phil. Hauswirth and Ed. Winterson made new records at four back, the former scoring 69 and the latter 71:

Name.	1st.	2d.	3d.	Ave.
C. W. McKellar	143			143
August Lange	141			141
John Degnan	133	132	117	127
J. S. Wilson	142	125	112	126
P. J. Hauswirth	124	130	112	122
Walter Kreitling	125	121	112	119
Jas. Hartshorne	113	123	85	107
E. F. Winterson	104			104
Alex Henderson	86	99	95	93
M. Barker	69			69

The November Record at Philadelphia.

A. L. Brown finished with first average in the November contest on the Florists' Club alleys in Horticultural Hall. These alleys, for some unknown cause, are considered to be the most difficult in the city, says the Philadelphia *Ledger*. They are regulation in every respect, with exception of the foot run, which is three feet short. In comparison with the bowling on the Century Wheelmen's alleys, G. O. Bell bowled an average of 159 for thirteen games at the Century, while the best he could do on the Florists' alleys was 140 for fourteen games. The averages follow:

Name.	Games.	Pins.	Ave.
A. L. Brown	19	2906	152
N. Moore	22	3248	147
J. Westcott	12	1636	146
D. T. Conner	17	2459	144
R. Kift	31	4472	144
T. Archer	15	2119	141
G. Moss	28	3950	141
G. O. Bell	14	1969	140
G. Anderson	31	4347	140
W. Baker	32	4435	138
W. C. Smith	31	1293	138
David Rust	14	1937	138
C. Longinotte	31	4220	136
J. P. Habermebl	17	2288	134
G. Craig	10	1343	134
John Walker	25	3313	132
R. Kienle	12	1463	121

W. Gibson	19	2127	111

Cleveland.

TRADE VARIABLE.—STOCK SHORT.—FEW CHRYSANTHEMUMS REMAIN UNCUT.—PADDOCK NAMES A YELLOW FOR ADAM GRAHAM.

Business continues sometimes fairly good, other days somewhat dull. There is, however, quite a general complaint as to quality and quantity of flowers offered. In spite of somewhat sluggish trade there has been some stringency and it is more keenly felt now that chrysanthemums are practically out of the market. There are of course a few late ones still in the hands of various growers, but they are being carefully husbanded for use at Christmas. Probably the largest lot of these is in the hands of A. Graham & Son, who have one house but little cut as yet, the sorts being W. H. Lincoln, W. W. Coles, V. H. Hallock, Niveus and Mrs. Jerome Jones. Speaking of this latter sort reminds one of E. J. Paddock's golden yellow sport of Jerome Jones. It is truly a most beautiful thing, having all the elegance of form and carriage that characterizes Jerome Jones as well as its health, vigor and certainty of blooming qualities. The color is beautifully soft and while somewhat unusual it is not freakish in tint. It has been named for Adam Graham. Wherever tried in the east and elsewhere the reports are unanimously in its favor. A.

Helpful Reminders.

Now that cold weather has come to stay, the transportation of stock is an essential item for consideration and to some, who have not made suitable preparations, it is a perplexing one. Quite a number of florists have procured closed wagons and fastened in small stoves, which overcomes one difficulty but furnishes others; they are troublesome and dangerous, and while they render the delivery of cut flowers in boxes comparatively easy, the growing popularity of plants requires some covering in moving them from the wagon to the house. Oil stoves are used, but are troublesome on rough roads, hot bricks and other contrivances similar to those used for warming feet in carriages, but I have adopted a plan that is more simple and satisfactory than anything I have yet seen. A few boxes, well built, of half-inch boards except the ends, which are thicker, are made in different sizes, say 12x12x 72, 18x18x120, 10x18 x68. The covers are arranged in one piece with cleats and fastened down with rope or straps. With these three sizes all ordinary sets of plants are easily packed by laying down; put in one or two Mason jars of hot water with each box and they will keep frost out for a long while. For large decorative plants that cannot be handled in these boxes, a canvas covered frame is used and, to keep the wagon warm, two or more large milk cans are filled with hot water.

In arranging the carnation in decorations its own foliage is preferable, but in large arrangements monotony is avoided by adding other foliage. The most beautiful effects are made with pink carnations and the gray-green foliage. The Cineraria maritima is very good for this. Asparagus Sprengerii, running into yellow green, as it does, occasionally works in well.

If you had Clematis paniculata blooming this fall you would better pick off all the seed and save it in a dry place; it grows from seed easily.

Acacias are showing bud and starting new growth and should be given plenty of light and nutriment from now on. For cutting a plant should be arranged in open ground, where it soon becomes a large bush and bears drooping branches of yellow that can be cut almost by the armful.

Freesias that are started early in flats or pots are the better for a little feeding, as they draw from the soil continually both for the formation of flower and strengthening the tuber for next season's growth.

You should not be without the blue marguerite, Agathæa cœlestis, now if you are catering to the demands of cut flower buyers. A few plants given an open bench in a warm temperature will soon produce long-stemmed daisies of light blue with yellow center, a color which is rare in flowers. C. B. W.

BUSINESS GOOD BUT RAIN IS BADLY NEEDED. —A FINE NEW STORE.—PERSONAL MENTION.

The florists have enjoyed a good autumn trade, one of the principal stores reporting business fifty per cent better than a year ago, but still the trade generally anticipates a decided improvement. So far this season this section of the state has not been visited by Jupiter Pluvius and his arrival is anxiously awaited as a rain is all we need to insure a good winter.

The Redondo Floral Company, of Redondo Beach, has opened a store at 246 S. Spring street where they will dispose at retail of the entire output of their gardens. This is the finest store in the city and several thousand dollars were spent in fitting it up. They celebrated the opening by giving away all the flowers they could cut from twelve acres of carnations. John Schlaloss is manager, with Miss Catharine Sexton assistant.

Morris Goldenson, the florist with the Ellington Drug Co., gave an opening recently. The store has been greatly enlarged and entirely refurnished. Morris celebrated the completion of the improvements by presenting visitors with all the carnations, roses and chrysanthemums he could buy.

Capt. F. Edward Gray has lately received the gold and silver medals awarded him by the Hamburg Exposition for his superior strains of amaryllis and gladioli. Jacob Dietrich deserves a medal. It's twins.

Thos. Patch, formerly with Pitcher & Manda, is now in charge of the Ingleside nurseries at Alhambra.

W. G. Bertermann, of Indianapolis, and Ernst A. Asmus, of New Jersey, are spending the winter in southern California.

B. F. Collins, one of the oldest florists in the city, retired from business on December 1.

R. Leithead, in charge of the Raymond nurseries, has 5000 Scott carnations nicely in bloom in the field that are doing remarkably well. He is testing some of the latest eastern varieties for field culture. D. R. W.

London, Ont.

J. Gammage & Sons have a store on Dundas street, the principal business thoroughfare of the city, which is one of the finest and best equipped in the province and their greenhouses on the outskirts of the city have undergone many improvements—they have added three carnation houses, each 10x180. Mr. Gammage reports the best trade they have had in years, the demand for cut flowers, being on the increase among all classes. Their chrysanthemums this fall were the finest grown in this section and sold readily at fair prices.

The London Floral Co., which has succeeded Ed. West, has remodeled the store, adding a handsome and spacious conservatory. They report business brisk and encouraging.

The law makers at Ottawa have evidently arrived at the conclusion that what is "sauce for the goose is not sauce for the gander," or vice versa. Far be it from my intention to question the wisdom of that honorable body, yet I am constrained to confess being at a perfect loss to account for the wisdom of a law that admits kentias and latanias free of duty and imposes a tax of twenty per cent upon Ficus elastica, pandanus and dracænas. HOMO.

CARNATION EXHIBIT BY THE FLORISTS' SOCIETY.—FLOWERS SCARCE BUT MANY GOOD BLOOMS DISPLAYED.—MANY SEEDLINGS.—THE CLUB MEETING FOLLOWS.

The carnation meeting held December 10 was not up to expectations owing to the scarcity of that flower. Few of our home growers entered into the cash prize contest. The following were exhibitors of standard varieties: Wm. Murphy staged Armazindy, Mrs. Geo. Bradt, Flora Hill, Gold Nuggett and Portia. Thomas Windram, of Newport, Ky., made a creditable display with Mrs. Geo. Bradt, Scott, Flora Hill, Daybreak, Victor and Evelina. George & Allen entered Mrs. Bradt, Wm. Scott, Flora Hill and Armazindy and captured the $5 prize offered by Wm. Murphy for best 100 blooms standard varieties. This firm also made a grand showing in roses, Perle, Bride, Bridesmaid, Meteor, Morgan and Beauties; they also carried off the $5 prize for twelve Beauties offered by Geo. S. Bartlett. In bulbous flowers they were also in the lead. Hoffmeister Floral Co. showed a magnificent vase of their new rose, Miss Clara Barton. The judges seemed to be favorably impressed with it and no doubt they will receive a special certificate at the March meeting.

In the seedling classes more interest was manifested. J. M. Gasser, of Cleveland, showed his new pink, Merrimac, but his box arrived in poor condition, much to everyone's regret. F. Dorner & Son, La Fayette, Ind., exhibited Gen. Maceo, a very dark velvety crimson; flowers medium, stem strong enough to hold the blooms gracefully. G. H. Crane, exhibited by the same firm, made a grand showing; color bright red, flowers large and full, calyx perfect and judging from the stem and foliage it must be a robust grower. E. G. Hill & Co., Richmond, Ind., showed one vase of their new aspirant, America, which should become famous. The flower is large and perfect, color a striking red, stem and foliage clean and healthy. H. Weber & Son, Oakland, Md., showed a seedling, No. 38–96, flower large and full, color shell pink very pleasing, stem stiff and strong. Peter Fisher, Ellis, Mass., sent his Mrs. Thomas W. Lawson. These new comers will have to be shown again at the March meeting in order to receive the special certificate of the society. R. Witterstaetter showed a collection of seedlings and worthy of note among them was No. 557 A. This was the largest bloom in the hall, in color delicate pink, form and calyx perfect, but it lacked somewhat in stem. No. 547 A. is a bright fringed scarlet, very fragrant and an all around perfect flower.

In the evening the regular monthly meeting of the Florists' Society was held and fairly well attended. Five new members were elected. After the regular business was transacted, the nomination of officers for the coming year took place. The election will occur at the January meeting and a jolly good time is in store for that night, as the present board of directors will treat the boys to a smoker and luncheon. J. Bertermann, of Indianapolis, was an interested visitor at the club. H. SCHWARZ.

FRANKFORT, KY.—Henry N. Craik, superintendent of the Frankfort cemeteries, and George Munich, formerly of Batavia, N. Y., have formed a partnership under the name of Munich & Craik. They have 6,000 feet of glass.

CARNATIONS ARE SCARCE IN THE SMOKY CITY.—CHRISTMAS GREENS.—VISITORS AT FISHER'S.—JOTTINGS.

Stock is fairly plentiful with the exception of carnations, which are scarce, especially white. Christmas greens are in abundance with the exception of ground pine, of which there will not be enough to meet the demand. There is complaint about the quality of holly; it is not up to the standard in many cases.

John Murchie, Sharon, Pa., had the misfortune to have the boilers at his greenhouses burned out during the severe cold weather of last week. Mr. Murchie secured a temporary connection with a neighbor's boiler and was thus enabled to save his stock from being a total loss. A new boiler will be put in at once, but it will require some time to recover the lost ground. He has not made an estimate of his loss as yet, but it will be heavy on account of being so near the holidays.

James Dell, formerly at 508 Smithfield street, has opened an office at 911 Penn avenue for the sale of fruit and ornamental trees and flowers. His many friends are glad to see him again in the florist business. J. F. Gibbs & Son, 5515 Fifth avenue, have been succeeded by S. Gibbs & Sunshine, the former a son of J. F. Gibbs. The latter has been a landscape gardener. J. F. Gibbs & Son will continue as before at Woodville and in the Allegheny Market.

At McKirky's greenhouses near Shousetown a fire occurred resulting in the destruction of a house of American Beauties and Harrisii lilies which would have been ready to cut Christmas week. The place was insured.

A very pleasaut party visited Mr. Fisher at Castle Shannon, on December 11. Mr and Mrs. Chas. Hoffmyer, Mr. and Mrs. Julius Ludwig, Mr. and Mrs. Wm. Young and Mr. and Mrs. Bayer comprised the delegation.

Mrs. E. A. Williams reports business very fair. What is probably the largest single decoration of the season, in a large department store, has just been completed by her.

Fred. Stokes, manager for Wm. F. Kasting & Co., says he is well pleased with the success they have met with in Pittsburg.

Loew & Roehrig have opened for the holiday season at 5 Union street.

M. I. O'Brien, Sharon, Pa., and Dumont & Co., Philadelphia, were visitors this week. REGIA.

PITTSFIELD, MASS.—J. G. McArthur, formerly secretary of the Gardeners' and Florists' Club and now superintendent of the Pittsfield Cemetery, is the republican candidate for councilman in Ward 1.

NURSERY SEED FLORISTS **CATALOGUES**

87-91 Plymouth Place, CHICAGO

Kansas City, Mo.

The autumn opening of James Morton's Sons and the flower show of W. L. Rock at their spacious store, 1024 Main street was the event of the year. As a chrysanthemum show for variety and size of display it rivaled many club shows. A souvenir invitation was mailed liberally and generously responded to, for, in spite of three as disagreeable days as could be, fully 3000 people attended. The store was decorated with wild smilax and Asparagus plumosus. Large palms where plentifully used. An elegant luncheon table formed the center and was done in Bridesmaid roses and adiantum, the appointments being in keeping. The buffet tables were decorated with fruits, flowers and autumn leaves. The display of chrysanthemums included thirty leading varieties. Of carnations there were sixteen of the best sorts and the display of roses would have been hard to beat. Beauties, with stems five feet long were shown, with some extra select stock in Madame Testout, Kaiserin, Perle, Bride, Bridesmaid and Meteor. There was also a special display of bronze and green galax and magnolia wreaths, specimen palms, Boston ferns, Asparagus Sprengerii, pot chrysanthemums and ferneries. In connection with the display a refreshment called ambrosia was served. The show was largely a home product display, as the greenhouses of local florists furnished the greater part of the exhibits, the bulk of the chrysanthemums coming from the Merriam greenhouses of Chas. Heite, who also grew many of the carnations. W. J. Barnes furnished the large palms. Mr. Rock reports that a largely increased retail flower trade has resulted from his liberality to the public in the way of a free show. B.

BRIDGEWATER, MASS.—During the severe storm November 30 the roof of T. J. Sjoberg's establishment was entirely destroyed.

The Model Extension Carnation Support.

Read what some of our best growers have to say concerning it: QUEENS, N. Y., Feb. 16, '97.

MR. THERON PARKER, Brooklyn, N. Y.,

Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention. Very truly yours, C. W. WARD.

The Right Cypress for Greenhouse Material.

Have you heard of Cypress Greenhouse Material that has not been satisfactory? If you have it does not follow that Cypress is not the best lumber to use. There is White Cypress, Yellow Cypress and Red Cypress; there is Cypress that grows on the high lands and Cypress that grows in the swamps.

All of these different kinds are not suitable for greenhouse purposes. Do you know which kind is best and do you know that kind when you see it? If not you would better buy from those that do know and will deliver exactly what they sell. We introduced Cypress for greenhouse construction and pushed it to the front. We know all about it. For fifteen years we have made a specialty of furnishing it, and during this time we have built up a reputation that we can not afford to jeopardize. We send out the best only.

HENRY ECKFORD, the famous English florist, has about thirty acres of land and nine-tenths of it is devoted to his specialty, peas that are beautiful to look upon or good for food.

Cannas in 1898.

We have been trying ten acres of these plants in something over 100 varieties, and give below a rough summary of the notes made through the season on most of the newer, as well as older kinds tried here. The general improvement made in the French Crozy type of canna the past few years must account for the fact that each succeeding year now shows few marked advances over former kinds, at least that is the way I look at it. Of course every new canna is criticised more closely than ever and even its best friends are slow to duplicate colors or forms and many novelties are thus rejected in favor of older kinds. We realize here, as in other large commercial places, the need of discarding all inferior kinds, the present list being cumbersome, and we have given special study this summer with this object in view.

ITALIA OR ORCHID-FLOWERING SORTS.

Alemannia.—Six feet. Green foliage, strong, robust grower, very fine flowering habit; flowers large and of a little better substance than any other of this class; color orange-scarlet, mottled and bordered yellow. This is unquestionably the best of the Italia type.

America.—Four feet. Dark bronze leaf streaked with green; late bloomer; flowers of fair substance, of a brilliant red. Desirable in this class on account of the foliage.

Aphrodite.—Five feet. Green foliage, strong grower, shy bloomer; poor substance, color deep salmon-orange, bordered yellow, having a washed-out appearance.

Atalanta.—Three feet. Narrow leaves of a grayish green with dark edge; flowers orange-scarlet, of good size but poor substance, and late coming into flower. Parthenope is better.

Austria.—Five feet. Green foliage, strong, robust grower, coming into flower late; clear yellow flowers of large size, but very little substance. Will discard it in favor of Burbank.

Burbank.—Five feet. Green foliage, strong, clean grower; flowers of largest size; color rich canary yellow with crimson spots in the throat; of fair substance; forms well developed trusses. The best of this color.

Burgundia.—Four feet. Green foliage; of same style as Alemannia but much inferior. Will grow Alemannia in place of this.

H. Wendland.—Five feet. Green foliage. This I think will prove an improvement on Italia; has large flowers, of better substance and richer in color; not as free flowering as Italia.

Iberia.—An inferior Italia; will discard it in favor of the latter.

Italia.—Still one of the best of its class; free flowering habit, strong grower, large orange-scarlet flowers with rather poor substance; makes a grand show when massed; will continue to be the leader in this color.

Parthenope.—Five to six feet. Green foliage. This was very showy with us this summer on account of its exceedingly large, bright, reddish-salmon flowers of fair substance; early and free flowering.

CROZY TYPE.

Alphonse Bouvier.—Five feet. Green foliage; still one of the best tall growing crimsons and will be a standard for some years to come; its drooping flower-spikes are not without grace.

Alsace.—Four feet. Small, creamy white flowers; free blooming habit; looks well in a large bed.

Aurora.—Five feet. Green foliage; large, well rounded flowers, of a clear orange-salmon; very free and early to flower. Monsieur Francois Gos I think an improvement.

Baronne de Poilly.—Four feet. Green foliage; poor, ragged grower; flowers large size, of a pinkish salmon; very poor substance; not wanted.

Bassett's Red.—Five feet. Similar to Black Beauty; leaves not quite as dark; being a taller grower there is a place for it.

Beaute Poitevine.—Four feet. Green foliage; this is one of the brightest crimsons we have; flowers are of medium size but numerous; an early and continuous bloomer; in a large bed it is hard to beat.

Black Beauty.—Four feet. The flowers are of no value, but its dark bronze, almost black, leaves are the most striking of this class.

Bronze Beauty.—Five feet. Bronze foliage; large flowers of deep vermillion. We find Inglewood better and will substitute it.

Champion.—Four feet. Green foliage; extra large flowers of bright scarlet; poor substance, late to come in flower; no place for it; Menelek is better.

Chas. Henderson.—Three and one-half feet. Green foliage; although coming into flower rather late, it is a good deep red.

Chas. Paul.—Five feet. Bronze foliage; orange-colored flowers of medium size; heads too compact; will discard in favor of J. D. Cabos.

Chicago.—Four and one half feet. Green foliage; this canna I place at the head as the best in its color, a bright vermilion scarlet; flowers are of good size, forming large trusses. A good habit of this canna is its shedding of dead flow-

ers; they drop off as soon as faded, leaving the flower stalks always clean and tidy.

Columbia.—Four feet. Green foliage; well formed flowers of bright vermilion; a poor grower and keeper; will discard it in favor of Chicago.

Comte de Bouchard.—Five feet. Green foliage; flowers yellow spotted carmine. No reason to prefer it to Florence Vaughan.

Comtesse de Sartoux Thorene.—This is rather a long name for a dwarf canna. Practically a dwarf Florence Vaughan, being identical with it in every respect except in height, which is only two and one-half to three feet; an early and continuous bloomer, sure to become popular.

Cuba Libre.—Three feet. Green foliage; like Madam Crozy but deeper shade of crimson. An improvement.

Defender.—Four feet. Green foliage; strong grower, producing small trusses of medium sized flowers; color, yellow striped crimson; of little value. A disappointment.

Depute Jonnart.—Three and one-half feet. Green foliage; poor, weak grower of no special value; medium sized flowers of deep scarlet; no place for it with Beaute Poitevine.

Duchess of Marlborough.—Four feet. Green foliage; flower long and narrow, almost a pure pink; has very little substance, forming loose, ragged heads; consider it of little value and not as good as Mlle. Berat.

Duke of Marlborough.—Four and one-half to five feet. Green foliage; we can find but little difference between this and Philadelphia, except that it is a shade darker in color, hardly noticeable, unless placed side by side. It cannot supersede Philadelphia.

Egandale.—Five feet. This I consider the king of all the bronze leaf cannas. Very free flowering, always in bloom, in all kinds of weather. The cherry-red flowers can be seen in twilight to better advantage than those of any other canna. Its only fault is its rather compact heads, which help to retain the dead flowers.

Eldorado.—Four and one-half feet. Green foliage; still the leader in its class and will be hard to displace; large flowers of a clear yellow, faintly spotted with red; fine grower, and an early and continuous bloomer.

Emma.—Four feet. Green foliage; greatly inferior to Cuba Libre, which it resembles.

Etendard.—Five feet. Green foliage; strong, even grower, forming large mass of trusses of orange-scarlet flowers. One of the best bloomers.

Explorateur Cramphel. — Five feet. Green foliage; deep crimson flowers, late bloomer; will discard it in favor of Philadelphia.

Feu d' Artifice.— New.— Three feet. Green foliage; poor, weak grower; an inferior Queen Charlotte.

Flamingo.—Three feet. Green foliage; this has an ideal flower of great substance and color, but it will have to go; on account of its poor growing qualities. Triumph is better.

Florence Vaughan.—Five feet. Green foliage; this I consider the best of all the spotted yellows; stands all kinds of weather.

F. R. Pierson.—Four feet. Green foliage; fine rich crimson, but comes into flower too late to be of any value.

Furst Bismarck.— Four feet. Green foliage; very free flowering habit; medium sized flowers of a deep, rich crimson. Will grow Philadelphia in place of it.

Geo. W. Childs.—Three feet. Green foliage; of uneven growth; small flowers of Madam Crozy type and not as good as that standard sort.

Golden Fleece.—Four feet. Green foliage; another inferior yellow of poor growth and no value.

Gold Pearl.—Three feet. Green foliage; a poor weak growing yellow; Yellow Crozy far better.

Goliath.—Three feet. Green foliage; from its name one would expect a giant canna, but I have found it a weak, dwarf grower and shy bloomer. Flowers rather long and narrow, of a deep crimson, similar to Philadelphia.

Gruss on Hamburg.—Four feet. Green foliage; a poor, uneven grower; color orange-scarlet; flowers large but very poor in substance and of no value.

Incendie.—Three and one-half feet. Green foliage; this has proved a good bloomer with us this summer; although not as strong a grower as some, it will stand closer planting; flowers are of medium size; color salmon-pink with band of yellow. Will give it further trial.

Inglewood.—Five feet. Dark, bronze foliage; flowers of largest size, clear vermillion; a free bloomer, and in all one of the best in this class.

J. C. Vaughan.—Four feet. Bronze foliage; will discard in favor of Inglewood, which it resembles.

J. D. Cabos.—Five feet. Bronze foliage; still good on account of its deep orange colored flowers.

J. D. Eisele.—Four feet. Green foliage; well rounded, medium sized flowers of a vermilion scarlet; not as good as Chicago.

John White.—Three feet. This is supposed to be a variegated leaf, which it has when grown inside; outside it loses its variegation; of no value whatever.

J. W. Elliott —Four and one-half feet. Green foliage; large flowers of bright vermilion, not as good as President Cleveland.

Klondike.—Four and one-half feet. Green foliage; this I find of rank, uneven growth, shy bloomer, especially in dry weather, color pure orange; in this class I prefer M. Francois Gos.

Leonard Vaughan.—Five feet. Dark bronze foliage; this I think is the best dark leaved canna having bright scarlet flowers; these are of largest size; an early and prolific bloomer.

Leon Pepin Lehalleur. — Four feet. Green foliage; of medium growth, large, five petaled flowers, of a washed out pinkish shade; foliage inclined to cover the flower spikes; no place for it.

Maiden's Blush.—Four and one-half feet. Green foliage; medium sized flowers, of a clear, Daybreak carnation pink; fades somewhat in the sun, but massed together makes a pretty effect; has a place on account of its color.

Manda's Ideal.—Three feet. Green foliage; weak grower, with narrow leaves; shy bloomer, medium sized flowers of bright scarlet.

Menelek.—Four feet. Green foliage; this canna I think hard to beat; flowers are of immense size and of a rich nasturtium red A very satisfactory variety.

Midway.—Four and one half feet. Green foliage; extra large flowers, but not as good as Chicago, which it resembles.

Mlle. Berat.—Five feet. Green foliage; a strong grower, flower deep pink, a shade deeper than Duchess of Marlborough and far better. Petals are rather long and narrow; large, loosely formed flower spikes.

Mme. Baronne P. Thenard.—Three and one-half feet. Green foliage; of uneven growth, compact flower heads holding the dead flowers badly; flowers are large and rounding; color orange, shading to salmon-pink.

Mme. Crozy.—Four feet. Green foliage; still one of the best and can be seen at any and all times in full bloom.

Mme. Leon LeClerc.—Five feet. Green foliage; extra strong grower, throwing up an abundance of flower stalks and when massed, makes a grand show; medium sized flowers of a bright orange-scarlet, with wide border of yellow.

M. Mesnier.—Four feet. Green foliage; still has a place, as I know of no other of the same color, salmon dotted and streaked with red, bordered with a narrow rim of yellow; large flowers and a free bloomer.

M. Francois Gos.—Three and one-half feet. Green foliage; strong, even grower. This I consider the best of its color which is a pure orange; petals are large and rounding and of good substance.

FIELD OF CANNAS AT VAUGHAN'S ESTABLISHMENT, WESTERN SPRINGS, ILL.

CONSTRUCTING A BOULDER GATEWAY AT SWAN POINT CEMETERY, PROVIDENCE, R. I.

Mont D'Or.—Three feet. Green foliage; poor grower, throwing up weak flower stalks covered sparingly with flowers of a bright yellow, which fade badly.

Mrs. Fairman Rogers.—Three and one-half feet. Green foliage; this I find almost identical with Mme. Crozy and can see no improvement.

Paul Bruant.—Four and one-half feet. Green foliage; large flowers, orange shaded red; it will have to take a back seat as there are many others better.

Paul Marquant.—Four and one-half feet. Green foliage; has had its day and will have to go; many other salmon shades better.

Paola Radaelle.—Three feet. Green foliage; a dazzling crimson, yellow edge, weak grower and shy bloomer; many better ones.

Papa.—Four feet. Green foliage; in this class I prefer Pres. Cleveland, which is better.

Philadelphia.—Four feet. Green foliage; of even growth; this is without doubt the best deep crimson canna we have; produces immense quantities of bloom the summer through; sheds its faded flowers and always looks fresh and bright.

Pierson's Premier, (Little Billie).—Three feet. Green foliage; one of the best dwarfs, a prolific bloomer; in color it is on the line of Queen Charlotte, but the scarlet is more intense.

Pillar of Fire.—Six to seven feet. Green foliage; similar to A. Bouvier, and shall discard it.

P. J. Berckmans;—Five feet. Green foliage; this we shall discard in favor of Mlle. Berat.

Pres. Cleveland.—Four and one-half feet. Green foliage; this I consider one of the best of recent introductions; very fine flowering habit and extra strong grower; large, compact flower heads; in dry weather it is inclined to hold its faded flowers and needs cleaning; petals are of largest size; color pure orange scarlet.

Pres. Max Michelli.—Four feet. Bronze foliage; a poor grower; leaves curl badly; late, shy bloomer, color dull red; Leonard Vaughan is better.

Pres. McKinley.—Three and one-half feet. Green foliage; came into bloom rather late with us; the style of Philadelphia and I can see no improvement.

Princess Helen de Montenegro.—Four feet. Green foliage; strong grower, shy bloomer; extra large flowers but of poor substance; color orange salmon with crimson lines; fades badly.

Queen Charlotte.—Four feet. Green foliage; a good, free flowering all round sort and will be in demand for some time to come; however, I prefer Souv. de Antoine Crozy, a more striking color.

Robert Christie.—Five to five and one-half feet. Green foliage; after the style of Chicago which it closely resembles but is not so good.

Robert Owen.—Four feet. Green foliage; color clear yellow; does not do well with us; prefer Yellow Crozy.

Roi des Rouges.—Four feet. Green foliage; a good canna, producing large flower trusses (inclined to droop) of a bright, almost dazzling crimson.

R. Pearson.—Four feet. Green foliage; color yellow, heavily dotted and splashed crimson; petals stand up stiff and do not show off to advantage. Vice-President David is of the same type but better.

Secretaire Chabanne.—Four feet. Green foliage; this has been grand with us this summer; a strong grower, early bloomer; flowers are extra large of a beautiful orange, shaded salmon. A decided improvement in the Marquant type.

Semaphore.—Five and one-half feet. Dark bronze foliage; extra strong growth and free to bloom; medium sized flowers of a light orange; very striking and shows off well at a distance.

Sophie Buchner.—Five feet. Green foliage; very large flowers, color deep vermilion, late coming into bloom; will discard it in favor of Chicago.

Souv. d' Antoine Crozy.—Four feet. Green foliage; a most distinct and striking flower; rich, crimson scarlet with wide gold border; an early and continuous bloomer; an improvement over Queen Charlotte.

Souv. de Mme. Crozy.—Five feet. Green foliage; strong, robust grower, throwing up immense flower stalks, always in bloom; large red flowers with broad border and large center of a bright yellow; the best of its kind.

Stella Kanst.—Five feet. Green foliage; one of the freest flowering cannas we have; produces medium sized flowers in great profusion and looks well when massed in large bed; color rich apricot.

The Burlington.—Five feet. Green foliage; strong grower, early to flower; cleans itself of all decayed flowers, never having that dried up appearance which so many of our good cannas have at

times, color is a clear orange scarlet.

Topaz.—Three feet. Green foliage; a good, clear, bright yellow; medium sized flowers, rather showy when in bloom; fades badly in the sun; a weak grower.

Triumph.—Three and one-half feet. Green foliage; this I think is one of the best dwarf bright reds of the Flamingo type that we have; a most vigorous grower, with large flowers and trusses and a constant bloomer; will give satisfaction.

Vice-President David.—Four feet. Green foliage; of strong, even growth; extra large, well rounding flowers, which open up full showing off to great advantage; trusses are of large size and not too compact; color yellow mottled heavily with crimson. This I consider best of the deep colored Florence Vaughan type.

Vice-President Luizet.—Three and one-half feet. Color bright red; flower heads are rather too compact; will discard it in favor of Triumph.

Villa de Poitiers.—Four feet. Green foliage; is of medium growth; flowers very striking color, deep orange-yellow, lower petals splashed crimson; petals stand up stiff which detracts from its beauty; very free to bloom; a new one with us which may improve on further trial.

Yellow Crozy.—Three and one-half feet. Green foliage; the strongest and most free flowering clear yellow canna we have; flowers are large and of good substance; it bleaches less in the full sun than any other yellow I know of. The flower heads are too compact and need cleaning.

My selection of sorts to grow, if restricted to a few varieties, would be the following: In orchid-flowering—Alemannia, Burbank, Italia. In Crozy types—Beaute Poitevine, Chicago, Comtesse de Sartoux Thorene, Egandale, Eldorado, Florence Vaughan, Inglewood, Leonard Vaughan, Madam Crozy, Menelek, Mlle. Berat, Monsieur Francois Gos, Philadelphia, Pierson's Premier, President Cleveland, Secretaire Chabanne, Souv. de Antoine Crozy, Triumph, Vice-President David, Yellow Crozy.

Western Springs, Ill. JAS. S. WILSON.

Swan Point Cemetery.

Swan Point Cemetery, at Providence, R. I., has for its superintendent a man who never copies the work of another. Bright, resourceful and courageous, he tackles a problem in his own way and solves it with a master hand. Under the management of Timothy McCarthy this beautiful resting-place of the dead has come to be known throughout this country and abroad as a masterpiece of sylvan adornment, and the unpretentious but earnest man who created it is recognized as standing at the head of his profession in America.

The exigencies of cemetery planning leave little scope for broad landscape effect. In addion to the many peculiar limitations common to all cemetery work, Swan Point presents a formidable problem in that it is located on a bed of glacial drift containing a large proportion of massive boulders, every one of which must be removed and the ground turned over to a depth of six or seven feet before it can be made use of for burial purposes. How to dispose of this material to best advantage has been an ever-present question as the cemetery extended its area. Superintendent McCarthy has solved it in his usual practical manner by using the stones in the construction of grottos and in building a boundary wall which is unique in its way.

One of our illustrations shows the older part of this boundary wall where a grand effect has been produced by the planting of masses of evergreen and deciduous shrubbery and creepers against its buttressed sides. The boulders are piled up in an irregular and seemingly random fashion, but the foundations are deeply laid and the back joints and beds well chinked and laid with mortar, and there is no reason to doubt its standing until the crack of doom.

The illustration of the unfinished gateway shows something of the manner and work of construction. The popular taste for some years has favored the banishment as much as possible of all cut stone work from the modern cemetery and Mr. McCarthy has determined that lot proprietors shall have an impressive example in this direction in the new entrances now being constructed and in which nothing but the natural boulders will be used. The effect at first is rather startling to one accustomed to associate cut stone masonry with cemetery entrances, yet commencing at the corner and approaching the entrance a certain harmony is apparent which will be all the more effectively marked when the now rugged lines of the rough boulder construction are softened by a luxuriant growth of vines and shrubbery. Several of the largest rocks used in this gateway weigh from twenty to thirty tons each.

Some Holiday Logic.

The season of depression through which the flower business has been passing makes it all the more necessary that the florist, be he grower, retail or wholesale dealer, should turn the approaching holiday trade to the best possible account. We occasionally hear it remarked that because of high prices, extra help and other drawbacks, all a retail florist may reasonably expect to do at Christmas is to serve his customers as well as he can under the circumstances and keep their friendship and that actual profits on the business as done at the holidays are very meagre. This is a poor standard for one to set up. We should do better and with the exercise of good judgment and foresight there is no good reason why a florist with a proper knowledge of his business should not make a holiday profit

A BOULDER WALL AT SWAN POINT CEMETERY, PROVIDENCE, R. I.

that will go a long way toward liquidating the shrinkage of the late unprofitable weeks that have been disturbing his waking and his sleeping hours.

We can never predict just what is going to happen at Christmas. The uncertainties of the weather, the caprices of customers and other contingencies make it impossible to figure reliably in advance and in more than one item we are pretty sure to realize within the next fortnight that "hindsight is better than foresight." But experience counts for something and is will be wise to revert to our experiences of the past and try to base our course this year to a considerable extent on what they show. Each individual has his own special record to draw upon but there are a few points of general application that may be presented just now with possibly good results.

The rapid increase in the holiday plant trade as compared with the sales of cut flowers demands our attention. Whatever may have been the cause, the fact is very evident and the florist who neglects to provide himself accordingly makes a mistake. The exclusive cut flower grower will, if wise, waste no time in complaining about the misfortunes that may have overtaken his industry but will see to it that no mistakes of judgment on his part will contribute to further misfortune or encourage increasing discrimination against his special product. He will, before doubling up the price of his flowers, first assure himself that there is a present actual demand for more than can be provided; he will not forget the oft repeated admonitions against the storing away of cut flowers in anticipation of extra holiday values, the most expensive delusion under which his craft has ever suffered; if packing for a wholesale market where an established system of grading exists he will understand that mixing or marking up his stock into grades in which they do not belong, in hopes that in the rush they may slip through, is folly that simply tries tempers, kindles resentment and reacts upon the flower growers in general and himself in particular. The mixing of rubbish among high grade stock does not raise the grade of the rubbish a single point, but it does degrade the quality of the good stock every time.

It has been the rule for many years that bright colored flowers enjoyed the largest demand at the holidays. So pronounced has the preference become of late that in the large centers the accumulation of white roses and carnations, Roman hyacinths, paper white narcissus and the like, at Christmas, has been actually pitiable while for scarlet carnations, high grade American Beauty and Meteor roses and poinsettias it has been impossible to supply a fraction of the demand. So many outdoor "greens" come to market at Christmas and so popular are they at this season that the use of the ordinary green stock of the florist, such as smilax, adiantum and geranium foliage is quite restricted and he who cuts off an unusual quantity of such material when not explicitly ordered makes a mistake for which there is no excuse. Barrels and barrels of smilax went to loss in New York last Christmas that might have been marketed, gradually, at a fair figure.

The record of flower sales in the wholesale markets of late years, at the holidays as well as on ordinary days, shows that the disposition of the buyer to discriminate as to quality has increased in proportion equal to the increased supply. Last Christmas it was particularly noted that as soon as the supply of first-class specimens of any coveted variety was exhausted sales on that line were at an end.

As to plants, the same fondness for color prevails at the holidays as is the case with cut flowers. The addition of a scarlet bow and a spray or two of holly will help the sale of a white azalea or primrose, but for quick sales take the Simon Mardner azalea, the deep pink primrose or cyclamen, the poinsettia and the bright fruiting solanums and ardisias and oranges. The white flowering plants have their place in basket and jardiniere arrangements, in the making of which the New York florists excel and of which the sales elsewhere might be augmented to enormous proportions if our florists in the smaller towns could be brought to realize the possibilities of this line. Baskets and pot covers of celluloid in many artistic forms and combinations, also jardinieres and fern dishes at prices to suit all pockets, are offered by our supply dealers and it is possible to work off in them stock which of itself would find a market with difficulty.

The big trade in holiday plants which has been developed in the large cities within the past few years is due in large measure to the well-directed efforts of our plant growers. They have aimed to produce goods not only attractive to the eye but of such quality as to ensure satisfaction after they have been delivered to the buyer. Good sturdy varieties that will retain their freshness and beauty in the unfavorable surroundings of the average dwelling house for a reasonable length of time, grown cool and presented in attractive form at fair prices are the best advertising medium in the world for the retail florist.

CHRYSANTHEMUM XENO.

Chrysanthemum Xeno.

This is one of the new varieties introduced by Nathan Smith & Son, Adrian, Mich. Xeno is pink in color and was certificated at Chicago, Cincinnati and Philadelphia November 26. Messrs. Smith & Son inform us that their new variety exhibited at Chicago under the name of Izanga has been renamed Zoraida.

MONTPELIER, VT.—The boiler in Jacobson's new house blew up during the cold spell last week.

LATROBE, PA.—W. G. Young has opened a well equipped flower and seed store in Young's block.

GERMANTOWN, PA.—The Germantown Horticultural Society has elected the following officers: President, Edward Neville; vice-presidents, Charles J. Wister, Albert Woltemate and Robert Le Bontillier; secretary and treasurer, George Redles, Jr.

NOTE.—Soliel d'Octobre.—This variety was reported upon as Soliel d'Or, with October Sunshine in parenthesis. As the first name had been appropriated to a chrysanthemum, it appeared in the weekly report of October 29 as October Sunshine. It has been ascertained that it is a French importation, the right name being as here given.

G. J. Warren.—Considerable controversy has arisen over the yellow sports from Mme. Carnot. Not less than three of them are catalogued by English growers. The following extracts from English catalogues may throw some light on the subject: "Yellow Mme. Carnot, a deep canary yellow sport from the well known Mme. Carnot." (H. J. Jones' catalogue '97). "Yellow Mme. Carnot or G. J. Warren." (Norman Davis' catalogue '98). "Mrs. W. Mease, the sulphur Mme. Carnot, is thoroughly distinct from the yellow sport G. J. Warren." (H. J. Jones' catalogue '98).

David S. Ward.—The committee consider this variety identical with Mrs. Robt. McArthur, and further inquiry has established the fact.

Yellow Mayflower.—As a certificate was awarded a yellow sport from Mayflower November 1896, under name of F. A. Spaulding, it is considered advisable to withhold certificate from the last shown until their distinctiveness can be determined.

Mrs. Geo. F. Baer.—The issuing of a certificate for the variety Mrs. Geo. F. Baer, which was withheld last year to determine its identity, will have to be deferred until the several yellow sports from Mrs. J. Jones can be thoroughly tested. To add to the complications of this case there have been two more yellow sports from this parent disseminated last spring. Mrs. J. Jones has sported to yellow and yellow with bronze shadings in six localities in this country.

ELMER D. SMITH, Secretary.

CARNATIONS.

CULTURAL NOTES.

DECEMBER 24.—Last summer I described in these columns the houses of H. D. Rohrer, Lancaster, Pa., and their peculiar adaptability for the growing of carnations indoors all summer. Last week I again visited these houses to ascertain what sort of a crop this stock is giving for the holidays and it certainly is a success, principally in quality but almost equally so in quantity of bloom.

Perhaps the most noticeable contrast is a parallel planting of the same varieties in the same house, one lot having been grown indoors all summer and the other being outdoor grown stock, bought in a section where there was plenty of rain to produce good plants.

Gold Nugget was one of these, and the indoor grown stock was not only the best looking but the flowers produced were almost three times the size of those of the outdoor grown stock, the quality of the flowers being in about the same ratio the whole way through the scale of points. There were, however, but two and three blooms to a plant on the indoor-grown stock and six to eight on those from outdoors, with, as nearly as I could judge, no probability of the indoor stock catching up before the first of February and probably not then. This is the point I have always made regarding the difference between indoor-grown stock and well grown outdoor stock: If you are satisfied with from three to five blooms per plant from October 1 to February 1 you can have much better blooms from indoor-grown stock, but if you want from ten to twenty blooms you will have to grow outdoor plants.

This is my "theory" demonstrated by my own experience and rather extended personal observations. Theories sometimes have a fall and I must confess that the amount of bloom on Mr. Rohrer's Scott, Cartledge, Triumph, Flora Hill, Helen Keller, Lily Dean and Mrs. Bradt contrasted with my own crop of these varieties at the same time rather knocks the foundation away from my theory and leaves it very little to stand on.

I know that with a good season for outdoor-grown stock, instead of the worst I ever experienced, I would have had a few and possibly one-third more blooms to a plant than Mr. Rohrer has at this time, but I also know that no amount of care and culture could have made my outdoor plants produce blooms the equal of his in quality, and when it is possible to get as good a crop as he now has for the holidays the argument is all in favor of the indoor-grown stock.

I have a house of Gold Nugget that was planted the last of August from which I have cut from six to eight blooms per plant of a quality not quite but pretty nearly as good as those produced by Mr. Rohrer's indoor-grown stock, of which, however, there were only about a dozen plants tried; possibly a house of it might give very different results. A dozen plants of Mrs. Frances Joost on trial have yet to produce their first flowers, although they have a nice setting of buds. With me the variety has been in constant bloom since October 1, is full of flowers now, and will, by January 1, have produced about twenty blooms to a plant. A dozen or more Firefly have bloomed early and freely and produced flowers that are in quality at least three times as good as those shown in Chicago last season. I believe that there were more blooms cut per plant from these indoor-grown ones than I have cut from those grown outdoors, and I know that when it comes to selling them I would give three hundred of mine for one hundred of Mr. Rohrer's and be ahead on the deal.

ALBERT M. HERR.

New York.

UNCERTAIN HOLIDAY PROSPECTS.—STORED ROSES STRONGLY IN EVIDENCE.—RETAILERS DISCRIMINATING AGAINST CUT FLOWERS IN FAVOR OF PLANTS.—MARKET GLUTTED WITH BAD HOLLY.

The uncertainty that experience has taught is to look for in the few days preceding Christmas prevails in the cut flower trade. The demand at present writing amounts to nothing and the prospects for the holiday demand are as yet only speculative. The wholesalers are perplexed. One of them on being congratulated on his amiable expression Wednesday morning replied "I may look very pleasant and placid but there's a turbulent sea inside me." The wholesalers, it may be remarked in passing are waxing poetical—the usual result of communion with nature. Some of the boxes of roses being received at present are enough to "try men's souls," their communion has been recently not with nature but damp cellar walls; the evidences are unmistakable and if these premature arrivals of the victims of the cellar habit are any indication of what may be looked for on Saturday there will be legitimate cause for unprintable language at both ends of the line. That top roses will go all right for the holidays there is no doubt, but top roses are constantly being pushed up a peg or two as the growers advance in proficiency and the top roses of five years ago are the culls of to-day.

American Beauty is quoted up to eight or ten dollars a dozen and the retailer in the retaliatory spirit which they have always on tap are pushing the ardisia and other plant favorites with their customers as substitutes for cut flowers, and with considerable success. One prominent retailer sets his plant trade at five times the value of his cut flower trade for the coming Christmas. Violets are promised in heavy quantity. Good figures are quoted in advance but it is doubtful if they can be maintained should the prospective crop materialize. Carnations are rather under the normal cut but excepting in the case of extra fancy varieties, seem to lag at the not unreasonable prices asked. Roman hyacinths and white narcissi are very abundant but are the deadest kind of stock in this market at present and it is hard to see where the growers can possibly come out whole on this class of material. Lily of the valley is a little better, but not much. Cattleyas are in brisk demand and will bring an advance of 50 per cent over regular prices.

The market is fairly swamped with miserable holly. Much of it has been cut too long and much of it never was worth cutting. This rubbish encumbers the market and makes trouble for the good stock which, however, is none too plenty and is readily bought by the knowing ones when located. Reports as to the greens business are conflicting. Localities where the cheap material abounds complain; elsewhere the trade seems to be satisfactory.

On the second Saturday in January the Gardener's Society will give a free exhibition of carnations that have not yet been disseminated. J. I. Doulan offers a special premium for the most promising variety.

Chicago.

THE HOLIDAY RUSH.—A WEEK OF BIG BUSINESS.—BAD WEATHER HAS ITS EFFECT.—FAIR SUPPLY OF STOCK.—CARNATION MATTERS.—FLOWERING PLANTS.—MANY ROOTED CUTTINGS.—COMMENT.

To begin with, it rained; and it kept on raining, but that did not deter the holiday buyers from their rush for flowers and this week, when it comes to an end, which will not be until Sunday, will probably record the largest volume of business Chicago wholesalers have ever transacted in the before-Christmas period.

Friday was the first clear day of the week and it was also the first day upon which the local retailers bought heavily. Although the consignments of that day were very heavy it was patent that there would be no break on the price of good stock and the situation seemed quite satisfactory all around.

Of course the weather had a large influence on the market in each of its phases. The rain not only caused less buying but the dark weather enforced early shipping to market as the stock was soft and could not be held. At no time from Monday to Friday was there too much stock nor was there too little. Shipping to distant points began Tuesday and has been rushing ever since. Early orders and late shipments were the rule, however, and the last days of the week were record breakers in many respects. The usual complaint has arisen that there is too little good stock and too much that is poor. Really first-class roses have been somewhat scarce ever since the bad weather came. There was a surprising quantity of late chrysanthemums on the market and a peculiar feature was the great number of Daybreak carnations.

Peter Reinberg proposes to grow but four varieties of carnations extensively next year, although he will, of course, grow a few thousand of each of the other sorts. The varieties which he has selected as the best in their classes are Triumph, Evanston, Evelina and Armazindy.

There were not many flowering plants upon the market this week, although there was an excellent demand for good stock of this character. Vaughan, McKeller & Winterson had something over 100 well flowered azaleas, twelve to fourteen inches, which wholesaled readily at $1.50 each.

Chas. W. Zaremba, of Riverside, is taking legal steps to recover from the World's Columbian Exposition Company $1000, which he says is the value of certain orchids which he exhibited and lost at the fair over five years ago.

T. D. Mosconesotes, in the Masonic Temple, decorated his holiday window with well flowered plants of azalea and cyclamen which not only made a handsome effect but attracted a ready sale.

The Reinberg brothers have already rooted over 100,000 carnation cuttings which, in earliest spring, they will plant in the field for summer blooming. They expect to more than double this number before planting out time comes.

Probably the largest C. O. D. order shipped out of Chicago this year was one to the northwest on Tuesday which carried a collection for $207.

A. W. Warren, an English gardener of excellent repute, has taken charge of R. W. Rathborn's private establishment at 5046 Woodlawn avenue.

Louis Lentze, who has been in business at Warsaw, Ind., is in Chicago.

Chas. Held, 920 North Campbell avenue, has been quite seriously ill for some time.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

IT IS ASSERTED that one acre of Roman hyacinths in France brings as much money as one hundred acres of grain in this country.

IT is the general belief that the Philadelphia meeting of the American Carnation Society, to be held February 16 and 17, will be a record breaker.

SWITZERLAND has a national chrysanthemum society which recently concluded a successful exhibition at which, it is reported, 8000 plants were displayed.

A RECENTLY elected member of the Connecticut legislature is James Hoyt, the New Canaan nurseryman, a septuagenarian who has never before held a public office.

AN executive order provides among other things that after January 1, 1899, trees, plants and moss in its natural state may be imported into Cuba free of duty.

MESSRS. PETER HENDERSON & Co. have named their new chrysanthemum Fair Harvard and awarded a prize of $25 to Misses Nellie and Jennie Finnegan, Anderson, Ind., who suggested the name.

THE National Chrysanthemum Society of England, on December 6, 7, and 8, held at the Royal Aquarium an exceptionally fine late show. In the principal prize-winning groups were Niveus, Nyanza, Golden Gate, C. B. Whitnall and Western King, the introductions of well known American growers.

American Carnation Society.

We are in receipt of the programme and prize list of the eighth annual meeting of the American Carnation Society, to be held at Philadelphia Thursday and Friday, February 16 and 17. The schedule gives a complete list of premiums together with rules and regulations governing exhibits and scale of points in judging. Copies may be had on application to Secretary Albert M. Herr, Lancaster, Pa.

Catalogues and Cut Flower Price Lists Received.

F. Kasting, Buffalo, N. Y., cut flowers; W. A. McFadden, Cincinnati, Ohio, cut flowers; Welch Bros., Boston, Mass., cut flowers.

Greenhouse Building.

Dover, N. H.—Chas. A. Rand, rebuilding house destroyed by fire November 27.

Philadelphia.—E. W. Clark, boiler house.

Manure for Violets.

ED. AM. FLORIST:—When unable to get cow manure for mixing with soil for violets, I would be pleased to know of the next best fertilizer to use? Could pulverized sheep manure be employed to advantage; if so, in what proportion?

M.

In growing violets the best substitute for cow manure is well-rotted stable manure. The writer has found sheep manure, such as is offered by the trade, to be of little value for violets and does not advise its use for this crop.

P. H. DORSETT.

Wholesale Price Lists.

ED. AM. FLORIST:—I read with interest in your issue for December 3 the "kick" raised by "Retailer" against the practice of mailing wholesale price lists of cut flowers on cards printed in large type, and I know from experience that in a small town with one or two young ladies and three or four young men employed in the post office that nearly one-half of a retail florist's customers know as much about the wholesale cut flower market or prices as the florist himself, and sometimes a little more, or at least in advance of him, if he don't get his mail very promptly.

P. H. THERKILDSON.

Ironton, O.

Chrysanthemums and Carnations.

ED. AM. FLORIST:—For the first time we raised our chrysanthemums in pots in the greenhouse the past season and are decidedly pleased with the results. It saves much labor and the plants do not grow so tall and leggy. I wish we could dwarf them still more. One great gain, we think, is that the plants are not so checked in growth as when grown outside. While they do get somewhat pot-bound, still they seem to bloom quite as well.

Our carnations we grow outside and for two years we have mulched them pretty heavily with stable manure containing considerable straw, which helps very much to keep the plants from suffering from drought. It also keeps down the weeds, keeps the ground from baking, saves labor and there are very few dead leaves to pick off when lifted. I know some good growers do not favor it, but for us we like it best.

Hiawatha, Kans. J. W. MARGRAVE.

Philadelphia.

JOTTINGS AMONG THE RETAILERS.—PREPARATIONS FOR CHRISTMAS.—WHAT THE DEALERS ARE SHOWING.—LESS OF THE DEPARTMENT STORE EVIL.—ANENT MR. BATTLES' REMARKS ON ICE.—COX AND HIS STOCK.—THE FARMERS INSTITUTE.—LA GRIPPE HAS HIS CLUTCHES ON THE TRADE.

Your regular correspondent, Mr. Kift, is so crowded with business this week that he is unable to write his weekly news letter, and has asked me to send a few lines. Some are born great, some achieve greatness, and some have greatness thrust upon them. You will please include me among the last and excuse any shortcomings.

From a hasty run among the flower shops I gather that there is to be a great Christmas trade. There is an air of hushed expectancy, as is natural on the eve of battle. Arms and ammunition are piled everywhere in wondrous profusion in readiness for the eventful Saturday morning, when the grand assault will take place. I watched them walk around the lines, with that subdued air which tells of tension and grim determination. Even the agressive and noisy drummer bends to the universal feeling and walks gingerly, speaking with bated breath. I feel like quoting "on Linden when the sun was low, all bloodless lay the untrodden snow," but by the time this appears in print it will be all over, and counting the spoils will be more in order than post-prandial sentiment.

White heather and tartan ribbon, beautiful orchids and ferns, seem to be the leading features at Pennock Bros. Their store is a bower of beauty, exhibiting fine taste in the arrangement of their great display of plants and flowers, and this, combined with the lavish store improvements of the past year, and their up-to-date methods, will doubtless still further enhance their great prestige as a leading store among the flower buying public.

Jos. Kift & Son make a fine feature of Parisian baskets filled with various combinations of ferns, flowering and foliage plants. This is rather a novelty to me. I do not remember having seen this done quite so tastefully before. The crepe paper pot cover seems to have had its day. Mr. Kift has skirmished for hundreds of miles for fine stock during the past week and has certainly got together a grand showing.

H. H. Battles said he was making no special effort for the Christmas trade; but from the brisk movements of his force of assistants I think this must be taken with a grain of salt. Here again I saw fine plants of the white heather, and I noticed it at other places later, which shows that this is one of the favorite plants for Easter. Mr. Battles has secured the whole stock of Mr. Lonsdale's fine pink begonia, which shows how quick he is to snap at a good thing while others are hesitating. It makes a beautiful effect in shower bouquets. Bon Silene buds were in evidence here—the only place I have seen them for some time. Who grows them? "H. H. B" evaded the question.

George Craig says the season has been excellent with him, both in plants and flowers and the outlook is for an excellent holiday business—better than ever before, if Jupiter Pluvius is kind.

Robert Crawford has a great display of fine plants and everything the flower buyer could desire for the holidays. This is one of the live stores and is beautifully fitted up. Mr. Crawford was one of the first to advertise in the daily papers and still keeps it up. Mr. Fox has joined the advertising ranks since, and he also seems to make it pay as he keeps at it regularly. None of the other stores advertise persistently—a few insertions about the holidays being all.

I hear less of the competition of the department stores among the florists this year. Perhaps they are getting used to it. But the seedsmen complain. Jardinieres and plants are not selling as freely with them this year, and they blame Wanamaker and the rest. Michell, Landreth and Dreer, all have fine holiday displays. Greens are plentiful and are selling well There seems to be no

fault to find with this branch of the business. Habermehl and Graham do the most of the big store and hotel decorations, I believe. They have been kept very busy in this line for the past week or more.

Mushrooms are more plentiful this week. Prime are bringing 50 cents per pound. English grapes and hothouse strawberries are among the choice things offered in the fruit line, and are used by some of our florists in presentation baskets of flowers, as are also fine confections occasionally.

Mr. Battles' little booklet, which I reviewed in your issue of last week, has not met with the approval of some of his competitors here. The ice-box matter is the bone of contention among most of them, although some other points are handled rather severely. Mr. Battles point, I take it, is that he has business enough to enable him to sell out every day and has little need of an ice box. This is in line with the methods of Thorley and some of the other up-to-date New York stores. At all events, it is a question whether it is wise to make the ice box too prominent a feature to one's customers. The public is quite ready to believe that flowers salted away in an ice box may not be as fresh as those just brought in from the greenhouse. The tendency of late has been to be quite lavish in ice-box fixings, a great deal of money having been spent on this item, and it may really not be the strong card supposed. Mr. Battles has set them thinking, although unintentionally, for it must not be forgotten that his talk in the booklet was addressed to his customers and not to his competitors. I fancy he is not thanking me for giving his pointers away as I did last week. Your wide awake florists, be they retailers or growers, keep pretty mum about how they do things until it is rather well known anyhow, and then they are willing enough to tell all about it.

Chas. W. Cox thinks there's about as much money in ferns as anything if a fellow knows just how to do it. He showed me a house of grand stock, in 3 inch pots less than a year from the seed, that were selling for 6 cents and asked if the man who grew cocos and sold them in 2¼-inch pots at 10 cents could show as good a profit, all things considered. Mr. Cox has done well with Beauty and teas, but says he is not in it with carnations, and will let some one else grow them hereafter, which is not good talk—I mean about the carnations. I saw some magnificent Flora Hill on his place and such flowers cannot help but pay. I hope to live to hear a different carnation story from this hustling, intelligent and rising young grower.

Robert Craig will speak on the care and management of house plants at the farmers' institute to be held in Horticultural Hall January 17. Hardy shrubs and trees for our lawns and gardens, will be the subject discussed by Edward Campbell, of Ardmore, a landscape gardener of wide experience. Professor Fernald, Dr. Rothrock, E. H. Hess, Col. Woodward, John Gould, W. A. Selser, Geo. Abbott and other experts in flowers, gardening, forestry, etc., will also take part in the institute, which will be a symposium of the latest scientific facts in connection with agriculture, horticulture and allied subjects. An interesting exhibition of house plants, dairy utensils, etc., will be a feature of the occasion.

The angel of Grippe spread his wings on the blast and breathed on the face of about one in every five of the trade in Philadelphia and still keeps on meandering and philandering and blandering around these parts in spite of copious charms in the shape of quinine and ——. It's annoying to be short-handed at such a time as this. G. C. WATSON.

NEWS NOTES.

TRENTON, N. J.—Wm. Moore has opened a store at 137 North Broad street.

CHAMPAIGN, ILL.—C. E. Ferdinandsen has a splendid display of geraniums.

DU BOIS, PA.—T. W. Monroe has opened a down town place of business at 206 N. Brady street.

DE KALB, ILL.—John Gustaffson has removed here from Sycamore to embark in the florist business.

PERRY, N. Y.—An incipient blaze in the greenhouse of G. O. Clark did considerable damage to stock December 14.

BLUE SPRINGS, NEB.—Peter Maw is constructing a system of water works at his Twin City Greenhouses.

PADUCAH, KY.—C. L. Brunson & Co. did the floral work for the recent elaborate Einstein-Bloom nuptials.

PROVIDENCE, R. I.—J. F. Parks & Co. have opened a down town store for the season at 142 Westminster street.

TAUNTON, MASS.—F. O. Willard has opened a city store in the Brockton and Providence street railway waiting room.

NORTH ROSE, N. Y.—Peter Salter, who recently established a greenhouse here, now has the institution in full running order.

LOWELL, MASS.—C. F. Miles, formerly with John Oliver, 326 Pawtucket street, has opened a store at 492 Merrimac street.

DALLAS, TEXAS.—Fire at 1:45 a. m. December 1 did considerable damage in the establishment of the Dallas Floral Company.

CROMWELL, CONN.—A. N Pierson has offered the handsome residence on Main street, formerly occupied by himself, to a charitable organization for an orphan's home.

ITHACA, N. Y.—R. J. Shore, Jr., for some years assistant gardener at Cornell University, has accepted the position of florist at the state hospital at Binghamton, N. Y.

TOLEDO, O.—The park board has rejected all bids upon the construction of the new greenhouses, the lowest being $20,000, while the board is willing to expend but $7,500.

PORTLAND, ME.—H. T. Harmon, for ten years with Kendall & Whitney, will on January 3 open a store for the sale of seeds, agricultural implements and dairy and poultry supplies.

GRAND RAPIDS, MICH.—The committee on parks of the city council charged the committee on buildings and grounds $77.50 for the use of the plants which adorned the court house lawn last summer. The bill was paid.

AURORA, ILL.—W. L. Smith was making some repairs on his boilers when the recent cold snap came on and only saved his stock by covering all the plants in his seven houses with newspapers and then building fires on the walks. It was eleven o'clock that night before the boilers were in shape for use.

COMPARING NOTES.—"My family can't help feeling a little proud of having been carried over by the Mayflower," said the young woman who was visiting in Chicago. "Is that so!" answered the young man interestedly. "None of our folks ever went into the florist business. What brought us through was wheat." —*Washington Star.*

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Also 2½ acres of land, or 14 lots. In a flourishing town of 8000 inhabitants, situated in central Ohio; no competition. Part cash; the rest on first and second mortgage. Address

GREENHOUSES, care Am. Florist.

Violet Culture in Maryland.

[A paper read before the Gardeners' Club of Baltimore, Md., Nov. 28, 1898, by Thomas C. Stevenson, of Govanstown, Md.]

I have been asked to say a few words on the way I grow violets, for although I grow them only in a small way, I have thus far been very successful. In the latter part of April or first of May I plant my violets in the open ground, unprotected by any shade. I prepare the soil by making it rich with manure. Then divide the clumps, taking off all young growth that has been made during the winter, being careful not to touch any of the old wood in the center of the clump. The object in planting the violets early is to have the plants well established, and growing before the hot dry weather sets in. I plant them five to six inches apart in rows one foot apart.

When the plants throw out young leaves, I give them a light hoeing and keep it up through the summer, even in the dry weather. Some people think that working them in dry weather causes them to dry out the more, but it is a mistaken idea. Keeping soil worked up, prevents a hard crust forming and lets the dew penetrate to the roots of the plants. In the latter part of July they will begin to throw out runners, which, just as soon as they are long enough to catch hold of, pinch or clip off, being careful not to loosen the roots. I keep the runners picked off until ready to plant in sash. Don't be afraid of the violets not making growth enough. It is not the runners that make the plant, but the stools that shoot up from the center. When the plants have three or four stools and no runners by the first of September, the hardest part is over.

I then get the sash ready to receive them, using a compost one-fifth cow manure to four-fifths soil. I prepare the soil one foot deep and have it level, with six-foot sash. I allow four inches fall to the sash and let the soil come one foot from the top. When level it will be eight inches from the glass at the bottom. When this is done I put in the plants, allowing twenty-eight plants to the sash, and water well. They will not need shading. Keep them stirred and weeded and water when necessary. It is best to keep the soil moist and the foliage dry, except when syringing, which must be done early on bright days in the fall, so that they dry out before night.

I put on the sash about September 15, if frosty at night, and take it off during the day. Keep this up until the weather grows too cool. I give them plenty of air through the winter by pushing open the sash at top and bottom of frame, closing it again before the sun gets too low, so that there will be a little heat when I cover the frames with mats. Let them have warm rains during fall and spring. I use mats made from rye straw to protect my frames from cold. In violets grown this way I have experienced no disease.

ADRIAN, MICH.—A man whose description agrees with that of the indefatigable palm swindler played a similar game upon Nathan Smith & Son, December 13, but selected only $4 worth of cut flowers and growing ferns.

WHITINSVILLE, MASS.—George McWilliam has a beautiful cypripedium seedling which he has named Mlle. Gabriel Moens. It is one of three, all crosses of Spicerianum and callosum, which took a silver medal at the Massachusetts Horticultural Society's exhibition. All have borne double flower spikes.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.: JOS. A. BOLOIANO, 1st Vice-Pres.: S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITORS AT CHICAGO: H. A. Johns, of Sioux City, Iowa; H. M. Clair, Jr.

DROUGHT again prevails in California, and some work is stopped in consequence.

NEW YORK.—H. Nungesser & Co. shipped by one European steamer recently 2000 bags of red clover seed.

WITH the end of the current year the firm of Vanderhorst & Dames, bulb growers, of Lisse, Holland, will be dissolved, each partner continuing for himself.

JOHN A. SEVERNS, superintendent of the D. M. Ferry Seed Company, Detroit, Mich., died at his home December 22. He was forty years of age and had been connected with the D. M. Ferry Company for nineteen years. He was a son of Judge Severns, of the United States District Court at Grand Rapids, and leaves a widow.

Partnership Proved.

The civil action of S. Y. Haines, of Minneapolis, Minn., against Miss C. H. Lippincott has reached an amicable adjustment by which the entire business has been divided equally, and both parties continue business separately, Mr. Haines in the Boston Block and Miss Lippincott at the old stand, 319 Sixth street south. The parties have for some time been engaged in the seed business under the name of C. H. Lippincott, and the action was really to settle the status of the plaintiff in the partnership. The court found for plaintiff and further proceedings were discontinued by mutual agreement.

The Use of Chemical Fertilizers.

[*Abstract of remarks by Andrew H. Ward before the Boston Florists' and Gardeners' Club.*]

It has been stated for so long a time and so persistently that the only constituents that were needed to be applied to the soil to produce remunerative crops were potash, phosphoric acid and nitrogen; that the soil contained enough of the other constituents, and that no addition of them to the soil was needed; also that nitrogen was the most expensive ingredient in fertilizers, that it has come without thought to be generally believed.

Now, for those financially interested in potash salts and those fertilizer manufacturers who use them, to admit that soda can replace potash as a plant food would be suicidal in a business point of view, as it would make a revolution in the manufacture of fertilizers, as no one would use potash salts at a very much higher price than that at which he could get soda salts, and the price not controlled by any syndicate. Again, if it were admitted that soda is as good as potash for a plant food, then the soda in nitrate of soda would have a value. Reckon the soda in nitrate of soda at 5 cents a pound and its value is 7½ cents a pound as compared with the potash in sulphate of potash at 5 cents a pound, which is the value put upon it by many of the experiment stations. It stands thus:—

100 lbs. of nitrate of soda at 2½c lb. is $2.12.

It contains:

16 lbs. nitrogen at 2c lb. is .32
36 " soda " 5c " $1.80 $2.12

which shows that nitrogen in this form and valuation, instead of being the highest cost ingredient in fertilizers, is the lowest. It has been suggested by some that the cheapest way for the farmer to obtain nitrogen was to steal it from the atmosphere by raising clover or other leguminous crops; but it is evident to the practical grower that counting the cost of seeds, ploughing and other labor, it is cheaper and better to obtain it by the use of nitrate of soda, without stealing. He not only gets the nitrogen, but soda in its best form, which replaces potash in plants.

Soda, in the form of a carbonate, can be purchased in 100 pound lots in the open market at less than 2 cents a pound, and is equivalent in alkaline action to 150 pounds of muriate or sulphate of potash at 4½ and 5 cents per pound respectively, or 6.75 and 7½ cents in comparison with carbonate of soda, which costs for actual soda 2 cents per pound, and in the form of a muriate ⅝ cents per pound. It is now claimed that for many crops a fertilizer should contain 10 per cent of potash or 200 pounds in a ton of fertilizer. Usually a muriate is used at 4½c a pound, which is $9; muriate of soda, which is just as good, at ⅝c a pound, is but $1.25, a difference of $7.75 in cost per ton, when soda instead of potash is used. This is no small item in the cost of one ingredient in a ton of fertilizer, for which the grower pays so much and gets so little for it. With the reduction in the cost of nitrogen, the use of soda in place of potash will reduce the cost of fertilizers one-half, and enable the farmer to make a larger use of them by the reduced cost and thus produce abundant and more remunerative crops, rendering his land more speedily productive, or improving quickly the condition of land already much exhausted.

Nitrogen at two cents a pound will remove the day of pressure of population upon food supply and make the cost of food for plants so low that the advantage of virgin soils would be of comparatively small importance, and the ability of distant and new lands to take the market away from old soils, so far as fertility is concerned, anything but a menace. The advantage in competition, instead of being sharply theirs, would be sharply against them.

Prof. M. Maerker, Ph. D., director of the Experiment Station at Halle, Germany, says: "Furthermore, according to recent investigations by Hellriegel and Willfurth, we must assume that a certain replacement of potash by soda may take place in plants. This may be of extensive practical interest, since the crude Stassfurt potash salts containing soda would be more economical to use than the pure potash salts." Professor Norton, in his Elements Scientific Agriculture, page 17, in reference to potash and soda, says: "In fact, the two are very much alike in many of their properties, and also in the purposes which they seem to serve in plants."

Professor Wagner says in regard to the effect of soda, "There is a direct effect of it, and this direct effect of soda, that is to say, of soda entered into the plant, has proved during my investigations of such importance that further researches in that direction are of very great moment." In his opinion, "the decided preference expressed by Schultz Lupitz for kainit, as a potash, (kali) salt, is like the better yield produced by the use of nitrate of soda, as against sulphate of ammonia, attributable to the effect of the soda, which kainit as well as nitrate of soda contains, and which heretofore has not been properly valued."

The tenth volume of the Experiment Station Record, No. 1, page 34, refers to experiments on the assimilation of nitric acid as well as the action of different nitrates, by W. Schneidewind. It says: "The relative proportions of potash and soda vary to a considerable extent with the relative amounts applied to the soil.

Thus in the experiment with sodium nitrate the crop took up 4.32 grn. of potash and 9.17 grn. of sodium.

In the experiment with potassium nitrate, the crop contained 9.08 grn. of potash and 5.39 grn. of soda.

This demonstrates that the fixed alkalies, soda and potash, replace each other in plants.

Bulletin No. 22, United States Department of Agriculture reports agricultural investigations at Rothamsted, England, during a period of fifty years, in six lectures delivered under the provisions of the Lawes Agricultural Trust, by Sir John Henry Gilbert, M. A. H. D. E. R. S., etc., under the auspices of the Association of American Agricultural Colleges and Experimental Stations in November, 1898. On page 159 is given the result of wheat on plots 12 and 13 as follows:—

"On plot 12, in addition to the ammonium salts and superphosphates, sulphate of soda was applied, but the plot had received potash prior to 1852. The first twenty years after 1852 produced an average yield of 37⅞ bushels per acre, the second twenty of 27½ bushels, and the whole forty years of 30¾ bushels.

To plot 13, besides ammonium salts and superphosphates, sulphate of potash was applied each hear of the forty, and it had also received potash previously. The average annual produce was, over the first twenty of the forty years 33⅞ bushels, over the second twenty 29⅝, and over the forty years 31¾." On page 163 is stated: "Referring to the columns relating to soda, it is seen that considerably smaller amounts were found in the produce of wheat than of barley; but as in the case of barley, the quantities of soda per acre in the total crop were greater where there was a marked deficiency of potash, than where soda was actually supplied, while the smallest amounts were where the supply of potash was the greatest.

Probably the greater amount of soda taken up by the barley than by the wheat is connected with the less root range, and much shorter period of collection in the case of the spring sown crop. In both crops by far the greater proportion of soda is found in the straw, but there is more in the grain of the barley than in that of wheat, due doubtless to the palese or chaff being adherent and included with the grain in the case of the barley, but not in that of the wheat." It will be noted that the average yield of wheat for forty years was one bushel per acre more where the sulphate of potash than where the sulphate of soda was used. If this falling off in the yield which occurred in the last twenty years was for the lack of alkali, it is easily accounted for, as but 100 pounds of sulphate of soda was used annually on plot 12, while on plot 13, 200 pounds of sulphate of potash was used annually.

The different forms of fertilizers supplying nitrogen have a relative crop producing capacity, as follows: nitrate soda 100, nitrate potash 100, sulphate ammonium 90, castor pomace 74, cotton seed meal 72, dried blood 68, dried fish 66, tankage 59, stable manure 45, ground heather 23.

The Connecticut station report for 1895, says: "The average cost of nitrogenous superphosphate in Connecticut in 1894 was $32.96, average valuation 23.30, per cent difference 41.3 per cent; 1895, was $32.32, average valuation 23.37 per cent, difference 38.2.

These valuations, it must be remembered, are based on the assumption that the nitrogen, phosphoric acid and potash in each fertilizer are readily available to farm crops. Chemical examinations can show pretty conclusively whether this is true in regard to potash. There is less certainty regarding phosphoric acid, while chemical examination, as it is usually made, gives little or no clue as to the availability of the organic nitrogen in mixed goods."

Sir John B. Lawes says: "Although potash, phosphoric acid and nitrogen are the chief manure ingredients in barnyard dung, the manure ingredients in artificial foods and in artificial manures, still the difference in form in which these substances are met with, greatly affects their value. The present methods of analyzing manures does not properly recognize these distinctions, and the valuations founded upon these analyses are altogether false and erroneous."

With the admission of the unreliability of the analysis, together with the "assumed valuation" of fertilizers on which farmers are expected to pin their faith and pay their money, it is pertinent to inquire how long this state of affairs will continue to exist and when something reliable will be obtained.

How long will it be before the experiment stations will of themselves reform and give facts instead of assumptions? What measures should be taken to expedite it?

Since manures are the nourishing material of plants, and other things being equal, the highest profits of the fields depends only and alone on the greater easily extracted quantity of the same found in the soil; therefore, the more accurate knowledge of this substance, the preparation, proportional use, and how it may be procured in sufficient quantity, and with the least cost, is of the greatest importance to the farmer.

The power of fertility which exists in the silicates of soil is unlimited. An improved agriculture must depend upon the skill with which this power is brought into action.

This can be done only by the conjunction of salts, organic matter and plants. No manure, no salt, no combination of salts, gives full vigor to vegetation while nitrogen is absent.

Nitrogen not only measures but gives the value to manures.

Without controversy the saving, preparing and application of manures is one of the most important subjects that the farmer can consider. His success, commercially, depends in a large measure upon his practice or method of feeding his crops as regards to quantity, quality, and manner of applying his manures.

AUCTION SALES!

The Nursery Trade.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

GOVERNOR W. E. GATES, of Kansas, is the head of the Wichita Nursery Association.

IT is stated that southern peach orchards will be largely increased again this year.

G. G. Gleason, superintendent of Irving Rouse's nursery, is on his fifth trip to Europe.

THE Chase Nursery Co., Riverside, Cal., has been incorporated by E. A., H. B., M. A., Augusta and Mary Chase; capital $50,000.

SAN JOSE scale is said to infect 134 separate premises in Georgia. W. N. Scott, state entomologist, recommends the kerosene treatment.

THE pineapple crop of Florida is very large and profitable, the runners, of which each plant produces five or six, selling for almost as much as does the fruit.

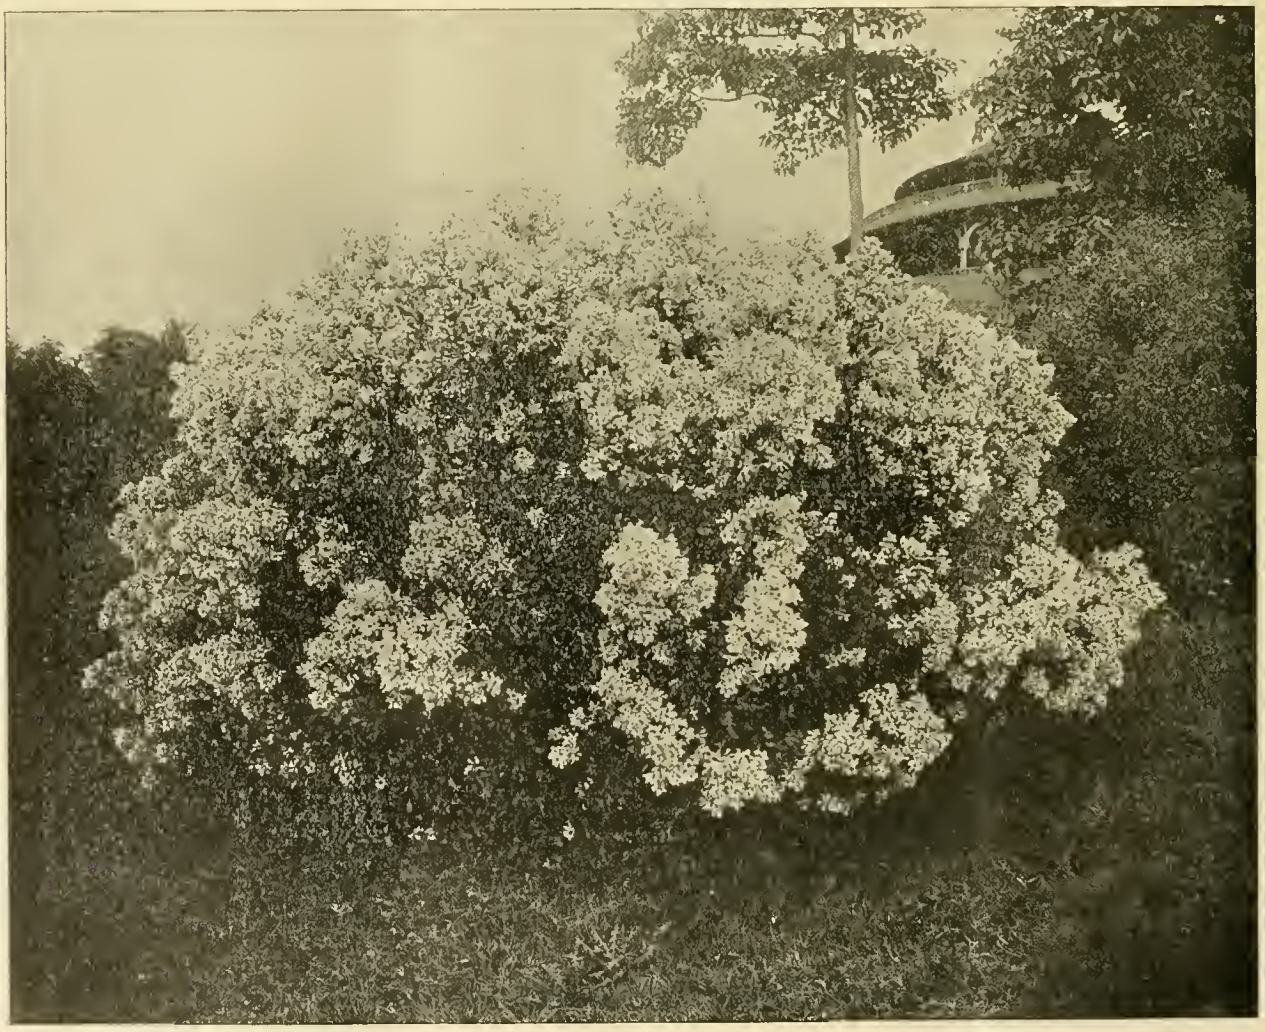
THE Buffalo Forestry Commission has been incorporated. It is an organization of leading men whose object is to secure better care and greater uniformity of shade trees of the city.

ABRAHAM F. MARTIN, of Delphi, Ind., well known in the earlier horticultural world, died November 16, aged 88 years.

JOHN R. PARRY, Parry, N. J., who has disposed of his nursery interests, will spend the winter upon his pineapple plantation at Orlando, Fla.

PECAN growing is rapidly becoming an industry of importance in the southern states. The trees bear at seven years of age and are in full crop at ten. The yield is large and the nuts always command a good price.

Baccharis Halimifolia.



This plant stands alone in being the only northern species of a genus which is scattered over many parts of the world. It is very nearly the only representative we have, two other species only being known, one, B. angustifolia, being found in the far south, the other; B. glomeratiflora, from Virginia to Louisiana, along the coast.

Some writers have said of B. halimifolia that it has no beauty. The illustration I think belies that. It is a beautiful shrub, and especially is this true of the one which bears the fertile flowers. The shrub is diœcious, and it is not given to know which is to be the fertile plant. Flowering has to be before one can be selected. But while one is much more ornamental than the other, both are worthy of cultivation.

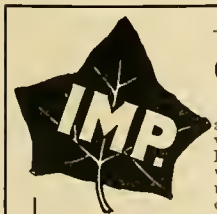
This shrub is known as the groundsel tree, because its leaves have some resemblance to the well known groundsel of the old world, Senecio vulgaris. In its native wilds it is found near the sea coast, but it does not mind removal to other localities inland at all, flourishing in any good soil. The flowers are white, and those of the fertile plant are borne in large, loose terminal panicles, with long slender pappus, looking like cotton. It is this large mass of what looks like cotton at a distance that gives the shrub its chief value for ornament. The display of "cotton" occurs towards the close of summer, just when nearly all shrubs are out of flower, and this alone should give it a place in all collections of shrubs.

There is an opinion prevailing that it is difficult to find summer flowering shrubs, but I think a good gardener could get together a collection in which would be several to bloom in every week in the season, one after the other. This, the groundsel tree, would have to be in it for late summer. Why so many shrubs are termed trees I do not know. There are groundsel tree, mist tree, strawberry tree and many more tree shrubs called trees in the botanies and catalogues. This particular "tree" is a shrub of from six to twelve feet high, but it is often in beautiful flowering condition when but two or three feet in height.

Unlike some other uncommon things in collections, this plant is not hard to get. It is easily obtained in its wild state, and

BACCHARIS HALIMIFOLIA IN HIGHLAND PARK, ROCHESTER, N. Y.

in many nurseries it can be had in quantities. When in flower is the time to make selection of those with fertile flowers. One of the merits of this shrub is that it holds its foliage green until quite hard freezing occurs. I have seen it as green as could be in late November, when almost every tree and shrub in sight was destitute of foliage.



JOSEPH MEEHAN.

Western Association of Wholesale Nurserymen.

The Western Association of Wholesale Nurserymen was in session at Kansas City, Mo., December 14 and 15 and, after reporting a very busy year, with not too much stock, high prices and ready collections, re-elected officers and adjourned to July 11, 1899. The officers elected are: A. L. Brooke, North Topeka, Kan., president; R. H. Blair, Kansas City, vice president; M. V. B. Pearsall, Yates Center, Kans., secretary and treasurer. The executive committee is composed of A. Willis, Ottawa, Kans.; Peter Youngers, Jr., Geneva, Neb.; E. S. Welch, Shenandoah, Ia., and J. L. Bagby, New Haven, Mo.

This association comprises seven-eighths of the stock planted west of the Missouri river. Its members are:

J. Wragg & Son, Waukee, Ia.; Blair & Kaufman, Kansas City; R. H. Blair & Co., Kansas City; Brewer & Stannard, Ottawa, Kans.; A. L. Brooke, North Topeka, Kans.; Bush & Son & Meissner, Bushberg, Mo.; Wm. Cutter & Son, Junction City, Kans.; A. H. Griesa, Lawrence, Kans.; A. C. Griesa & Bro., Lawrence, Kans.; W. H. Heikes, Huntsville, Ala.; Holman & Bente, Leavenworth, Kans.; Jewell Nursery Company, Lake City, Minn.; D S. Lake, Shenandoah, Ia.; New Haven Nurseries, New Haven, Mo.; Peters & Skinner, Topeka, Kans.; Schutte & Cyarnowski, St. Louis; Stark Bros., Louisiana, Mo.; L. R. Taylor & Sons, Topeka, Kans.; Sedgwick Nursery Company, Sedgwick, Kans.; E. S. Welch, Shenandoah, Ia.; Williams & Bernardin, Parsons, Kans.; A. Willis, Ottawa, Kans.; Youngers & Co., Geneva, Neb.

Crustaceans Banquet Mollusks.

The victorious Flatbush Clams were banqueted by the Lobsters in fine style on Wednesday evening, December 14. Representatives of the horticultural press were present as invited guests and these experienced gentlemen unanimously pronounced the affair a howling success, with but one drawback—the absence, on account of sickness in his family, of popular Dave Mellis, the captain of the defeated, but gamey Lobsters.

Papa Zeller presided at the banquet table and managed to get a speech, song or argument out of each guest. Mr. Prosser spoke for the Lobsters, in the absence of their chief, and challenged their opponents to a contest for another supper. Eugene Dailledouze accepted the defiance on behalf of the Clams and gave his views as to why his side had won, and was followed by Tom Brennan, who tried to explain why his side had lost, and incidentally, why he had parted with his moustache since the last encounter. Louis Schmutz rendered a song in two languages and four octaves, and his example encouraged Messrs. Butterfield, Brennan and Stewart to give examples of their vocal abilities.

It was announced that Mr. Leonhart would present a valuable pin as a trophy to be bowled for. A contest with the Hoboken aggregation is in prospect and a challenge to the New York club will soon be forthcoming. Flatbush is very much alive.

Boston.

MARKET CONDITIONS PREVIOUS TO CHRISTMAS.—CARNATIONS SCARCE.—BEAUTIES AND METEORS HIGH.—TWO KINDS OF HOLLY.—MUCH LAUREL USED.—A VISIT TO WHITINSVILLE.—WONDERFUL CALANTHE DISPLAY.

By the time this paper reaches its readers, Christmas will be a thing of the past. Its record will have been finished and each individual will know just how much good or bad fortune it has brought him. As to how it will turn out no one can possibly predict with certainty, although the great event is but a few days away. So much depends upon the weather then and until then that any forecast would be largely conjecture which, if correct, would be too late to be of any service and, if incorrect, would bring no credit to the prophet, so will refrain from making any predictions.

At present writing carnations, at least, are very scarce in this market and anyone bringing them in at any time for several days past could get a big price and spot cash at that. Violets went up to nearly double values several days ago, also, but the general impression seems to be that there are a good many flowers on the plants and a half defined protest is discernible, which would make trouble if any considerable number of blooms should be picked this week. Roses are selling but indifferently and prices are not far in advance of those prevailing last week, but dealers are quoting stiff figures for later delivery, especially on extra grades. American Beauty and Meteor roses are the exceptions to present general conditions. They are fairly soaring, and it being evident that the supply of both these prime holiday favorites is very limited, the advance to double and triple prices comes easily.

Boston florists are not making any extraordinary preparations for plant trade, although a study of the developments and tendencies of the past few seasons would suggest that they might do so with safety and profit. The only plants of special note seen in the windows are Gloire de Lorraine begonias, which easily outclass anything in the flowering plant line that this market has ever seen at Christmas. Beyond this there is only to be found the usual assortment of Chinese primroses, cyclamens, Jerusalem cherries, etc., in quality fair to medium only.

All are busily engaged in making up holly and laurel, for which the demand seems insatiable. There is holly and holly. Most of the regular stock put up by trustworthy parties on order for reputable jobbers is excellent in every respect, well worth the price quoted and will be well and satisfactorily sold. But we are suffering from an avalanche of rubbishy material most of which is consigned to produce dealers at the public markets to be sold at half regular quotations or less. Occasionally a search may bring to light some good stock in these shipments but the great bulk of it is dear at any price, being aged, dropping, lacking berries and thrown so loosely into the crates that they contain scarcely half the quantity found in the cases of the regular trade. The extreme scarcity of "Princess pine" has quickened the demand for laurel festooning and wreaths which is more decorative anyway than the old-fashioned green and is being used almost exclusively and in unprecedented quantity for draping exteriors and interiors of stores of all descriptions.

On Tuesday a delegation from the Massachusetts Horticultural and the Worcester Horticultural societies visited the Whitin greenhouses at Whitinsville on invitation to see the wonderful display of calanthes there in bloom. Mention was made of these plants on the occasion of a former visit and they now fully carry out the promise made at that time. It can be safely said that the equal of the present display has never been seen in America. The plants are in pans each bearing from four to ten enormous spikes and there are enough of them, with the adiantums, etc., used as a setting, to fill the entire center of a large house. Mr. McWilliam grows them in a low "pit" house where they get no fire heat but plenty of nourishment and only removes them to the big show house after they are fully in bloom. The other attractions here are many, for Mr. McWilliam is a wizard in his profession. There are cypripediums—many of them seedlings—Dendrobium formosum giganteum, anthuriums, dipladenias, daphnes, and Gloire de Lorraine begonias and the stove plants are also very imposing, but the calanthes outdo everything else just now in glory and too much cannot be said in praise of this grand Christmas display. The visitors, about forty in number, were entertained most hospitably by Mr. and Mrs. Whitin and their daughters at their residence.

The new range of greenhouses at the Harvard Botanic Garden are now completed and local papers have been giving due attention to the event. The Boston *Globe* publishes a picture purporting to be a likeness of the genial superintendent Robert Cameron which looks as much like Naval Constructor Amatory Hobson as it does like our sedate friend Cameron.

The greenhouses of W. H. Spooner, on Center street, Jamaica Plain, have been leased by Jerry F. Shea, who has been Mr. Spooner's foreman for many years.

A. W. and H. Belcher, of Winthrop, have opened a branch store at 1317 Washington street.

Visiting Boston: Carl Jurgens, Newport, R. I.

Cypripedium Insigne Laura Kimball.

One of the most valuable yellow forms of Cypripedium insigne is now in flower in Mr. Oakes Ames' collection at North Easton, Mass. It is part of a plant now in the late Mr. Kimball's collection at Rochester, N. Y., which Mr. George Savage flowered several years ago from a collection of imported plants. It is extremely valuable and as far as we know these are the only two specimens in the country. The blossoms are clear golden yellow, devoid of all spotting. The venation in the dorsal sepal becomes very prominent as the flower attains age. The plant has four strong growths and a beautiful well formed flower, and is named C. insigne Laura Kimball, in honor of Mrs. Kimball, the present owner of the collection at Rochester, N. Y.

Heating Notes.

"Why is it that our boiler will not heat as it did the first season it was put in? We use the same coal, fire in the same manner and the house is just as tight as ever it was, and yet we cannot get heat enough, fire as we will." Such a question I have put to me each winter and the usual reply is: "If you will keep the flues as clean as they were in the new boiler, you will get just as much heat."

Whenever I am called upon to report on a defective heating apparatus, one of my first actions is to look in the flues of the boiler, and it is surprising in how large a proportion of the complaints I find the cause to be dirty flues. I have in mind a case where the firemen, on having his attention called to about one and a half inches accumulation of soot in the flues, explained his reason for such condition thus: "Sure, I don't brush that off 'cause it's a non-conductor, and helps keep the heat in the water."

The flues of a boiler are similar to our own digestive organs, inasmuch as, if they are kept free and clean, all is well, but if choked and clogged, trouble ensues. The brushing out of the flues daily is a small operation, but saves many times its cost in fuel. HENRY W. GIBBONS.

THE BEFORE CHRISTMAS TRADE NOT UP TO FORMER YEARS.—CARNATIONS PRECEDE ROSES IN DEMAND.—WINDOW DECORATIONS.—THE GREENS MARKET.

A slight improvement has been felt in the cut flower market the past week, although the amount of business done falls short of corresponding weeks of former years. Chrysanthemums are practically all gone. Carnations promise to be in best demand for Christmas, with roses second in favor. At present roses are comparatively abundant, but most likely a shortage will be felt when a heavy cut is most needed. Some good stock of Lilium Harrisii is coming in and a good supply will probably be in for Christmas.

Poinsettias, with their ever-pleasing scarlet color, are seen in the Sunderbruch's Sons' show windows with some well grown azaleas in full bloom. J. A. Peterson's window decoration consists of choice orchids, which always attract special attention. Critchells' Sons are making a great display of salable decorative plants for the holidays. The Hoffmeister Floral Co. is very busy and their window decoration of blooming as well as decorative plants intermixed with choice cut flowers deserves special mention.

Lycopodium has moved from $5 per crate to $10 and is scarce at that. Holly can be seen everywhere, but as a rule is not of very fine quality and none too well berried. J. Wilder & Co. received a shipment of 120 crates on Friday and all were disposed of the following day.

H. SCHWARZ.

HARTFORD, CONN.—Robert Veitch, of New Haven, and A. N. Pierson, of Cromwell, have been elected vice-presidents of the Connecticut Horticultural Society.

LA FAYETTE, IND.—Fred. Dorner & Sons received both first and second premiums on cut flowers at the annual exhibition of the Indiana Horticultural Society at Indianapolis.

PORTLAND, ME.—The store of Albert Dirwanger, on Exchange street, was damaged by smoke and water during a fire in the building in which it is located, on the night of December 11.

NORTH TARRYTOWN, N. Y.—J. M. Cooke and Wm. F. McCord, who have been in the employ of the F. R. Pierson Co. for a number of years, have opened a flower store on upper Main street.

SOUTH HADLEY FALLS, MASS.—The greenhouse and adjoining buildings belonging to Jos. J. Beach were damaged by fire on December 11 to the extent of $1,000. Cause, overheated boiler. Insurance, $800

MINNEAPOLIS, MINN.—The florists of the Twin Cities, at a meeting at the Ryan hotel, appointed a committee to secure a law during the next session of the legislature prohibiting state institutions from selling flowers in competition with the regular dealers. The committee consists of A. S. Swanson, L. L. May, C. A. Smith, St. Paul; R. J. Mendenhall, Minneapolis.

Seed, $1.00 per pkg, $5 00 per ounce.

E. B. JENNINGS, L. B. 254, **Southport, Conn.**
Grower of the Finest Pansies.

Helpful Reminders.

Seed of cyclamen, dracæna, lobelia, verbena, centaurea, Cineraria maritima, Pyrethrum aureum and Marguerite carnation should be sown now in flats with soil porous so as not to form a crust on top but deep and heavy enough not to dry too rapidly when seed begins to swell.

About January 1, dormant roses, pot-grown should be cleaned, put into pots with fresh soil and started in a cool temperature. As soon as new rootlets are formed, move them into the heat and moisture recommended for such roses as Bridesmaid; the Rambler roses are particularly desirable for Easter decoration.

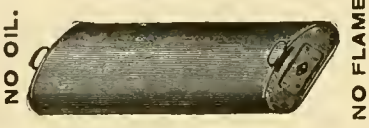
Longiflorum lilies will thrive in an even temperature of 60° after January 20 and should not be allowed to wilt for fear of green fly. If your benches are not covered with soil spread moss between the pots to prevent rapid drying.

Hydrangeas intended for Easter should be put in the warm now and watering increased as foliage develops. Be sure the drainage is good and keep the water pot busy.

Those who have not provided satisfactory sub-irrigation for their benches cannot be too careful in watering, as the roots are now very apt to dry from below. Adiantums are most apt to suffer in this way, as the new frond development depends largely on the new roots and the old fronds do not show that the harm is being done.

Bougainvilleas are showing color now and should be kept warm. Unless Amaryllis belladonna is making good foliage now you will not have good bloom next fall. All fancy caladiums, tuberous begonias, and gloxinias are now dried out and are best packed in boxes of dry sand, labeled and put on the shelf. C. B. W.

TOLEDO, O.—The palm swindler has, apparently, turned his attention to smaller, although similar, operations among flower sellers but was thwarted and narrowly escaped arrest when he attempted to defraud Geo. A. Heinl.



HAVERHILL, MASS.—Chas. Kaulback's greenhouses would have been entered by burglars December 3 had it not been for the bravery of an employe named Frank Sargent who drove the robbers away with a hammer, seriously wounding one of them.

AUBURNDALE, MASS.—F. W. Fletcher has formed a partnership with Nelson Freeman under the name of Freeman & Fletcher. The new firm will build four houses in addition to the original range of Mr. Fletcher's and will grow violets and miscellaneous stock.

ALEXANDRIA, VA.—A very pleasant birthday party was given Friday evening, December 16, in honor of W. Arnold, rose grower for J. Louis Loose. There were many guests and Arthur Hebel made a very good speech in presenting Mr. Arnold with a handsome chair given by his fellow employes.

BROCKTON, MASS.—The annual meeting of the Florists' Club was held on the evening of December 6 and the following officers were elected: President, F. B. French; vice-president, John McFarland; secretary, W. E. Baker; treasurer, C. A. Leach; executive committee, J. McFarland, H. E. Barrows, A. D. Copeland and John Kindregan. A committee was appointed to make arrangements for a course of entertainments for the winter.

THIS IS IT.

St. Paul.

PROSPEROUS TIMES AT THE TWIN CITIES.—GOOD FLOWERS IN EXCELLENT DEMAND.—VIOLETS TO SHIP TO CHICAGO.—A NEW STORE.—JOTTINGS.

Trade has been very good both in cut flowers and greens. The weather has been bright and favorable and stock has been plentiful and of good quality. There will be a good crop for the holidays but the big demand may keep prices high.

Buyers are asking for Beauties and are willing to pay $12 to $15 per dozen at retail for choice stock. Meteors are also in good demand and sell readily at retail at $3 per dozen. Carnations are in fine favor and choice stock finds ready customers at $1 per dozen. There is a scarcity of Harrisii. Violets are plentiful at $1.50 per hundred. Christian Hansen has a fine crop of them, picking about 8000 from one house this week. Part of these are being shipped to Chicago. Flowering plants are not very plentiful. Bouquet green is very scarce and the loose article impossible to obtain. Wreathing is quoted at $6 per 100 yards, higher than in ten years. Holly is somewhat scarce. Some choice mistletoe has found its way into this market from Texas and Indian Territory.

The last meeting of the Florists' Society was well attended and considerable interest manifested. Hereafter the society will meet on the second Saturday evening in each month.

Flower stores are becoming quite numerous in this city, the latest being opened by John A. May at 18 West Sixth street. His store is fitted up in an attractive manner and is centrally located.

L. L. May & Co. recently shipped to North Dakota an order for designs and several thousand cut blooms amounting to upwards of $500. FELIX.

Nashville, Tenn.

The outlook promises a large trade for the holidays with an abundant supply of stock of every kind. Prices will be moderate.

There will be several moves made by florists with the new year. Joy & Son will remove a few doors east of their present location on Church street. Geny Brothers, two very clever young men who have long grown flowers, have opened an up-town store in the Lulane hotel, near neighbors to Currey & Co.

Mrs. E. Kramer does a very flourishing business on North Cherry street, and commands a large part of the German trade.

Geny Brothers have produced a very pretty seedling carnation, not unlike Wm. Scott, as yet un-named.

The local holly is well berried and of most excellent quality and the mistletoe is fine this year. M. C. DORRIS.

Springfield, Mass.

At the annual meeting of the Hampden County Horticultural Society the following officers were elected: R. Hale Smith, president; Clark W. Bryan, first vice-president; Joel H. Hendrick, second vice-president; Jacob C. Lutz, third vice-president; H. Curtis Rowley, treasurer; William F. Gale, secretary.

The society will hold three exhibitions during 1899, a rose show in June for members only, a sweet pea show in July which is to eclipse all previous successes, and a fall show.

Clear Cypress Greenhouse Material.

This *with us* means the best growth of Cypress Lumber and the best grade of that growth; and from this grade all the sap—bright sap, which only experts can detect—as well as stained sap, knots and other defects cut out. Others do not equal our quality if they do beat our prices. It is not hard to see the reason: You can not buy gold dollars at fifty cents each. Experienced growers know that the best is not too good and cheapest in the long run.

Write for Circulars or Estimates.

THE CHRISTMAS TRADE.

The reports at hand of Christmas trade, representing thirty-three important points in seventeen states, with one Canadian city, are very encouraging and certainly afford the hard-times croaker no opportunity for patting himself on the back or "I-told-you-so" reiteration. From these a careful estimate places the increase of business at, approximately, twenty per cent over that of last year. Decreased business is reported in only two instances.

Retail prices in general were about the same as last year, though occasionally higher, especially for flowering plants, carnations and roses. The supply of flowers, etc., with a large majority, was equal to the demand. There was a small shortage of roses and violets, but with the large increase of space and attention recently given the carnation it is quite surprising to find that the supply of this flower ran short in many sections. Two Massachusetts reports, one Missouri and one Canadian indicate a short supply of flowers in general. Quality generally better, with some complaint about shipped stock; roses and carnations in a few cases reported not so good as last year. An increased demand is noted for carnations, violets, roses and poinsettias in the order named; where mentioned at all, bulbous stock appears to be on the down grade.

Most of the reports indicate an increased demand for plants, with preferences slightly in favor of flowering sorts as against those with ornamental foliage, though palms and ferns appear to be in brisk demand, especially the former. In flowering plants the azalea is easily leader, followed in the order named by cyclamens, hyacinths, primulas and narcissi. Several of our correspondents make mention of a largely increased demand for holly, greens and Christmas trees.

Details of a number of the reports follow herewith:

PORTLAND, ME.—Christmas trade was heavy but stock in many lines was short, particularly American Beauties, violets and white carnations. Some beautiful azaleas sold quickly. C.

ATCHISON, KANS.—Business was good, about the same as last year; enough stock and twenty-five per cent better in quality than last year; increased call for carnations but not for plants. R. J. G.

HAVERHILL, MASS.—This Christmas was ten per cent better than last. Flowers were fine and were equal to the call. Violets and red carnations were the favorites. Greens sold well. G. H. H.

NEW BEDFORD, MASS.—Trade was one-third less than last year and even at that there was not stock enough to supply the demand. Increased call for violets and flowering plants. Big call for greens. E. S. H.

NEW LONDON, CONN.—Business was about equal to last year's holiday season. Carnations were scarce and advanced slightly in price. The call for palms and flowering plants was rather ahead of last year. J. S.

ROCHESTER, N. Y.—Christmas showed an increase over last year; everything sold out clean. Although the supply of flowering plants was greater than ever before it was not nearly equal to the demand and prices were higher. J. B. K.

ALBUQUERQUE, N. M.—Business was twenty-five per cent better than a year ago. There were not quite enough flowers but they were of good quality. Roses and carnations lead. No call for plants. B. H. I.

PADUCAH, KY.—This Christmas was fifty per cent ahead of last; roses and carnations were in short supply, so that prices were higher. Flowers were very good. Special call was for palms, ferneries and blooming plants. C. L. B.

IOWA CITY, IA.—There was twenty-five per cent increase in holiday trade and prices were higher although the supply was up to the demand, many flowers being shipped in, most of them being poor. Carnations were favorites. J. A.

BUFFALO, N. Y.—Trade was thirty per cent better than last year; prices about the same; good stock and plenty of it except carnations. There was an increased demand for carnations, violets and decorative plants. W. A.

ST. PAUL, MINN.—The total sales were twenty-five per cent greater than last year and prices were somewhat higher. The supply of stock seemed adequate and the qualities were much better than usual. There was an increased call for palms and ferns. Buyers were not bargain hunters and were willing to pay stiff prices for good flowers. D.

SPRINGFIELD, MASS.—Trade this Christmas and last showed little difference. There was an inadequate supply of stock but there was a considerable improvement in quality. There was a decreased demand for pot plants of all kinds. G. M.

SYRACUSE, N. Y.—Trade was equal to last year; roses and carnations were higher; home grown stock was better, so were shipped in roses but shipped carnations were poor. No call for bulbous stock and good chrysanthemums did not sell. B.

CINCINNATI, OHIO.—Retail sales were twenty-five per cent greater than last year with supply equal to demand except of carnations. There was an increased sale for poinsettias but otherwise the plant sales were about the same as heretofore. Azaleas were scarce. H. S.

NORTHAMPTON, MASS.—There was five per cent increase in Christmas sales. Carnations and violets were short. Every plant in bloom was sold. There was a rush on the last day as nothing stirred during the first five days of the week. G. W. T.

OTTAWA, ONT.—Christmas trade was double last year with an inadequate supply of stock; prices ruled equal to previous holidays. Increased demand for carnations, roses, violets and chrysanthemums. Azaleas, palms and ferns sold better than ever before. G.

DAYTON, O.—The volume of Christmas trade was one-fourth greater than last year and prices were correspondingly higher. Supply was equal to demand. There was less call for hyacinths but a wonderful increase in the sales of palms, ferns and azaleas. J. B. H.

PITTSBURG, PA.—Trade was fifteen per cent better than last year and flowers were generally of much better quality. Prices were about the same as last season and the supply was equal to the demand. Decorative plants and ferneries sold better than ever before. R.

NASHVILLE, TENN.—There were fair flowers enough to supply Christmas business exceeding by fifty per cent the volume of last year's holiday trade. Plants sold at better prices than ever before and there were plenty of many kinds. M. C. D.

WATERTOWN, N. Y.—This year's holiday showed twenty-five per cent increase in business. We were short on carnations but there were plenty of roses and violets at the prices asked for them. Good late chrysanthemums were what the people wanted. Cheap plants sold well. W. R. S.

TOLEDO, O.—Business for the holidays was double that of last year and there was not more than half enough stock. Qualities were far better than last Christmas. Violets and carnations were in extra demand. Azaleas and large palms sold finely and everybody paid cash. E. S.

COLUMBUS, O.—There was an increase of forty per cent in Christmas business. Roses were twenty per cent higher than last year and carnations twenty-five per cent. Stock was good and about equal to demands. Carnations were the leaders. More call for high priced palms; last year $1 plants were asked for, this season $2.50 to $4 was the popular price. F. D.

PARKERSBURG, W. VA.—Cash sales exceeded last year by twenty per cent. The supply of stock equaled the demand and was of fair quality. There was a fine sale for Ficus elastica, araucarias and latanias. Trade on greens exceeded anything in fifteen years. Carnations sold splendidly. G. A. H.

WASHINGTON, D. C.—There were no dull days in December and Christmas was fifteen per cent ahead of last year. There was stock enough but prices were better and qualities good. Far more plants were sold than ever before, leading dealers having prepared immense stocks of azaleas and first-class cyclamen. A. G.

GEORGE M. GERAGHTY.

KOKOMO, IND.—There was an increase of fifteen per cent and prices were twenty-five per cent better. Supply equalled demand but was not greater. Roses were not so good, carnations much better. Much call for the latter. Increased sale for palms, Orders for American Beauties had to be declined. W. C.

SPRINGFIELD, MO.—The demand for stock and Christmas prices did not vary materially from last year. Roses and carnations were in short supply, the call for carnations being noticeably brisk, although sixty per cent of the customers asked for roses. There was a decreased demand for plants. W. A. C.

GRAND RAPIDS, MICH.—Business was ten per cent ahead of last year. Carnations were great sellers and advanced in price, particularly reds. Plenty of roses and violets; great demand for latter. Plant sales decreased twenty-five per cent. Holly sold well but dealers have wreathing left. J. A. C.

INDIANAPOLIS, IND.—Increase of ten or fifteen per cent in trade; prices not higher than last year; quality better; supply equal to demand; increased call for plants; poinsettias sold well. In cut flowers colors were generally preferred to white but in blooming plants, particularly azaleas, white sold better than pink. H. J.

ST. LOUIS, MO.—Holiday business was not up to last year although retail prices were the same and there were not enough flowers to supply the existing demand. About half the stock was good and the rest of it very poor. There was an increased call for American Beauty and fancy carnations and blooming plants sold out—then decorative stock went. Would-be purchasers rebelled at the prices of Beauty and violets. J. F. C.

CLEVELAND, O.—The volume of this Christmas business exceeded last year's with all local dealers, increases of from fifteen to fifty per cent being reported. Retail prices were at last year's level, there being a fair supply of all flowers except violets and carnations, for which there was an unusual demand. Flowering plants sold better than last year. A.

WORCESTER, MASS.—This year's holiday trade was fifteen per cent better than last and the supply of flowers more nearly met the demand than ever before: at the same time qualities were much better than usual. There was a big sale for white carnations and large quantities of plants, both decorative and flowering, were handled very satisfactorily. A. H. L.

LOUISVILLE, KY.—Christmas sales were ten or fifteen per cent ahead of last year, although retail prices were only slightly better. There was an ample supply of all stock, generally of good quality, American Beauty being noticeably better than last season. There was a marked increase in the call for violets. The general public seemed to have spending money this year. C. N.

INDIANAPOLIS, IND.—Trade exceeded last Christmas by one-third and better prices were obtained. Shipped stock was generally poor; home grown, fair; shortage of carnations, with big increase in demand. Increase in sale of all plants, palms, azaleas, cyclamen and Begonia incarnata leading. Think high prices charged were an error and turn away trade. H. W. R.

NASHUA, N. H.—Business was one-third greater than last year; much funeral work. Prices higher than a year ago. Increased call for carnations and a considerable shortage. Twenty-five per cent increase in call for flowering plants; not much improvement in sale for decorative stock. Greens sold better than usual. Not so much call for violets as last year. A. G.

A Colorado Wholesaler.

George M. Geraghty is the pushing, progressive head of the largest wholesale florist business between the Mississippi river and the Pacific, and the only one of importance west of Omaha, that of Daniels & Fisher, leading merchants of Denver, Colo. Mr. Geraghty is a Bostonian, having been born in the Massachusetts center of erudition in 1870. Most of his life has been spent at Springfield, Mass., but in 1890 he went to Denver and has been with Daniels & Fisher ever since. Up to July last he was superintendent of their immense establishment and at that time was given charge of their large floral department, which enjoys a splendid wholesale trade extending westward to Portland, Oregon, and southward to Texas. Mr. Geraghty is a confirmed bachelor.

QUINCY, ILL.—Henry Eing's most valued Christmas present was a twelve pound daughter.

OWATONNA, MINN.—Lord & Johnson will erect a range of 5000 feet of glass in the spring and conduct a general florist business. Mr. Johnson is at present gardener at one of the state institutions.

Effects of the Recent Storm at Cottage Gardens, Queens, N. Y.

The snow storm of a few weeks ago had some serious results at many greenhouse establishments in the east, and the effect on houses of varied structure at the Cottage Gardens, Queens, N. Y., as kindly noted by Mr. C. W. Ward, with illustrations prepared from photographs, will not be without interest to our readers:

"The storm began Saturday afternoon with a few fitful flakes, followed soon after by a rushing gale, the air filled with swirling clouds of snow. Throughout Saturday night up to Sunday at 3 p. m. the wind and snow raged ceaselessly, the gale blowing at fifty to sixty miles an hour without any modification. Sunday afternoon the snow ceased but the wind rushed on till well towards midnight.

"During the gale it was impossible for a novice to venture out. The wind whisked one here and there; the cutting, blinding snow filled one's mouth, nose, ears and eyes, obscuring everything, and one speedily lost his bearings. The exposed points of the greenhouses were severely shaken and lost a few lights of glass, but the mantle of snow effectually held most of the glass in place. Huge masses of ice formed on the boiler room eaves and on the glass eaves where angle iron plates or wood plates were omitted and proved very destructive to these glass eaves, breaking twenty-five lights in one house and twenty-three in another.

"The superiority of the angle-iron eave over all other forms was clearly demonstrated as those houses were free from snow on the south slope within an hour from the time the snow ceased falling, while all other houses were well covered with snow at 8:30 the next morning. The illustration, from a photo taken at 8:30 a. m. shows the condition of the glass-eaved houses. Fifteen minutes after this was taken most of the snow and ice had slid off from this roof leaving many serious holes and broken lights at the eaves. Considering the violence of the storm the damage was trifling, save the breakage on the glass-eaved houses. The short-span-to-south houses suffered very little and were all clear on Tuesday morning, the front slopes clearing rapidly Monday morning. The storm proved the superiority of the even-span house running east and west with angle-iron plates over all other forms in existence here as a self-cleaner in severe snow storms. Some idea of the drifts may be had from the illustration showing the snow drifted from the ground nearly to the top of the short-span-to-the-south houses, some twelve feet high.

"A few days after, another gale without snow picked out about 100 lights of glass and tore down the smoke stack, the latter mishap being due to an improperly secured guy cable. It was the worst storm we have had since we came to Queens."

Short-span-to-south houses showing clean fronts on rear houses.

EFFECTS OF THE RECENT STORM AT COTTAGE GARDENS, QUEENS, N. Y.

Three-quarter span house, with glass eaves, showing accumulation of ice at eaves the morning after the storm.

EFFECTS OF RECENT STORM AT COTTAGE GARDENS, QUEENS, N. Y.

CARNATIONS.

CHRISTMAS CARNATION PRICES.

The week before Christmas found carnations in short supply at almost every point except Chicago, yet it was in the western metropolis that top prices were obtained, particularly for the fancy varieties in which so much interest is manifest just now. The highest mark reached was 10 cents, which was obtained for Mrs. George M. Bradt by the Chicago Carnation Company, who obtained first prize for variegated blooms with this variety at the Chicago show. Mayor Pingree, Cerise Queen and Jubilee, strictly fancy, disbudded, brought 8 cents and the other grades of these sorts fetched 6 cents and 7 cents. Such varieties as Daybreak, Scott, Flora Hill, Maud Dean, Argyle, Helen Keller, Niveus and others, when done by the best growers, commanded from 4 cents to 6 cents, but there were plenty of flowers at from 3 cents down, some of the stock which had been held back being difficult to dispose of at any price.

CULTURAL NOTES.

December 31.—Now that the holidays are over we must make haste to get our houses back to their normal temperature. This must be done gradually, as a sudden drop would be productive of split calyxes. Let the temperature fall two degrees lower each night until you have it down to 55° or 50°.

The weather over the holidays with me was such as demonstrates the utter impossibility to give any set rules for carnation culture. With the dull, foggy and moderate weather we had day and night for the week before Christmas, it would be simply ruinous to have increased the temperature of any of my houses; in fact, we were compelled to keep the houses cooler rather than warmer. In all such instances the individual grower must use his own judgment and knowledge of plant life in order to secure the best results.

Nearly all the growers that I have visited this season will have the bulk of their crop of blooms between the dates of January 15 and March 15. This is likely to cause somewhat of an over supply unless it is counteracted by a shortage in other sections. It behooves us to make every effort to turn out the highest grade flowers that our plants will produce. If we do that, no matter how the market may be glutted with carnations, our stock will not only sell up clean but at reasonable prices.

Just how to get the best results is a matter which each one will have to decide for himself In some soils, liquid manure is the best and most effective method of giving the plants a little extra nourishment and in other soils better results can be attained by the judicious application of pure bone meal. In some soils wood ashes give better results than any thing else. The wood ashes are especially good at this season of the year as they seem to add to the vigor of the plants in such a manner that the cuttings are made healthier and better than when liquid manure or bone are used.

Care must be used in stimulation as some varieties will not stand much of such treatment. Scott and Daybreak are notable examples, as neither of these sorts will form perfect flowers if they are overfed. It is better to apply the food in small doses and often as in this case you can watch the effects of it and thus keep on the safe side.

Another very effective element in the production of first-class blooms is to grow them cool, as near 50° as possible. This will produce stiffer stems and

give more substance to the petals, but with some varities it will also produce bursted calyxes and for these latter you will have to increase the temperature in some cases as much as ten degrees. Disbudding must be attended to faithfully and if you are wise the plants will not be robbed of too much foliage for cuttings.

After producing the flowers see to it that they are sent to their destination in good shape. If all this is followed up closely you will be a long way ahead of the shiftless grower and will find a balance in your favor at the end of the season.

ALBERT M. HERR.

CHRYSANTHEMUMS.

AMERICAN VARIETIES IN ENGLAND.

Chrysanthemums of American origin have been so popular with growers in this country for some years past that it may not be out of place at this time to draw the attention of readers of the AMERICAN FLORIST to what appears to be a relaxation of the efforts of American raisers to compete with their French rivals.

A few years ago there was every indication of the contest being long and severe, and the names of the most eminent American growers were as familiar to us as our own. An audit of the best show chrysanthemums, taken at any time during the past ten years, would, I feel sure, contain a very fair proportion of these Transatlantic seedlings. But the last year or two seem to show signs of the American florists relaxing their eflorts, and curiously enough this year our colonial chrysanthemum growers in New Zealand and Australia have entered in strong force upon the scene and in their turn seem likely to enter into a contest with the French.

There is no doubt that both American and Australian growers are handicapped by the distance, and also by the fact that English raisers have been busy in this department of horticultural enterprise. It is a peculiar incident of chrysanthemum culture in this country that after the death of John Salter there was for many years but little attempt on the part of English nurserymen to produce new seedling chrysanthemums of any kind; they were content to rely almost solely upon imported varieties.

The first indication of forthcoming novelties is generally to be found at our floral meetings and at the trade displays and it is safe to affirm that during the present season American novelties have not been seen in anything like the customary number. On the showboards the good old standard varieties have, of course, maintained their reputation, but of novelties, in the strict sense of the word, there are scarcely any and the hunter after new sorts has had to choose between the French and the Australian productions.

CHRYSANTHEMUM QUEEN OF PLUMES.

It may not be generally known to the American reader that here in London a beneficent county council provides the public with a gratuitous display of the popular autumn flower in certain parks. These displays are quite separate and distinct from the shows organized by the many local chrysanthemum societies, and usually open about the middle of October and close about four or five weeks later, the plants being shown in pots and housed in a spare greenhouse, through which the visitors pass from morning till night in greater or lesser number as the circumstances permit, being the most largely patronized on Saturdays and Sundays.

At Finsbury park, right away in the north of London, I noticed Gorgeous, a large yellow incurving Japanese, in very good form; some fine blooms of the early but very tall Mrs. E. G. Hill, pale pink; G. W. Childs, the crimson and gold Japanese, is very attractive on account of its color and in such displays is often used with good effect; Eda Prass is another, and The Egyptian completes the list here.

Victoria park is in the northeast corner of the metropolis and here again G. W. Childs was visible, and also the bright pink William Tricker, which seems to be an especial favorite. Col. W. B. Smith, rich golden bronze, is another; A. H. Fewkes, yellow, and Mrs. E. G. Hill in considerable quantity.

Southwark park lies far away in the southeast corner in a crowded locality near the riverside. There is always an interesting display here and crowds of people throng the greenhouse, especially on Saturdays and Sundays. G. W. Childs is a favorite decorative variety at this place and so, too, is Mrs. E. G. Hill. There were also some blooms of Mutual Friend, the big white Japanese; Wm. Tricker, Gloriosum, Louis Boehmer, Inter-Ocean and Puritan.

Battersea park is in the southwest of the metropolis and the show there always attracts many visitors. The best of the American varieties I noticed there were A. H. Fewkes, Louis Boehmer, Wm. Tricker, Gloriosum, G. W. Childs, very good; Puritan, Eda Prass, W. H. Lincoln, Mrs. Alpheus Hardy, Col. W. B. Smith, Delaware, the anemone; the grand golden yellow Modesto, Good Gracious, etc.

Another means of seeing the chrysanthemum is by going the rounds of the trade displays, and most of the horticultural firms here permit the public to view their greenhouses free of charge during the early part of the season. These collections are in many respects far more interesting than those at the parks because of the many new and unknown sorts that can be seen.

At the establishment of J. Veitch & Sons, Chelsea, there is a very choice collection composed of the most select kinds from all sources. At the time of my visit Modesto was large and very deep in color and was well finished; Mutual Friend is a grand deep flower, pure white; Octoroon, deep rosy crimson, one of Spaulding's introductions of three years ago, was also fine and most effective; Mrs. R. C. Kingston is an incurved variety, large and good—this is

the variety raised by Mr. Surman some years ago and always does well here; W. H. Lincoln is a good yellow, and Col. W. B. Smith concludes the number of striking varieties.

W. Wells, of Earlswood, has usually a very much finer and more comprehensive display than the firm just named. Here were some noble blooms of the white Simplicity, Western King and Mutual Friend. But my notes do not contain any further reference to American sorts, by far the larger number being French and colonial seedlings so far as the big show blooms were concerned.

At Swanley H. Cannell & Sons pay, and have paid, considerable attention to the chrysanthemum for many years past and there is always a floral treat in store for any visitor and a right cheery welcome. The collection here is mainly composed of seedlings and new importations and this year French and colonial are certainly in the ascendant. On entering the big greenhouse containing the main collection almost the first thing of any merit to be seen was Mutual Friend. Mrs. R. C. Kingston was also well represented by some very fine deep blooms. There were also Pennsylvania, a yellow incurving Japanese, the Barrington, purple with silvery reverse, and Glory of the Pacific.

Most growers the wide world over know the name of W. J. Jones, of Lewisham, who purchased the stock of chryanthemums of Pitcher & Manda when that firm retired from their European establishment some few years since. Large numbers of these were named and distributed at the time of his purchase and it is sometimes difficult to decide whether novelties from this nursery may not be some of the survivors or progeny of that collection. At any rate this year there are not many, but Mongolian Prince is a pretty little incurved of undoubted American origin, color deep golden bronze.

At Woking, in Surrey, another well known exhibitor and grower, H. Shoesmith, is established and here I saw some of the very best flowers of Col. W. B. Smith and Modesto that could be grown. Simplicity was also noteworthy for its size and purity of tint. R. Owen of the Floral Nurseries, Maidenhead, is only flowering some of the best of the continentals and his own seedlings, but he keeps all the standard varieties of American origin for stock. Here Glory of the Pacific was freely grown as a bush plant, and in that form is pretty for decoration or grouping. Mrs. W. C. Egan, a fine incurved raised by Dorner, is a lovely flower and will be much admired. Pearl Palace is another.

Norman Davis, of Framfield, is a well known importer of American novelties, but his establishment is too far away from the metropolis for me to go there this season. It is only fair to say, however, that he was one of the first if not actually the first English grower to introduce American novelties. W. J. Godfrey, of Exmouth, is another who has done something of the same kind but his place is far beyond the reach of a metropolitan lover of the autumn flower and can only be partly judged by the material that he exhibits at the London shows and floral meetings.

C. HARMAN PAYNE.

A FIRST-CLASS certificate has been awarded Chrysanthemum Yellow Mme. Carnot by the Dutch Horticultural Society at Amsterdam.

CHRYSANTHEMUM NAGOYA.

AMONG THE NOVELTIES.

Our illustrations show two of the best novelties introduced by Messrs. Nathan Smith & Son, of Adrain, Mich., and described as follows:

Nagoya (Modesto x Western King).—A Japanese of reflexed form, clear bright yellow, as pure as that of Modesto; fine stem and foliage. Cut Nov. 24, a date when good yellows are very scarce. Terminal bud, 4½ ft. Certificated by C. S. A.

Queen of Plumes (Francis B. Hayes x White Swan).—The first double, pink, hairy chrysanthemum yet produced, as all efforts to secure a plumed pink of a pleasing shade and fully double have thus far been in vain. It might be briefly described as White Swan in foliage, fullness, form and time of flowering, more dwarf in habit, but in color a beautiful shade of bright pink. Certificated by C. S. A.

HOMER, N. Y.—Hobart & Coon have dissolved partnership. D. C. Hobart will continue the business. He has 3000 feet of glass.

New York.

REVIEW OF CHRISTMAS PLANT TRADE.—MANY ARTISTIC COMBINATIONS.—MONEY SPENT FREELY FOR NOVELTIES OF INTRINSIC VALUE.—A FINE ASSORTMENT OFFERED. — AZALEAS, ONLY, DISPLAY WEAKNESS.—BIG SALE OF GREEN MATERIAL.—INFERIOR HOLLY UNSALABLE. —UNCERTAINTY IN CUT FLOWER DISTRICT UNTIL SATURDAY.—MANY POOR ROSES ON MARKET.—GOOD PRICES FOR CHOICE STOCK AT CLOSE.—VIOLETS OVERSTOCKED AND PRICE BROKEN.—BRIEF NOTES.

As intimated in our report of last week the Christmas plant trade in this city attained prodigious proportions, far outstripping any previous record. Stock in growers' hands was depleted early and many fruitless trips in quest of plants were made by late buyers who had failed to provide for the increased demand. The retail florists vied with each other in presenting plants in novel and attractive forms and to this well-directed rivalry was undoubtedly due much of the support given them by the buying public.

The plant growers, also, did their part well and recognizing the great advantage to them of an established plant holiday so early in the season, had provided abundant evidence of the foresight and skill of New York's expert plantsmen. Customers were looking for novelty and parted with their money easily and in liberal amounts for anything that pleased them and no better proof of the return of prosperity to the people could have been given.

The variety of plants offered was very large for the season and included heaths, azaleas, poinsettias, primroses, cyclamens and violets in flowering plants, ardisias, oranges and solanums in berried plants, and dracænas, pandanuses, palms, ferns and selaginellas in foliage stock. Nothing finer than the heaths and ardisias could be imagined. They were provided in all sizes and led everything else in popularity. Primula obconica in the improved form and bright pink tints seemed to have regained much of its lost popularity and sold well. In fact, the only plants that met a disappointing reception were the azaleas. Whether buyers are tired of seeing azaleas or whether they regard them as essentially Easter offerings, they certainly did not evince the usual enthusiasm over them. If azaleas could be presented at Christmas with the profusion of bloom given at Easter they might meet with greater favor, but the early forced specimens are sparse of bloom at best. Should they be relegated to the rear and preference given to plants that are American grown from seed or cutting bench to finish, no harm will be done.

To enumerate the many artistic combinations in which plants were arranged would take columns of space. Low zinc-lined baskets, in straw or olive green color and fantastic shapes, were the favorite receptacles. There were combinations of specked and splashed crotons with selaginellas, luxuriant Adiantum Farleyense with lily of the valley, bright foliaged Dracæna terminalis and white striped Dracæna Sanderiana with small ferns, Pandanus Veitchii and poinsettias, oranges and Jerusalem cherries, etc. Heaths, ardisias and dracænas were the choice for center plants and enormous quantities of small cocos palms and ferns in variety were used to fill in the bare spaces. In many cases living plants were combined with cut flowers. Cypripedium blooms were great favorites for this purpose, looking well regardless of the color with which they were brought in contact. One of the most beautiful arrangements seen was a low basket of growing Adiantum Farleyense with clusters of cut Dendrobium Phalænopsis interspersed among the fronds. The basket was olive green and the square handle was brightened with a bow of soft lace matching the pink tints of the orchids. Many clusters of bright red berries and mistletoe were introduced among these plant arrangements with fine effect. Whether in single plants or collections it was the rule everywhere that the soil be hidden from sight by low growing plants or clusters of berries and green and very few bare flower pots were seen. The pot cover almost universally used was an olive green basket of straw braid, and tissue paper was conspicuous by its absence. On orange trees, orange or olive green ribbon was used but otherwise everything flaunted a red bow. The quantity of red ribbon used, in the aggregate, must have cost a large sum for, with the better class of florists, the quality was very fine and they were very particular as to the color, which must be a pure holly berry red. One florist who has his ribbon made to order refused one lot valued at $105 because of a trifling variation in the shade.

All kinds of holiday greens met with an enormous sale. The only loss was on the quantities of inferior holly sent to this market on consignment and which not even the street fakirs would take at the cost of the freight. It is to be hoped that the lesson will have its effect on shippers and that there will never again be a repetition of this useless destruction of this beautiful tree. When bright green and full berried, holly sold well. With this as with mistletoe, in whatever form, the inevitable red ribbon was used. Many other kinds of green were used in the manufacturing of wreaths and garlands. Nothing prettier for this purpose was seen than the bright green box foliage from the south. Large crescent wreaths of this material in combination with retinospora and finished at the base with a cluster of red berries and mistletoe, tied with a scarlet bow, were among the handsomest things shown and brought big prices.

While all this rush was going on doubt and uncertainty ruled in the wholesale cut flower section where, but a few years ago, the rose, the carnation and the violet held invincible sway over the Christmas buyer for a week or two in advance. Wholesalers stood in lonely speculation on the prospects while their customers, the retail florists, were industriously advising the shoppers to buy plants in preference to cut flowers and flower growers were flitting nervously from one commission house to another in quest of guarantees that no one was able to give while the accumulating stock at home was taking advantage of the warm weather and persistently accumulating. An advantage that the plant will always enjoy over the cut flower is that the buyer can see what his purchase is; he can select it a few days in advance and see it addressed. The retail florist also benefits in like manner as he can deliver his plant orders early and get them out of the way. These reasons together with the natural development of the business would in time have brought about the present popularity of the growing plant at the expense of the cut flower but undoubtedly the evolution has been hastened by the indiscretions prevalent in the wholesale cut flower trade and if the pendulum ever swings back again it will only be when the time honored methods of holding stock and inflating prices shall have been abandoned for good.

Now that the cut flower shipping trade in this section is reduced to a minimum, the so-called "holiday prices" cannot be realized until the flowers can be used locally for holiday consumption and the result of high advance quotations and talk of "short crop" is to encourage the storing of stock in anticipation of a rise at the last moment. Some growers do not do it but there are more that do and the injury is shared by the innocent as well as the guilty. This time the trouble was intensified by the warm, sunny Christmas weather following closely on several days of dense fog which left its debilitating impress on the flowers, roses especially, whether on the plant or in the cellar and the quality of much of the stock offered on this market was far behind anything we have seen in years. The volume of business done in cut flowers on Saturday and Sunday was very large and stock was plentiful in most varieties and overplentiful in many. When Saturday morning's avalanche of shipments, good and bad, began to arrive the retailers were not slow to size up the situation and held their peace as to what they would require, only buying what might be necessary for momentary needs. As to prices, anything like uniformity was out of the question. The bulk of the rose stock was necessarily worked off at any figure it would bring.

Only toward evening on Saturday did it become apparent that good Bridesmaids were wanted and when they filled the bill they sold sharp at 12 to 25 cents. Second class material cut no figure whatever even then and Brides were unfortunate all through. Meteor was a good seller from beginning to end of the week. Beauty did not quite reach predicted rates but cleaned up finally in pretty good shape, considering the heavy shipments; $1.25 each was generally outside figure obtained for the very best. Carnations were sold at figures considerably below previous estimates. Really fine stock sold well but at moderate prices, colors and fancy varieties well in advance; the pale and sleepy kind remained unsold. As to violets the amount received far exceeded the estimates of the growers and the demand was inadequate to absorb more than three-fourths of the number available, the balance, numbering many thousands, being left in wholesalers' hands till Monday morning. Prices fell from $3 to $2.50 and finally to $1 per hundred. Hyacinths, narcissi, stevia, lily of the valley and ferns were as usual in over-supply and not cleaned out. On Monday trade was light and buying on a small scale. Extra Bridesmaids sold out all right but Beauties were not wanted. Violets repeated the slump of Saturday. A number of retailers are authority for the statement that the violet trade was much lighter than usual, all through, notwithstanding the salubrious weather.

Among the odd things seen at the wholesalers' for Christmas were Gontier buds at Julius Lang's, tulips at J. I. Raynor's and lilacs at E. C. Horan's. A novelty in the plant line was a lot of thrifty little plants of Cypripedium Spicerianum bearing from three to ten flowers each, at Siebrecht & Son's and they sold well.

The Tropical Decorative Plant Co. displays in the window a certificate of merit awarded by the Farmers' Club of the American Institute for dried and artificial palms!

Visitors in town: Thos. F. Galvin, Boston; Robert Kift, Philadelphia; Ben Ulam, Pittsburg; G. T. Lambrook, Troy; A. D. Carpenter, Cohoes; M. J Lynch, Poughkeepsie.

Boston.

AN OLD-TIME CHRISTMAS.—A TREMENDOUS FLOWER TRADE.—UNPRECEDENTED HOLIDAY DEMAND.—PLANT TRADE SHOWS MODERATE INCREASE.—GLOIRE DE LORRAINE SCORES A TRIUMPH.—HOLLY REACHES ITS LIMIT.—AN UNWISE PUBLICATION.—A NEW LIGHT.

Christmas trade in Boston had a refreshing snap about it that reminded one of old times and furnished a most convincing proof that in New England, at least, the cut flower retains its pre-eminence as a holiday favorite. And this notwithstanding the publication in the *Transcript*—the family paper—a week beforehand, of one of the most ill-advised and trouble-breeding articles that the local flower trade has had to face for many a day. This we will refer to again, further along.

The plant trade showed a considerable increase over past years and naturally occupied the attention of the florists a good deal during the early part of the week, but the plant business did not develop anything like the prominence noted in some sections, and, while the tendency is unquestionably in the direction of an increasing preference for flowering plants, yet the movement is slow here and the flower growers have no cause for immediate alarm on this line if this year's experience counts for anything.

No doubt the sluggishness of the movement plantward, as compared with New York's experience, is due to the fact that the plants offered here do not compare in variety and perfection with the plants seen there and that the store-keepers make but little effort to present them in any other shape than in plain flower pots as received from the grower. That the public here are not slow to appreciate or unwilling to pay a good price for a meritorious novelty is proven by the sales of Begonia Gloire de Lorraine. From five to fifteen dollars apiece was paid for plants of this novelty and the demand at these prices exceeded the supply. Azaleas did not sell as well as anticipated. Ardisias were best liked in the small sizes. Dracænas moved slowly. Red cyclamens sold rapidly and so did Jerusalem cherries. White cyclamens and Roman hyacinths dragged somewhat. Many small fern pans were disposed of at moderate prices.

The weather on Friday and Saturday was simply lovely and shoppers took full advantage of the opportunity, so rare at Christmas. Flower stores were besieged by crowds. Sales were made quickly, very little made-up work being called for, yet most of the store-keepers were busy far into the night for three successive days and the claim of all that they did the heaviest holiday business in their history seemed well substantiated.

The growers, one and all, are equally jubilant and at the wholesale marts corroborative testimony was abundant. The demand, while it favored certain things—red flowers especially—swallowed up everything in sight and called for much more than could be supplied in some lines and the full prices asked and paid were maintained without a waver till the last. The Cut Flower Market, on Saturday morning, presented a remarkable and unusual sight, being almost impassable with the crowds from the moment of opening, and the enormous quantity of stock carted in by the growers melted away in the liveliest manner. The wholesalers were hustled with local and shipping orders till far into the night and drew on the growers until everything was exhausted. The first freesias of the season were in for Christmas.

Of holly there was just a little too much. Had the inferior grade stuff been kept away, this would not have been so and most of the holly left unsold belonged to this class. Yet it would seem that the limit of holly consumption had been reached this year for the first time in this market and heavier shipments next year are likely to bring disaster to what has been, up to this time, a nice remunerative feature of the holiday trade. The fine weather was held responsible for diverting a certain proportion of the good buyers in this line from the regular flower stores to the cheap stalls at the market, but this cloud had a very silvery lining since the same weather brought out the flower buyers to the last individual.

Some sensational reporter got a lengthy article into the Boston *Transcript*, warning flower buyers that the florists were contemplating to make them pay prices for flowers such as never before, in the history of flower growing, had been quoted. The communication was widely circulated and commented upon by other New England papers and much criticism was the result. A few more such articles will suffice to put the holiday flower industry *hors de combat*. The Springfield *Republican* comments thus: "Even the worm will turn, and if the dizzy flight of prices for Christmas flowers is not checked in some way, an indignant public will be forced to stop buying. Every sensible woman will abet her lover or husband in abandoning flowers for candy, if the flower-growers do not have a care. The eggs are golden, but the producer of them may be only a goose." The Newport, R. I., *News* remarks that a local florist has pasted the *Transcript* clipping in a conspicuous place where it can be shown customers to warn them to confine their flower buying to the home florists.

At the meeting of the Gardeners' and Florists' Club, Tuesday, January 3, 1899, John K. M. L. Farquhar will give an illustrated lecture on "Gardens, Fields and Woods of Japan." Members desiring to have their friends, including ladies, hear Mr. Farquhar's lecture, are urged to invite them to attend. A business meeting will be in order previous to the lecture, at 7:30 o'clock, at which the officers for 1899 will be installed.

George Hollis exhibited a set of eighteen single and double named pelargoniums at the Horticultural Hall last Saturday.

The Park street Flower Market has installed six of the new kerosene-burning Washington lights. They give great light and equal satisfaction.

Chicago.

THE CLOSE OF A VERY GOOD YEAR.—A RESUME OF THE SEASONS.—IT WAS A RECORD BREAKING CHRISTMAS.—FLOWERING PLANTS WERE SCARCE AND IN DEMAND.—AS TOLD BY DEALERS.—VIOLETS, CARNATIONS AND BEAUTIES.—JOTTINGS PERSONAL AND OTHERWISE.

This week brings to an end a year far better for local florists than its predecessor and in many respects the best on record. Trade all through the early spring was good, Easter was excellent, the summer was as active as could be expected and prices held up better than usual; the fall trade was large, chrysanthemums were profitable and the two days before Christmas saw a trade which put a fitting finish on the record of the year. Various wholesalers report Christmas sales as from twenty to 100 per cent ahead of last year. During the past seven days, prices have been stiff and trade brisk.

American Beauties were scarce for the holidays and other good roses not plentiful. During the middle of the Christmas selling period there was an over-stock of carnations, but this was wiped out in the beginning of the rush of Friday, Saturday and Sunday. There were plenty of violets until Friday but from then on there was a scramble for them. Many retailers were unable to fill orders booked for Monday. Prices ruled high throughout the list.

Plants sold readily, particularly well flowered ones, of which few were offered. Azaleas were in great demand, the Simon Mardner taking the lead. Cyclamens and poinsettias were readily exchanged for coin. It seemed that the shortage of flowering plants was not due to lack of effort on the part of the growers, but to that perverseness which made the week's supply of Harrisii less than 100 dozen. Palms, particularly latanias, sold well and the supply of Ficus elastica was exhausted.

E. Wienhoeber, who is a leader among retailers, reports that he served many more customers than usual at Christmas and that his facilities were taxed to the utmost, although he doubts if the aggregate of his sales will exceed last Christmas. He was able to use a few 10 cent carnations to advantage but says that his customers objected to the stiff prices, particularly on Beauties. He found no great sale for decorative plants but states that he could have used well flowered ones profitably had they been procurable, but probably at the expense of the cut flowers.

George Witthold enjoyed a splendid wholesale trade in palms all through December and in the week before Christmas did the best retail business he has ever had. He was lavish with his green in decorating his own establishments. Henry Wittbold has been ill most of the winter but is now improving.

W. J. Smyth, who handles the Oconomowoc violets, sold 8,000 of Sylvester's fancy flowers in the week preceding Christmas and on Monday found himself short nearly 1,000 and was compelled to join in the down town strife for good blooms. He reports a very fine holiday trade, with a marked tendency on the part of gift buyers to purchase flowering plants.

Mr. Weiland's Evanston, a bright red sport from Tidal Wave, has two warm and influential friends in E. E. Pieser and Peter Reinberg, who esteem it highly.

The Burlington Route, which has spent $5,000 annually with local florists, will shortly erect greenhouses at Aurora, Ill., in which to grow flowers to supply its dining cars.

Mr. Peterson, who has a stand at A. G. Prince & Co.'s had an overcoat stolen Friday from which a few moments previous he had removed a package containing $200.

The Albion Floral Company has retired after three months business at Cottage Grove avenue near Thirty-fifth street.

The University of Chicago will establish greenhouses for scientific purposes upon the roof of the Hull Botany building.

H. C. Rowe, formerly with the Anderson Floral Company, is now with the Klunder-Thiele Company.

Archie Spencer, manager for Reinberg Bros., was a St. Louis visitor this week.

John Wilson, Oshkosh, Wis., was a holiday visitor

BROCKTON, MASS.—The fortnightly meeting of the Brockton Florists' Club was held on the evening of December 20 with a good number in attendance. The report of the committee on the late exhibition was considered very favorable. Chas. A. Leach, Thos. Greaves and A. S. Crawford were appointed a committee to inspect without previous notice, the greenhouses in the district and report with recommendations for such improvement as they may be able to suggest. It was announced that John Farquhar would give a lecture before the club some time in January.

TORONTO, ONT.—Fire early on the morning of December 18 did considerable damage in Horticultural Hall

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

NOW for Easter, which next year falls on April 2.

WE wish all in the trade a happy and prosperous New Year.

HAVE you renewed your subscription? If not, please do so now.

PLACE one of those memo-calendar pads for 1899 on your desk and enter notes of coming work as they occur to you.

THERE have recently been large exportations of Brassavola Digbyana and Epidendrum Stamfordianum from Honduras.

HEAVY firing in severe weather may bring about serious loss if your premises are not insured in the Florists' Mutual Fire Insurance Co.

A PROMINENT grower advises that care be taken to avoid wetting the flowers of Acalypha Sanderi. The flowers will not turn brown if this rule be carefully followed.

AT THE Paris exposition in 1900 there will be a series of horticultural exhibitions, four general and eight special, the last, on October 23, to be devoted to chrysanthemums.

AN ENGLISH pointer in greenhouse construction is shown in the form of a wall plate of cement instead of wood, of course, on brick walls. The cement is Portland and worked in much the same way as for cement sidewalks. This should be a cheap and practically indestructible wall plate.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

John Cook, Baltimore, Md., registers seedling rose "Baltimore," a cross between Rivoir and Mary Fitzwilliam, a very large, fragrant flower, color Daybreak pink, deepening toward center; stem and foliage very large and strong as shown in blooms submitted.

WM. J. STEWART, Secretary.

Wholesale Prices on Postal Cards.

ED. AM. FLORIST:—We are, indeed, glad to see the article by P. H. Therkildson, Ironton, O., on this subject in your last issue. He evidently knows by experience the great injury this practice of sending wholesale prices on postal cards works upon the florist in smaller cities, where not only the post-office employes, but all their friends, have knowledge of wholesale prices, and that before the florist himself, unless he is on hand when the mail is distributed. We hope that other dealers in small places will enter their protest against this practice and thereby cause it to be stopped. S. H. B.

Greenhouse Building.

Elk's Head Design.

We are in receipt of a colored photograph from Gustav Ludwig, of Allegheny, Pa., showing a very realistic elk's head in immortelles, sheet moss and cape flowers, designed by Mr. Ludwig for the memorial services of Allegheny Lodge, No. 339, B. P. O. Elks. The head proper was secured to a panel some six feet in height and displayed on an easel which occupied a prominent position on the stage of the theatre in which the services were held. The immortelles were fastened individually, thus insuring a smooth and even surface. The piece is said to have been most effective, and even in the photograph its huge proportions are evident, while the color arrangement is both tasteful and suggestive.

Facts vs. Theory in the Ice Chest Question.

ED. AM. FLORIST:—Among the wonderful statements from the Battles booklet, furnished the AMERICAN FLORIST of December 17 by G. C. Watson "for the benefit of your readers," are the following remarkable theories: "We wish particularly to emphasize the fact that flowers, to give satisfaction, should not be kept on ice. A large, handsome ice chest is an evidence of weakness rather than of strength."

The *fact* is that no florist keeps flowers on ice, and the florists will not be disturbed by any such theory, although customers may. Where "a large, handsome ice chest" would fill a florist's store, he may be obliged to use a cellar or pavement vault for flowers; but he may be ignorant of the facts that cut flowers require air as well as growing plants, that carbonic acid and other deleterious gases settle to such vaults and sicken the flowers, although perhaps not noticed, and that sick flowers do not give satisfaction. Every florist knows, although customers may not, that the same temperature is required to keep flowers properly in "a large, handsome ice chest" as in a vault, but every florist does not seem to know that "a large, handsome ice chest" may keep flowers in a healthier condition on account of the purer air.

The *fact* is that vaults have been abandoned for that very reason, and in one instance, at least, instead of an evidence of weakness, a strong yearly increase in business has been the result. There is, however, another gas of which florists should be warned, as injurious to the sale of flowers. It may be called natural gas—not the coal oil natural gas that comes out of the ground, but a gas that appears to orginate in the brain of the afflicted. It is often accompanied by a disease called swelled head. One exemplification of this occured lately in Philadelphia, a gentleman changing his florist to get more flowers, less gas.

PRO BONO PUBLICO.

Tokens of the New Year.

That of I. W. Lozier, Des Moines, Ia., comes to us in the form of a neat blotter with appropriate admonitions to prospective purchasers of floral designs and cut flowers.

John Breitmeyer & Sons, of Detroit, send the compliments of the season with a pretty folding calendar for 1899, illuminated with a colored spray of flowers and foliage of a pink form of the Chinese primrose.

The Syndicate des Cultivateurs d' Oignons a Fleurs at Ollioules, France, wish us "A Happy New Year," and employ for the purpose an elaborate picture showing colored figures of various bulbous flowers, half tone group of numerous heads of departments, with a calendar attachment.

Philadelphia.

LOOKING BACKWARD.—A GLANCE AT THE EXPERIENCES OF A GOOD CHRISTMAS.—PLANT SALES VERY HEAVY BUT SUPPLY SHORT.—THE CUT FLOWER MARKET.

From the florists' standpoint it was a good Christmas. The weather was fine for delivering goods and it makes a great difference whether plants can be delivered as they are sold or have to be wrapped up. Foliage and flowering plants have entered so into the Christmas trade the past few years that they are a strong factor and more care and attention should be given to their culture. Well flowered cyclamens are sure sellers but I will venture to say that there was not one dozen plants that would sell on sight to be had in this city ready at the hour. What they will be two weeks hence is nothing; their best market is gone. Dwarf poinsettias, one in a four-inch pot or several in small pans, are good stock and the few placed on sale were quickly taken. Hundreds more "might have been" sold, but the growers were appealed to in vain.

Azaleas sold very well, particularly the bright Simon Mardner. Harris and Becker had a nice lot of plants at from $1.50 to $2.50 each. An attempt to make large plants out of several small ones placed together in one pot succeeded fairly well. Linum flavum, the yellow flax, is pretty one day but nothing the next, as by that time all the flowers are gone and something else has to be substituted for the plant set aside to be delivered Christmas day. He is a wise florist who convinces his customers that it is better to send plants selected home at once, as the last day is enough of itself without carrying others into it. Good primulas sold well and, while not a high priced plant, they fit in nicely and give variety. Dracæna terminalis, with its bright cen-

ter leaves, sold very well. Robert Craig had a fine stock and sold well out, shipping plants by the hundred to Boston, New York, Baltimore and other cities. Other foilage plants and palms sold fairly well although the preference was for plants with bright foliage or flowers.

Of course there was a great demand for cut flowers and I believe that all the good and fairly good stock was sold at about the same prices as prevailed last year. It seemed there was more than the expected quantity of "salted" stock. Beauties were better in this respect than other roses, they being for the most part of a good color, but the Bridesmaids had lost their blush and were a sorry looking lot. It was astonishing what a lot of work the growers had to do at home through the day as it was evening before many found time to bring their stock in, and then it looked so much better under the artificial light.

Carnations went to sleep very quickly and showed much evidence of having been kept too long on the plants. It is very aggravating to a dealer to find jar after jar of carnations that cost four to eight dollars per hundred one day going to sleep the next before he can get his orders out.

The volume of business is variously estimated at from one-fifth to one-third greater than that of last year. All report having done a good and satisfactory trade and with rather more profit than usual on account of the stock being so well cleaned up.

The Pennsylvania Horticultural Society, at the recent annual meeting, elected officers for the ensuing year as follows: President, James M. Rhodes, Ardmore; vice-presidents, Robert Craig, George Goebel, Henry F. Michell and John McCleary; treasurer, W. F. Dreer; secretary, David Rust; botanist, Thomas Meehan; horticultural chemist, Dr. Persifor Frazer; entomologist, Rev. H. C. McCook, D. D.; executive council, Edwin Lonsdale, J. Cheston Morris, M. D.; Mr. Westcott, W. K. Harris, John Thacher, Moses Paxson and Chester Davis. K.

Cleveland.

A SATISFACTORY BUSINESS AT THE TRYING HOLIDAY PERIOD.—SERIOUS SHORTAGE OF CARNATIONS, VIOLETS AND BOUQUET GREEN.—GREAT INCREASE IN THE CALL FOR FLOWERING PLANTS. — AZALEAS TAKE THE LEAD.

Well, Christmas is over and with it the most anxious holiday for the florist in the entire year, for among the blows that are landed on that day, either by irate customers or faithless wholesale men, there are sure to be a few that "almost kill father."

On the whole, however, the local talent is well pleased with the Christmas trade. Cut flowers of pretty much all kinds sold well, and at prices up to the last few years. This is particularly true of carnations and violets, the flower buying public having turned its longing eye upon them with more avidity even than last year. Of violets there were not nearly enough to go around. They sold at good prices, averaging about $3 a hundred for fine ones. Carnations, which for some reason have been rather short nearly all the season, were extremely hard to get for a week previous to Christmas. All fall the growers have been complaining that the plants, although looking as well as usual, have not been up to their usual standard of productiveness. As a result hardly any could be laid in in advance and the supply was all sold long before Saturday was over. It is quite impossible to guess how many more could have been used were they available. Red carnations were practically unknown, the demand for that color predominating in every other kind of flower as well. Many florists refused to accept orders for straight colors in carnations, either using mixed colors, or using whatever shade they could get the most of.

A feature of the business was the steadily increasing demand for flowering plants. Azaleas, of course, led and quite a good many were in the hands of the different florists. Deutsche Perle predominated, with a liberal sprinkling of Vervæneana and a few Simon Mardner. Anything that was at all good in azaleas sold well. There was a good call for primulas, cyclamens, Begonia incarnata, or any other good flowering plant, more especially if it were colored.

The demand for immortelle wreaths and other designs was notable. Wild smilax, holly, laurel wreathing and other greens sold well. Ground pine was scarce and much more could have been used had it been obtainable. A.

Des Moines, Ia.

I. W. Lozier is completely remodeling the store at 408 East Sixth street and will fit it up in a thoroughly modern style for a down town store under the management of Alfred G. Lozier, son of the proprietor. A large conservatory will be added and the establishment will be not only the best thing of the kind in the city but one of the finest in Iowa.

Lozier finds business very brisk. He now has seven houses at 1310–1312 East Thirteenth street, three new structure 25x75, for carnations, chrysanthemums and palms, having been added during the past season. Mr. Lozier reports a splendid fall season in his city and is confident that 1899 will be a year of prosperity for Des Moines.

OBITUARY.

MRS. GEORGE SMITH.

The wife of George Smith, 5 Peckham street, Fall River, Mass., died December 21, making his Christmas and that of his family, a most sad one. At the obsequies there were many floral tokens of the esteem in which Mrs. Smith was held among those in the trade and others outside its ranks.

JOHN S. HINNERSHOTS.

Dr. John S. Hinnershots died Dec. 24 at his residence, 113 South Fifth street, Reading, Pa., of spine disease, aged 57 years. Deceased was ailing for the last ten years. He conducted a cut flower business and greenhouse at his residence and at Oakbrook. Besides his second wife, he leaves one son, John. Deceased was born in Alsace township and resided in Reading for over twenty years. He graduated from the University of Pennsylvania and then opened an office in St. Lawrence, where he practiced medicine for a year, after which he moved to Reading. For the last ten years he relinquished his profession and devoted his time to his greenhouses, known as the Sunnyside Greenhouses, near the Kurtz house.

LINCOLN, NEB.—A. A. Hunter is making some successful experiments in growing mushrooms under the benches in his greenhouses.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By a young man as assistant florist; 3 years' experience. Address GROHMAN BROS., 317 Fitzhugh St., Saginaw, E. S., Mich.

SITUATION WANTED—By an experienced rose grower, age 30, single, for wholesale trade. Ohio or Pennsylvania preferred. ROSE, care Am. Florist.

SITUATION WANTED—As foreman by first-class all-round man, age 37, single; private or commercial. Refs. first-class. EXPERIENCE, care Am. Florist.

SITUATION WANTED—By florist, 23 years' experience in roses, carnations and general stock; married, sober. Good references. E W, care Am. Florist.

SITUATON WANTED—A rose grower for Beauties, Teas, 'mums, etc., bulbous stock, cuttings. City references, married. V. P. RASMUSSEN, 201 Hervey St., Chicago.

SITUATION WANTED—By man 23 years old, single; 7 years' experience in large establishment where all sorts of stock is raised. Address W T A, care American Florist.

SITUATION WANTED—By rose and all-round grower, German; single, 4 years in the country. Could not go far from Chicago. No references. G M 300, care American Florist.

SITUATION WANTED—As foreman by a successful rose grower and general plantsman; 20 years' experience, sober, married, age 37. References. Address D M, care American Florist, Chicago.

SITUATION WANTED—1st or second gardener for exotic plants, roses, 'mums, hothouse, lawn. Good references, married. Address V. P. RASMUSSEN, 201 Hervey St., Chicago.

WANTED—Salesmen to sell flower pots as a side line on commission. CAMBRIDGE TILE M'F'G CO., Covington, Ky.

WANTED—Two handy, quick young men of good character and some experience. Write, stating wages expected, etc. A. DONAGHUE, Omaha, Neb.

WANTED—Two young men to assist in general greenhouse work. Address, stating wages, board, etc, POEHLMANN BROS., Morton Grove, Ill.

WANTED AT ONCE—A good all-round florist, one who knows how and is willing to work. State lowest wages with board and lodging. W. H. WRIGHT, 204 1st East St., Vicksburg, Miss

WANTED—No. 1 grower of roses and carnations to take charge of a block of houses as second foreman on a large commercial place; must be up to-date grower; married man preferred. Steady job to right man and a good opening; would prefer a Chicago man or from that region. Wages, $12.00 per week. Address F, care American Florist.

FOR SALE—One No 17 Hitchings hot water boiler in first-class condition, with 1,500 feet of cast iron piping and fittings. Make me an offer. M. Helfrich, New Holland, O.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE OR RENT—Three greenhouses well stocked with roses, carnations and general greenhouse plants; plenty of water and in one of the best cities in Iowa. Correspondence solicited. Address FLORIST, 1721 N. Story St., Boone, Ia.

WANTED.

Two or three men used to propagating roses and carnations.....

BASSETT & WASHBURN,
Hinsdale, Ill.

FOR SALE.

A well established and paying florist's business, with 10 to 30 acres of land, 17,000 square feet of glass. Good residence and houses for help. Situated near one of the largest cities in California. Ill health and desire to retire from business cause for selling. For full particulars address

LOCK BOX 720. Los Angeles, Cal.

FOR SALE AT A BARGAIN.

Nine (9) greenhouses, about 21,000 feet of glass, well stocked with Roses and Carnations in first-class condition, also large stock of Bedding Plants; houses heated with steam, a new boiler; one heavy wagon and one spring wagon. Also 2½ acres of land, or 14 lots. In a flourishing town of 8000 inhabitants, situated in central Ohio; no competition. Part cash; the rest on first and second mortgage. Address

GREENHOUSES, care Am. Florist.

Cincinnati.

CHRISTMAS TRADE. — PLANTS AT THE FLOWER MARKET.—FRUIT CAKE FOR WHOLESALERS.—A NEW BOY AT ALLEN'S.

The store men report an increase of ten to fifteen per cent in Christmas sales, while the wholesale houses report an unusually large trade, an increase of twenty-five per cent. Never before was holly and other green so closely used up as it was this Christmas.

The Sixth street flower market on Saturday was well stocked with choice plants and judging from the plants carried away, the boys must have done a good business Azaleas were rather scarce; cyclamens met with ready sale, as did primulas, palms and ferns.

Miss Cronan, of the Covington Floral Co., remembered the boys at the wholesale houses with a delicious fruit cake tastefully put up and tied at both ends with a bow of silk ribbon. Frank Ball said it was the best cake he ever ate.

Mrs. James Allen presented her husband with a bouncing baby boy Christmas week. H. SCHWARZ.

Syracuse, N. Y.

The annual meeting of the Central New York Horticultural Society was held in the rooms of the Chamber of Commerce Dec. 22, and despite the fact that many members were engaged in preparing for the holidays there was a good attendance. The rooms were beautifully decorated with greens, fruit and rare tropical plants, which were arranged under the direction of President S. T. Betts, who presented a very comprehensive report outlining the work of the society for the past year.

Treasurer F. H. Ebling's report showed the society's income for the year to have been $913.30, of which $629.95 was show receipts, and disbursements of $908.85, of which $861.05 was exhibition expenses.

The nominating committee, of which C. A. Phillips was chairman, made the following report, which was unanimously adopted:

President—S. T. Betts.

Vice-Presidents—Alan C. Forbes, A. D. Perry, M. E. Driscoll, E. A. Powell, A. C. Chase, C. W. Snow.

Secretary—N. H. Chapman.

Treasurer—David Campbell.

Executive board—L. E. Marquisee, C. A. Phillips, George Ham, Philip Kay, F. H. Ebeling and John T. Roberts.

Mr. Betts and Mr. Campbell both wished to retire from office and said so, but the members could not think of it.

CLINTON, IA.—The J. R. Bather greenhouses have been equipped with a new tubular boiler and increased radiation.

POUGHKEEPSIE, N. Y.—The annual meeting of the Dutchess County Horticultural Society will be held at the Y. M. C. A. rooms on Thursday, Jan. 5, at 1:30 p. m. The annual dinner will be served at Masonic Temple on the same evening at 6 o'clock. The usual good time is promised.

INDIANAPOLIS, IND.—The annual meeting of the State Florists' Association will take place in this city January 9 at the State house. In connection with the meeting an exhibition will be held and certificates of merit awarded. It is very important for the welfare of the association that both the meeting and exhibition are well attended. H. J.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ADVANCE copies of retail seed lists for 1899 are at a premium just now.

SWEET PEAS are in good demand but not at the prices anticipated in the early fall days.

IN nearly all items the flower seed crop is a good one; aster seed turned out somewhat short.

NEW YORK.—W. A. Prosser, of Vaughan's Seed Store, received a rare and valuable present on Christmas night. It is a daughter and her equal is not to be found in all Brooklyn, so Mr. Prosser asserts.

ONION, BEAN AND SPINACH seed prices are the items which the seedsman first looks up when he gets a copy of a '99 catalogue, even before he reads the supreme effort of his fellow seedsman—the introductory pages in which he tells the recipient that he is making a great mistake by buying his seeds elsewhere. And, as was to be expected, these prices vary greatly. What is the reason catalogues are not coming in livelier?

The Use and Construction of Greenhouses for Horticulturists.

[*Abstract of a paper read by Prof. L. R. Taft, Agricultural College, Mich., at the meeting of the Missouri State Horticultural Society.*]

During the past ten or fifteen years, not only has there been a marked change in the methods of building greenhouses, but there has been a great increase in their use. This increase has been quite large in the neighborhood of large cities, but there has been a greater amount of building in the vicinity of small towns, and, even in sections remote from settled communities, improved means of transportation making it possible for growers of flowers and vegetables to locate where they can secure cheap land and fuel, from which points the products are often shipped hundreds of miles. In other states many farmers and fruit growers, whose time is occupied during the summer months with their orchards and farm crops, have erected extensive ranges of greenhouses, which, during the winter months, are used for the production of vegetables and cut flowers, and as the owners become specialists, they not only find the work remunerative, but are thus able to occupy the portion of the year which is not required for their other pursuits. With the cheap fuel, clear sky and comparatively short and mild winters, there is no reason why similar establishments will not prove even more satisfactory in Missouri. For such a purpose the form of house best suited is the even span; this should be not less than twenty feet in width and of any desired length. If several houses are erected they may be placed side by side, with division walls in common, but for most crops the extra expense will be more than repaid by the benefits that will be derived when the houses are placed far enough apart to prevent the shading of one house by its neighbor, as well as from the light and ventilation that can be secured through the side walls. For roses, however, the three-quarter-span roof is generally preferred, while in sections where a slight slope to the south can be secured, a wide sidehill house will be found adapted to the growing of vegetables, carnations, violets, etc., and it will, in addition, be of comparatively cheap construction.

While the modern, iron frame construction is in many ways desirable and will often, in the long run, prove most economical, the increased first cost will prevent it from being commonly adopted for the ordinary greenhouse purposes. The iron frame house may be raised upon a brick foundation, or iron posts may be set in the ground to which the side posts can be attached. Iron rafters are placed every seven or eight feet and connecting them are plates, purlins, and a ridge upon which the sash bars rest. With this form of construction much lighter sash bars can be used than in wooden houses, as nearly all the strain and weight of the roof is borne by the iron posts and rafters. The house will also be much more durable, as the portions that are first to decay in a wooden house have been replaced by iron. When wooden houses are used, posts of cedar or cypress should be set at intervals of from four to six feet. The height will depend somewhat upon the crops to be grown and whether there is to be glass in the side walls. In the former case four feet will be ample, while in the latter four and one-half to five feet will be none too much. The walls can be formed of sheathing and a block siding; with a double thickness of building paper between. If ventilating sash is to be placed in the side walls, there should be a sash sill arranged for them to close upon. Various forms of plates may be used, but they should be so arranged that they will provide a firm bearing for the sash bars and for the running off of the water upon the inside, as well as on the outside of the house. In wooden framed houses rafters are now seldom used, the usual plan being to depend entirely upon sash bars which rest upon one or more lines of gas pipe, or similar purlins. The usual size of the sash bar is about one and one-fourth by two and one half inches, and drip gutters in the sash bars are desirable. One and sometimes two continuous lines of ventilators at the ridge should be provided and connected with shafting so that a line fifty to one hundred feet in length may be worked with one machine. In houses twenty feet wide, if a single row of ventilating sash is used, it should be from thirty to thirty-six inches wide, while if there are two rows they should vary from twenty-four to thirty inches, according to the kind of crops to be grown.

For most purposes it is desirable to use glass at least 14x18 inches, and for roses 16x24 will be none too much. In setting the glass a good grade of putty or mastica is used under the panes. If it is to be lapped, it is held in place by means of zinc points or brads. For many purposes, however, butted glass is preferred, the size generally being 16x16. The square form is desirable, as it permits of the turning of the panes so as to secure a perfect union between them. When the glass is butted it is customary to use wooden caps over the sash bars which are screwed down upon the panes. This makes a warm and water-tight joint and permits the ready resetting of broken panes. In three-quarter-span houses the south wall should be about the same height as the walls of an even-span-house, but the north wall should be about one-half higher if the long-span-to-the-south construction is used, but both walls may be of the same height when the short span-to-the-south house is used. The usual height of the ridge in a house twenty feet wide, is seven feet above the walls, except in a long-span-to-the-south in which the distance from the level of the south wall to the ridge is measured and the ridge is so situated that the sash bars on the south side will be twice as long as those upon the north.

Either raised benches or solid beds may be used, the former being the most commonly employed for flowers and the latter for vegetables. In the construction of the raised benches it is desirable to use either gas pipe or angle iron for the supports, although if constructed of wood they will last a long time when supported upon bricks or cedar blocks. In order to secure proper drainage, there should be cracks of one-half inch to one inch between the boards used for the bottoms of the benches. In some cases tile or slate bottoms are used and with an iron framework will form a very durable bench. The former practice was to place narrow benches along the side walls, with one or more wide benches in the center of the house, separated by walks, but in order to bring the benches into the more desirable parts of the house, the plan of having walks along the side of the house, and of arranging for three or four beds from four to five feet in width, separated by walks twenty to twenty-four inches wide, has been adopted. With solid beds a similar arrangement has been followed, except that the beds are somewhat wider, although seven feet is the usual maximum for violets and carnations. The height of the solid beds is determined by the kind of crop to be grown and the distance to the glass. The same care is required as with raised benches to secure good drainage. This is generally done by filling in with broken brick and similar material, and covering with eight inches of prepared soil. Where sub-irrigation is to be used, the bottoms of the beds or benches are made practically water-tight, and one or two lines of drain tile are placed lengthwise of the houses. The water is turned in at one end through a hose and, filling the tile, makes its way out through the joints. In three-quarter-span houses with a long slope to the south, the benches are placed at different levels, something like steps, so that those upon the north side will not be shaded, and will not be too far from the glass.

For heating small ranges of greenhouses, some of the cast iron hot water boilers, although they are comparatively high-priced, will prove satisfactory and economical, as they will be more durable than wrought iron boilers, especially if the latter are made in the form of box coils from gas pipes. The joints of the latter being screwed together will expose more or less of the threads, and as a result, may not last more than two or three years, although with heavy pipes the life of the coil boiler may be seven or eight years, if care is taken not to have any of the threads exposed. For larger ranges in which either hot water or steam are used, tubular boilers may be employed and will give satisfaction, especially if, when used for hot water heating, the entire shell is filled with tubes. Although the tubes are made of wrought iron they are thicker than those commonly used for coil boilers, and the tubes being riveted, rather than screwed into the boiler heads, will be quite durable. Although not to be recommended for very small ranges, a considerable saving in the amount of pipe required for radiating surface in the houses can be made if the system is carried under pressure, and there is hardly any limit to the size of the plant in which hot water under pressure may be used, although many florists pre-

fer steam for ranges of a size that will make the use of a night fireman desirable. While it will require rather more attention than a hot water system, steam as a method of heating greenhouses has some advantages.

For ranges of houses with less than 10,000 square feet of glass, only one heater will be desirable, but, if the amount exceeds this, two or more should be employed. The heaters should then be so arranged that any of them can be cut out of the system in case of accident or for the purpose of making repairs. Having more than one heater, under such conditions, will oftentimes prevent serious loss. During the fall and spring months only one heater will be required, the others being held in reserve for use in severe weather in winter, or in case of accident. During the past twenty years there has been a gradual change in the kind of pipe used for heating greenhouses. Instead of the old-fashioned, four-inch cast iron pipe, wrought iron pipes from one and one-half to two inches in diameter are now used for the coils. In some cases the coils include both the flow and return pipes, but more commonly the water is carried to the farther end of the house in one or more pipes of a somewhat larger size, which are there connected with the returns. Although larger pipes are occasionally used, the ordinary size for the flow pipes is either two or two and one-half inches, the former being used for coils containing about 200 square feet of radiation, while the latter will supply 350 feet. When the heater can be sunk so as to be below the level of the greenhouse floor, a fairly good circulation can be secured with all of the pipes under the benches, but better results can be obtained when the flow pipes are carried as high as possible, and the use of overhead flows becomes almost necessary where it is not possible to lower the heater. One or two of the flows can be carried upon the rows of purlin or ridge posts, and others if necessary upon the walls.

The radiation supplied by the returns will be rather more effective when arranged in horizontal coils than when the pipes are placed one above the other, but from the fact that when the coils, in whole or in part, are carried upon the posts of the side walls, they are out of the way, the vertical coil is often used. While good results will be secured whether the flow pipes are carried with an upward or downward slope, the downhill system if anything seems to be preferable. The slope should be merely enough to free the pipes of air, for which purpose an outlet must be provided at the highest point. It is an excellent plan, especially when the closed system is used, to connect each flow pipe, or the highest point of the common system, with the expansion tank. The returns should always be laid with a slight slope toward the boiler, but if the larger sized pipes are used and are properly supported, this need not be more than one inch in twenty feet, the object being to carry the pipes as high as possible and at the same time have sufficient slope to permit the air to escape.

The arrangement of the pipes where steam is used is quite similar to that in a hot water system, the principal difference being that the size of both flow and return pipes is smaller. The return pipes need not be larger than one and one-fourth inches and, in small houses, very good results can be obtained with one-inch pipes, while, as a rule, a two-inch supply pipe will answer for a house 20x100 feet, except where high temperatures are desired. In the steam system there should be an automatic air valve at the lower end of each of the coils, and, for controlling the heat, valves are necessary upon both the supply and drip pipes, while in the hot water system only one valve is necessary, although two will be desirable in case there should be occasion at any time to cut off the coil in order to make repairs upon it. In the steam coils it is also well to have several of the pipes provided with valves in order that one or more of them may be cut off to control the heat.

In estimating the amount of radiating surface that will be required, it is customary to estimate that one square foot of pipe will be sufficient for one square foot of glass, if the house is to be carried at 60° with hot water, and that it will answer for four or five if 50° or 40° respectively, are required. With steam heat, one foot of radiating surface will be ample for five and one-half square feet of glass, in houses to be heated to 60°, seven and one-half if 50° is to be maintained, while only one foot of radiation to nine square feet of glass will be required in houses that are to be heated to 40°. The above figures will be found substantially correct in sections where the usual winter temperature does not drop below zero, and where the houses are well built and with a comparatively small amount of exposed wall surface. Where the temperature drops much below zero, or where the construction of the house makes it difficult to heat, they will need to be slightly modified.

CHICAGO. **VAUGHAN'S SEED STORE,** NEW YORK.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

MADAGASCAR supplies almost the whole of the raffia of commerce.

ONE of Luther Burbank's latest introductions is the October Purple plum.

ASPARAGUS is profitably grown in Algiers and shipped to Paris, five days distant.

MINNESOTA nurserymen would have a fine market in Manitoba were it not for the Canadian exclusion act.

JACOB MOORE, Vine Valley, N. Y., is a persistent advocate of trade-marks for plants and trees to protect the originator.

NURSERYMEN and florists within twelve miles of London pay from £12 to £15, $60 to $75, rent per acre for the land they occupy.

ORCHARDISTS in Tasmania are subject to a fine if they neglect to bandage their trees to keep down codlin moth or fail to destroy infested fruit.

FAVORABLE reports are coming from all the northern states upon the Morello and other Russian cherries which have now been tried in a small way for several years.

INDICATIONS are that seedlings of the Sand cherry will become popular as plum stocks, as trees on this stock are dwarf and begin to bear when two years old from the bud.

IT IS reported that the Chicasa varieties of the plum do excellently when grafted on peach roots. They should be set in the orchard with the union just below the surface.

ONE of the most promising of the new industries of the south is pecan growing, and the demand for trees shows that land owners are rapidly taking advantage of their opportunity in this line.

SULPHURIC acid has been used successfully in cutting the gum which covers red cedar seed, to make it sprout the same spring it is planted, but the acid often kills the seed, even when applied by an expert. A far better way is to rub the seed on a wire sieve until the gum is worn away.

VIEW IN THE GARDENS OF THE HON. FRANK JONES, PORTSMOUTH, N. H.

A New Hampshire Garden.

A visit to the beautiful grounds of the Hon. Frank Jones, Portsmouth, N. H., situated a little over a mile out of the good old town, is time well spent. Robert Patterson, the head gardener, always has a hearty welcome to any of the craft, while both Mr. and Mrs. Jones seem to delight in having Portsmouth people and others enjoy visiting the greenhouses and grounds. No less than 5000 people came from all quarters to admire Mr. Jones' chrysanthemum exhibition during the five days of its continuance. These plants were a little past their best at the time of our visit, but were still worth a long journey to see.

The pleasure grounds and gardens surrounding the mansion comprise about thirty acres. The farm extends beyond the hedged enclosures in finely cultivated acres almost as far as one can see. Apart from the terraces and lawns, where many fine coniferous trees are set to advantage, there remained few reminders of the gay summertime effects. November found the flower beds and borders bare, but all neatly raked, trimmed and made sightly for the long winter. But an inspection of the extensive range of greenhouses, some twenty in number, profitably engaged all the time we had to spare. Substantial construction, perfect order and neatness are features of the entire establishment. The plant houses and their varied contents, sheds and potting house are all finely cared for. All the houses have rounded concrete walks and slate-bordered benches and are lighted throughout by electricity.

In addition to other plant houses, there are four devoted to grapes, two to palms, two to roses, two to ornamental tropical plants and one each to peaches, carnations and violets. The varieties of violets preferred are Marie Louise and California. They are grown in 6-inch pots and were bearing and showing well. The varieties of roses which are the favorites are Bride, Catherine Mermet and Bridesmaid. The plants were in perfect health with a plentitude of dark green, healthy foliage from bottom to top, and plenty of bearing wood. The temperature maintained at night is from 56° to 58°, a heat which seems to suit exactly. The centers of the rose houses are occupied by well ventilated beds and the plants are set in six inches of earth, top-dressed with decomposed cow manure. The side benches are filled with vigorous plants in 8-inch pots. All roses grown are on their own roots, and propagated on the place.

The kinds of carnations forced are Flora Hill, Harrison's White, Alaska, Lizzie McGowan, Wm. Scott, Emily Pierson, Winter Cheer, Della Fox and Mme. Diaz Albertini. For these a rather cool temperature is maintained, thus greatly extending their flowering.

Callas are made to flower very abundantly by the following treatment: After flowering time the plants are dried off in May and planted out in rich loam in July. In September they are lifted into 8-inch pots, and are taken indoors before frost. When in the greenhouse, manure water is given three times a week. A splendid batch of sixty plants testifies to the success attending this manner of securing large flowers and plenty of them.

Bouvardias, stevias and other plants, valuable in a gentleman's establishment for winter flower supplies are grown in

VIEW IN THE GARDENS OF THE HON. FRANK JONES, PORTSMOUTH, N. H.

shallow boxes, six plants in each. They can be brought along for succession or display and easily moved out when desired to give place to other plant boxes. The boxes are made of a size to fit the stages, hence no space is lost. This plan may afford a hint to others who desire to do away in part with solid beds and the handling of single pot plants. Cinerarias were being given their last shift into 8-inch pots; 50° was their temperature at night.

The palm houses were filled with a collection of the well known varieties in excellent condition. Intermingled were good specimens of marantas, dracænas, nephrolepis, crotons, etc. A house full of the newer varieties of zonal and other geraniums was in a blaze of bloom. The chrysanthemum exhibition just past was open to the public day and evening. Under a perfect blaze of electric light the great house filled with splendidly flowered plants in every conceivable hue was a sight not soon to be forgotten. At the time of our visit, the gardeners were busy shipping boxes and packages of the cut blooms sent by Mr. and Mrs. Jones to many hospitals and other charitable institutions. What a cold world ours would be if we were bereft of those who try to make others happy.

ROBERT FARQUHAR.

A New Rose Disease.

From Wiesbaden, Germany, a new disease of the La France rose is reported by *Rosenzeitung*. So serious is the trouble and so fatal in its attacks that a commercial grower expresses the fear that this variety cannot persist in infected localities more than three or four years longer, unless a remedy is provided.

The trouble was first observed four years ago. The disease makes its appearance just before the flowering period. Individual plants (not always those standing next each other) wilt, wither and in a few days lose their foliage. Others are attacked and in a short time all are destroyed. If a plant is pulled up, the roots are found to be perfectly sound. A microscopic examination of them reveals no suspicious appearance. When the crown of the plant is examined nothing unusual is found. One is led then to suspect that the disease is caused by a fungus or bacterium working within the tissues of the plant.

The disease has a very striking and at the same time fortunate peculiarity, in that, so far as known, it attacks only La France or its white sport. It has never been observed on any other variety no matter how near together the plants might grow. This peculiarity becomes still more singular when we consider that La France is one of the freest varieties from disease. It is further noteworthy that the disease has not yet been observed on plants grown in pots.

It is to be hoped that this new disease will not prove to be so serious as this first report represents it. We shall await further notes upon it with interest.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

PASTIMES lag at holiday time. Steady attention to business now furnishes the wherewithal for recreation at the proper time hereafter. The alleys and balls will have but a brief respite for spring will soon be here and the great Detroit event looms up in the distance. We hope the holiday rush will bring substantial returns to all.

With Chicago Bowlers.

Because of the holiday rush not one bowler presented himself at the alleys last Friday night. On the first Thursday evening in January the prize medal contests will begin and will continue twice a month through January, February and March, four games being rolled at each session.

Hitchings & Company's Annual Ball.

The employers and employes of the well known firm of Hitchings & Co., greenhouse builders and manufacturers of heating and ventilating apparatus, numbering three hundred strong, with offices and factory at 233 Mercer street, New York City, and foundry in Jersey City, will congregate at Columbia Hall in Jersey City on the evening of January 31, with their relatives and friends, wives and sweethearts, to celebrate their Grand Annual Ball. Gardeners generally and friends of the company are cordially invited to attend. Tickets may be had by addressing Mr. J. McArthur, chairman entertainment committee, care of above company.

Bowling in New Jersey.

The New Jersey Florists' Bowling Club promises to cut a large figure in the reckoning to be done at Detroit next August. Practice is kept up regularly on Friday nights and some excellent scores are being made, Walter Gray having scored a 230 in the last game, with others up to the double century mark. Here is the record of the past two weeks:

G. V. Q.

A Model Store.

The firm of J. J. Habermehl's Sons, Philadelphia, has recently erected a very handsome showroom and store, which, together with the large greenhouse in the rear, built at the same time, makes their establishment one of the most complete in the city.

The store proper is twenty-eight feet wide by thirty in depth and has two beautiful show windows which round in with curved glass on either side of the entrance. The north window is fifteen feet wide and when decorated is one of the handsomest in the city. The entire front, except the plate glass, is made of sheet copper and presents a very ornamental appearance. The interior is fitted up with great care, the floor is laid with the latest tile design. The wood work is enameled white, the counter is of white tile, the large flower case, twelve feet long by nine high, is of quartered oak, the bottom and base board inside is white tile, while above, at the back and ends mirrors reflect the contents. The ice chamber at the top is concealed outside by beveled mirrors. Plate glass divides the compartments, which, with the sliding doors makes the case complete and up-to-date in every respect.

The illumination of the store is by electricity on fixtures of the latest design. A very neat and complete office and cashier's desk occupies a corner alongside of which is placed some rattan furniture and palms in ornamental vases. The greenhouse, opening out at the rear, is about one hundred feet long and filled with fine palms and other choice house plants. A large, light, cemented cellar and work room under the store is a most important addition.

There are a number of other greenhouses; in fact the establishment occupies a city block at Twenty-second and Diamond streets, nearly the entire lot being built over. The proprietors, John and Edward Habermehl, succeeded their father, now deceased, who established the business over thirty years ago. John is the Captain Jack of the Florists' Club bowling team and finds time between his business rushes to give the boys a rub at the game, at which he is a champion.

K.

Vanda Caerulea.

When a place is found suitable for this most beautiful blue orchid it thrives and during the autumn months produces long racemes of unequalled flowers as regards color. But how many of us can do the plants really well for long? Imported plants go away and promise to give the lie direct to those who assert that it cannot be kept in good condition under cultivation, but, alas, in a few months the spotting of the foliage commences, a tiny speck at first; but gradually and surely, it gets larger until you feel constrained to out with your knife and cut the affected part away. This, of course, removes the unsightly part, and to outward appearance it seems all right, but you know in your inmost heart that something is wrong with the atmospheric condition or the treatment it otherwise receives; but what? That's the point. We have seen them growing in a temperature that rarely falls below 60° at night; and also in houses that go down to 45° with almost the same result. This year we are trying them grown quite cool, that is, as cool as the odontoglossums with which they find a place. It is, however, early yet to give an opinion, as almost anything will grow in the cool house during the summer months; but if looks and healthy green foliage count for anything, we have made a decided advance. I may say that we shall keep them dry at the roots as soon as cold weather sets in.—*C. in the Gardening World.*

Begonia Gloire de Lorraine.

As this fine winter flowering plant is coming so rapidly to the front rank, it has occurred to me to ask if anyone has noticed that there are two very distinct varieties of it in commerce. They are as distinct as the Bridesmaid and Mermet roses and the difference is noticeable all through the growing season. Our plants were derived from four sources and among them were some that never showed the mottling of yellow in the foliage, the growth was stronger, and now that the plants are in bloom the flowers are pink and not rose colored, larger and the clusters more dense. The color of this variety is more pleasing to some and it would be interesting to know if the difference has been noted elsewhere.

DEALERS PLEASED WITH THEIR EXPERIENCES WITH LOCAL WHOLESALE HOUSES.—JOTTINGS AMONG THE TRADE.—DEATH OF JAMES SEMPLE'S GRANDCHILD.

The dealers are very much pleased with their first Christmas experience of having two first-class wholesale houses to deal with and, judging from the trade both houses have built up since starting in October and the satisfaction both are giving, their venture is emphatically a success.

John Bader, Allegheny, reports his trade at Christmas very good indeed, especially in decorative plants. He also sold several car loads of Christmas trees and greens at prices a little better than last year.

Gustav Ludwig, Allegheny Market, enjoyed a large holiday trade and, in addition to his cut flower business, he handled several car loads of trees, the majority of them brought from Massachusetts.

Lincoln I. Neft reports business at his four stores as more than meeting his expectations.

E. C. Ludwig, Allegheny Market, did a better Christmas trade than for several years past, the improvement being very marked in the cut flower department.

James Semple's Christmas was saddened by the death of his only grandchild, a boy two and one-half years of age. He was buried on Monday, the mother, Mr. Semple's only child, and the father both were unable to attend the funeral, being ill with the grip.

Mrs. E. A. Williams says business this Christmas with her was a great improvement over last year. J. F. Gibbs & Son report a good increase in volume of business and Gibbs & Sunshine also report a good trade. REGIA.

Rochester, N. Y.

During November and the first half of December, prices for cut flowers were reasonably low and our florists anticipated no great change for the holiday trade, though an advance was expected all along the line. The sudden jump to the top notch was a surprise to everybody and especially to the habitual flower-buyers, who had been quite confident of obtaining a generous box of fine roses or other flowers, at prices not far above the ordinary figure. They were sadly disappointed and had to pay as high as ever before for the posies, excepting perhaps carnations, which had come into market unexpectedly plentiful, last week's fair and mild weather having brought out great quantities of them.

High prices, in the cut flower line, induced many people to buy plants of some description instead; more of these were disposed of than ever before. The plant trade for the holidays is growing with every year and, although most of our growers thought they were amply prepared to meet a largely increased demand for the blooming plants, they found themselves short at the last moment.

John Dobbertin was recently swindled out of a wagon load of palms and decorative plants in the usual way. Only three or four plants have been recovered. J. B. K.

AURORA, ILL.—Only a small part of the establishment of W. L. Smith was affected by the recent mishap to his boilers and by hard work and good fortune he was able to escape without damage to any of his stock.

DREER'S SUPERB **Double Fringed Petunias**

FOR thirty-five years We have made a Specialty of the PETUNIA. This year we again offer a set of fifteen varieties, unsurpassed either in this country or abroad. The plants are well established in three-inch pots, full of vigor, and will furnish quantities of cuttings in a short time.

These plants must not be compared in price with rooted cuttings or plants just potted off. The set is composed of the finest colors, especially suited for the retail trade. $1.00 per doz., $8.00 per 100. The set of 15 varieties for $1.25. DOUBLE FRINGED PETUNIA SEED, our own saving, 75 cts. per 500 seeds; $1.50 per 1000 seeds.

SPLENDID CHRISTMAS FOLLOWS A DULL NOVEMBER. — THREE POINTS WORTH MEMORIZING.—FEW FLOWERING PLANTS OFFERED.—THE VARIOUS STORE DECORATIONS —NOTES AND COMMENTS.

The florists of this city generally complained of dullness of trade in November but business began to improve toward the latter part of that month and has been good since the middle of December. The demand for choice stock was so firm that the high prices for Christmas were not complained of and the number of cut flowers handled here was much larger than at any previous Christmas. Some dealers worked all Saturday night for Sunday delivery and orders Monday could only be partially filled.

Three points demonstrated by this season's business are worthy of special notice by growers in this vicinity. The increased proportion of fancy stock is the cause of ready selling; the shortage of red flowers was a fair indication of what must be done to hold trade another year; and it is a surprise to note the surplus of violets.

The plant trade was good, but was confined principally to palms. There were but few blooming plants offered. In this line there has not been any well directed effort for Christmas by local growers, and the urgent appeal from the retailers should generate a greater spirit of enterprise.

While all the stores made good window displays among the best was that of Volk & Stewart, who displayed poinsettia plants, Asparagus Sprengerii, Harrisii lilies and Pandanus Veitchii as a setting for cut flowers. Alex. Klokner's window was exceptionally well arranged but was so constantly covered with mistletoe that it did not do the advertising it should have done. Fox's window was varied and revealed the principal counter well laden with flowers with Miss Ryan serving several customers at once, which was attractive. McKenny's was principally cut blooms in clusters, but one color. The Curries had a very large holly wreath with a small ribbon with palms and ferns. Ben. Gregory had a pretty lot of stock but the rebuilding of the Plankington house interfered with his trade. English's window was all bloom. The Paris Floral Co.'s outside show cases were neatly trimmed, there being no opportunity for window display. Binzel & Kellner, Baumgartner and Edletsen, who take good care of Third street trade, each showed plants in fair proportion to cut blooms. One noticeable feature this season was the increased number of orders that were received days ahead, which enabled us to calculate more accurately what to purchase.

Stevia has been quite prominent in decorations this season.

The large single violets are beginning to find favor.

While the weather has not been disagreeable, growers have used ten per cent more coal than is usual up to this time of year.

Robert Currie, of Wauwatosa, has been sending violets that have raised the standard considerably. Oconomowoc will have to look to her laurels.

C. B. W.

TOLEDO, O.—Plans for the range of city greenhouses have been revised and the growing houses made much smaller to come within the appropriation.

THIS IS IT.

HOLIDAY TIMES IN THE BISON CITY.—PLANT SALES LARGE.—THRALL'S NEW STORE.—KASTING'S ENDEAVORS.

Christmas trade did not get serious until Friday and not until about 10 a. m. Saturday did it get down to an old-fashioned Christmas crowd.

Carnations were decidedly scarce. American Beauties were sold at from $15 to $24 per dozen, more at $18 than any other price, and I think that some that bought Beauties were wearing suits of clothes made in one of the stores that has a big sign on the front "$15, no more, no less." But such is life and we look on.

Violets were good and sold at 75 cen to $1 per bunch; they seem to be getting more popular all the time. Palms, principally kentias and arecas, sold well. Cyclamens, azaleas and primroses sold readily, but the supply was not large, still, I think, was enough to go around.

Starting in last Monday every florist had funeral work and it kept up all the week, Christmas included.

A. L. Thrall branched out on Friday with an annex down town and a fine white wagon with gold letters on it.

Wm. F. Kasting had a good stock and everyone went away from there satisfied, at least they should have been, for he tried to please all and divide the carnations so we could all get some. If we had wanted tooth picks all could have had their full order.

As soon as the holiday rush is over another meeting of the club will be held, when we will try and organize a bowling club. W. A.

Heating Notes.

"Poor iron," is usually the fireman's excuse for burnt out grates, but poor management is more often the true reason. Grates may be melted out in a few hours if the pit is left full of ashes, whereas with a clean ash pit, that is, where ashes are never nearer the bottom of the grates than six or eight inches, grates will last for years. I have known of grates being in continuous use for thirteen years, where the boiler was of ample capacity, so as not to require excessive firing, and the ash pit was cleaned out at least once every day. The trouble in connection with a burnt out or broken grate is not alone the cost of a new one, but the difficulty of maintaining a perfect and even fire while waiting for the new grate to arrive. It will pay to keep an eye on the ash pits. HENRY W. GIBBONS.

Newport, R. I.

The annaul election of officers for the Newport Horticultural Society takes place December 28 and at the conclusion of the meeting a social session occurs. A number of the present officers have announced their intention of stepping down to allow others a chance to show their capabilities. The society has made much progress in its work in the past year.

The Christmas trade here did not amount to much. There was a scarcity of violets and carnations. There are shipped daily from Carl Jurgens' place fine roses and lily of the valley. Mr. Jurgens is at present on a visit to Jamaica in the West Indies. J. B.

SYRACUSE, N. Y.—In 1862 P. R. Quinlan took charge of two small houses belonging to Smith & Powell, nurserymen. To-day Quinlan & Co., have a range of thirty-two modern structures.

GREENHOUSE WOODWORK.

Open-air-dried Cypress Lumber is more durable, and better suited to Greenhouse conditions, than kiln-dried stock. But you cannot get it from those that are engaged in the business in a small way—even though their entire business is confined to greenhouse material—for it takes a long time for the lumber to thoroughly dry and this means an investment in lumber that only those of large capital can make. The only way to have air-dried lumber is to buy green lumber and hold it until it dries. Those that order dry lumber from the producers of Cypress get kiln-dried stock. It is cheaper for them to kiln-dry than to hold the stock long enough to season it in the open air. We carry a large stock and fill all orders with open-air-dried Cypress clear of knots, sap and all other defects.

Novelties of Recent Introduction and Talk on Some Coming Claimants.

[Abstract of a paper read before the Florists' Club of Philadelphia by A. Blanc, January 3, 1899.]

I have been asked to read a paper on novelties of the past and future, though why this honor has been accorded to me is somewhat of an enigma, as many of you are better posted on the subject. However, I will do what I can under the circumstances.

It has been said that novelties are the staff of life for florists and seedsmen; and it is true that many most prosperous in the business owe their first success to some taking novelty in plants or seeds, which carried them on the tide that led to fortune.

By thousands who take an interest in the new plants introduced from year to year it is to be regretted that the publication of Professor Bailey's "Annals of Horticulture" was discontinued. It was an invaluable work on that subject and on horticulture in general. It is greatly missed by many, as to-day there is no work to take its place..

To show how few novelties eventually become popular, I might say that in 1891 884 species and varieties supposed to be new were introduced to the American trade—including vegetables and fruits; and I fear that not ten of them are grown in or near Philadelphia at this time. We may perhaps find one or two carnations and chrysanthemums.

One of the first sensational novelties introduced in this neighborhood was chrysanthemum Philadelphia, raised by Mr. Graham. It did more to advertise our city as a chrysanthemum-growing center than any other plant I know of, and was certainly far ahead of anything raised up to that date. Since then it has been eclipsed by Pennsylvania, Carnot, and no doubt by several others.

The chrysanthemum which is good enough to receive a certificate nowadays is hard to improve upon and the acme of perfection seems attained. I read in a foreign journal that the latest introductions of the most celebrated French chrysanthemist, to whom we always looked for something grand, are very disappointing and actually not worth growing.

My opportunities for studying the new chrysanthemums have been so limited that I shall have to refer you to the list of varieties certificated lately published in the trade papers, as it would take too much of your time to give even a list of the meritorious ones.

Chrysanthemum Ivory is probably the best for all commercial purposes to date, but, as usual with a good thing, every one has grown it in excess of the demand, and as a result the flowers have been sold at a loss. It may therefore be discarded for some other variety newer but of less merit.

The chrysanthemum we do want, I suppose, is one that will bloom continuously from September until Easter, bearing immense, sweet-scented flowers of various colors on one plant—including blue, I dare say. I hear that one is to be offered in New York which is said to bloom from July until New Year, and even later, and is perfectly hardy in the open ground.

ROSES.

In roses we have forgotten Her Majesty, Wm. Francis Bennett and hundreds of others supposed to be grand acquisitions; but it is a pleasure to note that American Beauty, the Bride and Bridesmaid (the latter two roses of American introduction) are today the most popular forcing roses in this country.

President Carnot has hosts of admirers. The trouble with it is that it will go to rest in January and February; yet some of our best growers still hold on to it and will bring it in for Easter, spring and summer, when it is at its best. Its distinct shade makes it always a seller.

It is a great pity we have discarded Madame Hoste, Mrs. Morgan, Madame de Watteville and others of this class, as every flower shop in the land feels the need of more variety. The man who will grow a houseful of each of these is sure to find a sale for them at a high price.

What we now want is a yellow Bridesmaid with the color of Marechal Neil. The man who gets it need not be afraid to ask $5,000 for it.

Crimson Rambler certainly jumped into favor with less trouble than any rose introduced for years. It is bound to be found in the gardens of our grandchildren. Those who have seen the hedges of it with thousands of clusters in full bloom can never forget the glorious sight.

Its three sisters, Aglaia, Thalia and Euphrosyne, have not given the same satisfaction everywhere, being much less hardy and not so suitable for forcing.

Royal Cluster is the name of the new hardy rose to be sent out by the Conard & Jones Co. this year. It is the result of a cross between the Dawson and the Hermosa. It bears clusters of over 100 flowers, the color of which is white tinted with blush. It has the advantage over Crimson Rambler of having a spicy fragrance, and apparently possesses all the good qualities of Crimson Rambler, which is saying a great deal.

Mr. Manda's hybrid Wichuraianas, Triumph, South Orange Perfection, Universal Favorite, Pink Roamer, are fine things for the garden; and his very latest evergreen

hybrids, Jersey Beauty, Gardenia and Evergreen Gem are claimed by those who know to be of immense value for garden purposes, and sure to be grown in all parts of the world.

It is a pleasure to note that the Lord Penzance sweet briars have found many admirers in this country. The new colors found among them make them desirable for amateurs as well as for parks and large gardens.

Much was expected of Carmine Pillar which is such a great favorite in English gardens; but, like the Rugosa roses, it does not seem to please the American fancy.

The Climbing Kaiserin (or Mrs. Peary), a sport from Kaiserin, originated in Wilmington and also with Mr. Chas. Cox, of Philadelphia, will prove a valuable rose for the south; and, if hardy, equally so for the north. The same may be said of Climbing Meteor.

Climbing Wootton is now claimed to have proved hardy in this latitude, and is a fine rose for porches or pillars, growing from ten to twelve feet in one season.

No better name than Liberty could have been selected for a new rose, and we congratulate the raiser upon his choice, which will help to make it popular here. It is of a better and more uniform color than Meteor and has not the fault of producing flowers of too dark a color. In this respect Liberty has a decided advantage. It is grown now by Mr. Asmus and Mr. Alexander Scott and will not be sent out until 1900.

Clara Barton, originated in the west, is a sport from Bridesmaid. It is darker and said to be a very distinct shade.

While some grand roses have been raised in America within the last few years, we regret that we are still far behind the English rose grower who some time since advertised to send, all for one shilling, a blue rose, a green rose and a rose as big as a cart wheel. Likewise we are outdone by the Russian gentleman who is said to possess a really black rose.

Of the hundreds of French roses sent over at very high prices, none are suitable for forcing in winter and consequently the demand for them has greatly diminished.

CARNATIONS.

So many good new carnations have been introduced within the last few years that it would exhaust your patience to talk about them. Besides you know more of them than I do. It is to be regretted that the prices obtained for cut-flowers make it more and more difficult to grow carnations at a profit, even with the most exhaustive care and the most economic management. In future it will only pay to grow the best varieties, such as White Cloud, Flora Hill, Evelina, in whites; Victor, Triumph, Argyle, Mrs. Joost and others of that class in pinks. Melba is the best among the pinks. It is owned by Robert Craig & Son and John N. May.

A good red one is badly needed, and this want will be supplied next spring by Mr. Fred. Dorner with W. H. Crane. This variety is equal in size to Jubilee, of as fine a color, and has the advantage of being much freer in bloom.

Among other notable newcomers will be J. Whitcomb Riley, a delicately variegated pink and white variety of immense size and many good qualities. It was raised by Mr. E. G. Hill and is now owned by Messrs. Dailledouze Bros. and Mr. Asmus.

Maceo is a dark crimson, a very free bloomer raised by Mr. C. W. Ward, who also has Gomez, a crimson as well, brighter and better in color but not nearly so free a bloomer as Maceo.

Mars is a superb scarlet. It is doubtful, however, that it will be sent out the coming season. America, by E. G. Hill, is a red one of great promise.

Mrs. Lawson is probably the finest pink in existence for forcing. It will not, however, be disseminated until the spring of 1900. It is currently reported that $5,000 has been refused for the stock of this variety, and the report seems to be true. Did the owner make a mistake in refusing?

CANNAS.

The word canna seems to give most growers the grip. They have got them badly and cannot get rid of them. To-day you can buy them for a song. The cause is again over-production; and while the demand has doubled or trebled every year, the supply is always too great. Think of one man getting 300 pounds of seed from his patch of cannas, and then imagine how many roots he must have lifted! I have known, however, of foreign varieties, costing $3 to $4 each, being left in the ground to freeze.

There is said to be an edible canna—and if all cannas were only so, what a paying crop they would be.

In the raising of new and superior cannas we have within the last few years totally eclipsed and displaced the French ones upon which we used to rely altogether. To-day thousands of American cannas are sent abroad, not only to France, but also to every part of Europe, Asia, Africa and even Australia.

You will not make a mistake in growing Philadelphia, President McKinley, President Cleveland, Menelek, Duke of Marlborough and Champion as the best reds; Mlle. Berat, Mary Washington, Duchess of Marlborough as the best pinks; Yellow Crozy and Topaz as pure yellows; Klondike as the only true orange; Rosemawr as the best salmon; Maiden's Blush as the best rosy flesh; Gloriosa and Cuba as the best gilt-edged sorts; and Florence Vaughan as still the best spotted variety to date. Black Beauty is not only a beautiful dark-leaved sort for bedding, but could well be grown as a decorative plant.

Probably every one of these may be superseded by newer and better varieties before long. It is edifying to know that in the raising of new cannas we can still report progress.

DAHLIAS.

In dahlias some of us think we beat the world; but I guess it may be easier to beat the Spaniards. Although I am personally a great admirer of the dahlia and have endeavored to help the boom, yet I begin to believe my friend Mr. Craig when he says, "Drop them." In Pennsylvania, at least, it is a losing business. But if I had the knowledge of their requirements and the warm, sandy soil that our enthusiastic friend, Mr. Peacock, has at his command, no flower would be more delightful to grow.

In dahlia novelties we are far behind the English growers. None of the latest and best cactus dahlias—now the only class popular in England—have been grown, or at least shown, in this country. If they are as far superior to the variety Gloriosa and others shown here as they are said to be, and will bloom as early or earlier, then indeed there is a grand future in store for them. You all know what splendid exhibitions were made in this hall of such fine flowers as Grand Duke Alexis, Clifford W. Bruton, Wm. Agnew, and other prize winners; and I am sure that Mr. Peacock has some great surprises up his sleeve, with which he will fill this hall next autumn.

FERNS AND ASPARAGUS.

The fern that has invaded every household and delighted its purchasers perhaps more than any other plant is certainly the Boston fern. How quickly it has become popular is well known to you. It was raised near Boston and sent to Kew for a name. Nephrolepis Bostoniensis was suggested and adopted. It is one of the very few things of which there was not enough to go around on Christmas. Orders for hundreds of plants in 6-inch pots at $1 each could not be filled. It is much more graceful than the old Nephrolepis exaltata, which, however, it closely resembles, and seems to stand rough treatment even better. It seems good for a few years to come, and I hear it is to be grown even more extensively than at present.

You will soon learn of a new giant nephrolepis from Washington, the stock of which is now in possession of Mr. N. Studer and Mr. John H. Ley, who will put it on the market next spring. It is to be called N. Washingtoniensis. Its proportions are enormous, the fronds growing to a length of eight feet, and a foot in width. It's going to come high, like—but I guess we'll have to have it. As a fine large leaf for decorative purposes it is likely to prove useful and valuable.

Asparagus Sprengerii, by some called emerald feather, which I believe I helped to introduce, is another most welcome addition to the list of plants that you cannot well do without. Some big asparagus growers said it would not take, and perhaps they are not growing it yet; but it is safe to say that half a million plants have been raised from the seed alone this year. Being so handy for many purposes and not liable to go back, even in the hands of inexperienced persons, it will continue to be grown very extensively. Many new seedlings of it have appeared lately. I know of six very distinct ones, all of which have merit. One is an almost erect grower; another is of drooping habit with secondary branches growing upwards, or rather backwards; still another is nearly pure white.

BEGONIAS.

Begonia Gloire de Lorraine is the best commercial begonia introduced within the last decade. It is very difficult to propagate in winter, because it produces none but flowering wood. But in spring it sends suckers from the base, which are readily rooted and grow freely during the hot summer months. They begin to flower in great abundance when the weather becomes cool in the fall. As a Christmas pot-plant it has no superior. Specimens grown in 7-inch pots, 18 inches by 18 through, sold readily at $30 per dozen, and in some cases at $48. That's pretty good for plants grown in summer and without much cost for fuel. I believe it has come to stay.

Duke Zeppelin is a most useful and attractive tuberous variety, and will become a favorite for bedding. It stands the sun better than any other begonia I know of, is very dwarf in growth and is not approached by any other in brilliancy of its color. It is a dazzling scarlet and very double. It is a German variety, introduced by the Dreer company.

A new double-flowering Begonia Vernon is soon to be placed upon the market. Its color is very bright and the flowers are of fair size.

While on the subject of begonias I

CYPRIPEDIUM BELLATULUM AND ADIANTUMS.—SEE NEXT PAGE.

should mention that some superb Rex varieties have been offered recently, notably Princess Charles of Denmark, but unfortunately this class has been attacked by a fungoid disease which destroys the leaves and frequently kills the plant. The disease is common in many sections of this country and in England.

MISCELLANEOUS.

A plant which has apparently escaped your notice is Campanula Mirabilis, of which the English journals speak in most enthusiastic terms as a free-blooming pot-plant. The bellflowers have been considered hard to grow, at least in the east, but I don't know what Mr. Thorpe would have done without them at the World's Fair. It is to be hoped that some of our energetic members will give this variety a chance. The seed is offered by Dreer and by Michell.

The fin de siecle novelty was thought to be Acalypha Sanderi; and no more interesting plant could be desired. Although it is now said to have been known and described under four or five different names years and years ago, Mr. Sander, of St. Albans, should be given great praise for re-introducing it. No other plant has created such a sensation here or abroad. It seems to take the fancy of the public as well as of the grower. Its success is assured, and I know positively that orders for 5,000 lots had to be refused, even for future delivery. This ought to be a pointer to those who have a stock of it. Few of you may know that it is a climber, reaching a height of eight to ten feet. Its drooping flower-spikes, or floral tails, as some have called them, must then be very attractive. Its proper name is Acalypha hispida, but some think a popular name is required. One party has suggested the crimson cat's tail or the cat's crimson tail, which is about as bad as "Caterus caudatus," under which it was known years ago.

Among the plants that will be offered as new this year are many that will be found worth growing even by florists. Not the least important is Primula Forbesi or the baby primrose, which has suddenly become a favorite and in great demand. Perhaps you have all seen it lately, and yet you may not realize what a very good thing it is. When I tell you it begins to bloom while small enough to grow in a thimble—blooms ten months a year in succession—fills six-inch pots in about four months or large pans in about six, and then carries fifty to 100 flower spikes at one time; when I say that this week I saw some flowers which were cut Thanksgiving day and were not wilted yet—that $2 per 100 has been paid for the sprays—that it can be grown in a cold house or in frames where Marie Louise violets will bloom—then you will not wonder that I am enthusiastic about it. The man who has a houseful of it by Easter ought to coin money. It can be benched closely and makes an elegant pot plant, salable at any time while in bloom.

Another good pot plant is Ruellia Mackoyana, a Belgian novelty recently exhibited at Ghent. It is a fine plant for growing in shady places, where others would die. Its dark, velvety olive-green foliage, veined with white, is quite ornamental, and its carmine red flowers appear during nearly the entire year. It has been twice color-plated in Europe—an honor accorded only to good things. It will soon be offered by the thousands.

It will surprise many of you gentlemen to learn that some fifty new seedling crotons raised by Mr. Lonsdale promise to outshine many of the finest European importations. You will hear of them in the near future and they will create special interest, as they are American grown. A new variety from Europe, named Aigsworth's Gem is also said to be a veritable treasure.

Hibiscus Peach Blow, a beautiful double pink sport from a double scarlet, is now being worked up by Messrs. Robert Craig & Son. It is a fine thing, making dwarf, dense, bush-like plants; an excellent bedder, very freely covered with blooms during the entire season.

A really new thing is Childsia Wercklei, a native of Costa Rica, named at Kew and to be offered this year by Mr. Childs, of New York. This "Treasure Vine" is a rapid and early climber, bearing large orange-scarlet flowers closely resembling a cosmos. To me it is a very interesting and beautiful plant.

Almost identical to the above in the form and color of its flowers is the new, early-flowering, Cosmos Klondike, a Mexican plant improved upon by Mr. A. W. Smith, of Americus, Ga., for whom it blooms as early as May 15. If it would only do so here, the florists would have something fine to cut early. The flowers are quite large and a bright orange. The foliage is substantial and the stems long.

It is easy to recognize that only the very best plants remain popular for any length of time. Among these may be classed the Otaheite orange—and, by the the way, I am sure that the Japanese Kumquat, if taken in hand by Mr. Harris and others, would prove even more popular, as it bears a greater number of

fruits, which, although smaller, are delicious to eat and can be ripened on plants not over a foot high. Others that will remain popular are: Bougainvillea Sanderiana, Carex Japonica, Phrynium variegatum, Livistonia rotundifolia, Abutilon Savitzi, Justicia flava, J. velutina and even Solanum Wendlandi—and the grand Clematis paniculata which, even as a pot plant, sold at $10 each.

For the garden we have been favored with more good new plants than at any time before. Most of them are of recent introduction and have come to stay. Probably the best of all new garden plants is the double Rudbeckia Golden Glow. I have not heard any one say a word against it—and that is indeed wonderful. Its long-stemmed double golden flowers are of great use to the florist.

Caryopteris Mastacanthus is perhaps nearly as good and is to be found in almost every garden. I have seen it loaded with lavender-blue flowers until the end of November, hundreds of bees, frozen stiff, nestling on the sprays. Just imagine a large bunch of it displayed on a table, bees and all! This year a white-flowering variety is offered—a much earlier and even more profuse bloomer. Whether it will prove as hardy remains to be seen.

Spiræa Anthony Waterer has become a favorite; likewise several new deutzias, among which the best seen to this date is the variety Lemoinei, which is still more useful for forcing. This, however, though with us only a year or so, will soon have to give place to Deutzia Lemoinei compacta, claimed to be dwarfer and more floriferous. Deutzia corymbiflora, lately illustrated in the AMERICAN FLORIST, is said to be so completely laden with white flowers as to appear like a huge snow-ball. We might have called it Snow in Summer, had this name not been already taken.

Sambucus racemosa plumosa aurea is a long name for a new golden-leaved elder which far exceeds in beauty any golden-leaved shrub known at present.

Astilbe Chinensis, a rather tall-growing spiræa, is simultaneously offered here and abroad. It has been sent to England for re-shipment to Holland in 1000 lots at low prices; and yet I hear that some firms are bringing it over and paying $2 per plant for it. Watching the advertising columns would have saved them considerable money.

What promises to be a fine addition to the garden is Buddleia variabilis, a fine, tall-growing shrub with handsome foliage, dark green above and silvery white below, bearing in a graceful manner very long recurving spikes of rosy-lilac flowers. The buddleias have not been favorites, but this one is so very highly recommended by Messrs. Vilmorin, that we may give it a prominent place without fear of being disappointed. Besides the above there are many others, such as Incarvillea Delavayi and variabilis, new aruncus, new anemones, new clematises such as Marcel Moser and Nellie Moser, and new hardy asters.

Grasses have never been very popular, but there is one which, never seen in gardens until the last two years, invariably elicits words of admiration. Its name, however, Pennistum Ruppellianum, will prove as killing to it as a severe frost. Purple feather grass seems more euphonious. Raised from seed it quickly attains large proportions, sending forth hundreds of silky, bending blades terminated by purple feather-like heads six to ten inches long. They are quite new in color and fine for floral work. It makes an elegant pot plant in a very short time from seed and is fine for table decoration even when in a small state.

Sweet peas are still the rage. New and important varieties are offered every year, nearly all the best ones being sent out from this city. We will soon have sweet Cupids in all colors, red, white and blue. Mr. Burpee introduced among others three remarkably fine sweet peas which every florist in the land should grow in quantities. Burpee's Earliest of All is the early bird that catches the dollars. It is identical with Extra Early Blanch Ferry except that it is more dwarf in growth and comes into full bloom at least ten days earlier. Eckford's Sadie Burpee is extremely dainty in shape and of a pearly whiteness beyond description. Burpee's Navy Blue is a distinct color innovation that will create surprise.

Now if you really want good things and new, don't confine yourself to this list by any means, as no doubt hundreds of good ones have been overlooked. Scan the advertising columns of the trade journals carefully. Something new is always to be found therein that will save you money.

Why, the other day a man was trying to sell me seed of a supposed novelty at $12 a pound—twenty pounds was all there was of it. I happened to glance over the columns of an anniversary number and lo! the first thing that caught my eye was an offer of the very same thing at 25 cents per pound! Did he feel cheap? Well I guess. I bought fifty pounds for $12.50 and saved $587.50.

The catalogues, which are beginning to come in by the basketful, will be a source of comfort and instruction to us. We should read them carefully and learn how little we know about our business. Here, for instance, is a description of a plant which to my knowledge has been offered in many catalogues for the last fifteen or twenty years. How many of you will recognize it? I should like to take a vote upon its name after I have read the description. You will all acknowledge that it must be the most beautiful thing under the sun, and blame yourselves for not tumbling to it sooner:

"The hardiest of hardy climbing vines. For many years we have been in quest of this beautiful hardy climbing vine, which might be well called the carmine wistaria, so similar are the lovely clusters of flowers with those of the wistaria. Apart from the similarity of the flowers, it differs from the wistaria in many ways. We believe it to be one of the most beautiful as well as one of the rarest hardy climbers in existence, and we have the distinction of being the only house to offer it at any price. Absolutely hardy, once planted it is practically everlasting. The foliage as well as the habit of growth resembles Ampelopsis Veitchii, one of the most popular and valuable of hardy climbers. It surpasses A. Veitchii, however, inasmuch as it produces immense clusters of the most exquisite flowers imaginable. The flowers are borne in prodigious profusion, and a well established plant, loaded with its gorgeous carmine flowers, is one of the grandest sights we have ever seen. Imagine a plant of Ampelopsis Veitchii with its magnificent, large, deep-green foliage covering the entire side of an ordinary dwelling, loaded down with large clusters of carmine flowers—and you can form an idea of the splendor of this novelty.

"Like Ampelopsis Veitchii, it is freely furnished with long tendrils that attach themselves firmly to stone, brick or wooden walls. It grows with the greatest rapidity and soon covers a large area. It is absolutely hardy and can adapt itself to any soil, locality or exposure. For covering posts, pillars, residences, etc., it will supersede many of the now popular hardy climbers. It covers all with an even, uniform mat of dark green foliage, which in autumn changes to brilliant crimson.

"This is really a wonderful novelty, which will excite the admiration of the botanist as well as that of the amateur planter. It is one of our grandest introductions, sure to become immensely popular because of its handsome foliage, hardiness and, lastly, its superb, brilliant flowers.

"We make the price low for strong plants. This is one of the plants you will be sorry to have missed getting when you see it growing and blooming. By all means take our advice and include three plants, at least, in your order."

Do you recognize it, gentlemen?

Cypripedium Bellatulum.

The illustration of the group of this beautiful cypripedium shows a very good example of the successful culture of a rather difficult subject. There is no trouble in growing it for a year or two after importation, but as time goes on it seems to get more delicate in constitution and very susceptible to decay at the base of the leaves if moisture reaches the plant from above. This trouble we find is more prevalent if the temperature is kept high, but on removal to the more airy and drier cattleya house, it has altogether disappeared and the plants are thriving. We were induced to buy largely of this cypripedium because of its value as a boutonniere flower, and the flowers are used entirely for this purpose. We have failed to get any results from it as a parent in hybridizing, but others have succeeded and its progeny are among the most valued by the connoisseurs.

This species seems to be widely distributed through the islands of the China Sea, and it has also been found in quantity in the Shan States from whence came C. Charlsworthii and also a most beautiful form of C. bellatulum, the only pure white one known, and to me the most desirable plant of this family. The variety has additional good qualities in being a vigorous plant, much more so than the type, easy to grow, flower and increase. When potting cypripediums of this section, which also includes C. concolor, C. Godefroyæ, C. niveum and others, it is well to add, if procurable, instead of crocks, a few pieces of limestone, as the roots cling to it with tenacity; they are found growing on limestone rocks. It is also best to use nothing but good fibrous loam instead of the usual mixture, and if when potting, there is at least half an inch left for water to be applied, it will be easy to give it without wetting the leaves, and by this course the rot at the base of the foliage will be largely avoided if the house be not too moist.

E. O. ORPET.

WILTON, IA.—John Beimford, the pansy man, has been elected secretary of the Wilton Fair Association.

DENVER, COL.—Mr. and Mrs. Henry Houseley announce the marriage of their daughter Ethel Stendahl Houseley, to Perry C. Gallup, of the Gallup Floral Co. The nuptials were consummated December 31 at St. John's cathedral.

CHRISTMAS TRADE.

Herewith we present some further and generally favorable reports on the Christmas trade:

DEXTER, ME.—Christmas trade was fifty per cent ahead of last year. It was the best season on record. C. H.

LARAMIE, WYO.—Trade was about the same as last year. There were plenty of fine flowers and prices fell. Roses were most sought. No plants sold here. G. A. H.

VICTORIA, B. C., CAN.—Trade increased twenty per cent and prices ten. There were plenty of fair flowers. Decorative plants sold better than ever before. J. M. T.

PROVIDENCE, R. I.—Trade was the same as last year; supply equal to demand in most cases; flowers poor; scarcity of carnations; call for flowering plants and cheap green. W. E. C.

HAMILTON, ONT.—Trade one-fourth better than last year with not enough stock and much of it of poor quality; demand principally for roses and carnations. Plants sold well. E. G. B.

SHARON, PA.—More palms, holly and wreathing were sold than a year ago but otherwise there was little change in the trade conditions; everything sold clean but prices did not advance. J. M.

WICHITA, KANS.—Holiday trade was good here, every florist reporting a good increase over last year. Much of the stock was shipped from distant points and much of it was poor. W. H. C.

MILWAUKEE, WIS.—The week's business was the best ever recorded. There was a shortage of red flowers and flowering plants, but, strange to relate, we had more violets than we could use. W.

LYNN, MASS.—Christmas trade ten per cent ahead of last year; much better prices; supply short; quality better; great call for carnations; violets very scarce; palms and ferns good sellers. J. L. M.

FALL RIVER, MASS.—Trade was ten per cent ahead of last year and there was a shortage of all flowers except pink. Special call for Beauties could not be met. Less sale for plants, more for greens. C. W.

DUBUQUE, IA.—Trade was thirty per cent ahead of last year. Plants and bright flowers sold well; roses in good supply except red; carnations plentiful and popular, especially red; bulb stock slow. W. A. H.

LOS ANGELES, CAL.—Although there was much more stock than last year there was not nearly enough. The total of sales increased fully fifty per cent and plant sales were forty per cent ahead of a year ago. D. R. W.

BRATTLEBORO, VT.—There was a considerable increase in the season's business but twice as many carnations and violets could have been used. Sales of Boston fern, palms and primroses far ahead of previous records. D. G.

ST. JOSEPH, MO.—Not much call for cut flowers except roses and carnations, but trade was ten per cent ahead of last year; all the greens sold. Flowers were not so plentiful as a year ago and were not as good. Great call for American Beauties. Increased sale for all plants. J. M. K.

UTICA, N. Y.—Trade ahead of last year; supply adequate except of roses; calls for boxes of orchids which could not be supplied; big demand for Beauties; flowering plants sold better, palms not so well. W. M.

TACOMA, WASH.—Trade was twenty per cent ahead of last year; prices were slightly higher and there were not enough violets or chrysanthemums, for which there was great demand, also for red and pink carnations. L. M.

WATERBURY, CONN.—This Christmas showed more cash sales than last; better supply and better stock than a year ago; steady increase in the call for good carnations. Most noticeable was the sale of pot plants and holly. A. D.

NEW ORLEANS, LA.—Christmas business increased thirty per cent although prices fell ten per cent. There was an abundance of stock and most of it was fine. There was a fifteen per cent increase in the sale of palms and ferns. U. J. V.

OMAHA, NEB.—The summer's great exposition may be credited with the better prices obtained this season and holiday trade increased thirteen per cent. There was too little stock but much of it was better than usual. American Beauties and carnations were favorites but there was increased call for all sorts of well grown flowering plants. H. S.

CAMDEN, N. J.—The Christmas returns were larger than a year ago. There was plenty of stock and most of it was very good. Red roses were in demand, as were Ficus elastica, chrysanthemums and palms. Ferns unremunerative. C. W. T.

CLEVELAND, O.—Business was twenty per cent ahead of the corresponding week of last year and the supply was not equal to the demand. The most noticeable feature of the week's trade was the unusual call for flowering plants. T. R. W.

NEW HAVEN, CONN.—There was less cash trade but much more in credit. Marked increase in calls for bright colored flowers. Red carnations and poinsettias short. Less sale for cypripediums but more for primroses and cheap plants. R. V.

SAN FRANCISCO, CAL.—Trade was thirty-five per cent better than for the holidays of 1897. Retail prices were about

BEGONIA GLOIRE DE LORRAINE AS A BASKET PLANT. SEE NEXT PAGE.

the same but wholesale figures were higher, except on chrysanthemums, which were very plentiful. There were plenty of all flowers but roses and violets. Decreased call for all lines of plants, especially Roman hyacinths. S. B.

BRIDGEPORT, CONN.—Christmas sales ten per cent ahead of 1897; prices the same; plenty of stock; quality unusually good; extraordinary call for red flowers and plants in bloom. There was more box trade than ever and three times as much holly was used. J. H.

NEW ALBANY, IND.—Christmas trade was seventy-five per cent better than last year, with large increase in the sale of palms, ferns and azaleas. Cut flowers about the same as last year; no increase in price; stock about equal to demand. A. R.

WINNIPEG, MAN., CAN.—Trade was twenty-five per cent ahead of last Christmas but the supply of flowers was about equal to the demand; qualities good; no increase in sales for decorative stock but many more calls for flowering plants. R. A.

HARTFORD, CONN.—Prices were ten per cent higher this year than last and business increased twenty per cent. Supply equaled demand and stock was of fair quality. Violets, roses and carnations ruled. Less call for palms, more for flowering plants. D. A. S.

SPRINGFIELD, ILL.—Trade was not much greater than last year but prices were higher and stock, what there was of it, of better quality than usual at Christmas. Carnations were in special demand; increased call for palms, ferns and azaleas. L. U.

ASHVILLE, N. C.—Business showed fifty per cent increase; roses plentiful but carnations and violets short; qualities decidedly better; marked increase in calls for pink carnations and Beauties; decreased demand for plants; wonderful call for greens. I. F. C.

DES MOINES, IA.—Business this Christmas was far ahead of last, some dealers reporting an increase of sales of fully fifty per cent. The principal call in cut flowers was for carnations, violets and roses, in the order named, but the demand for holiday plants was strong. L.

POUGHKEEPSIE, N. Y.—Flowers were better in quality but less in quantity than usual at Christmas but the total of sales was not far from last year. Roses and carnations were very short and the latter were in extra demand, as were violets. Poor sale for pot plants. M. J. L.

MUSCATINE, IA.—There was splendid business the last part of Christmas week. The demand was greatest for carnations and will result in increased plantings next year. Primroses, ferns and Ficus elastica sold best among plants, but everything went on Saturday. A. S.

PORTLAND, ORE.—Christmas trade was fifty per cent ahead of last year and prices were ten per cent higher. Stock of all kinds was short. Carnations and chrysanthemums were these leaders and twice as many of the flowers could have been sold, but every customer wanted holly or mistletoe. S. J. L.

ST. LOUIS, MO.—Retailers report sales from twenty-five to seventy-five per cent ahead of last year and prices were better. There was a glut of California violets. Beauties and violets were in increased demand. Heavy increase in plant sales, particularly flowering; high prices of cut flowers seem responsible for this. R. F. T.

PARKERSBURG, W. VA.—Holiday trade was twenty-five to thirty per cent better than last year; prices not increased; stock equal to demand; quality twenty five per cent better than usual. Great call for violets, carnations and flowering plants; twice as much holly sold as last year. G. O.

OAKLAND, CAL.—Trade for Christmas was one-fourth heavier than last year and prices were somewhat higher. There were not enough flowers. Carnations were very good and enjoyed a splendid sale; good call for violets. No increase in sales of plants. Orders were liberal. H. M. S.

BUTTE, MONT.—There was a fifteen per cent increase over last year although prices did not advance. There was not one-tenth enough home grown stock. Carnations were most in demand. Kentias were favorites; there were no blooming plants on the market. The holly trade was spoiled by the produce men. L. B.

Plants Versus Holiday Cut Flowers.

Once upon a time a man had a goose that laid a golden egg and from the remarks of certain retail florists I fear that they may fail to profit by the experience of the gentleman in the Æsop narrative.

It may seem a brilliant thing to do to push the plant trade as a proper retaliation upon the growers of cut flowers who raised their prices for Christmas, but the one who, at this time, puts plants forward at the expense of cut flowers, will eventually find his profits materially decreased.

Possibly there may be some growers who went crazy over the Christmas prices, but the majority of them certainly did not, and even where prices were more than doubled the grower did not have as much profit per dozen over the actual cost of the production of carnation blooms as the retailer who bought them for $6 or $8 per hundred and sold them for $1.50 to $2.00 per dozen.

I do not know of an instance where growers more than doubled their regular prices for Christmas but I do know that if a grower of carnations can not get double the usual rates for both Christmas and Easter he might as well turn his attention and glass to plants.

The growers of first quality carnation blooms who really make a profit on this class of stock can be counted on the fingers of one's hands and if carefully sifted down they would not be hard to count on one hand. There are hundreds of growers who devote a portion of their place to first-class blooms, who, if they were to carefully estimate their expenses, would find that the receipts from these blooms fall below the actual cost of production.

It is this latter class of growers who have to depend on extra returns for the holidays in order to make both ends meet, and the retail man who is not willing to pay at least double the rates for those days should be willing to pay the grower one-third of what he receives for his stock the balance of the season, or forever hide his head in shame.

When a grower is selling a carnation which costs him almost, if not quite, two cents for $1 or $1.25 per hundred, and the retailer is selling the same carnations for seventy-five cents or possibly $1 a dozen, there is certainly more discrepancy between prices than there is at Christmas and the grower has some reason to kick; much more than the other party ever has.

Presuming that plants eventually displace cut flowers, will not the stores be the loosers? It stands to reason that competition will finally reduce prices between retailer and grower to the same low standard now existing in cut flowers, and the grower will be compelled to double the price on plants for all special occasions, the same as is now done on cut blooms. An extensive grower of plants would have the retailer under his thumb, for if he did not get his figures on these special occasions he could rent a room for a week or so and beat the retailer at his own game. Another strong point against the pushing of the plant trade into the place occupied by cut flowers is the opening there would be for the department stores.

Plants are certainly a useful adjunct at Christmas, or, in fact, at any other time, but it is to be hoped that the retailers who persistently advocate the use of plants instead of cut flowers are few in number and will never increase.

ALBERT M. HERR.

Begonia Gloire de Lorraine as a Basket Plant.

Begonia Gloire de Lorraine is shown as a hanging plant in the figure, page 677. The profusion of bloom is wonderful. The plants are grown in pans made especially for them, six inches wide and five deep, hard burnt and perforated in three places below the rim for the hanging attachment. As with many other good things, it will probably be overdone. Its propagation is easy, either by cuttings or leaves. Mine were all raised from base cuttings, induced by keeping all flowers picked after the month of March. Rooted flowering tips refuse to break, even when topped, and those allowed to grow maintain a single stemmed character. Such plants have grown nearly two feet, blooming profusely for half their length. They are well suited for center pieces in a neat arrangement of small palms and ferns for table decoration. No special culture has been given; in fact, these plants have not received the attention they deserve. Perhaps it was well so. New plants are often spoiled with too much care. By using light soil, and plenty of charcoal drainage it is almost impossible to give them too much water. They have taken a regular dose of manure water, such as is given to chrysanthemums. For good circulation of air they were set on five-inch pots. Shading was kept on until the first of October, and then full sunshine. So far only male flowers have appeared; the female blooms will come later in the season. T. D. HATFIELD.

White Ants.

Referring to F. P. Davis' very interesting article on the ravages of white ants, page 600 of the current volume, I hardly think he realizes the amount of energy which would be developed at the nozzle of his hose under a steam pressure of 100 pounds. If he will run a pipe from his safety valve out through the wall of his boiler room, raise the pressure to one-half the amount he proposes, and then open the safety valve, I think he will quickly decide that there is too big a cloud of steam to enable a man to work successfully. A better plan would be similar to the sterilizing plant of W. W. Rawson, Arlington, Mass., described on page 871 of the *Rural New Yorker* of

December 24, 1898. But before going to the expense required to fit up such a plant I would suggest an experiment which will cost comparatively nothing, and if not successful will not prevent the trial of the steam in any form he thinks best. As I understand from his article, the ants are now present in his soil. That being the case, take a tight box and place in it a quantity of soil containing the ants. Have a cover to the box and also an old blanket which has been wet. Make a hole in the soil in the box and pour into it a teaspoonful, or a tablespoonful if he takes quite an amount of the soil, of bi-sulphide of carbon. Cover quickly with the box lid and the blanket and let it rest for a number of hours. Then examine carefully, and if there are any ants alive it will probably be through an insufficient quantity of the bi-sulphide, or that the gas had an opportunity to escape, in which event the experiment can be repeated. The only care necessary is not to have any light near at hand, as the gas is very explosive. Should he find this remedy effectual he can treat the mounds of soil outside by making numerous holes and covering with a wet blanket to prevent the gas escaping. I trust he will report his results in the AMERICAN FLORIST. The bi-sulphide is inexpensive and is getting to be a favorite remedy for noxious insects. F. C. CURTIS.

Eel Worms (Nematodes).

Bulletin No. 55 of the Hatch Experiment Station, Massachusetts, gives the results of a very extensive study of these pests, and should be of great interest and value to the florist. The following is a brief resume of the bulletin:

Nematodes are small worms allied to the earth worm. Many are entirely harmless and only one species, Heterodera radicola, is known to damage plants in Massachusetts. Many of the harmless species can withstand the winter, but the one which is so harmful to florists' plants is destroyed by freezing. It may, however, easily survive in the center of compost or manure heaps which frost does not reach. It therefore follows, that if soil, manure and compost heaps are spread out so that every part becomes frozen, no danger need be feared, provided the benches are not themselves infested. It would seem that the careful cleaning and whitewashing of benches and the use of soil which has been frozen would eradicate the pest. Of course the first potting from the cutting bench should also be in the soil which had been frozen, as the planting of infested plants, or the contact of infested soil with the other would soon cause the whole bench to be infested, as the worms breed rapidly.

Infested plants usually appear sickly and gradually fade away and die. The roots of such plants are more or less covered with various galls or swellings. These are abnormal growths of the roots due to the presence of the worms, which when full grown are not much larger than the size of a pin head. The damage to the plant is not due to the feeding of the worms upon the roots, but to the fact that the flow of the sap is checked by the abnormal growth. A plant weakened by the attack of these worms is quite likely to become infested with other fungus and insect pests.

The use of chemicals is of no value as the eggs practically can not be killed by such means. The most effectual, complete and practical method of exterminating nematodes in greenhouses is by heating the soil by means of steam. A number of methods of heating soil have been described in former issues of the AMERICAN FLORIST. (See vol. ix., p. 171 and vol. xiii, p 721.) The amount of heat necessary to destroy them is 140° which is much less than has been supposed. As, however, all parts of the soil are not heated equally, it is recommended that it be heated to about the boiling point of water (212°).

New York.

THE NEW YEAR SEASON IS A DISTRESSING PERIOD FOR THE WHOLESALE CUT FLOWER DEALERS OF GREATER GOTHAM.—ANOTHER GREEK SUSPENDS PAYMENT.—SWEET PEAS ARE COMING IN.—CARNATION MATTERS.

Everybody has been wishing everybody else a "Happy New Year" but up to date there has been nothing in the flower trade to indicate any immediate realization of the good wishes thus expressed. New Year's is no longer an occasion of any great magnitude in New York but the little that might have drifted in the way of the flower people was effectually side tracked by the hard weather of Saturday and Sunday. The entire week following Christmas was disappointing but Saturday crowned the record. Violets and carnations suffered, perhaps, worse than did anything else. These flowers are essentially favorites of the transient trade and anything that keeps the public off the streets and under cover is sure to react at once on these two staples. The quantity of violets sent to this market during the week was enormous, and a break of fifty per cent on Christmas prices failed to move the big accumulation. A large part of the receipts were held over by the wholesalers until the present week, and the Greeks are getting them for what they are willing to offer. It is the worst reverse the violet business has sustained in this market for years, and the grower who nets seventy-five cents a hundred may count himself fortunate.

Another Greek has "sold out," and the wholesale cut flower district, as well as some large plant growers, are in deep mourning in consequence. Geo. Giatris has transferred his business to his brother and liabilities amounting to $22,000 with no assets is the problem that confronts his creditors.

E. Schrader is sending in flowers of a very attractive sport from Lizzie McGowan carnation. He calls it Richmond Belle. The color is a glowing pink which puts Scott into the shade, and the edges of the petals are prettily feathered with white. Julius Lang has them.

W. H. Gunther has been receiving Blanche Ferry sweet peas from E. Leuly for several weeks, and they are now coming in freely and of excellent quality for the season.

Twenty-eighth street misses the cheerful companionship this week of J. K. Allen, Howard Blauvelt and expressman Tierney, each of whom is laid up with grippe.

Some of the new fancy carnations realized fat prices for Christmas. Among the most notable were some of John May's fancy seedlings which brought $1.50 per dozen wholesale.

Visitors in town: E. G. Hill, Richmond, Ind.

SPRINGFIELD, ILL.—Brown & Canfield, Louis Unverzagt and Henry T. Phelps each performed a share in an elaborate decoration of the historic Leland Hotel for a New Year's dancing party.

Chicago.

THE LULL WHICH SUCCEEDS THE STORM.—NO STABILITY TO THE MARKET EXCEPT ON ROSE PRICES.—AMERICAN BEAUTIES SCARCE.—CARNATIONS PLENTIFUL AND VIOLETS OVER ABUNDANT.

The first week of the new year has seen poor business in Chicago, but not less than generally follows the rush of the holidays. Roses are the only item in the list that have held up and their prices are not stiff because of heavy demand, but rather because of a short supply. American Beauties, for which orders have been coming from all parts of the country, are the strongest flower in the market and for the best grades prices are not far below the holiday scale, $6 to $10 per dozen being readily obtained for the long-stemmed blooms.

Since December 30 it has been largely a matter of realizing the best possible sums for carnations, although first-class flowers are not let go at less than 2 cents. There are bargain offerings in lily of the valley, Romans, Paper Whites, tulips and callas. Harrisii are more plentiful but still command good figures. Violets have become too numerous and one house had several thousand unsold on New Year's day. Fakirs have been able to handle violets this week.

Latest reports indicate that the largest C. O. D. order sent out of Chicago at Christmas was one for $242 shipped December 22 by Reinberg Bros. This and other houses have sent out larger C. O. D.'s in the past, but not every day.

John C. Schubert & Co., believe that, although more flowers were shipped from Chicago than in any previous year, 1898 was not equally good for the retailers. But they look to 1899 with more encouragement.

M. Weiland, his son and his son-in-law each have large stocks of the Evanston carnation, which is now being introduced, and is meeting with a ready sale. Vaughan, McKellar & Winterson are pushing the cuttings for John Weiland and are booking many orders.

At its meeting last evening the Chicago Florists' Club enjoyed a smoker, very many of the members having responded to Secretary McKellar's invitation to come and assist in fumigating the club's pathway to a prosperous new year.

Immeuse quantities of spring bedding stock are being propagated, under the impression that 1899 will be a year in which everyone can afford flowers for his door yard.

L. P. Kelley has assumed the management of S. B. Winter's commission house. He is thoroughly competent to make the business even more successful than in the past.

Daybreak carnations still outnumber any other variety in this market but next season every grower may plant more of them thinking that everyone else will plant less.

Christmas brought J. B. Deamud a handsome diamond ring, which, of course, pleased him very much.

Chas. Seek, formerly packer for Bassett & Washburn, is now officiating in a like capacity for E. C. Amling.

W. H. Desforges, who has been with several Chicago retailers, is now with O. L. Baird at Dixon, Ill.

Edwin A. Kanst is ripening a good sized bunch of bananas at the Washington Park conservatories.

Among the week's visitors were Carl Hirsch, Hillsdale, Mich.; A. G. Boehringer, Bay City, Mich.; C. F. Weeks, Hot Springs, Ark.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

SUBSCRIBERS who have seen him will oblige by sending us an accurate description of the palm swindler.

THE Worcester County Horticultural Society, Worcester, Mass., has prepared a programme for ten Thursday afternoon discussions upon subjects of horticultural interest.

DR. FAIRCHILD, of the Department of Agriculture, has sailed for a tour of Africa, Asia and the South Sea Islands in search of plants of value to the people of the United States.

THE National Chrysanthemum Society (British) has pronounced the varieties Major Bonnaffon and C. H. Curtis too much alike to be shown as separate varieties in the same exhibit.

FERD. W. PECK, in his report of the space available to United States exhibitors at the Paris exposition of 1900 allots to horticulture 2,718 square feet of the total space of 210,836 feet.

THE thirteenth annual meeting of the State Florists' Association of Indiana, will be held at Indianapolis at 2 p. m., Monday, January 9, and will be opened with an address by Pres. J. D. Carmody.

THE *Gardener's Magazine* describes the new English rose Sunset as being of an apricot color in the center with the outer petals carmine on the outside, and states that it gives every indication of being a very fine winter bloomer. What a blessed relief it would be to see a bunch of such a color as this in our flower stores in place of the ever repeated Bride-Bridesmaid-Meteor-Beauty combination!

Some Recent Fires.

OWEN SOUND, ONT.—James Leslie's dwelling and greenhouse were destroyed by fire December 26, loss $2,000.

UTICA, N. Y.—Fire recently did $800 damage to the Seymour avenue greenhouse of W. T. Millgate.

TERRE HAUTE, IND.—Otto Heinl & Co. were burned out December 16 at 33 N. Fifth street, but reopened December 21 at 112 on the same thoroughfare.

SOUTH HADLEY FALLS, MASS.—Joseph Beach recently lost his greenhouses by fire, but business warrants him in rebuilding upon an enlarged scale.

RED BANK, N. J.—On December 28 an overheated boiler in L. Loeb's greenhouses caused a fire which destroyed the houses and contents, entailing a loss of several thousand dollars.

TONAWANDA, N. Y.—Frederick Knight's greenhouse was destroyed at 2 a. m. December 27 by a fire which caught from the heating apparatus. The loss is estimated at $2,000, and was partially covered by an insurance of $1,600.

Tokens of the New Year.

We are in receipt of calendars and other pictorial reminders of the fact that we have entered upon another year from Wood & Stubbs, Louisville, Ky.; John Lucas & Co., Philadelphia, Pa.; Flower City Plant Food Co., Rochester, N. Y.; Gurney Heater Mfg. Co., Boston, Mass.; Regan Printing House, Chicago, Ill.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Alex. McLellan, Newport, R. I., registers new chrysanthemum Regina, a seedling from Silver Cloud and L'Enfant de Deux Mondes. Color, creamy white; bloom of the Frank Hardy type, a variety which it much resembles, but with no tendency to crookneck. Won Newport Horticultural Society's silver medal as best seedling of 1898.

WM. J. STEWART, Sec'y.

Greenhouse Building.

Sharon, Pa.—John Murchie, two story boiler house.

So. Hadley Falls, Mass.—Joseph Beach, rebuilding range of houses.

Brunswick, Me.—John McManus, two houses.

Chicago, Ill.—Wietor Bros., 200,000 feet of glass.

Roslindale, Mass.—A. Leuthy, one greenhouse 10x150.

Chestnut Hill, Pa.—John T. Morris, one conservatory 34x51.

Roses Dropping their Leaves.

ED. AM. FLORIST:—Will you kindly inform me what is the cause of my rose leaves dropping off? The roses are making a vigorous, healthy growth, but for the past three weeks the old leaves are turning yellow and falling off very badly. The roses were planted early in June, making a good growth all summer. In September I mulched them two to three inches deep with well-rotted cow manure (there was no manure put in the soil at planting time) and put on a light top dressing of soil and firmed it to keep the manure from drying up. It is now thoroughly rotted and a mass of young feeding roots. A prominent carnation grower saw them two days ago and said the dropping of leaves was caused by the mulch being too heavy. Would this old manure cause it at this time?

B. B. M.

Your correspondent gives no idea of the depth of bed, drainage, etc., all of which are necessary in forming an opinion as to the cause of his trouble. It is seemingly a case of overfeeding—too much heavy rich food, and it is probable that the bed has been kept too wet. If the plants are rooted in the soil and in the mulch as well the balance of root action is disturbed and the dropping leaves are the result. Another common cause of leaf dropping is dampness on the foliage. There is especial danger from this in the fall mornings when, with the temperature at 60° outside and no fire, the leaves will be found dripping with moisture, and it takes but few repetitions of this condition to do the mischief. I would advise "B. B. M." to be careful and not water too much. Keep a uniform temperature and don't get discouraged as the roses will probably be all right by February and give a good crop.

LAWRENCE COTTER.

The Ice Box Versus the Vault.

From reading the effusion of "Pro Bono Publico" in your issue of December 31, I feel very much like Euclion's cock, so celebrated by Plautus and Ausonius, which rooster having, by diligent scratching, discovered a treasure, straightway had his hide well curried.

The Battles booklet, which has raised all this pother, was reviewed in the columns of the AMERICAN FLORIST because it was a piece of good advertising for a retail florist. "Pro Bono Publico" ignores this altogether, and sets up a man of straw and then proceeds to wollop the straw effigy to his own entire satisfaction. The booklet never raised the point as to whether an ice box was an improvement on a vault for keeping flowers. As I understand the matter, Mr. Battles' theory is the rapid handling of flowers, a method which is superior to both vault and ice box. Mr. Battles prides himself on using the vault or ice box as little as possible. That being the case, a wise retailer would have taken the pointer, if there was anything in it, and said nothing. In these days of keen competition, it is important to know just what your competitor is doing. The great Napoleon won his remarkable victories over the enemy because of his accurate knowledge of what the enemy would do under given conditions. When he had found this out he was always ready to trump the enemy's trick, and generally won the day. What would one have thought of Napoleon if a courier had brought him an important piece of information regarding the enemy, if the said Napoleon should have turned around and lambasted the said courier because the enemy was not doing something else that Napoleon expected him to do?

"Pro Bono Publico" then proceeds to fire some billingsgate at somebody) it is not very clear who) using a number of expressions about natural gas and swelled heads, which seem entirely outside of the question altogether. I am afraid that "Pro Bono Publico" must measure some of his competitors according to his own shoe sole. If he has a touch of the terrible malady of swelled

head himself, he will be unable to see other people through anything but swelled head spectacles.

If any good is to be gotten from public discussion of points in the conducting of business, the said discussion must be carried on with the utmost good humor and good sense. The introduction of billingsgate is an unpardonable crime. It is a resort of that numerous variety of the genus homo which, when it runs short of argument, runs to the brick pile. "Pro Bono Publico" evidently had no confidence in the strength of his argument about the ice vault, therefore he made a rush to the brick pile as a wind up.

Another thing that "Pro Bono Publico" does which is "an evidence of weakness rather than of strength," is the writing under an assumed name, or nom de plume. This practice has always struck me as synonymous with shooting a man from behind a hedge. The anonymous writer and the anonymous poisoner and assasin belong very nearly to the same category. If a man has anything to say to which he is afraid to put his name, it is a pretty good sign that that "say" should not be said. Let "Pro Bono Publico" stand up like a man and say what he has to say courteously and he will receive a much more respectful hearing than he will if he sneaks behind a nom de plume to say it.

G. C. WATSON.

Live Steam in Greenhouses.

It commonly occurs to the mind of some beginner in greenhouse work that inasmuch as a moist atmosphere is supposed to be death to the red spider, the escape of live steam into the greenhouse from the heating pipes would be an excellent means of subduing this pest. The result of his meditations on this subject usually leads him to send an inquiry to his paper regarding the feasibility of the scheme. The answer given is usually about as follows: "It would probably kill the spider, also the plants. Better not try it."

An accident that occurred last March in the greenhouses here has given us valuable evidence on the subject. In one house several ¾-inch pipes drop from the overhead feed pipe (steam) to tanks 6x3x2 feet, located beneath the central benches. The valve on one of these pipes had been opened during the day when the steam was down; the night fireman maintained a steady pressure of steam all night but failed to visit this house at all until 6 a. m. At that time the tank which had been filled with water the previous afternoon, was now empty; the steam was rushing out of the ¾ inch opening under five pounds pressure as it had undoubtedly done all night and the temperature of the house was between 80° and 90°. This was moist air with a vengeance! According to established rules every well behaved red spider should have decently perished. When I visited the house between seven and eight o'clock every plant was drooping with moisture; a lot of tamarix plants had collected so much moisture in their finely cut foliage that the branches rested on the ground.

As to the effects of this steaming: Out of several hundred plants, coleus, alternanthera, canna, geraniums, roses, carnations and a mixed lot of greenhouse plants, not one suffered any material injury so far as could be observed. Neither did the red spiders! The water (condensed steam) had settled largely on the upper surfaces of the leaves and the spiders had found a safe shelter on the under surfaces. Although somewhat surprised and a trifle moist they were actively at work before noon and continued to thrive until destroyed by other means. In the light of this and other experiences with excessive moisture in greenhouses I am led to believe that the red spider will thrive equally as well in a moist as in dry atmosphere if it is only hot enough. They possess surprising activity and tenacity but are little above microscopic in size and we combat them by forcibly spraying the plants; that is, we dash them off and before they have fairly reorganized their domestic arrangements we are at it again with the hose.

FREDERIC CRANEFIELD.

OBITUARY.

MRS. PROTHERS.

Mrs. Fredericka Prothers, widow of the late William Prothers and mother of Mrs. Samuel Goldring, Albany, N. Y., died on December 27, 1898.

SILAS FISH.

Silas Fish, the oldest resident of Sandwich, Mass., and for a number of years in the florist business there, died on December 31, 1898, aged 90 years.

W. L. BRETTHAUER.

William L. Bretthauer, of Evergreen, Bradford county, Pa., died on New Year's day. He was twenty-four years of age and a very popular young man. As a florist and gardener he had built up quite a nice business.

RICHARD DAVIS.

One of the old and most respected citizens of Utica, N. Y., died December 23. Richard Davis was born in North Wales, May 1, 1824, and was for many years a weaver but embarked in the greenhouse business in 1889, continuing in it to his death. He came to America in 1845 and since 1848 had resided in the same house in Utica. He is survived by two married daughters.

MILTON, N. Y.—C. A. Valentine will retire from business because of illness in his family.

SARATOGA SPRINGS, N. Y.—T. S. Totten has a seedlings carnation which he thinks has a future. It has been named Young America. Stems strong and color deep pink.

GALESBURG, ILL.—I. L. Pillsbury has leased his greenhouses at Macomb, Ill., to Fred R. Thornton, who has been employed in a greenhouse in Galesburg for some time. He took possession the first of the year and will grow a general stock of plants and cut flowers, and some for the wholesale trade.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1899 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By young man in greenhouse or store. Good references and life experience. E. A. CLARK, 3501 Wabash Ave., Chicago.

SITUATION WANTED—By first-class rose and carnation grower, capable of taking charge. Fine references. Address J H M, care Am. Florist.

SITUATION WANTED—As foreman by first-class all-round man, age 37, single; private or commercial. Refs. first-class. EXPERIENCE, care Am. Florist.

SITUATION WANTED—By thoroughly practical gardener; 12 years' experience in all departments. First-class testimonials. GAZABO, care Am. Florist.

SITUATION WANTED—By an experienced rose grower to take charge of commercial place, in Chicago preferred. Address ROSE, care American Florist.

SITUATION WANTED—By a competent florist; 9 years' experience in growing cut flowers and plants generally. JAMES SMITH, 17 Rush St., 32d Ward, Pittsburg, Pa.

SITUATION WANTED—By gardener for hothouses and lawn; foreign and American unveilings; vegetables, fruit garden, grapery, etc. Best references; married. P. RASMUSSEN, 201 Hervey St., Chicago.

SITUATION WANTED—By two young men, good hustlers (potters); understand growing palms, ferns, cut flowers; wish good, steady position from Jan. 20 on private or commercial place. Address AXEL JONSON, 531 Balmoral Ave., Chicago.

SITUATION WANTED—As foreman for a large commercial place. Thoroughly experienced in growing roses and carnations for the wholesale trade; single, 32; Ohio preferred. Salary, $40 per month. Address GROWER, care American Florist.

SITUATION WANTED—At once by practical grower of cut flowers and plants; 12 years' experience. Also had good success growing mushrooms and cucumbers under glass. Can take charge of place. Married, age 30. Best of references. State wages. Address H. FISHER, Cudahy, Wis.

SITUATION WANTED—By experienced grower of cut flowers and all sorts of pot plants, German, age 35, understands hotbeds, can also grow vegetables under glass, as well as mushrooms. Capable of taking charge of any large establishment. Address CHAS. SCHULZ care F. Neumann, 129 McClure Ave., Allegheny, Pa.

SITUATION WANTED—As I am about closing up my down-town store, would be pleased to recommend the young man who has had charge to anyone in need of a good man. He is thoroughly competent in all branches of floral art. His experience has been with first-class florists in New York and Pittsburg. Address E. J. PADDOCK, 1317 Euclid Ave., Cleveland, O.

WANTED—Rapid propagator for carnations; none other need apply. State wages expected. CHICAGO CARNATION CO., Joliet, Ill.

WANTED—A young man, German preferred, to assist in greenhouse work. State wages. HENRY EICHHOLZ, Waynesboro, Pa.

WANTED—Salesmen to sell flower pots as a side line on commission. CAMBRIDGE TILE M'F'G CO., Covington, Ky.

WANTED—Two handy, quick young men of good character and some experience. Write, stating wages expected, etc. A. DONAGHUE, Omaha, Neb.

WANTED AT ONCE—A good, all-round florist, single man, one who knows how and is willing to work. State lowest wages with board and lodging. C. P. DOW, Laconia, N. H.

WANTED—A night fireman to attend two steam boilers. Wages, $8.00 a week. State nationality. Address with references K, care American Florist.

WANTED AT ONCE—A good all-round florist, one who knows how and is willing to work. State lowest wages with board and lodging. W. H. WRIGHT, 204 1st East St., Vicksburg, Miss.

FOR SALE—Three greenhouses, with dwelling house; hot water heating; good retail business. Easy terms. Cause for selling, ill health. Address H. LORENZ, Cor. State and Marshall St., Mankato, Minn.

TO LEASE—A first-class retail stand 5000 feet of glass; new in city. Will net good man at least $1000 per year. Must buy stock, about $500. Reason for selling, poor health. Address ILLINOIS, care Am. Florist.

WANTED—On commercial place, a gardener who understands the growing of bedding plants, also pot plants, for forcing; none need apply without good references. Address C. K., 161 A, 23d St., Brooklyn, N. Y.

WANTED—No. 1 grower of roses and carnations to take charge of a block of houses as second foreman on a large commercial place; must be up to-date grower; married man preferred. Steady job to right man and a good opening; would prefer a Chicago man or from that region. Wages, $12.00 per week. Address F, care American Florist.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE AT A BARGAIN.

Nine (9) greenhouses, about 21,000 feet of glass, well stocked with Roses and Carnations in first-class condition, also large stock of Bedding Plants; houses heated with steam, a new boiler; one heavy wagon and one spring wagon. Also 2½ acres of land, or 14 lots. In a flourishing town of 8000 inhabitants, situated in central Ohio; no competition. Part cash; the rest on first and second mortgage. Address

GREENHOUSES, care Am. Florist.

Cincinnati.

NEW YEAR CHRYSANTHEMUMS SOLD WELL.—AMONG WITTERSTAETTER'S SEEDLING CARNATIONS.—CLUB ELECTION IN SIGHT.

New Year's trade was about the same as last year with no special call for anything in particular. A few late chrysanthemums were in market from Gus. Adrian, and sold fairly well. The supply of cut flowers was equal to the demand.

A trip to R. Witterstaetter's reveals the fact that he still takes great interest in carnations. Among those of promise at his place is a bright scarlet, flower very large, calyx and form all that could be desired, blooming qualities equal to Portia, which will be a welcome addition to the list of scarlets. He has a very large white, flowers fringed and fragrant, measuring three and one-half inches in diameter, now in its second crop and showing up well. Another striking one is of a bright rose color; the flower is immense in size and comes close to John Thorpe's prediction. All these will be heard from at the February meeting of the American Carnation Society.

Of last year's novelties Mr. Witterstaetter speaks favorably of New York, which he has had in bloom since November. Psyche has behaved very well and more of it will be grown next year. Gold Nugget stands ahead of Pingree in quantity but Pingree makes up in quality; both are good and will be grown extensively. Evelina as grown here is far ahead of any white.

Saturday evening, January 14, will be meeting night for the Cincinnati Florists' Society and election of officers for the ensuing year will take place.

H. SCHWARZ.

San Francisco.

GROWERS ORGANIZE TO DEAL WITH THE PROBLEMS OF THEIR BUSINESS.—OFFICERS.—BANQUET.

On December 16 the leading growers of cut flowers in San Francisco county organized the Growers' Protective Association of San Francisco, for the purpose of dealing with the various problems which confront their industry. The following officers were chosen: President, Alphonse Pottet; vice-president, George Simons; secretary, John Shepard; treasurer, Edmond McLellan.

Following the adjournment a very fine dinner was served. The following members of the trade were present:

Alphonse Pottet, Geo. Simons, Edw. McLellan, S. J. Shepard, G. Clack, Felepo Marterello, P. Boneou, Jos. P. Ladick, Dominic Figonii, J. Young, Geo. Karman, C. Crockford, Messrs. Nethoe, Domoto, Haselbacher, Cook, Nespoli, Grallert, Magomen, Gardiner and Barbong.

METEOR.

Worcester, Mass.

Flowers have recovered from the furious onslaughts of Christmas week and good stock is obtainable in sufficient quantities. Trade has been fairly good but there was the usual reaction that always follows Christmas and Easter. Violets still remain scarce and sell at $3 per hundred.

Generally the business on the first day of the year amounts to considerable, but this year was an exception to the rule as there was absolutely no extra trade. The only reason I can supply is that of the holiday falling on Sunday. A. H. L.

KOKOMO, IND.—W. W. Coles has added one greenhouse 10x100 to his establishment.

WESTERN PENNA. HEADQUARTERS FOR EXTRA FANCY STOCK.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

CHICAGO.—Alex. Rodgers is no longer with the Illinois Seed Co. but is in business for himself at 32 Traders Building. The Illinois Seed Company continues as usual with Wm. S. Gilbraith, president.

DOLLAR a pound onion seed prices are shown in the first early seed catalogues now arriving. Seedsmen do not take a sordid view of the new year, but will continue to work for glory rather than profit.

NEW YORK.—The scarcity of beans seems more pronounced than was anticipated and some varieties are not to be obtained at any figure. Lilium auratum is in great demand for export and the larger sizes are all sold out. Tuberoses, first size, are wanted but the supply seems limited.

The Rocky Ford and Netted Gem Musk Melons.

ED. AM. FLORIST:—Replying to your inquiry as to the relation between Rocky Ford and Netted Gem musk melons, I would say that I think the Netted Gem was first described in a seedsman's catalogue in 1881, but I have no copy of the book and so cannot say just what the description was. In 1883 I find it described in four catalogues; in one of these it is said to be a perfect globe, in two to be globular and in one the shape is not mentioned though in the accompanying illustration it is shown as being distinctly long oval. The other two illustrations of the year show it as short oval or nearly round. In 1888 I find it described in seventeen catalogues; in five it is described as a perfect globe, or as globe shaped; in six as nearly round, in one as perfectly round and in five the shape is not given though in two of these the illustrations show it as long oval, and of the eight different illustrations published in these seventeen catalogues five show it as short oval and three as long oval. In 1898 I find it described in twenty-three catalogues; in five of these as a perfect globe, or globular; in one as round, in three as nearly round and in five as oval while in one both round and oval stock is offered and in eight the shape is not given. Of the illustrations three are short oval, or nearly round, and seven distinctly long oval. I never have seen a cut of Netted Gem which shows the fruit as round or globular. In several catalogues of both 1888 and 1898 stocks are described and offered under other names which would seem to be identical with the long oval type of Netted Gem.

I believe the facts are that as first sent out the stock of Netted Gem was made up of two very distinct types, one a round or very nearly round fruit with little netting and ripening very early with a tendency to become distinctly yellow at maturity. The flesh of these melons was not very firm nor of uniformly high flavor, though often very sweet. The other type did not ripen quite so early, was much longer, being long oval shaped, was decidedly netted and had only a slight tendency to yellow at maturity. The flesh was very firm, thick and uniformly of high flavor. This longer type has been generally selected and grown to the exclusion of the other until now most of the stock seed sold as Netted Gem, even by those who describe the sort as round, is of this shape and character and the Rocky Ford melon as described to me by the largest and best growers there, and as I have seen it growing and on the markets, is simply this stock of the old Netted Gem. I think the history of this sort as I have given it affords a good illustration of the defects of our system, or want of system, in describing and identifying sorts and the desirability and the advantage it would be to seed dealers and users if a minute, accurate and universally accepted statement of just what constitutes the type indicated by our varietal names.

As to the quality of the melons grown in the vicinity of Rocky Ford, I may state that in 1896 and 1897 the finest melons I found on the market were from that region, but in 1898 I tested a great many fruits there, others which I found on the market and said to be from there, and they were certainly inferior in quality to most of the Netted Gem grown in Michigan, and fruits grown in Michigan from the choicest seed of the most careful growers in Rocky Ford were in no way superior to fruits produced from Michigan grown seed of Netted Gem.

WILL W. TRACY.

Pittsburg.

THE NEW YEAR STARTS IN WELL AT THE SMOKY CITY.—MUCH ILLNESS AMONG THOSE IN THE TRADE.—PERSONAL MENTION.

New Year's business was good for this locality, and the outlook for a good trade the first part of 1899 is very bright. Prices are somewhat lower than during the holidays but not a great deal, as stock is not over-abundant, although sufficient for the present demand.

Randolph & McClements have been very busy with the Christmas and New Year's trade and are well satisfied with the amount. Mr. McClements has been unwell for over two weeks, but managed to be about notwithstanding. They have moved their office to the rear of the display and workroom, by this change adding about one-third more space to the latter and improving the appearance of their place very much.

Harry F. Baxter reports business with him as pretty fair. He put up a very handsome and extensive decoration a few days ago, at which each room was decorated with a different rose. Mr. Baxter's wife and some of his help have been ill with the grip, but are slowly recovering.

Fred. Burki and several of his best men, L. I. Neff, Mrs. Neff and Julius Ludwig, have each been sufferers with the prevailing influenza. REGIA.

St. Louis.

SUPPLIES OF STOCK EXCEED THE PRESENT DEMAND.—CHANCES THAT VIOLETS WILL BE AN OVER STOCK ERE LONG.

At present writing the demand and extraordinary rush that prevailed during Christmas and the week following shows signs of abatement. Stock has increased considerably in wholesalers' hands, coming in much more freely than it did last week and being of about the same quality. To-day is the first time that prices have broken since Christmas, and the quotations on all stock are down.

Bulb stock is increasing in quantity, and there is not enough demand to clean up each day's receipts. Harrisii lilies are coming in much more freely, and are selling at 15 cents.

Violets are showing the first indication of a break in price, having dropped from $1 to 75 cents per 100. The area planted to violets this year is much greater than last, and it is freely predicted that towards spring or in the late winter season, when stock commences to cut plentifully, they are going to be badly overstocked.

We have seen in town this week C. H. Foreman, of Louisiana, Mo. R. F. T.

LOGANSPORT, IND.—Mrs. O. G. McCormick has opened a flower stand at W. H. Thompson's, Thirteenth and Elm streets.

Not Talk But Work

Printed talk or spoken talk would never have built up the immense **Iron Age** business. It's the work that's behind the machines and the excellent work they do in the field and garden that sells them in increasing numbers every year. Our success is built on work—not talk. See an **Iron Age** machine at work and it will talk for itself. It does the best work in the least time. The latest

Iron Age Implements

are described in the handsome **Iron Age Book** for 1899 which we send free. The **Iron Age Hill and Drill Seeder** has a wheel 16 inches high with a two-inch tread. Opening plow is clog-proof, instantly adjustable in depth. The hopper holds 4 quarts and is close to the ground, making accurate spacing possible. Can be changed instantly from a row drill to a hill dropper. Patented cam index regulates flow of seed. For particulars address

BATEMAN MFG. CO., Box 184 Grenloch, N. J.

When writing mention the American Florist.

S. B. WINTER,

Commission Handler of HIGH GRADE CUT FLOWERS.

21 Randolph St., CHICAGO.

December 31st, 1898.

Announcement!

I AM pleased to announce that Mr. Lawrence P. Kelly, who has for the past ten years been connected with the wholesale commission trade of Chicago, for several years with Messrs. Kennicott Bros'. Company, on January 1st, 1899, assumes charge of my business, located at the above number.

Owing to the fact of Mr. Kelly's long acquaintance in this line and his complete knowledge of cut flowers, you can be assured of the best attention to your orders and the choicest stock which the market affords at moderate prices.

Hoping for at least a share of your esteemed patronage and wishing you a happy and prosperous New Year, permit me to remain

Yours respectfully,

S. B. WINTER.

THE Maple Grove Nurseries, St. Thomas, Ont., is placing large numbers of apple seedlings in the upper peninsular of Michigan.

PROF. J. L. BUDD is devoting his time and strength to the revision of Charles Downing's great work upon the apples of North America.

J. WRAGG & SONS, Waukee, Ia., have printed on their envelopes: "Aye, keep plantin' a tree, Jock. It will be growin' while ye're sleepin'."

GOVERNOR TANNER, of Illinois, has asked a committee of the State Horticultural Society to prepare a San Jose scale law for his legislature.

IT IS announced that the Messrs. Rump, the largest fruit growers in Georgia, will set 1000 acres to fruits at Evergreen, Ala. Peaches will be planted this spring on 200 acres.

A. W. BRYANT and L. R. Bryant, the Princeton, Ill., nurserymen, have been elected secretary of the Northern Illinois Horticultural Society and the Illinois Horticultural Society, respectively.

A BULLETIN on San Jose scale by H. P. Gould, now in press, will treat in detail of experiments which proved conclusively that kerosene and water, one part to four, will destroy every insect without injury to the plant.

MINNESOTA pays a bounty of $2 40 per acre to those who plant and grow trees and the disbursement for 1898 was $19,553.68, divided among 2,800 persons and representing a reward for the culture of 8,147 acres of trees.

JOHN PRYNE, of Grand Rapids, Mich., is defendant in several suits for damages. Complainants allege that he misrepresented peach trees which he sold, but Mr. Pryne denies this and declares that the actions are malicious.

DESMOINES, IA.—David Smeaton has brought suit against Judge C. C. Cole, claiming $6,000 damages for loss to his florist business because of legal actions n 1892 which he thinks he can prove to have been inspired by malice.

Detroit.

THE CONVENTION CITY FLORISTS ENJOYED A VERY MERRY CHRISTMAS AND A HAPPY NEW YEAR.—GOOD TRADE THE CAUSE OF IT ALL.

All Detroit florists report a successful holiday season. The wholesale men sold out of everything and all were short of carnations. All our growers will hunt for good reds for next year. Frank Holznagle brought in some very fine roses, Brides, Bridesmaids and Woottons, and John Carey, of Mt. Clemens, sent extra Meteors.

George Leadley, J. F. Sullivan and B. Schroeter each report greatly increased calls for carnations, American Beauties and violets in cut flowers and for all kinds of blooming and decorative plants. Messrs. Sullivan and Schroeter complain that wholesale prices were too high to leave a fair profit for the retailer. Each will have larger stocks of azaleas, primroses, poinsettias, cyclamens, palms and ferns for next year.

John Breitmeyer & Son experienced a splendid Christmas trade. They, too, found unprecedented activity among plant buyers but also sold all the Beauties, Meteors, carnations and violets they were able to procure. They had a church wedding decoration which used many flowers and great quantities of green.

President Harry Balsley, of the park commission, is planning a banquet for city officials for the purpose of discussing appropriations.

Miss Anna J. Shultie has resumed charge of C. H. Michell's cut flower department. She occupied the same position for six years prior to a year and a half ago. R. F.

GALESBURG, ILL.—I. P. Norton will open a florists and undertaking establishment at Abingdon, Ill.

NEW CARNATION EVANSTON

We are offering Rooted Cuttings of this Grand New Scarlet Carnation, the merits of which can not be doubted, as it is receiving the hearty endorsement from both the Growers and Wholesalers. We have handled the cut of Mr. J. Weiland for past two years, of this as well as other varieties, and have found it always a ready seller and one that was appreciated by buyers in preference to any other scarlet on the market.

CHICAGO.

The following testimonial from one of our LEADING GROWERS should have a great deal of bearing with growers of Carnations:

MR. JOHN WEILAND, Evanston, Ill. Dear Sir:—In reference to the new Carnation "Evanston" which is being introduced this season, would state that I have grown a bench of this variety for the past year and have been better impressed with it than with any new carnation that has as yet been introduced, for scarlet, and intend the coming season to grow this variety for our leading scarlet, as in my estimation this variety will fill a long felt want in the market; namely, a good scarlet carnation, with good, thrifty habits and a strong producer. The "Evanston" is one that will surely fill these wants, and is one that will find ready sale wherever introduced. I consider it superior in all respects to any of the other twenty leading varieties which I now grow. I heartily endorse it to all carnation growers as a sure money-maker. Yours very truly, PETER REINBERG.

Give us your order now. Rooted Cuttings, $7.00 per 100, $60.00 per 1000. 500 at the thousand rate.

FERNS.

H. B. MAY invites inquiries for the above, of which he holds a very large and varied stock, including all the most useful market sorts and a large selection of choice novelties. Leading sorts can be quoted per 100 or 1000. Please name special sorts required. Quotations per return mail.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Chicago Bowling Matters.

Next Thursday night the bi-weekly gold medal contests will be inaugurated and some very warm games are expected. Last Friday night the following scores were rolled:

Name.	1st.	2d.	3d.	4th.	5th.	Av.
E. F. Winterson	122	172	153	172	175	158
G. L. Grant	177	130				153
John Degnan	144	126	141	123	131	133
Charles Schweigert	137	137	105	111	138	125
Alex. Henderson	114	127	123			121
E. Benthey	86	116	106	138		111
C. S. Stewart	91	90				90
M. Barker	61					61

Convention City Bowlers.

Detroiters lost no time after the holiday rush in resuming their weekly practice on the alleys and, considering that this is the first season that any of the players have rolled with any degree of regularity, the following score is very creditable:

Name.	1st.	2d.	3d.	Av.
Dunn	182	165	137	161
Coryell	118	125	186	143
Holznagle	143	134	135	137
Watson	134	107	137	126
Rackham	125	117	132	125
Ferguson	114	107	132	118
Sullivan	110	92	146	116
Paulke	117	122	107	115
Pickworth	131	100	110	114
Beard	94	101	121	105

R. F.

The Champion Bowlers.

St. Louis has seen some really great bowling during the year just past. During the fifty-two weeks the club rolled 144 games and Messrs. Beneke and Kuehn participated in every one of them. The former made a total of 23,109 points and the best average, 160. Emil Schray made the best single score, 268, although Carl Beyer was a close second with 266. Ten members made scores in excess of 200.

At last Monday evening's contest Mr. Beyer started the 1899 record with three games of 200 or better and an average for the night of 195. The complete record follows:

Name.	1st.	2d	3d.	4th.	5th.	Av.
C. Beyer	150	226	204	200		195
C. A. Kuehn	164	133	127	147	171	148
J. J. Beneke	142	157	140	165	127	146
D. Finlayson	122	163	174	123	133	144
C. C. Sanders	137	140	158	136		143
Emil Schray	112	149	130	152	136	136
F. J. Fillmore	105	95	106	102	139	109

R. F. T.

Philadelphia.

GOOD TRADE AND FINE FLOWERS KEEP PRICES WELL ADVANCED. — GRAHAM'S BEST DECORATION. — CARNATION MATTERS. — THE CLUB MEETING. — NEXT MONTH'S SUBJECT. — A BANQUET IN SIGHT.

Trade has continued brisk since the holidays. The decorations by Graham for a large ball on December 30 were very fine. American Beauties and cattleyas were used lavishly. Most of these large entertainments are held in Horticultural Hall, and altogether this was the finest decoration yet executed by this firm.

The good demand keeps up the prices, which, since the quality of the stock has so improved, are paid without much cavil. Beauties are cleaned up every day; top price is $9 per dozen. The color of all the roses is much finer than two weeks ago, the Bridesmaids being very bright and a pleasure to handle; the stems, too, are stiffening, which was badly needed.

Carnations are down a bit, but $2.50 is still asked for anything worth having, while $4 to $6 is asked for the fancies. Flora Hill is getting a stronger stem, but the string on this, as in many other kinds, is still criss-crossed a good distance up the stems of the bunches. Geo. M. Chandler, of Avondale, is sending in some fine Annie Pixley. This seems worth a trial, although discarded by many growers. As Mr. Chandler grows it, it is an ideal pink.

The January meeting of the Florists' Club was well attended, as, indeed are most of the meetings. Mr. Blanc read a most entertaining paper on novelties. Messrs. Craig, Eisele and others took part in the discussion that followed. Mr. Eisele thought anemones were coming up and that Queen Charlotte would be a good variety to cultivate. He also thinks Duetzia Lemoinei a splendid pot plant for Easter. The essay for next meeting, "Latest Facts on Grafted Roses," by Alexander Scott, should be the best of the season, as results from such stock have proved so successful, and yet so few growers have adopted this plan. It was determined to have a banquet to entertain the visiting carnationists at their convention. Other matters looking to their comfort were discussed, and the meeting promises to be one of the best attended in the history of the society.

F. R. Pierson, of Tarrytown, and Edwin Seidewitz, of Baltimore, were among recent visitors. K.

Boston.

CUT FLOWER BUSINESS STEADY AND UNUSUALLY SATISFACTORY FOR THE SEASON. —MEETING OF THE GARDENERS' AND FLORISTS' CLUB.—INSTALLATION OF OFFICERS.—ENTERTAINING LECTURE.—VALUABLE PREMIUMS AWARDED.

It did not take long, with the fine weather that followed Christmas, to fill up the gap in the cut flower supply caused by the remarkable clean-up of that memorable occasion, but the old year went out in storm and the new one came in both stormy and cold and the overstock frequently experienced in the lull after the holidays has been nicely avoided. Prices have been maintained with commendable firmness and while somewhat lower than those prevailing at Christmas are, nevertheless, much better and more steady generally than was the case at the same period last year. The call is well distributed over the whole list of staple market varieties and comes evenly from all parts of New England as well as local sources and this feature is particularly encouraging as an indication of healthy conditions for the balance of the season.

The Gardeners' and Florists' Club held its initial meeting for 1899 on Tuesday evening. President-elect Elliott and Secretary-elect Wood were duly installed and a unanimous vote of thanks to the retiring officers, President Anderson and Secretary Dawson, was passed. A letter from Prof. Brooks, of Amherst Agricultural College, was presented, in which that gentleman denounced as fallacious the theories advanced by a recent lecturer before the club in reference to the comparative value of soda and potash as fertilizers. The club seemed disposed to arrange for a joint discussion at a future time.

The event of the evening was a lecture on the scenery, gardens and customs of the Japanese by John Farquhar. Mr. Farquhar has recently returned from that quaint country and during his travels there and in China secured about 1400 photographs. His lecture was illustrated by many of these views, the stereopticon being ably handled by Jas. Farquhar, and the large audience present enjoyed a great treat in seeing many of our favorite garden plants as they appear in their native habitat. The temples and elaborately constructed parks and gardens were especially attractive.

The garden committee of the Massachusetts Horticultural Society has made its annual award of premiums as follows: House of chrysanthemums, arranged for effect, first, J. G. Bailey; second, Mrs. B. P. Cheeney; house of chrysanthemums grown on benches, first, E. M. Wood & Co.; second, David Nevins' estate; house of foreign grapes, George McWilliam; house of violets, David Nevins' estate; carnation house, Wm. Nicholson; rose house, E. M. Wood & Co. The Hunnewell triennial premium for the best kept estate of not less than three acres was awarded to the David Nevins' estate. Gratuities were also given to E. S. Converse for well kept grounds and greenhouses, E. N. Pierce & Sons for chrysanthemum houses, J. S. Bailey for well kept grounds and greenhouses and George McWilliam for orchid house.

Exeter, N. H., had the honor of sending to Boston the finest American Beauty roses in the market for Christmas. They came to Welch Bros. from Hilliard & Karlson and no better blooms have ever been seen here.

Parkersburg, W. Va.

G. A. Hiehle's new rose and carnation houses which were erected last summer prove to be a success. The new range covers a quarter of an acre and is built in the most modern manner. The timber was furnished by the Lockland Lumber Company and is all clear cypress and cedar. The walls are hollow brick and iron supports are employed for purlins and benches. The ventilator is operated by Carmody's "meat saw" which works 150 feet like a charm. The heater is a locomotive boiler and the heating is done with a 2½-inch overhead flow and nine 1½-inch return pipes in each house, with valves to cut out any pipe in the system. The houses are on a southern exposure and are an ornament to the landscape, at least so their owner avers.

Parkersburg is booming more than any other town of its size on the Ohio river and the local florists are enjoying their full share of the good times. G. A.

Des Moines, Ia.

New Year's trade was about on a par with former years. The supply of stock was not equal to demands, although some fine blooms are being cut. Carnations are exceptionally fine. Roses are scarce and in good demand.

Many of the craft are now selecting the varieties of carnations for another year, and propagating has begun. All are preparing for large sales of spring bedding stock and Easter flowers, anticipating a prosperous season. J. T. D. F.

LAMBERTVILLE, N. J.—George Stephenson has removed to No. 1 North Union street.

Helpful Reminders.

The first batch of deutzias, either gracilis or Lemoinei, may be placed in the warmth now; for most floral work this is far preferable to the lily of the valley. Narcissus Princeps and Von Sion can be brought in now with safety. Romans should not be held any later as it is best to have done with them before Dutch hyacinths appear.

Grevillea robusta that has been growing for one or two seasons in pots had best be shaken out and put back into the same pots with that good soil which was prepared in September.

If you think your trade will appreciate sweet peas enough to make an early crop profitable, put in the seed now. See to it that your stock plants of chrysanthemums and stevia are in good condition and of the most desirable varieties for your trade. Take heed of the reports that poinsettias were in great demand at Christmas.

Turning from growing, I wish to remind you of a few facts concerning the delivery of flowers. To waste is a sin, therefore economy is a virture, but there is a penny wise and pound foolish policy practiced by many. I refer to slovenly ways of doing up flowers for delivery. If your wholesale dealer should send you American Beauties in a market basket, violets in a herring box or smilax in a fish net you would soon send your orders elsewhere, but for the desire to save three cents for a clean box the suitable length, and breadth for a $2 parcel of flowers, many florists will squeeze them into a shoe box, break two or three stems, bruise a few flowers and injure their standing, sometimes irreparably. Keep at least four sizes of cut flower boxes, have your name neatly printed on them and line with tissue paper to be sure that every flower is well packed and will be delivered safely to the customer; it's the the beauty they pay for, not merely the substance. C. B. W.

Portland, Ore.

Except for a couple of weeks just before Christmas, when the temperature fell to the freezing point, we have had a very fine winter here. Portland lies in a sheltered valley where the cold does not strike, although we can see snow all the year round. Roses that are called tender in the east are grown outside here and some of the rose bushes had buds in December. Two weeks before Christmas florists were using Bride roses cut outdoors for their funeral work.

All stock is looking well and prospects are good for spring. But, speaking of busy people, S. J. Lemmon beats them all. He has 6000 feet of glass and does all the work himself, including that in his retail store. For three weeks before Christmas he did not see a bed, doing his sleeping in the intervals between firing his boiler.

The Pacific Floral Company is a new concern at the corner of Forty-first and Powell street.

The Japanese Greenhouses, Glencoe Station, are also new. S.

STERLING, ILL.—Ross Langdon, of Morrison, is now employed in the greenhouses of his brother-in-law, F. A. Belt.

JACKSON, MICH.—W. J. Heath has purchased the stock of the late Oakes Greenhouse Company and opened a retail establishment at Forbes and Tyson streets.

12 Reasons Why Every Florist Should Grow

BABY PRIMROSE!

(PRIMULA FORBESI.)

1st. Plants begin to bloom when only one inch high.
2d. Plants in 2-in pots 3 months ago now in 6-in., carry more than 50 sprays of flowers and will continue to bloom in greater profusion. It's a perpetual bloomer.
3d. Prominent Philadelphia and New York florists pay $2 per 100 for the sprays
4th. Baby Primrose requires no forcing and will even bloom in violet frames It is not poisonous.
5th. The flowers remain fresh for nearly a month after being cut.
6th. The stems are long and erect, useful for all purposes.
7th. The rosy lilac flowers are just the right color.
8th. For Easter blooming nothing could be more profitable or newer.
9th. The more you cut it the more it blooms You can't stop it.
10th It is elegant as a pot plant or for jardinieres.
11th. IT IS MORE PROFITABLE to grow than roses or carnations, as it begins to bloom as soon as bedded and can be cut as wanted.
12th WE RETURN YOUR MONEY if you are not satisfied.

Grower of the Finest Pansies.

St. Paul.

A PROSPEROUS WINTER.—FINE FLOWERS.—MANY OF THEM SHIPPED FROM CHICAGO.—A COLD NEW YEAR.—PROSPECTS.—AN ORCHID QUEST.—SEEGER'S FINE ROSES.—FLORISTS TO MEET.

Altogether Christmas 1898 holds the record for good sales, good weather, good stock and good prices. There were very few Harrisii blooms seen and but very little demand for them. Romans and Paper Whites were plentiful, with lily of the valley scarce. Large quantities of stock were shipped in from Chicago and Milwaukee of better quality than ever before seen here.

The old year was ushered out with the lowest temperature of the season, the mercury ranging from 19° to 30° below zero. With this condition New Year's trade was lighter than usual.

Trade for the next six weeks promises to be very lively. Numerous weddings, frequent receptions and other social functions of greater or less degree will keep the craft busy and help pay coal bills, which so far this winter have been unusually heavy.

Dr. R. Schiffmann, our orchid specialist, intends to start this month on his annual pilgrimage to South America in search of new and rare specimens, touching at Guatemala and some other Central American states. Anyone in the trade desiring agreeable company and an interesting trip would do well to join him.

R. C. Seeger has closed his store at the City Market for two months or more. He is bringing in some very choice Brides, Bridesmaids, Woottons and Meteors. Violets are now coming in very freely and prices are dropping weekly. This is the only flower grown here in sufficient quantities to meet the trade demands. Large quantities of carnations and roses are shipped in daily.

The next meeting of the Minnesota Florists' Society will be held at the West Hotel, Minneapolis, on Saturday evening, January 14. FELIX.

Newport, R. I.

The best attended meeting in the history of the Newport Horticultural Society was that on December 28 at which the following officers were elected:

President, James McLeish; first vice-president, B. F. Tanner; second vice-president, John J. Allan; recording secretary, W. T. Burton; financial secretary, Bruce Butterton; treasurer, Richard Gardner; sergeant-at-arms, Wm. Smith; executive committee, Alexander MacLellan, W. T. Burton, J. J Butler, James McLeish, Robert Laurie, James Kile, Richard Gardner, Alexander Ogg and A. S. Meikle; auditing committee, B. F. Tanner, Joseph Gibson and Samuel Chambers; entertainment committee, J. T. Allan, Robert Laurie, J. J. Butler, James Kile and Charles D. Stark.

The various reports showed the society to be in excellent financial condition and strong in members and interest.

John K. M. L. Farquhar, of Boston, will lecture before the society in Sanborn's Hall on the evening of January 11.

Robert Christie has been very ill for the past two weeks with inflammatory rheumatism and his condition is at present regarded as serious.

BUSHNELL, ILL.—E. D. Lauterbach established a well decorated Christmas down-town branch in Kent's grocery and did a thriving trade.

Address EDITORS OF THE "H. A."
Chilwell Nurseries, - Notts, England.

Chatham, Ont.

The year just ended was an excellent one for local florists and the prospects for spring are bright. Trade was good at Christmas and stock is in fine condition.

Robert Killen reports as good a holiday season as has ever been known here and his carnations and roses are his pride. They are certainly well grown.

Miss Fannie Tissiman, whose glass is the most extensive here—she has eight houses—found an excellent holiday sale for plants and had provided a generous supply. She reports carnations and roses the most popular Christmas flowers.

LENOX, MASS.—The annual banquet of the Lenox Horticultural Society will be held January 11 at Flint's hotel and the annual ball January 27 at Sedgwick hall.

REDUCED RATES TO HOT SPRINGS, ARK.

The Wabash Line has on sale ninety-day round trip excursion tickets to the famous Hot Springs of Arkansas at very low rates. Through Sleeping Cars to Hot Springs with but one change of cars (in St. Louis Union Station).

Hot Springs is the only health resort endorsed and conducted by the United States Government. Climate, like Italy. This is the season to go. Over 300 hotels, and boarding rates to suit all visitors.

Illustrated pamphlets and full information furnished by any Ticket Agent of the Wabash Railroad or C. S. Crane, Gen'l Pass'r and Ticket Agent, St. Louis.

Crane Is a Great Rhymester.

Charles S. Crane, the General Passenger Agent of the Wabash, is quite a poet, and has written many nice things. Recently he read the poem on the "Music of the Wheels," written by E. E. Coyle, for the Baltimore *Morning Herald*, which runs as follows:

MUSIC OF THE WHEELS.

When you're riding on the railroad
At a mile-a-minute crack,
Do you ever note the rhythm
Of the wheels along the track?
Is there any great composer
Of sharps and flats and bars
Can equal in his cadences
The music of the cars?

Whether dashing through the meadow,
Or the tunnel's choking grime,
You will never hear them falter
From the measured beat of time;
Charging wildly 'mongst the mountains,
Or by the river's bank,
You will always find them playing—
Click-clickety-click-clank.

Every air that has been written
Since the days of wicked Cain
Finds a fit and perfect setting
In the rhythm of the train;
From opera to comic song,
From Patti down to Cline,
You can hum all sorts of ditties
While rushing down the line.

After reading the above Mr. Crane got his typewriter in order, and by screwing up the poetical lever ground off the following:

It's too bad to spoil the story
Told in cadence sentimental
But it's not so on the Wabash
With its famous 'Continental."

If you are about to travel
Please note the following points,
The Wabash track is perfect,
And you cannot count the joints.

In its wheels there is no music,
At a mile-a minute gait,
And of course there is no rhythm
On a track that's up-to-date.

There is no measured beat of time;
In fact it can't be measured.
We beat our rivals every time,
A fact that should be treasured.

When you go to the convention
At Detroit in ninety-nine;
If in comfort you would travel,
Take the famous Wabash line.

Cypress Greenhouse Material.

We are the pioneers in Clear Cypress Greenhouse Material. We discovered that Cypress is better than any other wood for greenhouses from top of posts up and we introduced it, and fought for it against many prejudices, and finally succeeded in bringing it into general use.

Others have attempted to follow where we lead, others are trying to reap what we sowed, but we have the experience and are recognized as experts in greenhouse construction.

WILLIAMS BAY, WIS.—Frank T. Manahan is putting in a new heating apparatus.

Further Notes on Watering.

The following additional facts with regard to the effect of cold water on plants may not be without interest. The experiment with coleus noted in the AMERICAN FLORIST of November 12, page 434, was repeated during the past year and with similar results. Four lots of cuttings were rooted in separate compartments and watered, as in the first trial, with water at 32°, 40°, 70° and 100° respectively. The cuttings all rooted well and were potted and shifted as needed, the final shift being into 6-inch pots.

Four months after taking the cuttings two average plants were washed free from earth and weighed with the following results: (The metric system of weight was used in this and the following experiments. The weights as here given may be transposed, approximately, to ounces avoirdupois by dividing by 28).

32°—238.5 Grammes. 70°—251.0 Grammes.
40°—216.0 " 100°—268.0 "

One month later the remaining plants were weighed with results as follows:

32°—373 Grammes. 70°—377 Grammes.
40°—325 " 100°—371 "

It is difficult to discover in these results any influence due to the temperature of the water used.

For the remaining experiments vegetables were used; these were grown on an ordinary raised bench, which was divided by board cross-partitions into beds each 2x4 feet and 4½ inches deep; tomatoes, beans and radishes were grown two or more crops of each. Some results are here given.

BEANS.

Eight beds were planted with Ne Plus Ultra beans—fourteen plants to each bed. The beds were watered with water at 32°, 40°, 70° and 100° respectively. An equal quantity of water was given to the different beds at each watering. The pods were picked when about four inches long. Below is given the total length of pods, total weight of pods and the weight of the plants; also the weight of the pods in the first three pickings:

Lots, 28 plants in each.	Length of pods.	Weight of pods.	Weight of plants.	Weight of pods first 3 pickings.
	Inches.	Gram's.	Gram's.	Grammes.
32°.....	1,062.25	793.7	650.0	318.5
40°.....	1,117.54	711.7	606.5	347.1
70°.....	971.50	596.2	539.5	298.6
100°....	859.60	556.4	564.9	270.0

The above table shows that the two lots which received the coldest water produced the greatest weight of pods, also the greatest length of pods and the heaviest plants. In the right hand column is given the weight of pods from the different lots in the first three pickings, showing an advantage in earliness for the 40° lot and the 32° lot.

TOMATOES.

Twenty plants were grown in four beds; the plants were set from 6-inch pots in eight inches of soil, trained to single stems and watered as in previous experiments. The total weight of fruit and plants follow:

No. of lot.	Weight of fruit.	Weight of plants.
32°	1,379 Gr.	196 Gr.
40°	1,130 "	198 "
70°	1,188.5 "	182 "
100°	1,408 "	161 "

In this case the 32° lot yielded more than the 70° lot, but less than the 100° lot.

An interesting trial was one conducted with tomato plants in pots. One hundred plants were grown from seed saved from the second generation of cold and warm water plants. These were potted, divided into four lots and watered as in above experiments. Two months from the date of sowing the seed fifteen plants of each lot, now in 6-inch pots, were weighed as follows:

32°—55.9 Grammes (Average Weight.)
40°—58.7 " " "
70°—65.3 " " "
100°—58.0 " " "

There is here a slight difference in favor of the 70° lot, but the 40° lot weighed a trifle more than the 100° lot. It would be unwise to ascribe this slight variation to the temperature of the water used.

In this experiment a record was made of the soil temperatures before and after watering. From these observations it was noted that the influence of the temperature of the water used was not apparent after three hours. In the following table is given a record of the variations in temperature of the soil in the pots at one watering; the readings are Centigrade:

No. of lot.	Before watering.	After 1 hour.	After 2 hours.	After 3 hours.
32°....	20.2° C.	17.8° C.	19.6° C.	24.2° C.
40°....	20.8	19 2	20.6	24.2
70°....	20.0	20.8	21.4	24.2
100°...	20.4	24.0	23.6	24.2

TOMATOES IN SOLID BEDS.

An extensive experiment was conducted with tomatoes in a house 22x75 feet without benches of any kind. The soil consists of fourteen inches of well manured loam underlaid with several feet of gravelly clay. The plants were set two feet apart in rows four feet apart. All were treated alike, so far as possible, except in the temperature of the water applied. In this case 32°, 60° and 90° were the temperatures selected. The

plants were watered about once a week; from two to three gallons of water applied to a plant. The following gives a summary of results:

No. of lot.	Total No. fruits.	Total wt. of fruits.	Average weight of fruits.	Weight of plants.	Height of plants.
		Gram.	Gram.	Lbs.	In feet.
32°.....	303	21,511.0	70.00	45.26	5.55
60°.....	300	21,014.0	70.00	41.12	5.42
90°.....	281	19,187.0	68.30	39.27	5.31

Here the plants that were thoroughly drenched with ice water actually yielded more than the ones watered with warm water!

Many other trials were conducted and all with similar results. Much work was also done in the field. An outline of one such experiment with its results may be of interest.

On a plat 8x50 feet were planted several rows of summer radishes and snap beans. The plat was then divided crosswise into three equal parts; one watered with ice water, one with warmer water (about 70°) and one not watered at all. Several hundred gallons of water were applied to each of the two irrigated plats.

In this case the plants watered with ice water exceeded in weight the ones watered with warm water about eight per cent, while those not irrigated at all weighed eighteen and six-tenths per cent less than those watered with ice water. It follows then, other conditions being equal, that twelve thorough waterings with ice water produced ten and six-tenths per cent greater yield than where no water was used. The rainfall during the past season was regarded as nearly or quite sufficient for the development of crops well cared for.

SUMMARY.

From the results of these and numerous other trials, not here noted, the conclusion appears fully warrantable that the growth of ordinary greenhouse and garden crops is not affected by the temperature of any water ordinarily available for irrigation purposes. The temperature of the soil about the roots of the plants so quickly regains its original temperature that no check to growth is likely to result. FREDERIC CRANEFIELD.

Fuchsia Photograph Competition.

On pages 588 and 600, No. 501, Vol. XIII., of the AMERICAN FLORIST a premium of $5 was offered for the best photograph of a fuchsia grown in accordance with the terms therein stated. It was decreed that photographs should not be admitted to the contest unless the subject cuttings were put in later than January 1, 1898, and grown in accordance with the cultural method outlined by "L. O. N." which was as follows:

"To proceed, select strong, newly made shoots that have been produced upon the old stock plants in a house that has been supplied with air and light in abundance and in a night temperature of from 50° to 55°. Pot the cuttings at once into 2½-inch pots, using soil that is light, moderately rich, and porous; place them in a temperature of 60° keeping them well sprinkled and shaded from the direct rays of the sun until well rooted. It should here be stated that great care must be exercised so as to never allow the cuttings to wilt at any time, either from lack of moisture or too much heat. After they are well rooted they may gradually be inured to more light and air, and given a position close to the glass and in a night temperature of not higher than 55°. As soon as the young plants are thoroughly well rooted they should be given a shift into well drained pots 5 or 6 inches in diameter, according to the strength of the young plant and the variety, using as a compost something similar to that recommended for the cuttings, with perhaps the addition of a little more loam. Great care in watering must be exercised at this stage of the young plant's existence or failure will more than likely be the result. They should have enough water, but not too much. One good watering to settle the soil will suffice after the repotting for a day or two, when the caution above referred to must be brought into play."

The contest was inaugurated to demonstrate the ease with which beautiful plants of the fuchsia may be grown for spring or summer sales, and many photographs were received in response to the offer. All these pictures were submitted to Prof. John F. Cowell, Director of the Buffalo Botanic Garden, whose decision is made known in the following letter:

ED. AM. FLORIST:—After carefully looking over the fuchsia photographs and considering the conditions as published, I award the prize to Mr. Peter Crovetto, of Millbrook, N. Y., for his 5-inch pot plant of Charming, the photograph of which is here reproduced.

Other photographs submitted were probably from good plants but in some instances the picture is not distinct enough to enable one to judge the true character of the specimen.

JOHN F. COWELL.

West Seneca, N. Y., January 6, 1899.

FUCHSIA CHARMING, GROWN BY PETER CROVETTO, MILBROOK, N. Y.

The Propagation of Bulbs.

This is a most important and interesting question both for the horticulturist and the botanist; and the history of the mode in which these plants are reproduced, is perhaps the most delightful phase of their delightful and absorbing life history.

They may be multiplied by seed, but this is for the most part a long and tedious process, and usually only employed in the case of raising hybrids. Too many years elapse before the bulb is mature enough for flowering, and the patience of the cultivator becomes, consequently, exhausted. The hyacinth, *e. g.*, demands a youthful immature career of some five or six years before it can feel energy and power, and ripeness enough to throw up a flowering spike. Some of the smaller bulbs, however, are frequently grown from seed, such as the snowdrop and squill, for these do not take so many years to mature their bulbs for flowering. The majority, however, such as hyacinths, tulips, narcissi, crocus and gladiolus, are propagated, when the bulb has reached a certain age, vegetatively, or by means of ordinary stem-branching,

Fig. 128.—Plant arising from a bud on leaf of Curculigo.

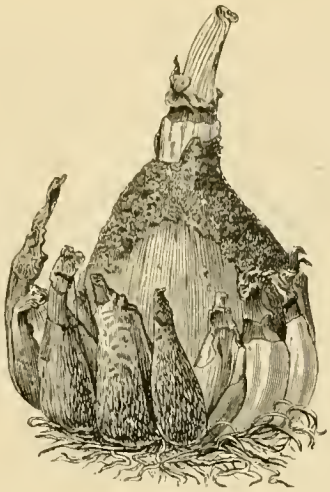

Fig. 129.—Method of natural increase of bulbs in Narcissus.

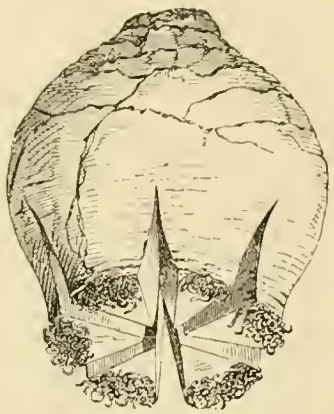

Fig. 130.—A method of Hyacinth propagation by notching the base of the bulb.

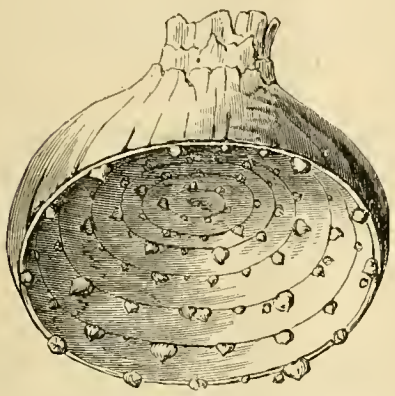

Fig. 131.—A method of Hyacinth propagation by scooping out the base of the bulb.

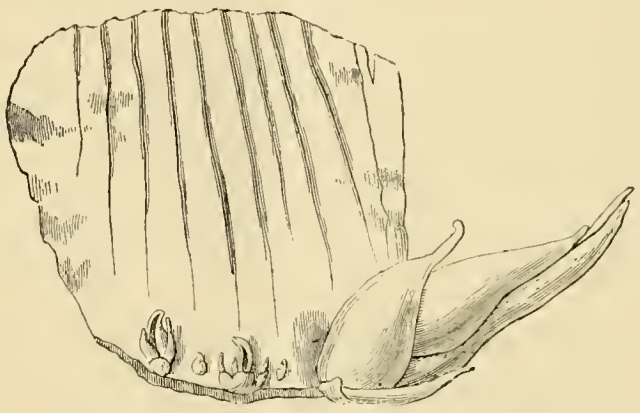

Fig. 132.—New bulbs arising from a bulb scale of Lily.

i. e., that in the axil of one or more of the foliar organs, or scales, a branch arises in the form of a swollen bud, developing fleshy appendages, or scales, like that of the main axis, until, eventually, it grows into a bulb like its parent, which latter decaying, it eventually replaces. Great numbers of such young bulbs may be produced by the parent; obviously a most convenient and rapid method of propagation.

The young bulbs are formed laterally, often in great numbers all around the parent in the axils of the scales of the latter, in the typical bulb. In the gladiolus and crocus, when the foliar organs or scales do not constitute the "bulb," the young corm is necessarily produced as a lateral branch in the axil of a scale-leaf at the top of the parent corm, for in that region is situated the growing point. The young corm then gradually replaces the old one below, which dies.

When the bulbs are taken up in the spring or early summer for housing, the young bulbs are all removed and reserved for planting in separate beds the following autumn, thus freeing the old bulb from the encumbrance of their support, and enabling it when replanted to concentrate its vital energies on its own growth and maturation.

A very interesting and useful method, which is adopted in the propagation of the hyacinth, consists in making two or three longitudinal slits across the underside of the bulb, *i. e.*, in the rudimentary stem, after removal from the ground. When placed on the shelf to dry, it is not long before numbers of tiny young bulbs are formed at the margins of each slit. Another means employed for gaining from each bulb a much larger number of offspring than is produced by nature in the soil, is that of scooping the bulb on the under-side, so that a large bowl-like cavity is formed, lined with the cut transverse surfaces of the fleshy scales. At the margins of these surfaces sprout very numerous young bulbs of very small size, representing so many tiny individual plants; these are all separated and grown apart in the autumn. It is well to study the raison d'etre and learn the biological significance of the production of young bulbs by these processes.

When a plant or part of a plant is wounded in any part of its tissues, it immediately sets to work to heal the wound which has been made; and this is effected by renewed growth on the part of the tissues immediately adjoining the injured part, so as eventually to cover over the wound by a protective callus. Some plants, but by no means all, have the power of producing, under certain conditions, offspring from nearly every organ, especially from the leaves; the instances of some ferns, begonia, curculigo (Fig. 128), streptocarpus, occur to us. If an incision be made in a detached leaf of a begonia lying on damp soil or sand, an entire new plant or plants will be formed at the margin of the incision. Numerous cases of natural adventitious budding will occur to us. This same power is possessed by bulbous plants. We have already seen how entire new individuals may be formed from ordinary branches of the stem in the ordinary natural method of bulb-propagation (see illustration of narcissus, Fig. 129). That is a not uncommon phenomenon, for we know that very many plants have the power of forming new individuals from their branches or portions of their stems, as in cuttings. In the first named slicing method of hyacinth propagation, it is the stem which is chiefly affected, hence we see here a case of adventitious budding from the stem of the same nature as the phenomenon of multiplication by means of cuttings. In the second-named method, however, that of "scooping" and "notching" (see Figs. 130, 131), it is the foliar organs, the scales, equivalent to ordinary foliage leaves, which are affected, and hence we find here the same phenomenon of the production of new individuals from the leaf as in the begonia, for the tiny bulblets are formed all round the cut edges of the scales.

Now, in all these cases of adventitious budding, as the result of wounding in some way or other, the energy which in ordinary cases of wounding is used solely and simply for the healing of the injured part by the formation of the simple callus-tissue, is in those cases which we have had under consideration, as well as in others, directed toward the building up of a new individual, with all its complex, differentiated tissues. For these cases are generally those of fatal wounding of the plant or organ, in which the possibility of renewed life and growth is precluded forever. And then the instinct of the plant asserts itself in the endeavor to create a numerous progeny capable of continuing the thus violently interrupted

life-cycle—just as the production of great quantities of spores is induced in many fungi and algæ when unfavorable outward conditions prevent a continuance of their normal vegetative growth. Very fortunate and convenient for the bulb grower is this habit of economy and desire for offspring on the part of the plant.

This same faculty in the plant of producing new individuals from the vegetative organs by adventitious budding is seen in some of the lilies (see Fig. 132). We used to propagate Lilium auratum, the beautiful Japan lily, in part, by pulling some of the bulbs to pieces and sowing the separate scales in sand, for each scale is capable of producing a new plant from its injured basal end, when thus detached and isolated from the bulb; offering, in fact, a similar instance to that of the begonia and streptocarpus leaf, and compensating by this rejuvenating process for the entire destruction of the parent bulb.

The main reasons for the annual removal of the bulbs from the soil, and storing them until the planting season again recurs, are the following: The young bulbs can then be detached and sorted from the others; the bulbs are secured thereby from the dangers of mice, and from accident from rain or drought; the decaying or unhealthy scales and roots can be removed, allowing a freer circulation of air, and freedom from infection by bacteria to the remaining parts of the bulb, and a longer rest and respite from growth is allowed to the bulb than they would get if left in the ground, and have a likelihood of their more profuse flowering next spring.

A method of cultivation of hyacinth bulbs, familiar to every lover of flowers, demonstrates clearly the nature and function of the "bulb" as the storehouse of all the food substances necessary for the production of the leaves and flowers. This is the practice of growing the bulbs in glass vases of water, so that the latter just bathes the base of the bulb, when long roots can be seen growing out and downwards through the transparent liquid. The uninitiated will sometimes wonder, doubtless, how the bulb can thus throw up leaves and flower-spikes without any soil around it, being acquainted with the fact that bulbs are usually grown under the garden mold. But to the interested grower who understands something of the common laws of plant-life, and the functions of the various organs of a plant, before commencing the attempt of the successful cultivation of an organism like a bulbous plant, the case is fairly simple and easy of explanation. For the bulb contains within its own thick fleshy scales nearly all the nutriment necessary for the development of the aerial flowers and leaves, whose rudiments are already laid down within the heart of the bulb. The roots supply the water, which will also contain a few of the salts in solution which are needful for the growth of the flower and foliage. So far, however, and no further, can this pretty method of water culture proceed. For the permanent growth of the bulb under such conditions would be impossible; because the water, unless it were specially prepared for the purpose, cannot supply all the requisite salts so essential to the plant, which are found in the soil. If sufficient skill, labor and patience were afforded, however, water culture would be quite possible, at least, for a certain length of time, as an interesting hobby and experiment; but for all practical purposes it would be useless, and is quite contrary to nature.

In conclusion, I would say that bulbous plants, like other members of the vegetable kingdom, are to be treated under cultivation in accordance with their peculiar organization, structure, and habits, and I am convinced that the perfection of horticulture will alone be attained when an interested and familiar knowledge of the structure and life histories of plants is united to a thorough and practical acquaintance with their treatment in the garden under cultivation.—*Adapted after W. C. Worsdell in the Gardeners' Chronicle.*

Plants Versus Holiday Cut Flowers.

This is a question decided wholly from one's point of view. Mr. Herr, on page 678 of the last issue of the AMERICAN FLORIST, seems to step out of his own sphere and decides off-hand questions affecting two classes of business in which he has had, apparently, little experience.

As to the storekeepers' proper business policy, that is a matter for them to decide; not for the grower, unless he chooses to become store keeper. However, the general proposition that the merchant watches closely the trend of popular taste, and shapes his stock to best supply that popular demand, will hold as good in the florist's business as in any other.

At the present time the cut flower grower is reaping a just inattention from the consuming buyer for his foolish attempt to dictate to the public what that public should and should not buy. In the magnificence of his own conceit, made more magnificent by his complete isolation from the flower buying consumer, he attempted to usurp many of the rights which the consumer himself exerts or else refuses to purchase.

The screed was announced that no new plant or flower should be sent forth without a certificate of growers, who were to decide by rules and scales whether or no the candidate was a proper subject for growing, sale, etc., and the rank and file purchased the successful candidate ad libitum. The retailer was flooded with an avalanche of indifferently grown material and a novelty price demanded therefor, and much to his chagrin he found a sickening sameness creeping into the stock in which he could trade, and in many instances the same wares hawked before his very place of business at less prices than he was obliged to pay for his stock.

Naturally his mind sought some relief, and he found in the plant grower a more plastic and accommodating source of supply. His customers welcomed the change; the business was more profitable than cut flowers had become. These facts settled the question, as they will always settle it whenever a change comes under consideration, and the cut flower grower reaped but the natural result of the laws of supply and demand. This is the cause for the change of which Mr. Herr complains, stated from my point of view.

Possibly a more exaggerated misstatement of facts could hardly be made than Mr. Herr's assertion that the growers of first class carnations who really make a profit can be counted on the fingers of one's hands, and, if carefully sifted down, on one hand. Bless your soul, Mr. Herr, it would take the best hand you have to count the successful growers of good carnations around New York City. Indeed, Long Island alone can fill your hand. Dailledouze, Suydam, Bell, Rath, Allen and Besold more than fill your hand already, with our own humble place as well as several others out of the question.

None of the above candidates have as yet applied for admission to the county poorhouse, though I understand the Dailledouze boys have been getting a "little closer" to that institution lately. And I will further venture that at least five more successful growers can be picked up around New York from Jensen, of Mamaroneck, to Asmus, of Hoboken. Even the staid old rosarian, Jno. N. May, pulls a pretty steady oar in carnations, and my neighbor, Jno. H. Taylor, has visions of acres of carnation houses since the last bulge in Calumet and Hecla.

Boston will hold up the names of Peter Fisher, Wm. Nicholson, F. A. Blake, H. T. Cook and others whom Mr. Herr will scarcely wish to class as anything else than producers of good stock. That jolly young athlete, Will Craig, of Philadelphia, sported a brand new suit the last time I saw him, and the cares of his carnation range evidently sat lightly on his shoulders. In the west Fred Dorner & Sons Co., Wietor Bros., Bassett &

SEEDLING KENTIAS IN BENCH.

Washburn, the Chicago Carnation Company, and some others, are all moving toward the poorhouse in the same way that the Dailledouze boys have been doing. Mr. Herr must hold up more digits! Mr. Herr is off!

However, he is right on one point; the grower of good stock should have an increased price for first class flowers at Christmas and Easter, and our experience has been that he always gets it provided his stock is fresh and up to standard. I have heard growers who held back their stock to the last day and then sent in a mass of tired flowers, with a few fresh blooms and some partially developed buds, kick like steers because they did not get the highest market returns.

So far as our experience goes, we have never had any difficulty in selling a first-class carnation that pleased the public taste at a reasonably profitable price at any period of the year. The remedy for the cut flower grower who is not receiving remunerative returns for his carnations is to improve his methods of culture and his list of varieties until his product is attractive enough to bring the price, or else, as Mr. Herr suggests, go to growing plants. C. W. WARD.

Queens, N. Y.

Wrinkles in Palm Culture.

That there is a growing demand for palms and all kinds of foliage plants there can be but little doubt, and the large increase in glass area given up to the growth of this class of stock with each recurring season, producing no excess except occasionally in a few lines, goes to prove that the love for plants is increasing, the stock being used up as fast as produced. This is a healthy state of affairs and should be a great incentive to growers to increase both the quantity and if possible the quality of their plants. The quality of the stock offered has much to do with its popularity and sale. The people are attracted by perfection. The prima donna demands extravagant prices which are eagerly paid while singers of great ability but without the finished voice are scarcely noticed and command but ordinary salaries. It is the same way in other lines; the record breaking man or horse attracts thousands while others very nearly as good go almost unrewarded.

This principle holds good in every department of the florists' business. It is the extreme finish put upon the plants and flowers through the skill of the grower that attracts the best customer. Not only with this class of stock is the price obtained a good one, but the excellence of the product draws the attention of the visitor and the temptation to buy, which did not exist before, is created and the sale made. The plant has successfully fulfilled its mission so far as the florist is concerned, except for the good it may still do by promoting sales of others of its kind. This virtue of excellence is recognized by most of the up-to-date growers of to-day and every convenience at their command is used to bring their plants and flowers to the highest state of perfection. A better knowledge of the habits and requirements of palms has enabled growers of late years to place their finished product on the market in a much shorter time than formerly. One of the greatest strides is made in handling the young plants from the sowing of the seed until they are ready for from 4 to 5 or 6-inch pots.

Kentia seeds were formerly sown in pans or pots, later in boxes of soil in order that they should not become root bound so soon, and now the better plan where a large quantity is grown is to use a side table or bench where the young stock is allowed to grow and attain quite a size before being transplanted to another bench, where they are given more room and develop into very stocky plants still holding their seed leaves. If the conditions are right they rarely receive a check when treated in this way and their rapid growth seems to keep them entirely free from scale or other insect pests. In every batch of kentia seeds there are many—probably the percentage is one-half—that start away first, develop more vigor and in a short time are twice the size of the weaker seedlings. This is accounted for by some who believe the stronger plants come from better ripened seed, although the good seed cannot be selected by sight as might be thought possible.

The pictures herewith reproduced show a batch of Kentia Forsteriana seedlings on a bench and a single plant the first season in a pot. The latter affords a good illustration of the short, stocky growth obtained by raising the plants in benches instead of the pots, pans or boxes heretofore employed. K.

KENTIA FIRST SEASON IN A POT.

Louisville, Ky.

The Kentucky Society of Florists held its annual meeting at Music Hall, in this city, on Tuesday evening, January 3, and installed the following officers:

President, C. H. Kunzman; vice-president, Jacob Schultz; secretary, Joseph Coenen; treasurer, Sam. P. Thompson.

After the meeting, its programme and ceremonies, the large number of members present partook of a banquet which was a credit to the chef.

CARNATIONS.

CULTURAL NOTES.

January 14.—Some growers make it a point to take large, heavy cuttings which present a fine appearance as soon as rooted, but my experience has led me to pin my faith to the side pips from the flowering stems or at the base of the heavier branches. I cut off the strong growing branches, and allow the side shoots a better chance to develop, as by this method one can get a goodly lot of strictly first class cuttings, and thus propagate a new or scarce variety in greater numbers than would be possible by waiting on the pips from flowering shoots. But it is unnecessary to sacrifice the flowers unless you are very short of stock.

There is this difference between the cuttings made from the tops and those made from tips or side shoots: The tops make finer looking cuttings, but not such fine plants; neither will they produce as much bloom as cuttings made from pips or side shoots.

Especial care should be used in making the cuttings to see that the plants from which they are taken are in the best of health. Some growers would not propagate from a plant that had a few dry leaves around the bottom yet where the dry leaves are the effect of drought and the plants are otherwise in good health, just as good cuttings can be taken from them as from any others.

Bacteria and stem rot are the two evils to exclude most carefully in the selection of your plants for propagation, as both are liable to be carried over into the young stock. For example, the grower who propagates Flora Hill indiscriminately will, before many years, have his stock in such condition that he will class

it with the run out sorts, but he will find it a hard variety to beat in the hands of a grower who selects his stock carefully.

After selecting a good healthy cutting, there should not be much trouble in getting it to root. Trimming the lower leaves off is largely a matter of choice and, as we are putting in the cuttings, we take off a few of the largest leaves and any that may be in the way of making a neat job. It is not necessary to have a special brand nor special degree of coarseness, but it is well to have sand that is porous enough not to pack solidly and does not form a crust. It should be put on the bench not less than three nor more than four inches deep and saturated well before, and again after, the cuttings have been put in.

Paper or muslin shutters are the best shading. The temperature of the sand should be about 60° for the first ten days, with the top temperature as nearly 50° as possible. At the end of that period they should be pretty well callused and if you are anxious to get them rooted quickly the temperature of the sand can be gradually increased until it reaches 70°, but without increasing the top temperature. After they have formed roots the shading should be taken off and they should be allowed to harden up a little before being taken out.

Carnations can be rooted without bottom heat and in the house in which the plants are growing, but if you have any quantity to root it will pay you to rig up a propagating bed and follow the above directions as nearly as possible, taking care not to have the sand at any time warmer than 70° as there is danger of weakening the cuttings.

Some growers spray their cuttings every morning and some varieties stand it pretty well, but others, such as Daybreak and Triumph, if kept constantly wet in the propagating bed will have "spot" more or less developed by the time they are rooted. When the sand needs water give it early in the morning and on a clear day if possible, so that you can have the cuttings dry again by night. Direct currents of air should not be allowed over fresh cuttings but the house should be well ventilated, as a close atmosphere will surely breed cutting bench fungus. A preventive of fungus is to water the cuttings with the copper mixture recommended for carnation rust.

ALBERT M. HERR.

CARNATIONS REGISTERED.

The following carnations have been registered under the regulations of the American Carnation Society:

By E. G. Hill & Co., Richmond, Ind.—America.—Color a rich, soft scarlet; large in size, of extra robust growth, free in production of bloom; a good commercial sort.

By H. A. Cook, Shrewsbury, Mass.—Dorothy Mandell.—Color a pure rose pink; large flower, long stem and prolific; a strong grower and vigorous, like Wm. Scott, but of a more open growth.

By F. Dorner & Sons Co., Lafayette, Ind.—G. H. Crane.—Color a brilliant scarlet, keeping its brightness and does not dim with age; large, perfect flowers well built up in the center and a strong calyx that does not burst; stem sixteen to eighteen inches long and stiff, holding up the flower in the early part of the season as well as during the later spring months; plants strong and well formed with hard broad foliage; easily grown and quickly established; an early and continuous bloomer, being thickly covered with buds for the holidays.

By John N. May, Summit, N. J., and Robert Craig & Son, Philadelphia, Pa.—Melba.—A grand combination of good qualities; free bloomer, early and continuous; in point of color the finest pink carnation yet produced; large and perfect in form, very fragrant and with a long stiff stem.

By L. A. Moore, Unionville, Pa.—Moore's Crimson.—A free flowering, perfectly healthy variety, early and continuous in bloom.

By Joseph Towell, Paterson, N. J.—Gov. Griggs.—A strong, healthy grower; continuous, free bloomer, with stiff stem, and in color similar to Daybreak but brighter; of good shape, with full center and does not burst; beautifully fimbriated.

ALBERT M. HERR, Sec'y.

DORNER'S G. H. CRANE.

This is one of the leaders among the novelties now offered. It is an excellent scarlet with large flowers and good calyx and stem. The blooms are produced freely throughout the season and never come washy. This variety received the American Carnation Society's certificate at Chicago, February, 1898, scoring ninety-two points; certificate and silver medal at the Chicago chrysanthemum show, and certificate at Indianapolis last November. A vase of the flowers, as exhibited at Chicago last February, is shown on page 780 of the AMERICAN FLORIST, Vol. XIII. The illustration herewith reproduced is from a photograph of a house of this variety at the establishment of F. Dorner & Sons Co., Lafayette, Ind.

Florists Visit New Castle, Ind.

An invitation was extended to the Indianapolis Florists' Club and to several leading florists in the state to visit the South Park Floral Company at New Castle, Ind., on Thursday, January 5, and about fifteen were present to enjoy the hospitality of Hellar & Co. and to view some of the finest carnations, violets and roses in the west.

The Indianapolis train arrived about 7 a. m., and we were informed that some of the boys had to awaken about 3 a. m. to catch the train. Nine were present from Indianapolis, but no doubt there would have been fully double this number had there been a later train. Among the other visitors were Stuart & Haugh, of Anderson, Fred Lemon, Richmond, and W. W. Coles, Kokomo. The Kokomo man, however, did not arrive until after the Indianapolis boys had returned home, much to his disappointment. On reaching the greenhouses, ten in number, we found everything in the pink of condition. In fact, it was acknowledged by every visitor present that they had never seen a place so uniformly good throughout. Fred Lemon, who has spent a year in the vicinity of Summit and Madison, N. J., declares he never saw such fine roses, and the boys had to pull him and Henry Rieman out of the Bride house to catch the train for home.

The houses are all connected, with no partition walls between, somewhat after the style of Dreer's, at Riverton, or Reinberg's at Chicago. This gives a free circulation of air through the houses, which I believe is beneficial to the growth and welfare of the plants, besides being much cheaper in construction. We were first taken to one of the Beauty houses, 25x132, in which there were two benches of old plants and two of young ones. There were good strong shoots all over the house from five to eight feet long and full of buds, with a splendid crop starting from the bottom, and not a sign of mildew or black spot. The preference was given to the old plants.

House No. 2, 25x132, was full of Kaiserins, now in a semi-dormant state but in good condition. No. 3, another Beauty house 24x110, about half each of young and old plants, was equal to the first. The next house, 20x110, was filled with Bridesmaids and Brides in splendid condition. But the crowning house of this fine establishment was one 20x110 filled with Brides—old plants. There was a perfect shower of buds, and good ones, too, many of the stems being three feet long. The next house, 24x120, was planted with old Bridesmaids just coming in crop, and in a few weeks will be as fine as the preceding house of Brides.

Houses Nos. 8 and 9, each 24x120, were planted to carnations. The varieties doing the best were Triumph, Albertini, McBurney and Helen Keller. Jubilee was also in fine form. Notwithstanding the carnations were in as good shape as one could wish, Mr. Hellar informed us it would be their last year to grow carnations as roses pay them much better. The last house, but not least in point of profit, was filled with California violets. The plants were small, but flowers large and plenty of them. John Hartje, of Indianapolis, remarked it was the grandest thing there. They had just picked 500 for the Chicago market, but the plants had the appearance of furnishing that many more without being missed.

Wm. Dittman, the foreman and grower,

HOUSE OF CARNATION G. H. CRANE AT DORNER'S, LAFAYETTE, IND.

deserves the credit of producing this fine stock, as he has full charge of everything. One of our party remarked that the South Park people had struck a good soil to produce such good results, but Henry Rieman answered that he was sure they had struck a good grower. It is seldom that we can go through a place of this size without finding one or two poor benches, or at least bad spots, but this place was paying good interest on the investment on every foot of bench room.

It may not be amiss to give in a brief way Mr. Dittman's treatment for old plants which he carries over. Beauties are removed to the open ground, after being dried for about two weeks. About the middle of June they are heeled in and given natural outdoor treatment, never watered or touched for about four weeks. They are then removed to the rose houses and replanted in new rose soil. They are cut back to within about ten or twelve inches of the base and kept on the dry side until nicely started, after which they receive the same treatment as young plants. The treatment of old Bridesmaids and Brides is somewhat different. They are not removed from the bench where they have grown, but are allowed to get pretty dry at the roots for some four or five weeks, beginning about the middle of June. About the end of July all weak shoots are cut out and the strong canes bent over, old soil scraped off to the roots and top-dressed with two-thirds manure and one-third soil. The soil is kept on the dry side until the plants get into strong, vigorous growth in late fall. The violets are in pots and grown under glass all summer. From this house, 11x120, 2,700 were shipped for Christmas. They also shipped over 900 Beauties for Christmas. The South Park Floral Company consigns to E. C. Amling at Chicago. W. W. COLES.

New York.

CLUB MEETING.—VARIOUS COMMITTEE REPORTS.—A PROSPEROUS YEAR FOR THE ORGANIZATION.—MEDALS WON.—CHANGE IN INITIATION FEE.—PROMISING NEW CARNATIONS.— BUSINESS MODERATE.— VIOLETS OVER-ABUNDANT.—HARD TIMES FOR SMALL ROSE GROWERS.— AN IMPOSING HORTICULTURAL STRUCTURE.—BUSINESS CHANGES.— PERSONAL MENTION.— DEATHS AND OTHER BRIEF NOTES.

The January meeting of the Florists' Club was not as well attended as some of its predecessors but was, nevertheless, a very interesting occasion. Many matters of detail in the working of the organization were adjusted and a good start made on the business of the new year. The award committee reported through its chairman, A. S. Burns, that they had visited the greenhouses of J. N. May and inspected the new pink carnation, Melba, which they found entitled to a certificate, having scored 85 points. Secretary Young reported that the medal competition for the year 1898 had resulted in the winning of the gold medal by W. A. Manda, the silver by C. W. Ward and the bronze by Thomas W. Weathered's Son, and it was announced that the medals, suitably engraved, would be presented at the February meeting.

The report of the essay and entertainment committee was presented by W. J. Stewart and showed that eight interesting lectures had been provided during the year, including one stereopticon exhibition, one ladies' night with refreshments and one smoker in December, all of which had been well attended. For the legislative committee, Mr. O'Mara reported that the work done recently had been under the supervision of the S. A. F., and that a full account of its doings would appear shortly in the trade papers. Reports of Secretary Young and Treasurer Weathered showed the balance in the treasury to have increased during the year, the membership being 156, of whom thirty-eight have been added during the year and there having been but one death, that of J. D. Burnett. The proposed amendment to the by-laws in reference to manner of nominating and electing officers was defeated and the initiation fee was fixed at $3 instead of $5 as heretofore. The president made an interesting address congratulating the club on its prosperity and outlining his views as to the policy to be pursued during the coming year. He noted especially the evident drift of popularity in occasions of a social character as compared with those of a purely technical or educational nature and among the things he especially advocated were more intimate and friendly relations with sister organizations, the holding of a public exhibition, even if it should be a small one, an invitation to the S. A. F. to meet in New York City in 1900 and the support of the bowling club. Paul Berkowitz, of Philadelphia, was present and responded to a call with a neat little speech.

On the exhibition table were vases of the new carnations, Maud Adams from Frank Niquet, and Governor Griggs from Jos. Towell, also carnations, tomatoes and mushrooms from President Plumb. The new carnations above mentioned are to be introduced this season. Maud Adams is a splendid cerise and fully bears out the high promise made for it when exhibited before the club last year. Governor Griggs was now shown for the first time. In color it is an improvement upon Daybreak. The flower is also larger and commands a much higher figure than that variety as a cut flower. A limited quantity of the blooms have been on sale at John I. Raynor's and they have met with high favor among the critical florists of the city.

Business has settled down to a somewhat steadier condition than prevailed during the week of New Year's. The weather has been more favorable for the production of cut flowers, which are consequently improved in quality and are selling in most varieties at prices that will compare favorably with those prevailing at the same season in recent years, as an examination of our market quotations will show. Violets are the most disappointing feature. They are very abundant and are seen in large quantities on the sidewalk stands all along Twenty-third street, "and they're hickory nuts at that," as Charlie Carlin says.

It would appear from a careful observation of the tendencies of supply, demand and prices in the cut flower business here that the most unfortunate man at present and for the future is the small grower who, in times past, has made shipments, say once or twice a week, to the wholesale markets, saving his daily cut until the accumulation should be large enough to make a respectable-sized shipment. A certain portion of such shipments is necessarily several days old and no matter how adroitly this may be distributed among the fresh stock, such is the proficiency of the latter-day trade, curb-stone venders included, that the mixture is discovered invariably, and such lots, if sold at all, go for a song. This applies especially to the small rose-grower now, but the carnation grower is likely also to find his opportunities becoming more and more restricted, in progress of time, as big carnation factories multiply.

On January 3, ground was broken for the new Horticultural Hall, which is to be erected at Bronx Park by Lord & Burnham. The dimensions of the structure will be 60 x 512 and the dome will be 90 feet in height.

The proposed carnation exhibition by the New York Gardener's Society has been postponed until the second Saturday in February. C. W. Ward will offer a special premium to be competed for.

L. C. Bobbink has taken F. L. Atkins into partnership. Headquarters will still be at Rutherford, N. J., and the firm name will be Bobbink & Atkins.

John Nicholas is making extensive improvements in his store in Forty-second street, including a new projecting window with tiled platform.

Henry Jaeger, who has carried on a florist business on Avenue B, between Eleventh and Twelfth streets, for many years, died on January 4.

A coroner's jury that has been investigating the death of an old flower peddler named Jean Baptiste Colin, has brought in a verdict that the old man was murdered.

Greenhouse builders and manufacturers of heating apparatus report business as very quiet now, but are receiving an encouraging number of inquiries regarding work for next spring.

News has come of the safe arrival of Alfred Dimmock on the other side of the Atlantic after an unusually tempestuous voyage.

Dracæna Godseffiana has made a very favorable impression as a basket plant for the holidays and is likely to be grown and used more generally.

W. A. Prosser, of Vaughan's Seed Store, has been the recipient of no less than three baby carriages from his friends. He thinks these will be sufficient.

The first Von Sion daffodils made their appearance at Raynor's on January 5.

Visitors in town: J. T. Butterworth and wife, So. Framingham, Mass.; Mr. Lundberg, gardener to A. P. Stokes, Lenox, Mass.; T. Waters, Boston.

Buffalo.

BUSINESS IS PRETTY GOOD—BULBOUS STOCK QUITE PLENTIFUL BUT SLOW SALE.—CARNATIONS BLOOM MORE FREELY.—ROSE PRICES FIRM.—JOTTINGS AMONG THE TRADE.

Trade the past week has been fair. A few receptions have given some good orders and funeral work has been very steady for nearly a month. Hyacinths and narcissi are quite plentiful but find limited sale. Tulips made their first appearance January 7. Carnations are becoming more plentiful and vary in price from $1.50 to $3 per hundred. Violets are fair and hold their own in price. Roses show no scarcity, but the price is rather high for the ordinary run of stock. Beauties are sold in limited quantities.

D. B. Long has introduced and sold some very artistic calendars and telephone cards. His book on the care of plants, for free distribution by the trade, is a good thing and sells well.

At one time last week Kasting's wholesale house was partly a hospital. Four of his employes were ill with the grip.

Lockport must have had a holiday to Buffalo last week, as C. L. Dole, F. B. Lewis, F. G. Lewis and Thomas Mansfield were all visitors.

Jerry Brookins, of Orchard Park, N. Y., is sending in Daybreaks that are unusually large flowers on stiff stems. W. A.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

"PENNSYLVANIAN" will find an exhaustive account of modern cannas in our issue of December 24 last.

PLANTS of the improved forms of Primula obconica are in considerable demand for Easter trade.

GLASS promises to be lower this year. The high prices of last season prevented many greenhouse men from building or renovating, and some who deferred extensive changes and additions are now soliciting quotations from foreign jobbers and manufacturers.

AUSTRALIAN CHRYSANTHEMUMS have made quite a stir in England this season. The variety Nellie Pockett, originated in Australia, according to the *Gardening World*, has received nineteen certificates, including the award of merit of the Royal Horticultural Society and a first class certificate of the National Chrysanthemum Society.

Greenhouse Building.

Brunswick, Me.—John McManus two commercial houses.

Philadelphia.—E. W. Clark, greenhouse costing $600.

Germantown, Pa.—Wm. Berger conservatory and show house costing $1200.

So. Portland, Me.—E. J. Harmon, two commercial houses each 300 feet long.

Bulbs for Easter.

ED. AM. FLORIST:—Please tell me through your journal what date I should move my Von Sions, Dutch hyacinths and tulips from the cold frames, out of doors, to a house which registers from 50° to 55° at night, so as to have them in bloom for Easter. D. E. G.

From three to four weeks previous to April 2, the date of Easter this year. It will, however, he well to start the forcing process at a lower temperature than that indicated above, say 35° or 40°. GROWER.

Catalogues and Cut Flower Price Lists Received.

Cement Joints for Cast Iron Pipes.

ED. AM. FLORIST:—Will cement make a satisfactory joint for cast iron pipes? I have been told such joints are not uncommon, but feel doubtful as to their contracting and expanding with the pipe satisfactorily. Z.

[Cement joints have been tried quite extensively in recent years and they are said to compare favorably with any other kind. In making these joints, however, it is necessary that the preliminary packing be thorough.—ED.]

Some Recent Fires.

GOVANSTOWN, MD.—The greenhouse at the country place of Henry M. Walker on York road was destroyed by fire January 6. The flames resulted from an overheated furnace and destroyed about 2000 plants, valued at $1000, besides the structure, which was worth $300.

HARTFORD, CONN.—On January 3 a workman at John Coomb's greenhouses placed his lighted pipe in a pocket of his coat and laid the garment aside. The blaze which resulted broke 400 panes of glass 16x24 and did much damage to stock. The loss is partly covered by insurance.

NEW YORK MILLS, N. Y.—At 3:30 a. m. on January 2 the rosehouse and house of general stock of Mrs. W. D. Wolcott was destroyed by fire caused by an overheated furnace. The loss was very large, particularly on stock. The buildings were insured for a portion of their value.

Philadelphia.

TRADE IS NOT AS BRISK AS IN PREVIOUS WEEKS.—DEMAND EQUAL TO SUPPLY, HOWEVER.—ROSES OFF CROP.—CARNATION JOTTINGS.—LILIES CAUSE ANXIETY.—A VISIT AT SCOTT'S.—GRAFTED ROSES.—NOTES AND COMMENT.

While business is not slow it lacks that snap and go that was so evident just previous to the holidays. There are still a few debutantes and an occasional wedding which, with the dinners and balls and mortuary occasions, keep stock in manageable form and there are no accumulations to worry over. Prices, however, are easier. Beauties are scarce, being off crop with most of the growers. This matter of all houses being off crop about the same time has received the attention of many growers with but few satisfactory results. It seems that no matter how far apart the houses are started they will get together about midwinter and continue so the balance of the season.

Carnations are a little easier in price, $1.50 per hundred buying the best ordinary. Weaver's S. S. Pennock shows up very well and he should have a vase of fine ones for the exhibition. Annie Eastburn, a fine white with a good stem, is being handled by Baker; it is much better than the average. Robert Craig & Son's Melba is in perfect form and its lovely pink color is rapidly making it a favorite. It sells readily at $6 per hundred. Violets are also down. Mignonette is plentiful. A few Harrisii are in. J. Atkinson, of Edgewater, is first in with freesia, as usual.

How are your lilies? This is now a leading question when growers get together. Easter coming early is making many men nervous as to whether their stock is forward enough. There does not seem to be as much disease as last season.

A number of batches of Crimson Rambler are being moved in to get started, as it requires time to get it in without forcing, which process so often spoils the crop at the finish.

E. G. Hill was in town the early part of the week. His mission, it was said, was looking up novelties, particularly in carnations. He carried Robert Craig away with him. He expects to be absent for a week or so.

A visit to the establishment of Robert Scott & Son, Sharon Hill, about fifteen minutes ride from town, shows everything to be progressing nicely there. A house of Beauties looked very well, as did two houses of Bridesmaids. Liberty, the new red rose, was the center of attraction, and while off crop at present, will soon be on with another. A house mostly Kaiserin had borne heavily all season and even now, when the rose is supposed to be resting, they were producing many fine blooms. Most of the stock was planted in prepared ground beds with cinder and brick-bat drainage, which saves the expense of benches and seems to answer just as well for many varieties. Mr. Scott is a firm believer in grafted roses and makes a specialty of this class. His stock of grafted plants will number about 45,000 when they are all worked up and ready for the market next spring. He claims to be able to produce better plants than the average florist, who is a novice at grafting, as he has learned much by experience. His grafts are nearly all successful now, whereas he had failures at first.

W. H. Taplin will have charge of "Plants for the Home" at the farmers' institute to be held in Horticultural Hall on January 17. Robert Craig was assigned the subject but declined on account of other business.

Geo. Moss, the Seventeenth street commission merchant, is spreading out and has taken the store next door to his present quarters, his new number being 32 South Seventeenth.

W. F. and Adolph Gude, of Washington, spent two days with the trade in this city the past week. Harry Bayersdorfer had them in tow one evening and it goes without saying they had a good time. K.

Chicago.

WHOLESALERS FIND BUSINESS MUCH BETTER THAN A YEAR AGO.—ROSES OFF CROP.—WHITE CARNATIONS SCARCE.—VIOLETS IN PROFUSION.—THE BURLINGTON TO GROW PLANTS.—BUSINESS CHANGES.—JOTTINGS IN THE TRADE.

It is the consensus of opinion that business for the first two weeks of the new year was fully half again as heavy as during the same period of 1898 and there is a general buoyancy in the market which presages a prosperous season.

Of course trade is not on the holiday level but it is moving briskly along and the demand is such that good flowers are absorbed with avidity and stock must be poor indeed which does not command a sale. It seems that roses are very generally off crop and the supply is neither heavy nor of extra quality. American Beauties continue to be in excellent demand and are more than ever the leading flower in this market. Meteors are scarce but are of somewhat improved color. Good Brides, Bridesmaids, Perles, Kaiserins and Woottons are in demand and occasional lots of the rarer

roses, both new and old, are taken on sight.

Despite the increased plantings of carnations last fall there have not been enough in many lines to supply the winter's demand, although there may be an overstock later. Calls for funeral flowers have exhausted the whites this week and resulted in an increased sale for other blooms. Carnations have sold at all the way from 50 cents to $6 a hundred, but $1 to $1.50 has been the prevailing price. Mrs. George M. Bradt continues to command the top figure.

The violet crop this year is a big one and $1 has bought four good bunches of fragrant flowers this week. But the violet seems to be even more popular than ever this season and there is a market for immense quantities so long as the price remains on a medium level. Bulbous stock has met with little sale except for funeral purposes.

Superintendent J. D. Besler, of the Burlington Road, states that his company will build a greenhouse 20x60 at Aurora, to be heated by the exhaust steam from the shops at that point. It is not the intention to grow cut flowers, but to provide geraniums, coleus and other bedding plants for decorating the station grounds along the line. The cut flowers for dining cars will, as heretofore, be supplied by Bassett & Washburn.

W. J. Coxe, who was with C. J. Deane in the Albion Floral Company, has opened a neat store on Forty-seventh street just east of Lake avenue and just across the street from the Kenwood club. Mr. Deane is now in business with a former partner at Thirty-sixth and Cottage Grove.

Lena Meyer has caused an execution for $3,198 to be levied upon the twenty-four greenhouses and stock of her brother, J. C. F. Meyer, 1116 Dunning street. The claim is for money advanced and is fully secured.

Just to show that he retains his youth J. A. Budlong skated forty miles or more on Monday, from Bowmanville to the head of the North Branch of the Chicago river and back again.

The Hinsdale Rose Company reports that its product brought just fifty per cent greater returns in the five months from August to January than it did in 1897.

The annual meeting of the Chicago Horticultural Society will be held at the Sherman house this afternoon.

Harrisii lilies are now down to $1.50 per dozen, the level at which they rested last Easter.

Andrew Miller, of the Central Floral Company, has recovered from an illness.

Washington.

TRADE VERY SATISFACTORY UP TO A RECENT DATE.—W. R. SMITH AGAIN ILL.—GRIP IS VERY PREVALENT.—PRESIDENT GUDE'S CHRISTMAS GIFT.

There is nothing especially new or interesting to the trade in general. Business has been very satisfactory up to the present time, stock having been good as well as trade. Both, however, went off crop last Friday and since that time have been scarce, poor and likely to remain so for about ten days.

Ex-President Wm. R. Smith is again confined to the house with a bad case of that fashionable disease, La grippe, which has considerably interfered with the florists, and especially their help, in the past six weeks, some of the larger firms having three or four men on the sick list all the time. But it is no wonder that people are sick with summer weather one day and zero the next. From December 31 to January 2, in forty-eight hours, the temperature fell 66°, and two days later the rise was equally marked.

F. W. Miller, Jr., has been on the sick list since October 19, being afflicted with rheumatic gout in one of his ankles. He recently reported for business but after working half a day his foot gave way and he has since been unable to walk. Mr. Miller being an unusually energetic and active young man makes it all the harder for him to remain quiet, being otherwise perfectly healthy.

It was on December 19 that President W. F. Gude, of the S. A. F., received his Christmas present. It was a baby girl. P.

OBITUARY.

JAMES W. HURTT.

After a prolonged illness with dropsy James W. Hurtt, Circleville, Ohio, in December, succumbed. He was a retail florist for several years and leaves a wife and six children. His age was sixty-eight.

CHARLES BAUMGARTEN.

Charles Baumgarten, whose establishment at 320 West Water street is a leading one at Milwaukee, Wis., died January 10, after a long illness with cancer of the stomach. Mr. Baumgarten succeeded his father, who was one of the Cream City's pioneer florists, in the business and is widely known in the trade.

CARL GREIVELDING.

Mrs. A. Guillaume, the La Crosse, Wis., florist, has received word of the death of her father, Carl Greivelding, in Luxemburg, Germany. He was eighty years of age and leaves a wife and one daughter other than Mrs. Guillaume. Deceased was known by many of the Luxemburgers in the trade in this country.

JAMES B. WENDALL.

For many years James B. Wendall conducted a small florist business at Waterville, Me., where he grew all his own stock and sold it at a stand at the old city hall. He was one of the oldest residents of the city and was 87 years of age at the time of his death, January 2. He was forced to give up business long since.

ROBERT CHRISTIE.

A native of Scotland, and in his seventy-sixth year, Robert Christie, for over tweny-five years in charge of Senator Wetmore's fine estate at Newport, R. I., succumbed on January 2 to an attack of grip. Mr. Christie was one of the best known private gardeners in America. He was a member of the S. A. F. and a ready worker in its ranks, an enthusiastic canna raiser and forester, and an ornament to his profession. He leaves a widow, two sons and a daughter.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1899 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

Grand Rapids.

LOCAL FLORISTS VERY MUCH ALIVE.—CLUB ELECTS ITS OFFICERS.—PLANS FOR A BANQUET. — ARRANGING TO IMPORT GLASS.—ON TO DETROIT.

Trade has been good here ever since chrysanthemum time arrived, and the Valley City florists are very much awake. The Florists' Club held its annual meeting on the evening of January 3 and re-elected President N. B. Stover, who comes from Grandville, seven miles away, and never misses a session. The other officers chosen were: Vice-president, William Cunningham; secretary, Henry Smith; treasurer, Henry Van Velden; reporter, Charles Chadwick.

It was decided by the club to hold a banquet at the Eagle Hotel on the evening of Tuesday, January 17, and Charles Chadwick, J. A. Creelman and Eli Cross were designated as a committee of arrangements.

The members of the club are in earnest about importing their season's supply of glass. George F. Crabb, of Crabb & Hunter, has the matter in charge and expects to soon be able to announce arrangements for a consignment from Europe at figures considerably below those which the American combine is enforcing.

Although Grand Rapids growers are too busy to aid in the general revival of bowling interest which is sweeping the country they are planning to be largely represented at the S. A. F. meeting in Detroit. It is probable that this city will not send a delegation to the carnation convention at Philadelphia, but several club members will stage exhibits.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

EXTRA EARLY VALENTINE beans seem to be about the scarcest item in the list and southern growers appear to be in need of a double supply.

THE executive committee of the American Seed Trade Association will meet at the Park Avenue Hotel, New York, January 17, at 11 a. m.

LESTER L. MORSE, Vice-president and Secretary of C. C. Morse & Co., incorporated, was married to Miss Frances Pierce Maynard in San Francisco, Jan 5.

WE are in receipt of a very pretty little calendar from Jerome B. Rice & Co., seed growers of Cambridge, N. Y. Within a very small compass it contains the regular calendar for 1899, with a list of legal holidays and domestic and foreign postage rates.

THE 1899 seed catalogues do not clear up the Rocky Ford musk melon question. Many offer Rocky Ford as distinct, others offer Netted Gem only, as representing all that is needed. The AMERICAN FLORIST hopes to have the matter cleared up in plain statements of facts and requests further comments from growers who desire to bring out the exact truth as to what has given this melon its prestige in our eastern local markets against Netted Gems which have been grown at home for several years.

Cleveland.

THE GRIP AND SOCIETY DOINGS MAKE BUSINESS GOOD.—CARNATIONS ALL ABSORBED.—ROSES OFF IN CROP AND COLOR.—EADIE'S FINE LILY OF THE VALLEY.—BUSINESS CHANGES.

Business continues to be active both by reason of social affairs of various kinds and the ravages of grip and kindred diseases. The demand for flowers for funeral purposes prevents any accumulation of white. Toward the end of last week there was some slight surplus of dark pink carnations, but scarlet, light pink and white continue to be pretty well absorbed. They are, however, quite generally of rather low grade compared with last year, and while in the aggregate there now appears little or no shortage, yet individual growers continue of the opinion that production is not what it should be. Prices rule fairly steady.

Roses are rather off with many growers, both in cut and quality, stems being poor and flowers of poor texture and color. Nothing but better weather will improve them. Bate Bros. are sending in some excellent single violets, good in color and stem. Some few single tulips, notably Proserpine, are to be seen in some of the store windows, but as yet they are poor in color and short of stem.

James Eadie is cutting some of the best lily of the valley that is seen in the city. It is fairly furnished as to foliage and runs close to eighteen inches in length, many of the spikes carrying fourteen to seventeen bells. There are, of course, a few poor pips, but not enough to be figured.

Charles Erhardt has gone out of business entirely. E. J. Paddock, who formerly operated on Erie street, has abandoned that location and opened on Euclid avenue near Willson street, two miles out from the center of the city. A.

WILLIAM PLUMB,
THE HOMESTEAD,
WESTCHESTER, N Y

January 4, 1899.

Mr. G. C. Watson,

Philadelphia, Pa.

My dear Sir:

I received the Fumigator all right, and the only fault (if any at all) is the size of it. I am very favorably impressed with it. It is certainly far ahead of Tobacco in any form used, and I am writing to ask you to please send me three of the large size, and the largest bottle of Compound that you have. I want to give it a fair trial. I certainly believe it is all right.

We have a small white insect, something like a flying thrip, that "laughed" at the strongest kind of Nicotine, but this little bit of a Fumigator you send killed millions of them. They are still on the tomatoes in clouds.

Please let me have three at your earliest convenience, and greatly oblige,

Yours truly
William Plumb

Announcement!

I AM pleased to announce that Mr. Lawrence P. Kelly, who has for the past ten years been connected with the wholesale commission trade of Chicago, on January 1st, 1899, assumed charge of my business, located at the above number.

Owing to the fact of Mr. Kelly's long acquaintance in this line and his complete knowledge of cut flowers, you can be assured of the best attention to your orders and the choicest stock which the market affords at moderate prices.

Hoping for at least a share of your esteemed patronage and wishing you a happy and prosperous New Year, permit me to remain

Yours respectfully,

S. B. WINTER.

CONGRESSMAN CHARLES A. BARLOW, who introduced the anti-scale bill at Washington, does not expect his measure to become law at this session of congress.

Indianapolis.

ANNUAL MEETING OF THE STATE FLORISTS' ASSOCIATION.—NO FALL SHOW.—CITY FLORISTS JOIN IN A BODY.—MONTHLY EXHIBITIONS HEREAFTER.—ELECTION OF OFFICERS.—A LEGISLATIVE COMMITTEE.—CERTIFICATES AWARDED.—THOSE PRESENT.—A TRIP TO NEW CASTLE.

The thirteenth annual meeting of the State Florists' Association of Indiana took place here January 9.

As stated by President Carmody the association will discontinue its annual shows, as the same have ceased to be self-sustaining. Mr. Carmody further said that with no show the association would be deprived of its main purpose of existence, but for general reasons it should be maintained and to accomplish this it would be highly desirable to unite the Indianapolis Florists' Club with the association. In behalf of the club Mr. Alley stated that his organization was ready to accept the invitation of the association providing that body would amend its by-laws in accordance with the requirements of a local society, and a committee for that purpose was named.

At the evening session the by-laws, as amended by the committee, were read and approved. It was provided that hereafter instead of an annual meeting, regular monthly meetings shall be held in this city; second, that the executive committee should consist of local men. The Florists' Club, which between the two sessions had held a meeting to act on the proposition of the association, announced its intention to join the same in a body and a motion to that effect was unanimously carried.

This being disposed of, election of officers took place and resulted as follows: President, E. G. Hill, of Richmond; first vice-president, J. Clyde Powers, of Indianapolis; second vice-president, Herbert Hellar of New Castle; secretary, Robert McKeand, of Indianapolis; treasurer, J. T. Huntington, of Indianapolis.

On a motion of R. McKeand the chair appointed the following legislative committee to secure, if possible, a larger appropriation for the advancement of floriculture in the state: J. C. Powers, H. C. Alley, William Langstaff, T. V. Page, Henry Rieman, Fred Hukriede and W. W. Coles.

The exhibition held in connection with the meeting was not quite as large as that of last year, but the flowers were fine. The following certificates were awarded:

To the Bertermann Floral Co. for cyclamen plants; to the South Park Floral Co. for Brides and Bridesmaids; to H. W. Rieman for Meteor roses; to J. Hartje for Farquhar violets; to Hukriede & Son for Marie Louise violets; to the South Park Floral Co. for California violets; to E. G. Hill & Co. for best red carnation, America; to South Park Floral Co. for best pink, Triumph; to South Park Floral Co. for best variegated, Helen Keller; to W. W. Coles for best white, Evelina.

Honorable mention was given Hukriede's azaleas and H. W. Rieman's cyripedium and carnation display.

Those present from the state were: Chas. Hunt, Terre Haute; Fred Dorner, Lafayette; W. Teagle, Richmond; H. Hellar, New Castle; W. W. Coles, Kokomo; J. D. Carmody, Evansville.

At the January meeting of the Indianapolis Florists' Club installation of officers took place. At every regular meeting hereafter a special exhibition of some kind of seasonable cut flowers or plants will take place at which the club will pay cash premiums.

For February the committee in charge announced a carnation exhibit. Premiums will be given for the best dozen flowers of pink, white, red and any other color.

After the meeting Messrs. Powers and Alley agreeable surprised the members by extending an invitation to supper. Everybody had a good time and the evening was one of the most pleasant we have had this winter.

January 5, a party of nine Indianapolis florists followed an invitation of the South Park Floral Co. to New Castle. We were very nicely entertained by the proprietors and can not praise enough the excellent condition of their stock. Roses, especially Beauties, received the greatest admiration, but carnations, and violets were very fine. H. JUNGE.

St. Paul.

Trade is fairly good. A. S. Swanson recently had a large decoration at the Aberdeen hotel for the Noel Club. Green, wild smilax and holly were used largely with splendid effect. L. L. May decorated the Ryan hotel parlors for the reception tendered the incoming Governor Lind. Palms and greens were used.

Fred. Schulze met with a severe loss the night of December 30 by the freezing of his entire stock, owing to insufficient boiler capacity. This falls heavily on him and he has the sympathy of his fellow workers. FELIX.

NEW CARNATION EVANSTON

We are offering Rooted Cuttings of this Grand New Scarlet Carnation, the merits of which can not be doubted, as it is receiving the hearty endorsement from both the Growers and Wholesalers. We have handled the cut of Mr. J. Weiland for past two years, of this as well as other varieties, and have found it always a ready seller and one that was appreciated by buyers in preference to any other scarlet on the market.

Vaughan, McKellar & Winterson,
45-47-49 Wabash Avenue,
CHICAGO.

The following testimonial from one of our LEADING GROWERS should have a great deal of bearing with growers of Carnations:

MR. JOHN WEILAND, Evanston, Ill. Dear Sir:—In reference to the new Carnation "Evanston" which is being introduced this season, would state that I have grown a bench of this variety for the past year and have been better impressed with it than with any new carnation that has as yet been introduced, for scarlet, and intend the coming season to grow this variety for our leading scarlet, as in my estimation this variety will fill a long felt want in the market; namely, a good scarlet carnation, with good, thrifty habits and a strong producer. The "Evanston" is one that will surely fill these wants, and is one that will find ready sale wherever introduced. I consider it superior in all respects to any of the other twenty leading varieties which I now grow. I heartily endorse it to all carnation growers as a sure money-maker. Yours very truly, PETER REINBERG.

Give us your order now. Rooted Cuttings, $7.00 per 100, $60.00 per 1000. 500 at the thousand rate.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 67 Bromfield St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Worthy of St. Louis.

As an achievement worthy of emulation it may be mentioned that Louis F. Ullrich, a Chicagoan, but not in the trade, last week established what is said to be a new world's record at bowling by rolling three games with an average of 223, the best average for three games previously recorded being 216. Mr. Ullrich's best game of the three was 256.

Omaha Bowling Matters.

The bowlers of the Omaha Florists' Club have not held regular practice games for the past two months, but now that the holiday rush is subsiding the interest is reviving and weekly meetings will shortly be held on the alleys. It is thought that Omaha will be able to send a team to Detroit next August which will be able to make a good showing, even with the strong competition which is sure to mark that event.

Trojans Were Winners.

The bowlers of the New York Club met on Monday afternoon, January 9, and adopted by-laws and rules for the management of practice games which will be indulged in weekly throughout the rest of the season. Scores will now be recorded and an effort made to evolve a team that will bring fame to New York next summer at Detroit. Two games were rolled on Monday between sides captained by J. H. Troy and Theodore Roehrs. The Trojans walloped the Roarers in both games.

Good Scores at Detroit.

The convention city bowlers are showing steady and rapid advancement in their work upon the alleys, and if their progress continues until August St. Louis may feel constrained to leave that beautiful silver cup in the city between the lakes. Here is the score rolled last week:

Name.	1st.	2d.	3d.	4th.	Av.
Holznagle	154	156	127	172	152
Ferguson	147	140	139	124	138
Beard	126	122	149	141	135
Watson	123	170	110	129	133
Dunn	124	137	113	140	129
Pickworth	114	139	151	108	128
Coryell	125	108	104	149	122

R. F.

Large Attendance at Championville.

The last regular weekly meeting of the St. Louis Bowling Club was a record breaker. Not only were all the regular members present except one, but several ex-members were there to make things look like old times; one of them, John Young, in one game had a clean sheet until the ninth frame.

Name.	1st.	2d.	3d.	4th.	Av.
D. Finlayson	165	188	161	180	174
Carl Beyer	195	172	142	171	170
R. F. Tesson				155	155
J. Kunz	145	129	181	125	145
John Young	114	132	186		144
F. J. Fillmore	184	144	112	125	141
C. A. Kuehn	115	150	170	125	140

J. J. Beneke	104	167	134	141	132
F. C. Weber	108	93	162	167	133

Minneapolis Will Roll.

The Minneapolis florists have organized a bowling club of eleven members. A. S. Swanson is captain and E. Nagel treasurer. The club will meet every Tuesday evening at the alley at Harmonia Hall. All florists of the Twin Cities are cordially invited to join.

Good Bowling at Cleveland.

There was a good attendance at the alleys on Thursday evening, January 5, and some good scores were made. Pentecost won the badges for both high score and best average. James Eadie was second and A. H. Graham third in the contest for each trophy. Following is the complete record of the evening:

Name.	1st.	2d.	3d.	Av.
Pentecost	160	188	145	164
Jas. Eadie	129	182	141	151
A. H. Graham	133	145	166	148
A. Graham	128	136	129	131

P. Hart	83	85	84	84

A.

With Chicago Bowlers.

Following last week's smoker at the rooms of the Chicago Florists' Club the bowling enthusiasts repaired to the Palm Garden Alley, 77 Randolph street, and, after voting to hold the prize medal contests on Friday nights instead of Thursdays as heretofore decided, rolled one game with the following score:

Phil Hauswirth	162
John Degnan	144
Ed. F. Winterson	143
G. L. Grant	132
Chas. Balluf	122
James Hartshorne	114
Alex. Henderson	114
C. W. McKellar	111
Walter Kreitling	110
Henry Roe	103
A. Lange	98
August Balluf	82

Fine Time at Orange.

The New Jersey Floricultural Society had a glorious time on Friday evening, January 6. It was the date of their annual banquet and installation of officers, and they further added to the lustre of the occasion by inviting the New York Gardeners' Society to come over and bowl with them, and then proceeded to thrash the visitors thoroughly. The Orange aggregation, lined up under the leadership of David Rose, comprised Messrs. Von Qualen, Atkins, Gray, Smith and Messman. The New Yorkers were Messrs. O'Mara, Withers, Troy, Bartholomew, Marshall and J. Manda, and Captain O'Mara expressively remarked, when it was all over, that their opponents gave them "what Paddy gave the drum."

Following the bowling came the business meeting and installation of officers, which was conducted in a business-like manner that would serve as a good example for other florists' organizations. Secretary, treasurer and librarian submitted their annual reports and then the retiring president, Malcolm MacRorie, installed the new officers, Messrs. Peter Duff, president; John Hayes, vice-president; Joseph Davis, secretary, and George Smith, treasurer. Adjournment was then made to the banquet hall.

Some good music and a song or two supplemented the material feast and put the participants in best of humor to listen to a series of bright and entertaining remarks by Messrs. P. O'Mara, Wm. McMillan, of Essex County Parks; Dr. Kitchen, J. Bartholomew, W. J. Stewart, J. W. Withers, Geo. Smith, J. H. Troy and Mr. Butterfield, and it was well past midnight before the lights went out.

Bowling at Philadelphia.

The alleys have been comparatively deserted for the past month, the boys having work to do, which, by the way, always interferes with their play. The second team, under the captaincy of John Walker, found time to bowl a series of games with the seconds of the Century Wheelmen, a crack bowling team, almost as good as their first, in fact. In the first match, which was played on their alleys, they broke the record for a single game, making over 1050, and finally won the match by over 250 pins. When they played the return match on the Florists' Club alleys, however, they were defeated by over 300 pins. The rubber was played on a neutral alley and the Centurions won by seventy-seven pins. The Saturday night games are much enjoyed; sides are chosen and, as the losers pay, each man bowls his best. The contest for the honor of representing the club at Detroit still goes on. All games count when four or more members are rolling. The following are the first twelve in the order named and their averages for the months of November and December:

Name.	Av.	Name.	Av.
Brown	153	Moss	141
Westcott	145	Baker	140
Kift	145	Anderson	138
Smith	143	Habermehl	136
Longinotte	142	Walker	135
Connor	142	Craig	126

K.

A Banquet at Poughkeepsie.

The fourth annual dinner of the Dutchess County Horticultural Society took place at Masonic Temple on the evening of January 5. The retiring president, George Saltford, opened the usual after-dinner oratory with a brief resume of the society's history and said that the membership was now 135, the financial condition good and prospects excellent. The last exhibition had come out about even, financially, and he considered that a good showing. He hoped to see an even greater show next year, second to none in the United States. He then introduced C. B. Weathered as toastmaster and the duties of the office were performed by that gentleman in a most acceptable manner.

Among the other speakers were Frank Lowne, who treated the subject of flowers in a very witty way; Mr. Seaman, whose subject was coal, but who pleaded inability to "fire up;" Major Sague, who has just returned from Honolulu, and told of the chances for a few live florists in our new Pacific possessions; Wm. Turner, who recounted some of his experiences on a recent trip to London, and C. Reynolds, who made lots of fun as he told of his love for horticulture and the troubles incident to the same. He was followed by Robt. Hood, who recited an original and most devout poem; W. J. Stewart, who responded for the S. A. F.; Richard Connell, who eulogized Dutchess county in a most eloquent manner, and several other local celebrities, and the pleasant occasion broke up at the very decorous hour of 9:30 p. m. The decorations of the table were very handsome.

Previous to the dinner officers for the ensuing year were elected as follows: President, F. W. Newbold; vice-president, James Blair; secretary, W. G. Gommersall; treasurer, C. S. Mitchell.

Benthey & Co.

WHOLESALE CUT FLOWERS.

41 Randolph Street, - - CHICAGO.

AS a firm we are young yet, but we are healthy and we are growing. We are receiving daily a large and complete stock of Choice Flowers. We get the stock because the growers have confidence in our ability to handle it to best advantage. We sell the stock because we give the buyer what he wants at the right price, because we are prompt and careful in filling orders, and last, but not least, because we are able to gauge the wants of the retail trade more intelligently for the reason of a life-long experience in the business in ALL its branches. Give the new house a trial and convince yourself.

We have room to handle the product of a few more growers, particularly American Beauties and other Choice Roses, Fancy Carnations, etc. We respectfully solicit consignments of same.

Our Terms are the usual 15 per cent. Weekly statement with check for amount promptly mailed on Tuesdays.

St. Louis.

FUNERAL WORK MAKES TRADE GOOD.—STOCK NOT PLENTIFUL AND PRICES RATHER HIGH.—HEAVY VIOLET CROP EXPECTED.—LILY OF THE VALLEY IN.

Trade during the past week has been fair, but those who have not had a share in the funeral work have found things a trifle slow. Stock has not been overplentiful and pretty stiff prices have been asked for what has come into the market. Carnations are coming in much more freely and promise with favorable weather, to be exceedingly plentiful. Roses have been cleaned up every day. California violets have dropped to 50 cents per hundred and it only needs bright weather to precipitate a deluge. Some very fine double violets are offered but it is a hard matter to educate the public up to appreciate the difference between single and double to pay the difference in price that is asked; when a person takes the double you can be sure they are from the east. New crop lily of the valley is in with several of the home growers and will do away with the necessity of sending to Cincinnati or Chicago whenever an order for it is received.

R. F. T.

Omaha.

THE HOLIDAY SEASON WAS BETTER THAN EVER BEFORE.—JOTTINGS OF THE GROWERS AND DEALERS.—A NEW STORE.

Holiday trade was better than ever before. Roses and carnations were somewhat scarce, but better in quality than those of other years. Roses brought $2.50 to $3 per dozen. Carnations sold at an average of 75 cents per dozen, American Beauties 50 cents to $1 each, violets $3 for 100, narcissus 75 cents to $1 per dozen and hyacinths 75 cents per dozen. Potted plants were as much in demand as cut flowers, especially such as azaleas, cinerarias, primroses and cyclamens as well as palms. It seems as if there was a decrease in the sale of evergreen, but an increase in holly.

J. F. Wilcox, of Council Bluffs, sends in some elegant roses, such as Meteors, Brides and Bridesmaids grown to perfection. His carnations are not far behind his roses. C. H. Frey, of Lincoln, sends in some of his carnations and they are first-class and command a good price. Nicol & Green, of Fremont, Neb., send in some fine double violets, in fact as good as can be grown. W. J. Hesser, of Plattsmouth, Neb., the palm grower, brought in some nice stock, which found eager purchasers at Christmas.

Hess & Swoboda's store was well stocked with poinsettias, palms, azaleas, cinerarias, primroses, cyclamens and potted violets which made a pleasing display. Louis Henderson's late chrysanthemums came in handy and sold very well. S. B. Stewart's window was beautifully arranged with ferneries interspersed with cut flowers.

Paul B. Flath's carnations were well cropped and brought him a nice sum of money for Christmas.

Karr & Davidson have moved their business from Douglas to Sixteenth streets.

A. Delaney has opened a store on Twenty-fourth street in South Omaha and reports good business. B. Haas, the pioneer florist, has remodeled his place. It looks neater than ever and he reports good business.

R. Mohr, of St. Louis, Mo., visiting his parents during the holidays, proved a good assistant to Hess & Swoboda during the rush.

GRIPPE.

I have still a very Fine Line of SPECIMEN PLANTS of

The BOSTON FERN.....

for 8 and 10-inch pots at 50 cts., 75 cts. and $1.00 each, spread of 4 to 6 feet, and smaller at 20 cts. and 25 cts. each.

Helpful Reminders.

A careful reading of recent reports in the AMERICAN FLORIST shows clearly that a greater variety of flowers and plants is what the public will most appreciate. Make a survey of your place and note all the odds and ends that can be repotted and brought into shape by Easter. I will mention a few plants not usually employed for this purpose but admirably adapted to it. Mahernia odorata cuttings made at once come in for next season and old pots of it bloom during spring and sell like "hot cakes." Abutilon Eclipse makes beautiful hanging pots and one of the showiest and prettiest plants ever grown is Lopezia rosea.

Begonias of almost all varieties are good. Strong clematis will sell at Easter if in bloom; trained over stakes carefully it is beautiful and will pay better than azaleas. Nice plants of passion vine in bloom are charming. Well grown heliotrope is most desirable yet very scarce. The improved salpiglossis from seed is beautiful and good pot grown antirrhinums are more varied in coloring and longer in bloom than azaleas; you can flower them in the garden and select the choice ones to establish in pots for spring sales.

The calceolaria is not half grown yet, and the geranium as a specimen plant is slighted. The Chicago Horticultural Society's show gave some idea of what this plant is equal to and the beautiful colors that are now being disseminated make it comparatively easy for greenhouse men to arrange a gorgeous display for any time of the year. Most of these things are found pot bound and weedy in the neglected corners of small greenhouses, unappreciated because the "big guns," of New York and Philadelphia are not making a hit with them. Do not be afraid of showing some originality and ingenuity. Clean up your place this month and see how many neglected pots you can make beautiful by April 1.

Gov. Griggs

SEEDLING OF VAN LEEUWEN ON DAYBREAK.

Strong, healthy grower, free from disease of all kinds, continuous free bloomer with flowers very erect on a stiff stem, 18 to 20 in.; flowers similar in color to DAYBREAK, but much brighter, edge beautifully fimbriated, good shape and with full center, and does not burst; commands the highest prices in New York for novelties. Having been grown by us for the past 4 years we can with confidence recommend it to the florists of America as one of the best if not the best light pink carnation ever sent out. Orders are now being booked for rooted cuttings to be delivered February 1 1899. Price,$75.00 per 1000; 500 at 1000 rates; $10.00 per 100; $1.50 per dozen. All orders filled strictly in rotation.

Cash with order from unknown correspondents. A personal inspection invited.

JOSEPH TOWELL, Paterson, N. J.
Haledon Ave. Nursery.

It is time you were thinking about

CARNATION STOCK

for next season. It pays to buy only the best. Will have them in large quantities, of all the leading commercial varieties. Ready Jan. 1st and later. Write me for prices.

BUSINESS FAIRLY SATISFACTORY.—WHITE FLOWERS IN DEMAND.—VIOLETS DRAGGING BADLY.—A FINE JANUARY EXHIBITION.—MEETING OF HORTICULTURAL SOCIETY.—DEATH OF CHARLES BRACKETT.—MINOR NOTES.

Trade remains as last week, fairly active and satisfactory. White flowers have held up especially good, owing probably to the large call for funeral purposes at this trying season of the year. Bride has caught up well with Bridesmaid and white and Daybreak carnations have outdistanced Scott and the deeper pinks. Violets are the only thing with a grievance. They are abundant and demand is unaccountably light and it is difficult to find a market for them at half normal price for the season. Tulips, freesias and daffodils are seen occasionally already but are not sufficiently plentiful to be entitled to a place on the market quotations as yet. Roses of all kinds seem to be off crop and are in shorter supply than for some weeks past and there is no surplus worth noting.

The January exhibition of the Massachusetts Horticultural Society was a good one. Primula Sinensis was shown in fine form by a number of exhibitors. Mrs. B. P. Cheney won first and second prizes for the plants and W. E. Coburn and Mrs. J. L. Gardner were first and second respectively on cut blooms. Mrs. Gardner also showed Primula obconica and Mrs. Cheney Primula stellata. Among the other attractions were Begonia Gloire de Lorraine from Mrs. Gardner, Cattleya speciosissima from E. J. Mitton. Cypripedium exul from J. E. Rothwell, Cypripedium Mme. Georges Truffaut and Cattleya Chocoensis alba from Oakes Ames and fine freesias from Mrs. E. M. Gill and W. N. Craig.

The meeting of the Horticultural Society was held on January 7. Appropriations amounting to $8100 were made for prizes to be awarded in 1899. President Appleton made a notable address reviewing the society's seventy years of usefulness and referring to the present and future needs which must be provided for if the standard of efficiency is to be maintained.

Mr. Charles H. Brackett, who has been a member of the Massachusetts Horticultural Society for forty-eight years and chairman of its vegetable committee for thirty-two years, died on January 4 after a very brief illness, aged 72 years. Mr. Brackett was a man beloved by every one who knew him. Among his associates on various committees at Horticultural Hall he was most popular. His disposition was even and always sunny and everybody was his friend. He will be painfully missed.

W. W. Rawson & Co. have secured the contract for supplying the Boston and Maine R. R. with plants for the station gardens for the next season.

J. T. Butterworth was surprised one evening recently by a party of his friends who presented him with a fine roll-top desk.

Edmund M. Wood has been a victim of the prevailing epidemic for several days.

Visitor in town: L. C. Bobbink, Rutherford, N. J.

BOONEVILLE, MISS.—E. E. Street reports that stock was short for the holidays and that prices rose twenty-five per cent. Chrysanthemums were nearly gone but in demand. There was a great increase in the call for violets.

Grafted Roses...

MAKE MONEY BY STARTING RIGHT

Grafted Roses will produce from 25 to 50 per cent more extra and first grade blooms than own root Roses. To accomplish this, however, you have to start right with gilt edged Rose Scions, properly grafted on the best Manetti stock. Before placing your order for Grafted Roses we would invite an inspection of our Roses at Sharon Hill. We use the best selected Manetti Stock from Messrs. Alexander Dickson & Sons, of Belfast—our grafting is done by men of experience and the wood of the different varieties of Roses is selected personally from exceptionally well grown and well ripened Rose Plants. The varieties are **AUGUSTA VICTORIA, BRIDE, BRIDESMAID, SOUV. DU PRESIDENT CARNOT, MRS. PIERPONT MORGAN & MME. HOSTE.** To secure our best stock **order at once,** *as we fill in rotation and March is the last grafting month.*

PRICES—From 2½-inch pots, $10 per 100; $90 per 1000. We guarantee our plants to be as represented, and at these low prices you can more than pay for the plants on the first cut of flowers.

ROBERT SCOTT & SON, - - - Sharon Hill, Del. Co., Pa.

Say: "Saw it in the FLORIST."

Toronto.

TRADE WAS VERY GOOD AT THE HOLIDAYS AND NO ONE MAKES COMPLAINT.—NEW OFFICERS FOR THE FLORISTS' AND GARDENERS' SOCIETY.—A SWEET PEA NOTE.

The general trade in Toronto for the holidays was much better than usual. John H. Dunlop reports that his sales at Christmas were three times as great as anything in his previous business experience. This was partly because of a larger demand and partly because he had provided a large stock of flowering plants which were eagerly taken by his customers. All the growers and dealers express themselves as satisfied with the holiday season, and it may be said that the trade was fully fifty per cent greater than last year. There was a much larger supply of stock than is usual at the season and qualities were better than ordinary. There was a particularly increased call for carnations and American Beauties. Roses were very plentiful, and were made to take the place of good blooming plants, of which the general supply was not as large as usual. Some fine cyclamens have found ready sale at good figures.

The Toronto Florists' and Gardeners' Society has elected the following officers: President, George Vair; vice-president, William Jay; second vice-president, W. J. Lawrence; treasurer, George Mills; secretary, D. Robertson; assistant secretary, E. Collins; executive committee, L. Chambers, William Houston, J. Graham, William Muston, J. H. Dunlop, Ed. Grainger and Thomas Manton. President Vair was chosen by acclamation and Messrs. Mills and Collins were re-elected.

Edwin Utley, sweet pea specialist and expert accountant, has been given charge of the books in the liquidation of the Farmers' Loan and Savings Company, which has assets of $600,000. Mr. Utley expects to have large grounds just outside the city for growing sweet peas this spring, and has planned to go more extensively into the business than ever before.

S. P.

Providence R. I.

The inauguration of the city government furnished employment for most of the florists here on the first of the year. The display was very fine and about every dealer was represented. Among the most noticeable designs was a five-pointed star some five feet high, made by M. Sweeney. W. D. Pierce, Jr., made two large horse shoes of carnations and roses. In the center of each was a rabbits' foot suspended with a delicate shade of satin ribbon with inscription. J. B. Canning displayed excellent taste in the arrangement of a pair of scales on a base of roses, carnations, etc. Two balls of Scott on the balance and the word "Unanimous" on the beam. A most unique design made by T. O'Connor was a globe of cranberries mounted on a base of cranberry vines. He also made a number of very elegant haskets of roses. A large horse shoe resting on a base of roses with inscription "Happy—1899—Year" was made by Wm. E. Chappell. Several large pieces from Wm. Appleton, Jr., were beautifully arranged. The gem basket of roses came from T. J. Johnston; they were selected Bridesmaids.

N. D. Pierce, Jr., and Miss Ida H. Sayles were married recently.

LITTLE RHODY.

BUSINESS STEADY ON THE WINTER LEVEL.—FLORISTS' CLUB'S PROSPERITY.—TALK ON HEATING.—PLANS FOR THE CONVENTION.—CARNATION SOCIETY INVITED TO COME NEXT YEAR.

Business has settled down to the usual January standard, Violets are again "penny goods" and first class roses are procurable at from 8 cents to 10 cents each. The supply is about equal to the demand.

The Florists' Club is progressing finely. At the last meeting two new members were elected and two applications were received. R. J. Coryell brought to the meeting several drawings and plans of greenhouse heating plants, both hot water and steam, accompanied by the records of tests at two of our experiment stations. The figures relative to heat results obtained from various amounts of coal were not only interesting but very valuable, and provoked general discussion. For the next meeting a dissertation on carnation growing is promised.

The S. A. F. meeting here next August is causing a great deal of interest and "the boys" are doing some hard thinking as to how to make the fifteenth convention the best one the society has ever enjoyed. At the last club meeting it was voted to invite the American Carnation Society to meet here in 1900, and a delegation will go to Philadelphia in February to extend the hospitalities of our city. R. F.

Montreal.

The holiday trade this season was the best on record. Flowers of all kinds were abundant and of first-class quality. Plants in bloom were as usual rather short. More azaleas could have been sold and cyclamens were in great demand. The supply of primulas and solanums was fully up to the demand as we find that the call at Christmas is each year becoming more for larger plants.

Just now we are having a lull and were it not for the great quantity of funeral work business would be exceedingly dull. The supply of carnations is rather short, with Christmas prices still ruling for first quality.

I visited the mammoth lettuce growing establishment of Camille Legare a few days ago. He has over 40,000 lettuce plants on each crop. There is one house 50x200 and several long, narrow houses all heated by hot water; the large house is sub-irrigated, the water being carried in 2-inch drain tiles and seems to work well. BEAVER.

FORT DODGE, IA.—P. L. Larson reports that the holidays saw a greatly increased call for violets and carnations. The volume of trade was fifty per cent greater than the preceding year.

MASON CITY, IA.—Carl Krieger, who has been in the employ of Geo. M. Kellogg at Pleasant Hill, Mo., has leased the greenhouses of F. S. Keith and will do a general retail business here. He is fully qualified to make his venture a success.

Plants Versus Holiday Cut Flowers.

I am under the impression that Albert M. Herr is an expert and most successful carnation specialist and that he knows what it costs him to produce first-class blooms. I am also quite sure that if Mr. Herr would let us have a peep at his books we would be better qualified to write about financial success in carnation growing, as he probably makes as much from this industry as any one can.

I find that last Christmas, the same as at every other, prices were subject to a greater or less demand in all varieties of cut flowers. Extra carnations were scarce, therefore commanded fine prices. Because of the unfavorable summer, at least in this section, the bulk of the carnation crop consisted of inferior blooms which brought but a medium price. I consider it no more than natural for the storekeeper to buy as cheaply as he is able —every one does that. We must consider that the storekeepers are under a large expense all the year around and that there is little doubt that from July to November everyone of them has to draw upon the surplus accumulated during the winter season. Nevertheless, the storekeeper has to buy flowers every day, and sometimes he has to throw many of them away for lack of orders.

It occurs to me that Mr. Herr knows almost nothing about the plant growers' troubles. The plant grower must have all his stock ready for sale at a certain date; he must also sell all these plants and deliver them in good shape, in sunshine or snow, in order to achieve a profit. Cut flowers can always be sold, even if they do not come in at the moment that the market is the best. This is not true of plants. Then, too, one mistake will ruin a house of plants and it does not take many minutes to do it. A trifling error will make a plant grower's product too late for his market and he has the stock on his hands with little chance to get ont whole. The worst cut into the profits of the plant grower is made by people of apparently good standing who get credit before it is developed that the best lawyers cannot make a collection from them. I know this by experience. We had several such cases this year.

It may be further stated that twenty per cent of the plants, either imported or grown here, will not be perfect enough for sale at the season of the best market and must be either sacrificed or carried over to another year. In importing the plant grower also suffers heavily in having stock perish while in the hands of the transportation companies or while delayed by the customs officials, who often hold importations in the public warehouses for weeks. I am certain that the plantsmen around New York have this season encountered enough of these reverses to be entitled to Mr. Herr's sympathy, and their ledgers, in comparison with his, would show them to be entitled to it.

In cut flowers, so far as my experience goes, there has been better money this year than last and prices at present are sufficient to enable a competent grower to make money; and there are hundreds more of them now to divide the profits than there were ten years ago. As to Mr. Herr's fear that plants will eventually displace cut flowers, he may dismiss it—that day will never come to pass. Tastes differ and change, but the buyers who wanted plants this year may next Christmas be calling for cut flowers, and certainly we will never see plants taking the place of cut flowers at funerals. The plant grower will never see the day when he can double his prices for special occasions as the cut flower men now do. It might be different if we had a plant exchange in New York where all the plantsmen could offer their wares the same as the cut flower men do. Then, of course, if an article was scarce and in demand prices would naturally increase. So long as the storekeeper comes to the greenhouse in search of his plants, the plantsman must be moderate in his demands. Mr. Herr insinuates that with the increasing popularity of plants for the holidays the plant grower, if he fails to receive his price, will open a store next door to the retail florist and beat him at his game of selling; but such a course would be suicidal.

Plants are offered in some of the wholesale cut flower houses and this may be a good way of disposing of the surplus of some growers but for good stock the treatment received there would be so harmful as to, in a couple of days, render it unfit for florists' use. Palms, of course, are an exception to this. I have recently seen plants exhibited in wholesale show windows and marked with prices but little above wholesale figures. This certainly must tend to keep down the retail price as buyers who chanced to see the displays I mention would naturally object to the retailer exacting a large profit.

It must be considered that the retail florist seldom sells out clean and sometimes has to throw away large quantities of flowers for which he paid dearly, and last, but not least, the poor commis-

sion dealer gets the blame for all. He cannot get 4 cents for carnations when they are only bringing 2 cents. Sometimes we read about the dollar roses at wholesale, but you can look for them with a lantern in broad daylight without finding very many. They are as few and far between as the 8 cent carnations. But carnations at 2 cents are golden enough so that the grower can find the yellow metal without going to the Klondike. ANTON SCHULTHEIS.

White Japan Lotus.

The Nelumbium album grandiflorum may justly be called the magnolia water lily. It is not new but until recently has been unknown in this country except in a few parks and botanical collections. It proves a worthy companion to the queenly pink Egyptian lotus, but in size surpasses it. The color of the flower is a clear, pearly white, the outside of the outer petals being softened with a creamy tint at the base. The texture is fine and uniform as in Nelumbium roseum. The stamens are long, numerous and prominent; color, bright sulphur yellow. The seed pod is of the same rich color and displays effectively the sparkling waxy white pistils. Both foliage and flower are stronger and more bulky than those of the Egyptian lotus; the flowers open more widely and the petals are broader and more rounded. The flowers rise but little above the foliage and often open amid or beneath it, a habit peculiar to the Japanese lotus. Its fragrance is delightful.

N. album grandiflorum is the largest of all the lotuses. appearing at a distance like a huge, well opened magnolia. It has proven perfectly hardy everywhere in the United States and southern Canada. It is not a wild plant, having been under the highest state of cultivation in China and Japan from time unknown, and does best when under cultivation. If grown in tubs or tanks where it becomes root bound the flowering quality is greatly enhanced.

The extraordinary size of its foliage and flowers, its vigorous, clean habits, the unique color of its flowers and leaves, its hardiness, freedom of bloom and endurance of rough usage will all combine to gain this plant universal favor and the only reason it is not in general cultivation to-day is that its merits are still unknown. GEO. B. MOULDER.

Society of American Florists.

LEGISLATIVE COMMITTEE'S REPORT.

At the November meeting of the New York Florists' Club the delays experienced by importers of plants and bulbs were brought before the club officially, the result being that the matter was referred to the Legislative Committee of the S. A. F. As we have completed our labors for the present, we beg leave to report as follows for publication in the trade press, the reason being that the matters touched upon should be taken cognizance of at once and not allowed to remain until our next convention.

The first action taken by the committee was to insert a call in the trade press requesting written complaints from those who had suffered losses through unnecessary delays. This call not being responded to as promptly or as fully as the circumstances appeared to warrant, the chairman of the committee wrote to twenty-five leading importers, other than members of the New York Florists' Club, asking if they had any complaints against the service in the New York Custom House, and if they desired to place such in the hands of the committee. The responses to that letter were of sufficient gravity and contained specifications which enabled the committee to present a strong case to the authorities. Many of the communications were confidential, and the committee deems it best not to publish any of the communications in the nature of complaints submitted to them. The investigations of the committee showed that the delays proceeded from the following causes:

First.—Irregularities in invoices, caused by shippers failing to comply with customs and regulations as to manner of making out the same, neglect to properly stencil cases with name of country

NELUMBIUM ALBUM GRANDIFLORUM.

from whence shipped and other minor omissions.

Second.—Undervaluation of goods on invoices, according to the market values adopted by the appraiser of the port, causing re-appraisement and vexatious delays, also in many cases penalties for alleged undervaluation, and in some cases loss of goods.

Third.—Delays in trucking goods from wharves to appraisers' stores, the average time consumed in that way having been found to be three days.

Fourth.—Lack of adequate help in examining room to expeditiously handle the goods ordered to appraisers' stores.

The committee also received complaints that the repacking done in the appraisers' stores was faulty, and consequently many plants were damaged from this cause; in some cases every plant among those ordered to appraisers' stores was damaged, some irreparably.

The first step taken by the committee to have the foregoing remedied was to obtain an interview with the collector of the port and lay the entire matter before him. He received the committee courteously and gave them freely of his time, making notes of the various matters as they applied directly to details within his jurisdiction. He promised to use every means within his power to expedite the handling of consignments of plants and bulbs, said he would issue orders to give them preference over less perishable goods, and that he would particularly urge a more prompt transfer from the wharves to the appraisers' stores of cases of plants and bulbs selected for examination.

The committee has pleasure in saying that the various promises made have been performed, and that there is every reason to believe that the improvements effected will be permanent. The collector explained that occasionally the wharves become congested with goods discharged from vessels, and that, as a consequence, the public truckmen could not transfer cases to appraisers' stores as rapidly as he would wish. To overcome that in a measure the collector suggested that the shippers be instructed to see to it that plants and bulbs were stowed on top of the ship's cargo, so that they would be first discharged upon arrival at her wharf.

The committee having learned that a senate committee was investigating matters connected with the Custom House in New York opened communication with them and received the following reply:

[Copy.]

SENATE CHAMBER,
WASHINGTON,
December 3, '98.

PATRICK O'MARA, ESQ., 35 Cortlandt street, New York City.

Dear Sir:—I received your letter of December 2 The committee of the senate which has been making inquiries with regard to the administrative features of the customs act closed its work in New York last week, and I do not think it will have any further sessions. Possibly there is a misapprehension as to the scope of our inquiry. It was confined to suggestions as to how the law might be amended so as to improve it and facilitate both the operations of business and the collection of the revenues. It was not the purpose of the committee to inquire into the propriety or justice of individual cases. But while in New York we were made aware of the delays which had occurred in the appraiser's office in fixing the value of foreign imported plants, bulbs, etc., and talked with the appraiser about it, who seemed very much to regret that there had been any occasion for complaint, and expressed a determination that there should be no avoidable delays hereafter. Yours truly,

(Signed) O. H. PLATT.

The committee next obtained an interview with the appraiser of the port, there being present the assistant appraiser and the examiner. The various causes for complaint were submitted and listened to attentively. The appraiser and his assistants were very courteous and apparently were very willing to do everything consistent with their duties to hasten the goods through the stores when received for examination. It transpired that steps had been taken in advance of our interview to have the force at the disposal of the examiner increased, a very important and valuable improvement. The appraiser said, also, that additional floor space would be provided when necessary. Great stress was laid by all three gentlemen upon having cases properly marked and invoices made out in conformity with the regulations. For the information of the trade, and so that they can instruct their shippers, we obtained sample invoices from the appraiser, which, with the accompanying letter, we submit herewith for publication, which is very important, and every shipper should be instructed to follow minutely:

[Copy.]

OFFICE OF THE
APPRAISER OF MERCHANDISE,
PORT OF NEW YORK,
December 21, 1898.

HON. F. W. WAKEMAN, U. S. Appraiser.

Sir:—Referring to the conference of December 13 between yourself and a committee of the Society of American Florists during which you directed Examiner Lersner to prepare and submit to you specimen forms of bulb and plant invoices made up in a manner best suited to the requirements of the regulations of this office, I

enclose herewith three such forms. The preparation of these invoices has received careful consideration, and the work of this office would be greatly facilitated and the examination of the goods made less difficult if these forms should be followed by shippers in the future.

I would respectfully suggest that these papers be sent to Patrick O'Mara, Esq., Chairman Legislative Committee of the Society of American Florists. Respectfully yours,

(Signed.) T. C. WORDIN,
Assistant Appraiser,
778—C. C. T. Tenth Division.

After the matters of detail which were submitted by the committee had been disposed of the still more important one of market values was taken up. The chairman of your committee urged upon the appraiser that some steps should be taken to fix said values a sufficient time in advance of the arrival of the main consignments in the fall so that importers could enter goods and have them passed upon in the shortest time possible. At first the proposition did not meet with favor, but afterwards an agreement was reached that the authorities would receive a committee next May or June and consult with them in regard to prices for fall importations.

In case the work could not be done through a committee they would receive individuals and accept evidence in regard to values, and from evidence submitted make the schedule. As this is a very important part of the work of the committee, we took pains to get the matter from the authorities and beg leave to submit it herewith:

OFFICE OF THE
APPRAISER OF MERCHANDISE,
PORT OF NEW YORK, N. Y.,
December 16, 1898.

PATRICK O'MARA, ESQ., 35 Cortlandt street.

Sir:—Referring to your conversation with Examiner Lersner in which you asked to be informed what constitutes market value, in order that the secretary of the Society of American Florists might have the information published in your official organ for the benefit of your members, I have to state:

Customs Administrative Act, as amended July 24, 1897, defined "market value" in paragraphs 10, 11 and 19, copies of which passages are enclosed.

In practical administration it is the custom of the appraising officer to determine in proper ways the value of the merchandise in the usual commercial quantities, and to establish a uniform value for the articles in the usual quantities. No special discounts are allowed and no privileges which are not enjoyed by the balance of the trade. Each article is judged by itself without relation to the balance of the invoice.

Any further information you may wish I shall be pleased to furnish. Respectfully yours,

(Signed.) T. C. WORDIN,
Assistant Appraiser,
728—C. C. T. Tenth Division.

SECTION 10.—That it shall be the duty of the appraisers of the United States, and every one of them and every person who shall act as such appraiser, or of the collector, as the case may be, by all reasonable ways and means in his or their power, to ascertain, estimate and appraise, any invoice or affidavit thereto or statement of cost, or of cost of production, to the contrary notwithstanding, the actual market value and wholesale price of the merchandise at the time of exportation to the United States, in the principal markets of the country whence the same has been imported, and the number of yards, parcels, or quantities, and actual market value of wholesale price of every one of them, as the case may require.

SECTION 11.—That when the actual market value as defined by law of any article of imported merchandise wholly or partly manufactured and subject to an ad valorem duty, or to a duty based in whole or in part on value, cannot be otherwise ascertained to the satisfaction of the appraising officer, such officer shall use all available means in his power to ascertain the cost of production of such merchandise at the time of exportation to the United States, and at the place of manufacture; such cost of production to include the cost of materials and of fabrication, all general expenses covering each and every outlay of whatsoever nature incident to such production, together with the expense of preparing and putting up such merchandise ready for shipment, and an addition of not less than 8 nor more than 50 per centum upon the total cost as thus ascertained; and in no case shall such merchandise be appraised upon original appraisal or reappraisement at less than the total cost of production as thus ascertained. It shall be lawful for appraising officers, in determining the dutiable value of such merchandise, to take into consideration the wholesale price at which such or similar merchandise is sold or offered for sale in the United States, due allowance being made for estimated duties thereon, the cost of transportation, insurance and other necessary expenses from the place of shipment to the United States, and a reasonable commission, if any has been paid, not exceeding six per centum.

SECTION 12.—That whenever imported merchandise is subject to an ad valorem rate of duty, or to a duty based upon or regulated in any manner by the value thereof, the duty shall be assessed upon the actual market value or wholesale price of such merchandise, as bought and sold in usual wholesale quantities, at the time of exportation to the United States, in the principal markets of the country from whence imported, and in the condition in which such merchandise is there bought and sold for exportation to the United States, or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States, and if there be used for covering or holding imported merchandise, whether dutiable or free, any unusual article or form designed for use otherwise than in the bone fide transportation of such merchandise to the United States, additional duty shall be levied and collected upon such material or article at the rate to which the same would be subject if separately imported. That the words "value" or "actual market value" whenever used in this Act or in any law relating to the appraisement of imported merchandise shall be construed to be the actual market value or wholesale price as defined in this section.

In conclusion, the committee desires to say that apparently we have done all that can be done at the present time. Among other things submitted to us was a complaint from one firm regarding penalty for undervaluation which they claimed was unjust and further stated that they could not obtain any consideration of their claim by the authorities. The committee presented the case to the collector, and by return of mail received assurance that the matter had never been in his office; application to the Secretary of the Treasury for information brought back a reply in two days, stating that the claim could not be allowed. The appraiser obtained a list of the firms who placed their case with the committee, and mailed to each a letter, copy of which is enclosed.

The committee desires to thank all those who aided them in the performance of this very important mission; they desire also to thank the government officials for the courteous treatment received, and the marked attention paid to their requests.

[Copy.]

Dictated by W. F. W.

OFFICE OF THE
APPRAISER OF MERCHANDISE,
PORT OF NEW YORK, N. Y.
December 20, 1898.

Gentlemen:—We had a call a few days since from your committee on the subject of importations of plants, bulbs, etc. With the co-operation of importers in your line, I think we will be able to avoid any delays in the future, and I beg to

say that it will be a pleasure to meet you or your representatives at any time. Do not hesitate to bring any delays to my attention.

Very truly yours,
(Signed.) W. F. WAKEMAN,
Appraiser.

All of which is respectfully submitted.
The Legislative Committee, S. A. F.
PATRICK O'MARA, Chairman.
JOHN N. MAY,
CHARLES H. ALLEN.
WM. J. STEWART, Secretary.

WITH THE GROWERS.

CHICAGO CARNATION CO., JOLIET, ILL.

Under the management of J. D. Thompson and Jas. Hartshorne there has been established at Joliet, Ill., the most elaborate range of glass for carnation growing in the country. Work was begun on the place late last year, and the propagation of stock and cutting of the best grade of flowers in the market is now going on as smoothly and extensively as if the concern had been engaged in the business many years.

It was originally intended to erect iron houses and the Lord & Burnham Co., of New York, supplied the plans for same. Wooden structures were finally determined upon, however, and the plans were slightly modified in conformity with the building material employed. The range, as shown in the illustration, consists of eight houses 22x200 feet, with excellent offices and accommodations for the employes, a number of whom sleep on the premises.

The houses were built by Michael Winandy, Rogers Park, Chicago, and completed, ready for planting, within thirty days. This is a feat in greenhouse building which it would be difficult to eclipse, especially when it is considered that the materials and workmanship put into the buildings by Mr. Winandy are most thorough and substantial.

Hot water under pressure is employed for heating and supplied by three No. 9 Kroeschell boilers, each with capacity for 6,000 feet of 4-inch pipe. Two of these boilers maintain the necessary temperature, the third being held in reserve for emergencies. Each house contains eight runs of 4-inch pipe, connecting with 8-inch mains in a tunnel which traverses the range in the center. Cement joints are used exclusively, and they have given entire satisfaction thus far.

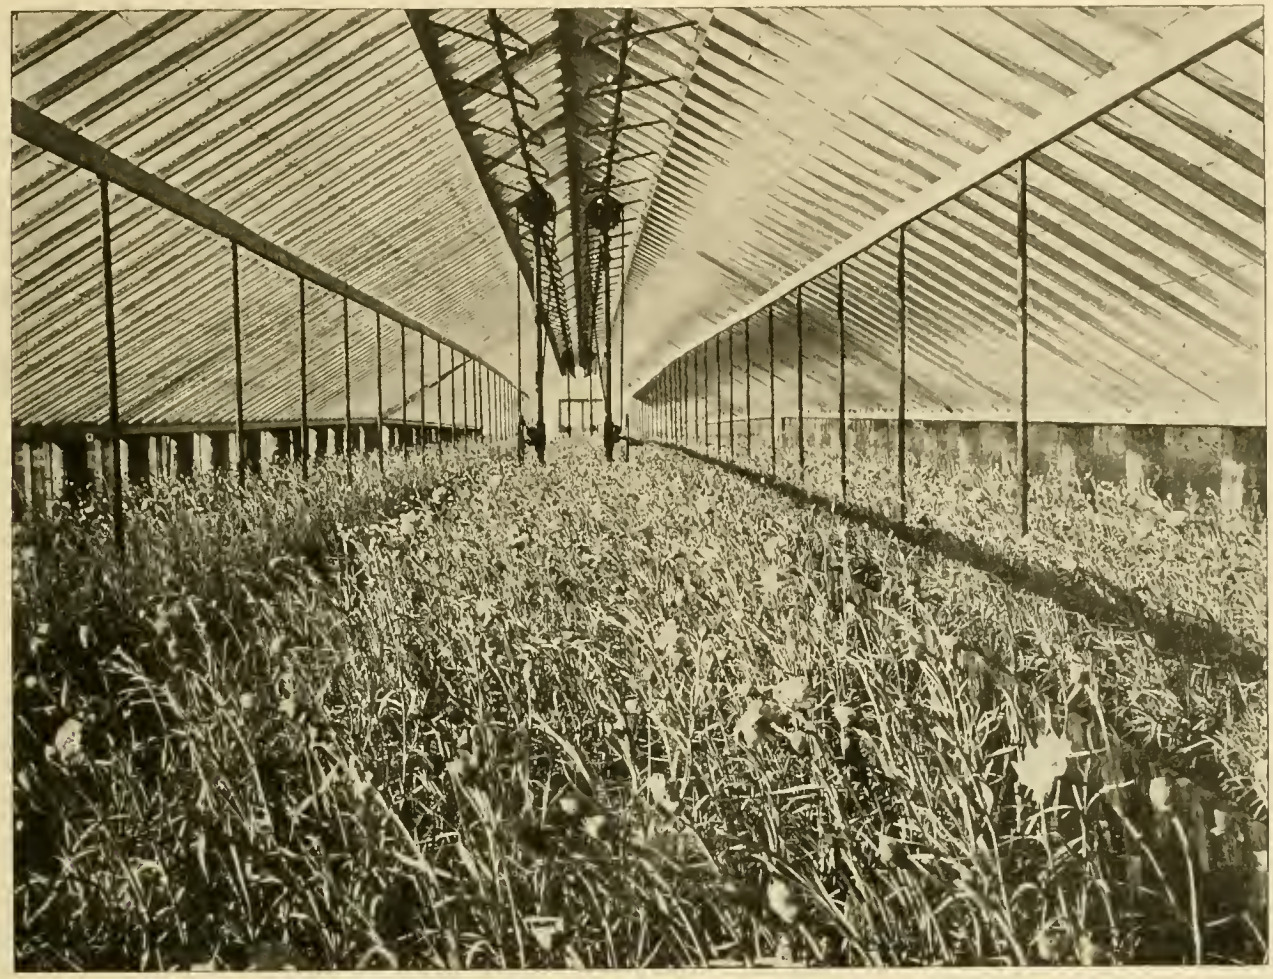
Ventilation is continuous on both sides, all the houses being fitted with the Challenge Ventilating Apparatus supplied by the Quaker City Machine Works, Richmond, Ind. The houses are divided by partitions, glass in panes 16x24 constituting the upper portion of same. The

J. D. THOMPSON.

benches are six inches deep, and Model supports, manufactured by the Model Plant Stake Co., Brooklyn, N. Y., are used for the plants.

Carnations are grown exclusively, but only a few of the best varieties, including Mrs. Geo. M. Bradt, Argyle, Mrs. Frances Joost, Flora Hill, Gold Nugget, Evelina, Victor, Armazindy, Jubilee, Daybreak, Mrs. Jas. Dean, Bon Ton, New York and John Young. It is the intention to grow still fewer sorts next year, retaining only the cream of the varieties at present in the market.

Mr. Hartshorne considers Mrs. Bradt, Gold Nugget, John Young and Mrs. Jas. Dean the best in their respective colors. Dorner's G. H. Crane will probably be grown next year. Bon Ton, as Mr. Hartshorne grows it, has sold better than Jubilee, but Mrs. Jas. Dean brings the highest price of all. Argyle is spoken of highly. Mrs. Frances Joost is considered an improvement on Scott, and the best "bread and butter" carnation. Evelina is found, very free flowering and Armazindy extremely useful in that it can be used as a white or as a variegated.



Victor is perhaps the most prolific variety on the place and the flowers readily fetch from three to five cents. Between September 25 and the same date in December 3200 plants of this variety produced 21,000 marketable flowers. Another record of cut blooms shows that 1575 plants of Flora Hill gave 1300 flowers between October 1 and December 25. A record of the cut from each variety is kept in this way, together with prices obtained, and such records, carefully followed to the end of the season, must be valuable when the time comes to make a selection of varieties for the next season.

Considering that many of the houses were not planted until late in the season, Mr. Hartshorne's success in securing the highest prices for his product is certainly remarkable. Healthier plants or better blooms are not to be found anywhere. But in all the rush of work attending the establishment of a new plant, time has been found to do much effective work with seedlings. One of Mr. Hartshorne's novelties (No. 11) has been already awarded the certificate and medal of the Chicago Horticultural Society, but it is safe to say that some not yet exhibited will prove to be record breakers. Many excellent seedlings were marked for the rubbish pile, because it is the practice at this place to discard everything of this character which fails to show some improvement on older varieties.

Mr. Hartshorne is well known to the trade, especially for his work among carnations and chrysanthemums. The other prominent member of the firm, Mr. J. D. Thompson, whose portrait appears herewith, is also manager of the extensive estate of Mr. H. N. Higinbotham, at Joliet, a position he has occupied for five years past. Formerly he was in the employ of Marshall Field & Co., of Chicago. Mr. Thompson is also an extensive grower of sweet corn, practically supplying the Chicago market with that vegetable from the 600 acres which he devotes to it.

GREENHOUSES OF THE CHICAGO CARNATION COMPANY, JOLIET, ILL.

CHICAGO CARNATION COMPANY'S HOUSE OF CARNATION MRS. BRADT.

The erroneous reports which have been going the rounds of the general press during the past few weeks, with reference to the sale of the variety Mrs. Thos. W. Lawson, by Peter Fisher, of Ellis, Mass., recall the fact that the Chicago Carnation Co. offered $4,000 for this seedling last February.

CARNATIONS.

CULTURAL NOTES.

January 21.—After getting a good healthy carnation cutting well rooted it becomes necessary to at once begin the care required all the way through life to get the best results.

If started in sand it is well to take the cuttings out as soon as they have formed small roots, as there is no nourishment in the sand and they are injured by allowing them to stand until they have formed a heavy clump of roots and have made a corresponding top growth. Some prefer to place the young plants either in flats or benches, and others put them into pots. Either plan will produce good results, but I choose to pot them, as they then have more room than is usually given on benches and are not so liable to suffer from careless handling when transplanted to the field or the house.

For growing indoors there is not much danger of the potting soil being too rich, as they should be pushed from the time they leave the cutting bed until they are thrown out the following summer, and the larger and stronger you can get your young plants the better results you will have next winter. But for growing outdoors the soil into which cuttings are potted or planted should not be so excessively rich that it will produce a soft luxuriant growth only to be checked by a poor soil in the field.

If cuttings are planted on a bed or in flats they should be given at the least two inches each way, and if they are to be grown indoors they should have not less three inches, and would be all the better for four inches. You simply can not have good carnations unless you are willing to give them the proper care and room. If you pot them they should be put into a small rose pot for a start and repotted later on; frequently even a third potting will not be time wasted.

The best houses for young plants are those running north and south, even span, as there is less likelihood of their drawing to one side and becoming deformed. I think the general run of growers adopt a regular carnation temperature for their young stock. If for outdoor planting and you can get your soil in shape early in the season there is a slight advantage in starting the young plants in the regular blooming temperature and gradually reducing it so that by the time your soil is ready your plants will be growing in the temperature they will be likely to encounter outside. If wanted for indoor planting almost the opposite method should be adopted, as in the latter case, by the time you are ready to plant, the temperature of the houses will be above that in a carnation house during the blooming period.

On no account let your young plants suffer for the lack of water, and still less from an overabundance of it, as both conditions will surely bring on disease. Red spider should be kept away by the application of sulphur to the heating pipes and the use of a rose in watering; it should never be necessary to syringe the young plants to kill the spider.

ALBERT M. HERR.

VIOLETS.

THE VIOLET GALL FLY.

ED. AM. FLORIST:—We would appreciate it as a favor to find in your columns a description of the form and habits of the violet gall fly that would enable us to distinguish it from the flies commonly found in greenhouses. A suggestion as to remedies would also be of much service. FLORISTS.

The so-called gall fly of violets is an undescribed species of cecidomyiid, to which family belong the Hessian fly, clover seed midge, and other pests. It would appear to be a comparatively new pest, at least in this country, and it is not impossible that it is an introduction from abroad. It would be a difficult matter to describe the insect in such a manner that florists would be able to distinguish it from other flies

found in greenhouses. Unfortunately there are several species of sciara which resemble it superficially and which breed from manure and decaying vegetable matter grown under glass.

Briefly, the parent gall fly may be described as a minute, slender, two-winged fly, measuring about one twentieth of an inch in length. It has long slender legs and antennæ, the latter 14-jointed, and is altogether a very inconspicuous creature. The larva or maggot, which is to be found folded up in the leaves of violets in such a manner as to bring the upper surfaces together in what is sometimes termed a gall is a minute legless creature of a whitish or yellowish color. From one to three or more of these maggots are to be found in a single gall.

Of the habits of this species comparatively little is known. I am therefore glad of the opportunity to bring the subject to the attention of florists, as I hope the coming spring to obtain through correspondents specimens of the larvæ as material for rearing the insect and thus studying its habits and development. I am also desirous of ascertaining more concerning its distribution. At present we know it from Washington, D. C., where, however, it has not been recently noticed; Richmond, Va.; Nyack, N. Y.; and Tappan, N. Y. It is also reported from Gordonsviell, Va.

According to Mr. A. Davison, one of our correspondents, at Nyack, N. Y., the maggot secretes itself in the crown of the plant. The leaves as they come up are tightly curled, and when unfolded there will be found six or eight small white maggots. The maggots seldom appear on the side crowns, thus affording them an opportunity to make good flowers, although the flowers will not be as large as crown flowers. When the maggot leaves the plant it enters the ground.

Mr. Davison has expressed the belief that the fly was introduced into his greenhouses through manure purchased from a party who collected garbage, but further experience is necessary to confirm this opinion.

The remedy generally employed against this pest consists in picking off and destroying the infested leaves. It should also yield to a dusting of Buhach insect powder which has been found a specific against similar gall flies on roses. Tobacco, however, cannot be safely used to any extent on violets owing to the danger of producing spot. The best remedy for this species is hydrocyanic acid gas, which will be fully described in Circular No. 37 of the Division of Entomology, U. S. Department of Agriculture, which is now in the printer's hands and will be available for distribution in a few days. Copies of this circular will be sent to persons requesting it.

Washington, D. C. L. O. HOWARD.

GLASS FOR VIOLET HOUSE.

ED. AM. FLORIST:—I would like to ask through your columns whether there would be any gain in the flowering of violets where the houses run east and west by the use of glass larger than 7x9? I should also like to know of any grower who raises the Victoria Regina violet.

A SUBSCRIBER.

There seems to be no positive data on this subject, and in order to determine whether the size of glass has any influence on flower production it would be necessary to conduct a number of experiments under as nearly the same conditions as possible and extending through several years. The results obtained from such experiments, however, would probably not hold good for any other locality than the one in which the experiments were made, owing to the fact that different conditions prevail in different places. Although every practical grower has doubtless seen large crops of good violets growing in frames under glass even smaller than 7x9 inches I do not think they would as a rule advise the use of glass smaller than 12x12 inches, or larger than 16x25 inches in violet houses, and it is my belief that glass coming within this range will give the best results.

Washington, D. C. P. H. DORSETT.

VIOLET ROT.

ED. AM. FLORIST:—Please give in your next issue the cause of a rot in the crown of violets, with remedy, and oblige.

J. T. G.

It is impossible to decide from the brief request just which form of rot the complainant has in his plants. There is a decay of the crown that follows from the attacks of a gray mould that destroys the outer leaves and may finally reach and injure the crown. There is a disease similar to that of the lettuce heart rot that may do much damage. This may start in the young leaves and possibly follow from the puncturings of the aphis. The rot is sometimes prevented by withholding water from the crown. Some form of sub-irrigation may be resorted to and if insects are at the bottom of the trouble fumigation with tobacco stems may be employed, or an application of the decoction of tobacco directly to the diseased plants. This latter should be in a dilute form as violets are very susceptible to injury by insecticides as well as fungicides. Of the latter the best is probably the cupram, and it may be of service with the rot in question.

BYRON D. HALSTED.

WILMINGTON, N. C.—Miss Lucy Moore has just completed two commercial houses, each seventy-five feet long.

PORTLAND, ME.—E. J. Harmon, who has a fine business here, will shortly erect two greenhouses each 60x300 at South Portland.

ROSES.

ROSES IN TENNESSEE.

Our illustration is from a photograph of a house of Brides taken November 10 at the establishment of Joy & Son, Nashville, Tenn. The plants are grown in solid beds, and this season they are producing the finest flowers ever cut by the Messrs. Joy. Details concerning the age of the plants and their general treatment would be interesting.

METEOR THE SECOND YEAR.

ED. AM. FLORIST:—Other things being equal, will Meteor carry over the second year with as good results as Mermet, Wootton and Belle Siebrecht? W. S. H.

With reasonable treatment there is nothing to prevent Meteor being carried over with good results, and as "W. S. H." has evidently had some experience in carrying over the other varieties named above, practically the same treatment should carry Meteor over with equal success.

JOHN N. MAY.

KEEPING CUT BLOOMS.

ED. AM. FLORIST:—Having had considerable complaint during the last two winters with regard to the keeping qualities of my roses when placed in rooms, I would feel much obliged for some information on the subject, principally as to the temperature at which the ice chest should be kept and how long roses may be retained in an ice chest without detriment to their lasting qualities when transferred to rooms for decorative purposes. I now grow my roses in a night temperature of 55° to 60°, increasing it from 5° to 10° during the day, according to weather conditions. The ice chest is kept at 38° to 40°. Sometimes I am obliged to keep the flowers in the ice chest three days, but never longer than that. I grow Bride, Bridesmaid and Perle.

J. S.

To keep cut roses that are grown in a mean temperature of 60° to 70° they should not be kept in a temperature below 45°, and it is not reasonable to expect that flowers can be kept three or four days after being cut from the plant in a cold temperature and then be expected to

BRIDE ROSES AT THE ESTABLISHMENT OF JOY & SON, NASHVILLE, TENN.

last for any length of time when transferred to warm rooms. I think that if "J. S." will keep his flowers in a temperature of, say, 45° and not keep them over thirty to forty hours at most there will not be much complaint. Of course there is considerable difference in the temperature of living rooms where these flowers are sometimes used. It is not at all reasonable to expect flowers to keep any length of time in rooms that are heated by hot air from furnaces to from 65° to 76°; such atmosphere is so extremely dry that the hardiest flowers will wilt very shortly. JOHN N. MAY.

Philadelphia.

BUSINESS SHOWS AN IMPROVEMENT WITH A SHORT SUPPLY OF STOCK.—GOOD FLOWERS PURCHASED ON SIGHT AT STIFF PRICES.—CARNATIONS AND VIOLETS PLENTIFUL.—TULIPS AND VON SIONS AT YOUNG'S.—THE FARMERS' INSTITUTE.—THE MATTER OF ROSE CROPS.

Business is a little better than last week and, all the crops appearing to be off, flowers, particularly good ones, are very scarce. Good Brides and Bridesmaids are bringing $12 per 100 at first sight, and some dealers feel themselves lucky to get even a look at them. There are not nearly enough American Beauties to go around. Fifty cents each is asked for the best and they are not at all up to the standard of two weeks ago.

A grower takes exception to my last week's remarks about crops all coming together at this season of the year. He says it is quite possible to have one table of roses going out while another in the same house is just coming in and this applies to any time of the year. Perhaps we can prevail on him sometime to tell how it is done.

Carnations are plentiful at from $1.50 per 100 up to $3 and a few extras bring $4 to $5. Violets are rather too plentiful and $1 buys very good stock, in fact, nearly, if not quite, the best. Tulips are commencing, J. W. Young having the first in, also a few Von Sion daffodils, but hardly of marketable size; $3 to $4 is the price.

W. K. Harris is cutting some fine new-crop lily of the valley. It is from Hagemann pips and either the brand or the growing makes it the best in the market. Harrisii lilies are becoming quite plentiful in the store windows. Greens of all kinds seem to sell well. Adiantum is getting scarcer and the bunches of twenty-five sprays are much smaller; $1 per 100 is still asked. Asparagus Sprengerii also sells well at from 2 to 5 cents per spray.

The Farmers' Institute at Horticultural Hall last Tuesday was very interesting. There was an exhibition of begonias and prominent among them and away ahead of anything else was a plant of Gloire de Lorraine; it was a revelation to those who had not seen it, and nothing has been said or can be written that is too good for it. W. H. Taplin told how to care for plants in the house and illustrated his remarks with specimens of all the varieties he described. W. A. Manda, of Orange, exhibited a yellow cypripedium and Mr. Clinkaberry a fine new hybrid cypripedium with two flowers. The meetings were well attended and very much enjoyed by all present.

E. M. Wood, of Boston, was in town the past week. He is much interested in the new rose Liberty, and rumor has it that he has acquired an interest in this coming beauty and will handle it in the New England territory.

W. A. Manda was also a visitor. K.

Boston.

ACTIVITY IN FUNERAL FLOWER WORK.—ROSES OFF CROP AND SELLING WELL.—WHITE FLOWERS OF ALL KINDS EXPERIENCE A BOOM.—VIOLETS STILL IN THE DUMPS.—GRADED LILY OF THE VALLEY.—SENSATIONAL ADVERTISING AND A RETAILER'S ENTERPRIZE.—NEW MANAGEMENT OF THE TWOMBLY COMPANY.—WABAN CONSERVATORIES TO DISTRIBUTE LIBERTY.

The market is fairly good this week on roses. Most of the growers are off crop and the light supply seems about right for the demand, which, while only moderate in volume for the time of the year, is yet sufficient to prevent any accumulation of stock. This is true of all the colored varieties. Beauties find a fair and steady market with but little fluctuation in value since New Year's and Meteors go all right, although lower than they were. On white roses, however, the call is decidedly sharp. Brides have been the leader for the past two weeks; they are wanted in town and out of town and there would be little difficulty in disposing of a much larger stock than is available at the present time. Retailers are having a steady run of funeral calls and this is in part responsible for the demand for white roses. White carnations, naturally, share in the activity, and, outside of the fancy varieties, hold the lead as to prices, bringing nearly or fully twice as much as Scott, which, for some reason, possibly overabundance, seems to get decidedly the small end of the bargain in this market this season. Daybreak does better than Scott, ranging about midway between Scott and the white sorts.

Violets continue to occupy the mourners' seat, in company with the bulbous stock, but the latter has held that position so long that it accepts it as a matter of course and no grumbling is heard, whereas the experience is rather unfamiliar to the violet grower and consequently the complaining is loud and the disappointment acute. One thing is sure—the quality of the violets is not the cause, for never before has this market been favored with violets of such high grade as most of the growers have produced this year, and it is greatly to be regretted that they are not recompensed accordingly. The cause is not entirely over-production either; the fact is that the violet seems, for the time being, to have waned in the public fancy. As soon as the weather favors curbstone peddling no doubt violets will move lively again but under such conditions extremely low prices are all that the growers can count on.

As daffodils and yellow tulips multiply, patches of bright yellow appear in the store windows and their spring-like suggestiveness fixes the attention of the passer as no other color can. Bunches of acacia are also beginning to show up and there are vases of that prettiest of all yellow flowers, the coreopsis, which one seldom sees outside of Boston at this season of the year. Freesias are coming in freely and together with Paper Whites and Roman hyacinths, whose adversity they have often shared in the past, are just now enjoying the stimulus of the funeral demand. Callas and lilies are also seasonable stock, under prevailing conditions. Lily of the valley, following the example of the roses, now boasts of three grades. The result is the same as with the roses—the selected fancy grade brings a price which ruled for ungraded stock a few years back and the rest of it must take its chances with the "culls" for cheap design work.

The daily papers have this week overflowed with sensational stories regarding the fortunes of the Mrs. Thos. W. Lawson carnation and the sum of $6,000 said to have been offered by Mr. Higinbotham, of Chicago, for the entire stock now appears very modest in the light of a "raise" to the tune of $15,000 for one-half the stock which a nameless New York wholesaler is represented to have made. All of which goes to prove, what needs no proof to those who know that gentleman's abilities, that Boston has in Mr. Thos. F. Galvin, who controls the cut flowers of this famous carnation, a bold and fearless advertiser who, without half trying, can cast a deep shadow on the puny efforts of his contemporaries in any other village on this continent when a hypnotizable reporter comes around.

It is understood that a number of capitalists, with whom rumor connects the name of Oakes Ames as president, have taken control of the affairs of the Twombly Company and propose making a gigantic affair out of it, building large greenhouses, etc., in the hope of eventually controlling a large share of the retail trade of New England and even more remote sections.

The control of the New England states for the distribution of the new red rose Liberty has been secured by the Waban Rose Conservatories. It could not fall into better hands. The trade knows what kind of stock to expect from Mr. Montgomery's benches.

Most agreeable, although unseasonable, has been the April-like weather experienced during the past few days up to the time of writing these notes. The disappearance of the snow drifts which have been lying since the memorable November blizzard exposes some of the havoc done at that time in the way of broken down rhododendrons and other low evergreen shrubbery.

The lecture at Horticultural Hall on Saturday, January 14, was on diseases of plants, especially those caused by parasitic fungi, by Prof. W. T. Sedgwick, of the Massachusetts Institute of Technology.

Wm. H. Elliott has bought 125,000 square feet of land adjacent to his establishment at Oak Square. More asparagus!

GARDENERS' CLUB HOLDS A SMOKER, DISCUSSION AND CARNATION SHOW.—FINE BLOOMS EXHIBITED.—THE QUESTION OF A FALL SHOW.

The Gardeners' Club smoked and discussed carnations at its recent meeting and inspected what the committee declared to be the finest display of carnation blooms ever staged here. Exhibits were made by Halliday Bros., who had seven vases; H. Weber & Son, Oakland, Md., eight vases; C. M. Wagner and J. L. Wagner. Cook Bros. made a display of fine mignonette. The committee, Messrs. B. F. Litton, J. H. Moss, Michael Hannigan, Hugo Walther and Fred Bauer, reported that the display of Halliday Bros. was as fine as ever exhibited at the club and showed superior culture, and that Messrs. Weber had made a very creditable showing.

A committee consisting of Harry Ekas, Charles Wagner, W. Paul Binder and John Donn has been appointed to report on the advisability of holding a chrysanthemum show next fall.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2.00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

THE demand for plants of the blue marguerite, Agathæa cœlestis, still exceeds the supply.

CROZY AINE, the famous canna specialist, formerly at Lyons, is now located at Hyeres (Var.) France.

PLAN now to attend the next meeting of the American Carnation Society, to be held at Philadelphia February 16 and 17.

WM. FALCONER, superintendent of Schenley Park, Pittsburg, has returned from Jamaica from a successful quest of economic plants.

SOME fine blooms of his carnation Merriamac, a pink seedling of Scott and McGowan parentage, have been received from J. M. Gasser, of Cleveland, Ohio.

W. DAETHE, a representative of the German government, fresh from a tour of France and England, is visiting points of horticultural interest in the United States.

THE Worcester County Horticultural Society has issued its premium list for 1899, with schedules of twenty-one exhibitions to occur between the dates of March 16 and October 12.

ERNST ASMUS, of West Hoboken, N. J., informs us that one-fourth of the stock of the new rose, Liberty, has been disposed of to E. M. Wood & Co., Natick, Mass., for distribution in the New England states.

GEORGE MORRISON, writing to H. A. Dreer upon the flora of Hawaii, reports that our new possession is rich in ferns, crotons and other valuable plants and that bougainvilleas flourish there. He states that but three varieties of orchids are known on the island.

WE are in receipt of flowers of some promising seedling carnations from J. O. Zimmerman, Pueblo, Col. Stem and calyx are good in each case, and a series of Scott and Daybreak crosses affords some pleasing shades, especially Nos. 11 and 12. A cross of Scott and Dr. Warder is of a rich port wine color. All the flowers are small, but the size will doubtless improve in some of the varieties with good cultivation another year.

Just in Time.

The American Florist Company's Directory of florists, nursery and seedsmen for 1899, now ready, appears at the right moment to put the spring trade lists direct to live people. The names and addresses of 1336 new firms have been added in this edition, and all lists revised to date. Price $2.

Greenhouse Building.

Evanston, Ill.—A. E. Hunt, two commercial houses and boiler house.

Toledo, O.—Park greenhouses to cost $12,700.

Helena, Mont.—State Nursery Company, rose house 17x130, smilax house 16x50.

Waukesha, Wis.—John Grape, greenhouse 16x25.

South Evanston, Ill.—Risch-Wieland Floral Company, nine houses 25x150.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

M. H. Walsh, Woods Holl, Mass., registers the new hybrid tea rose Lilian Nordica, a cross between Margaret Dickson and Mme. Hoste. Color pure; buds long and borne on long stems; flowers large, double and with strong tea fragrance; foliage dark green and profuse; growth vigorous; plant perpetual bloomer and is hardy at Woods Holl.

WM. J. STEWART, Sec'y.

American Carnation Society.

Arrangements have been made for the accommodation of members and their friends at the Lafayette hotel, Philadelphia, for $1 and $1.50 per day on the European plan.

The Lafayette is convenient to the meeting place and hall and it is desired by the managers that they know how many to expect at the latest one week in advance of the meeting.

Members or others desiring to stop at this hotel should notify the secretary not later than February 7, or they can if they so desire write to the hotel direct and secure the rates given by stating that they will attend the meeting of the society.

Communications regarding space in the exhibition hall should be addressed to Geo. C. Watson, Juniper and Walnut streets, Philadelphia, Pa.

Entries should be made with the secretary as soon as possible to avoid the confusion of the opening day of the exhibition and possible errors resulting therefrom.

The meeting promises to be a big one, the show a bigger one and every live carnation grower should arrange his affairs now so that he can attend.

ALBERT M. HERR, Sec'y.

Lancaster, Pa.

Foliage of Rubbers and Bananas Scalded.

ED. AM. FLORIST:—We have lately erected a greenhouse 20x50 feet, sides eight feet high and center twelve feet. The even span roof is made of hotbed sashes. We find plants such as rubbers, bananas, etc., scald in this house and would like to have your opinion as to cause of same. The glass is lapped from one to one and one-fourth inches and a small quantity of water which collects at the lap takes some time to evaporate. Might this be the cause? Would paint or putty stains produce the trouble? There are no blisters in the glass. Any information will be gladly received. H. C. A.

Replying to above, we have always heretofore blamed defective glass when the leaves of plants growing thereunder are scalded, but whether we are justified in so doing or not we cannot positively say. Some years ago the idea was advanced that drops of water in the greenhouse would sometimes so concentrate the sun's rays that a scald in the leaves where the concentration struck would be the result. If "H. C. A." would make an effort to determine what in his case was the cause of the leaves of his plants scalding, it would all be in the interest of horticulture and for the benefit of science. Paint or putty stains would not, we are inclined to think, produce the trouble. We ourselves have had troubles of this kind, and when we have found, as we thought, the defective pane of glass, have smeared paint thereon with what we confidently believed to have the desired result. If it is as "H. C. A." says, "there are no blisters in the glass" in his greenhouse, some other cause than the one given must be looked for. A plant that is allowed to become too dry at the roots is often more susceptible to the scalding tendency than plants which are never allowed to suffer in that respect. It is a very difficult question for the undersigned to satisfactorily answer, as he has never yet been on hand when the trouble was being done, so that the best he can do is to give what has generally been considered the cause of the trouble. Here is something for the experiment stations to wrestle with. E. D. W.

Phosphate of Ammonia.

ED. AM. FLORIST:—I wish to inquire of Professor Britton what form of phosphate of ammonia he uses in the preparation of the liquid fertilizer mentioned on page 439 of your issue of November 12? The straight article is quite expensive here (23 cents per pound) and I have thought that perhaps there may be some cheaper compound which he employs for this purpose. F. H. C.

I have used the pure phosphate of ammonia in making the liquid fertilizer. It is rather expensive, but very little is required as a pound is sufficient to make 400 gallons of the liquid. So far as I know there is no cheaper commercial grade of phosphate of ammonia.

W E. BRITTON.

Galvanized Iron Pipes for Heating.

ED. AM. FLORIST:—I would like to inquire whether any of your readers have ever tried galvanized iron pipes for heating by hot water, and with what results? There is manufactured here a heavy corrugated, galvanized iron pipe in ten-foot lengths and three or four inches in diameter, which can be purchased at moderate cost. All the joints are soldered, and it is claimed that on account of the corrugation, expansion and contraction are satisfactory. If such pipes can be used advantageously for greenhouse heating, the expense and annoyance attending the defective joints of iron pipes might be materially lessened. Z.

While I have never tried galvanized pipes for heating, I doubt if they can be used satisfactorily. In order to have the corrugations provide for expansion, it will be necessary to have them run around the pipe and these irregularities can hardly fail to hinder the circulation. Even with the pipes thus corrugated, I should have some fear that the soldered joints would draw apart unless provision was made for the expansion of the pipes, the same as with cast iron or gas pipe. If such is the case, "the expense and annoyance attending the defective joints," would be greater than with iron pipes. If, as I infer, the pipes are of heavy galvanized sheet-iron, there will also be danger of its rusting at points where it may be imperfectly galvanized, or where the iron may become exposed.

L. R. TAFT.

OBITUARY.

W. W. EDGAR, SR.

W. W. Edgar, Sr., father of William W. Edgar, the well-known fern specialist of Waverly, Mass., died January 10 at the home of his son. He was 82 years of age.

L. C. HAUSSERMANN.

Louis C. Haussermann died on January 8 at his home at Leavenworth, Kan. He was the husband of Lizzie Byrns Haussermann, senior partner in the firm of Byrns & Katzung, the leading florists of Leavenworth.

REV. J. HERMAN WIBBE.

The rector of St. Joseph's church, Schenectady, N. Y., died January 7, aged fifty-five years. He was a leading botanist and was at one time consulting botanist at the Smithsonian Institute at Washington. His herbarium was considered one of the most complete in the United States.

ROBERT MATHISON.

Aged 87 years, this veteran Philadelphia florist and gardener breathed his last on January 7. He was born at Preble, Scotland, and came to America when sixteen years old, locating on Long Island, where he learned his trade. He was a veteran of the Rebellion, having served in the Collis Zouaves.

WILLIAM W. COOK.

William W. Cook, who was at one time the leading florist in the vicinity of Worcester, Mass., died January 11 at Chapin Home in New York. He was seventy-eight years of age. Mr. Cook was a member of the Worcester Horticultural society, joining in 1865, and was for fifteen years a member of its board of trustees.

THEODORE WHITSON.

The senior member of T. Whitson & Sons, Atglen, Pa., died on January 5. He had for several years been menaced by heart disease, to which he at length succumbed. Mr. Whitson was fifty-eight years of age and leaves a widow and five children. He had been in business at Atglen for many years and during the civil war was a member of Co. E. 122d Penn. Vol.

New York.

RETAIL TRADE VERY MODERATE.—LIGHT RECEIPTS IN WHOLESALE MARKETS.—VIOLETS STILL SLOW.—CARNATIONS SHOW MARKED IMPROVEMENT.—AZALEAS SELL WELL.—LOCAL NOTES.

Considering that it is now nearing the height of the season and that Lent is but four weeks away the flower trade of New York cannot be said to be good. There is a dearth of affairs calling for the use of large quantities of plants and when such occasions do occur the disposition is to make the floral display as insignificent as possible and to depend as far as practicable upon the product of the home conservatories, the florist being called upon only to furnish missing items and to do the work of arranging. In the wholesale establishments there is no evidence of an accumulation of stock, however, owing to the fact that fortunately, the receipts are very light and so the prices are maintained with commendable evenness. On violets, only, is serious weakness discernible; they have dropped twenty-five per cent in value on an average within the past week and no one now thinks of getting them back to the usual midwinter figures, although the mildness of the past few days has helped the sale of violets and carnations materially. No other flowers seem to benefit from cheerful sunny weather as do these two especial favorites of the transient buyers.

Roses have turned the corner and the tide will rise as they gradually come into crop again. It is fortunate that the period of light product should have come at a time when the demand was equally light, and the fact is creditable to the judgment of the rose growers who managed to balance their crop so nicely between chrysanthemum time and the after-holiday inactivity. Tulips are now seen in all the usual market colors and are improving in flower and stem, some of those now coming in being very good for the season.

The plant trade is reported as fairly steady, palms and large ferns enjoying a regular and satisfactory sale. Ericas are still good and there are plenty of small, low-priced Chinese primroses in market that sell in large quantities, especially in the medium-class sections of the city. Azaleas are selling very well, much better in fact than at any time this season with the exception of the special holiday rush.

R. W. Clucas returned on January 14 from a trip to Bermuda.

Jos. Millang has been engaged as manager of the New York Cut Flower Co.

Visitors in town: E. M. Wood, Boston; W. F. and A. Gude, Washington.

LINCOLN, ILL.—W. H. Gullett & Sons supplied the decorations for the swellest ball of the season at Decatur, Ill.

ATLANTIC, IA.—Christmas far ahead of last year; sold out of everything presentable; prices good. C. G. A.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1899 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By a strictly sober florist; capable and willing, and the best of recommendations. Address E J C, care American Florist.

SITUATION WANTED—By first-class rose grower. Beauties a specialty; 20 years' experience; best references. Address M, care American Florist.

SITUATION WANTED—By young man 21 years old in flower or seed store. Four years' experience as assistant in greenhouses. Address W H M, care American Florist.

SITUATION WANTED—By thoroughly practical gardener (English). Private establishment preferred. Wages $15 per week; 12 years; character. Address ENGLISH, care Am. Florist.

SITUATON WANTED—By a married man, German, 14 years' experience in growing cut flowers, general bedding and greenhouse stock, and nursery work. Sober and reliable. At liberty by 1st of April. Address W D, care American Florist.

SITUATION WANTED—By German gardener, age 29, on commercial or private place; 15 year's experience; married; first-class designer and decorator; best references. Address E. T. SCHROEDER, 1804 N. Marshfield ave. Chicago.

SITUATION WANTED—As working foreman in medium-size place or to take charge of section of houses; 14 years' experience growing roses, carnations, 'mums and general stock; Al propagator. Best of references as to ability of growing first-class stock. Address AMERICAN, care American Florist.

SITUATION WANTED—As foreman by a thoroughly competent German florist; understands growing roses, carnations, 'mums, palms, ferns, orchids and general stock; designer and decorator; 8 years experience in America; 31 years of age, married. First-class German and American references. Address stating terms P G, care American Florist.

SITUATION WANTED—As foreman on large place where Beauties are wanted first-class; 12 years experience; married, age 36, one child. Also steam and hot water engineer and greenhouse constructor, also good designer and truck gardener. If any one is in need of such a man, strictly sober and honest please state wages. Address W G, care American Florist.

WANTED—Salesmen to sell flower pots as a side line on commission. CAMBRIDGE TILE M'F'G CO., Covington, Ky.

WANTED—A man for general greenhouse work. With some experience and able to fire steam boilers; $9 a week. Address with references WM. KIRKHAM, Maywood, Ill.

WANTED—First-class rose and carnation grower to take charge of six houses; must be single. State lowest wages with board, and age. Address JOHN L. WYLAND, De Haven, Pa.

WANTED AT ONCE—A good all-round florist, one who knows how and is willing to work. State lowest wages with board and lodging. W. H. WRIGHT, 204 1st East St., Vicksburg, Miss

WANTED—February 1, good steady man who thoroughly understands handling hose and general greenhouse work; must know how to water. State wages expected. Address C. H. FREY, 1131 O St., Lincoln, Neb.

FOR SALE—Five greenhouses, five building lots and barn, 25 miles from New York in growing city. Good retail and wholesale stand; cheap. E L, care Am. Florist.

FOR SALE—Good chance for man or partners with cash. Eleven years' business in live western city of 10,000; railway division; good shipping trade; no opposition. WESTERNER, care Am. Florist.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE OR LEASE—Greenhouse 20x100 well stocked, Hitching's boiler. Ground to suit purchaser near two cemeteries in good location, good market for all that can be raised. Address WM. KALL, Park Ave. and Dean St., E. E., Pittsburg.

FOR SALE VERY CHEAP—A fine greenhouse establishment of 10 000 sq. feet of glass in a booming city of 18 000. Very little competition. Everything in fine condition. A well paying investment. Good reasons for selling. Address BARGAIN, care American Florist.

For Rent Or Sale.

Six greenhouses, 15,000 feet of glass, well stocked with Carnations, Violets and Bedding Plants; houses heated with hot water and steam in best condition. Can have either one or 5 acres of ground. Best location around Detroit, one mile from the city, opposite the Woodmere Cemetery entrance. Too much business on hand, and may have it on partnership.

Apply to **Anton Kaier, Woodmere, Mich.**

FOR SALE.

A twenty-year establishment of five new greenhouses, containing 7 000 feet of glass; heated by hot water (three boilers); growing roses, carnations and assortment; all in excellent condition; a good dwelling house with 12 rooms and a furnace; a wind-mill; city water; have the use of both the electric light and gas; inside of corporation; 3 blocks from the court house and business houses; no competition for 50 miles around; 14 acres of as good land as there is anywhere; all in small fruit; a barn, 40x20, and all necessary buildings; all in the best shape; can give possession any time; cost $15,000; pay $3,000 down, the rest can stay longer if wanted.

For further information write to

N. P. COLBERG, Princeton, Ill.

We like to have you tell our advertisers that you read our paper.

Nashville, Tenn.

All kinds of flowers are beginning to be plentiful again. Brides and Bridesmaids are fine in color and size and American Beauties are fair. Violets continue scarce but are coming in more plentifully. Azaleas are coming in rapidly and meet with a ready sale. There is good demand also for other blooming pot plants.

Church street, of our city, could well be called Florists' Row, as all the leading stores are on that thoroughfare.

M. C. DORRIS.

MARTINSVILLE, IND.—H. R. Winn has sold his establishment to R. S. Barrett, a local capitalist, who proposes to place a competent man in charge and greatly enlarge the plant.

PAWTUCKET, R. I.—Mr. and Mrs. A. L. Warner arrived home on January 9 after a five months' visit to their daughter in Pueblo, Cal. The steamer Lampasses on which they came from Key West was obliged to return, when about 200 miles from that port, owing to a fire in the cotton which formed a large part of the cargo, and the boat had a narrow escape from total destruction.

SPRINGFIELD, MASS.—The directors of the Hampden County Horticultural Society met last evening in the board of trade rooms and arranged the schedule of premiums for the rose and sweet pea shows next summer. It was decided to hold the rose show on June 20 and 21 and the sweet pea show on July 18 and 19. The fall exhibition of flowers, fruits and vegetables will be held September 19 and 20.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

JAMES SPROULE, formerly manager of the Sunset Seed and Plant Company, San Francisco, is again with the Southern Pacific Railroad.

THE Secretary of Agriculture has sent his annual notice to congressmen that some 6,000 packages of seeds are at the disposal of each.

ONE of the last acts of Governor Budd, of California, before retiring from office, was the appointment of W. H. Metson, the seed grower, as one of the Golden Gate Park commissioners.

GEORGE W. P. JERRARD, Caribou, Me., has sold the seed business bearing his name to Haines S. Hardison and Parker L. Hardison, of Caribou, and L. E. Tuttle, of Washburn.

SAN FRANCISCO.—Good rains encourage the growers, who began to fear another year of drought. Onions are mostly planted and other stock will soon be in. The rain has greatly benefited all crops.

HAYES & CRITTENDEN, New Haven, Conn., have dissolved partnership, Charles A. Crittenden retiring. The seed business of the concern, at 100 Broadway, will be continued by Edwin A. Hayes.

F. A. STECHER, the well-known Rochester lithographer, passed through Chicago on the 20th enroute to Japan. Besides the pleasure of the spring trip there Mr. Stecher has in view to establish a lithographic plant in that country.

No Duty on Seeds for Cape Colony.

ED. AM. FLORIST:—Please give tariff on seeds and bulbs exported to Cape Colony, South Africa, and oblige. SEEDSMAN.

[Seeds, bulbs, plants and tubers for planting or sowing only, under such regulations as regards edible kinds as the customs authorities may impose to safeguard the revenue against diversion into ordinary consumption, are admitted free of duty.—ED.]

American Seed Trade Association.

The executive committee of the American Seed Trade Association met at the Park Avenue Hotel, New York, on January 17. There were present President E. B. Clark, of Milford, Conn.; Secretary S. F. Willard, Wethersfield, Conn.; A. N. Clark, Milford, Conn.; I. B. Clark, Buffalo, N. Y.; Wm. Meggatt, Wethersfield, Conn.; W. Grinnell, Pierpont Manor, N. Y.; Jerome B. Rice, Cambridge, N. Y.; Albert McCullough, Cincinnati, O.; W. Atlee Burpee, Philadelphia, Pa., and A. L. Don, C. L. Allen, E. V. Hallock and M. H. Duryea, of New York. Cincinnati was selected as the location for the next annual meeting of the association, which will be held on the second Tuesday in June. A communication was received from the secretary of the Society of American Florists suggesting co-operation of the various national organizations with a view to securing if possible the appointment of one member to represent the horticultural interests on the Paris Exposition Commission. The suggestion was regarded with favor, but action was deferred pending its consideration by the S. A. F. The outlines of the programme for the June meeting comprised the only other business of importance transacted. The evening was passed pleasantly by most of the members of the committee at the theatre and the price of beans furnished a fruitful theme of conversation between the acts.

Cincinnati.

DISPLAY OF VERY FINE VIOLETS.—CLARA BARTON IS IN FAVOR EVERYWHERE.—YOUNG AMERICA MISSED CONNECTIONS.—CLUB MEETING.—ELECTION POSTPONED.—PERSONAL JOTTINGS.

The violet show of January 14 was not as large as former exhibits, but what was lacking in quantity was more than made up in quality. Corbett & Wilson, of College Hill, captured both prizes of $5 for best 100 single and double blooms. Their vase of Marie Louise was a revelation, the flowers very large and of good color. The vase of 100 Princess de Gales was the grandest ever shown here.

R. Witterstaetter had a vase of seedling carnations on exhibition which was a center of attraction in the hall—people simply went wild over them. George & Allen made the best display of roses and miscellaneous cut flowers. The Hoffmeister Floral Company had on exhibition a vase of their new rose, Miss Clara Barton, which was awarded a special certificate by the society. This is becoming a favorite among the craft and judging from the orders already booked will be grown extensively around this city.

A box of the new carnation, Young America, from T. J. Totten, Saratoga Springs, N. Y., came a day too late to be exhibited, but the flowers arrived in good shape. The color is similar to Tidal Wave; stems very strong and flowers large and well formed.

In the evening of January 14 the annual meeting of the Cincinnati Florists' Society was held. The election of officers was to have occurred, but owing to the fact that the number of members required for this purpose were not present it was deferred until the meeting in February. After a short business session a social hour was enjoyed and a toothsome buffet lunch was served.

Frank Ball, of the Cincinnati Cut Flower Company, took a flying trip through the northern part of the state last week.

Albert McCullough has been east the past week on a business and pleasure trip.

John Evans, the Quaker City ventilator man, was an interested visitor at the violet show.

I am glad to report that quite a delegation from here will attend the annual carnation meeting at Philadelphia.

Mrs. Harry Sunderbruch was quietly married January 12. Her many friends will learn of this with surprise.

H. SCHWARZ.

St. Paul.

MEETING OF THE MINNESOTA FLORISTS.—MR. HIERSEKORN'S VALUABLE PAPER.—ANDERSON RE-EMBARKS IN STORE KEEPING.

The regular meeting of the Society of Minnesota Florists was held at the West hotel, Minneapolis, on Saturday evening, January 14. There was a large attendance, over thirty members being present. Mr. Hiersekorn, of St Paul, presented a paper on decorating and how to successfully conduct a store, which showed careful preparation and presented some very helpful hints on management. Incidentally he scored the commission men for maintaining high prices at the holidays, thus reducing the retailer's profits. As a preventative he advocated the growing of more decorative stock and less bedding plants by our home growers. Mr. Swanson, of the legislative committee, reported on the progress made and solicited funds from the growers to help the matter along.

Chas. Anderson has started a store at his old stand, 179 Western avenue, in the best residence district.

Dr. Schiffmann has employed an orchid grower from the east to look after his plants. FELIX.

SO. PORTLAND, ME.—John Minot is very dangerously ill.

ROCKLAND, ME.—J. H. Willson has purchased the store of A. W. Cunningham on Park street.

SALINA, KANS.—John Buchi reports Christmas and New Year trade twenty per cent better than before.

GRAND RAPIDS, MICH.—Miss Etta Allen has removed her flower stand from Sweet's hotel to 103 Monroe street.

DES MOINES.—J. T. Temple, of Davenport, grand patriarch of the Patriarch Militant, was in town January 17 and visited a few of the florists in company with President Lambert and Secretary Fulmer of the club.

Not Talk But Work

Printed talk or spoken talk would never have built up the immense **Iron Age** business. It's the work that's behind the machines and the excellent work they do in the field and garden that sells them in increasing numbers every year. Our success is built on work—not talk. See an **Iron Age** machine at work and it will talk for itself. It does the best work in the least time. The latest

Iron Age Implements

are described in the handsome **Iron Age Book** for 1899 which we send free. The **Iron Age Combined Wheel Hoe and Seed Drill** will plow, level, furrow, sow, cover, rake, cultivate, hill and hoe and do all well. A boy can convert it from drill to hoe. Wheels are of steel, 16 inches high, an original feature. The height makes the wheels run easier and they will not yield to depressions in the soil like low wheels. The high wheel is an **Iron Age** idea which has come to stay.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

GILBERT COSTRICH purchased the Charles Little nursery stock and personal property at sheriff's sale.

THE Western Nursery Company, C. W. Murphy, manager, at Lawrence, Kansas, is building up a nice trade.

W. M. PETERS' SONS, Wesley, Md., are selling out a few million strawberry plants, shrubs and trees to clear the land.

PLEASANT HILL, MO.—The weather here is fair and bright; no frost in the ground and we are plowing. G. M. K.

THE new Dempsey pear produced from seed of Bartlett fertilized with Duchesse d' Angonleme, is meeting with much praise. The stock is owned in Toronto.

BAY CITY, MICH.—Boehringer Bros., who have more than 12,000 feet of glass, are testing several hundred sugar beet seeds raised by N. B. Bradley.

The Clematis Disease.

Recent issues of *Moller' Deutsche Gartner Zeitung* contain a very interesting report on the clematis disease. Observation made on varieties of the Florida and lanuginosa types seems to prove that the plague must not be attributed to insects or fungi and that these pests first attack the plants after they have become weak through other causes.

Messrs. Goos & Koenemann, Germany, give their experience as follows: The large fleshy roots of the clematis have the power of absorbing large quantities of moisture. After heavy rains greater amounts of water are sent into the woody parts than they are able to take, thereby bursting the cells in such parts where the pressure becomes too great. Food distribution to the upper parts is sometimes continued for a short period, until the next outburst, when whole runners suddenly die off. If we look to the natural home of C. vitalba and C. viticella it will be found on sloping land or among roots of large trees where ample drainage is provided, and if we give our clematis good drainage and rich soil to produce strong runners that will be able to take care of any overproduction of sap, then there will be no cause for further trouble from this dreaded disease.

Mr. Joh. Nicolai, Caswig, Saxony, gives the following as his observation: My belief in regard to the sudden dying off of plants mostly belonging to the Florida and lanuginosa types is that this disease is caused by injury from frost. Nearly every clematis commences its growing period in early spring, when frosts are of not unusual occurrence. In nearly all instances they are not killed outright, except by very severe frosts, but those affected will show their injury later on. The clematis has stowed away in its fleshy roots great quantities of food for use in the spring that is put into circulation at a very low temperature. Then comes the rapid growth which necessitates a large circulation of sap. The injury that has been caused by frost is first shown when the reserve food is exhausted and new food must be absorbed from the soil through the agency of the roots. At this point, which is usually found in the wood-building period, there is a sudden lack of nourishment, resulting in the dying off of whole branches, often in a day's time. It is also presumed that sap destroyed and transformed by the action of frost acts as a poison. Other causes can be found in unripe and weak wood, open and cold situation and especially in wet and poorly drained ground. Clematis planted in my rose houses or in well sheltered places has never been troubled with disease.

Edwin Urlandt, Austria, has noticed that among a number of clematis troubled with the disease one had been planted close to a grape vine where it often received a wash and also an occasional watering with thick lime water, which seemingly gave the clematis new life and vigor. To the varieties especially subject to the die-back, Lord Mayo, Bilisaire, Fair Rosamond, Henryii and Otto Froebel, the new remedy was applied. The plants soon revived and as a stimulant to the quite weak plants liquid manure was administered and the disease has never shown itself again.

C. A. Meyer, Kiew, Russia, notes that too rich food or too much water is the cause of clematis dying back, especially when, after a period of dry weather, several rainy days follow, thus dissolving a large amount of food, which would be detrimental to the plants.

Prof. Dr. P. Soraner, Berlin, announces, after studying the disease, that insects or fungi are not the direct cause. Plants brought to him have sometimes shown injury from frost but he states that too much nourishment, water, and at certain times heat, are the causes of the clematis disease and recommends well drained land, not too rich soil and partial shade as the proper remedy. He has come to this conclusion after having planted diseased plants under a birch tree, the soil being of a rich loam and having previously been prepared with a liberal amount of sand. The plants thus treated were never again troubled with the disease.

Humboldt park, Chicago, possesses some grand specimens of Clematis Jackmanii that are between eighteen and twenty years old. When I took charge of the park, three years ago, a few of them were badly troubled with the disease, for which I knew no remedy. Changes in the flower garden necessitated their being transplanted and after this they have never been troubled. Now, if the transplanting was the remedy or the change to a dryer situation, I do not know. Two years ago I bought a lot of plants belonging to the class that are troubled with the die-back. These were planted in a northern exposure, and of the whole lot only two plants are left—The Queen. Did the frost kill them? For winter protection we use ashes, applied after the ground is frozen solid, and as cold increases litter or long manure is put over the ashes. A good protection for late frost in spring is straw matting. This can be put over the plants at night and removed during the day.

JAMES JENSEN.

OMAHA, NEB.—A. Donaghue, Sr., the dean of the profession here, has gone to California to spend the winter.

TOLEDO, O.—The park board has let contracts for the new greenhouses. They are not to cost to exceed $12,700.

WHITE PLAINS, N. Y.—Doyle Bros., of Katonah, who have conducted a retail store on Railroad street, have decided to remove to smaller quarters.

CHARLESTON, S. C.—Wulbern & McIntosh combine fire works with their florist business and found a splendid sale for both of their commodities at Christmas.

LENOX, MASS.—On Saturday, January 7, W. A. Manda gave an excellent and instructive address on hybridization which brought together a very large meeting of the Lenox Horticultural Society. A lively discussion followed, many interesting facts being brought out.

New York Challenges Flatbush.

The New York Florists' Bowling Club met on Monday evening and in the enthusiasm born of a good attendance and high line scores, issued a challenge to the Flatbush Florists' Bowling Club to meet them on the New York alleys on the afternoon of Monday, February 13. Lovers of good sport would better be on deck that day.

The Start at Minneapolis.

At the first meeting of the bowlers in Minneapolis the following scores were made and are not bad for the start; they will improve each week:

Name.	1st.	2d.	3d.	4th.	5th.	Ave.
Gust. Malmquist	131	96	123	144	127	124
E. Nagel	143	100	122	144	106	123
Gust. Will	97	112	91	105	104	102
Ed. Swahn		84	112	93	113	101
Otto Will	73	60	141	98		93
J. Hartman	79	101	97			92
R. J. S. Wessling		90	75	103		89
G. Monson	98	76	80	97	90	88
Carlson	70	64	74	122	108	88
Aug. S. Swanson		91	80	68		80

Good Scores at Detroit.

The convention city bowlers may be planning to extend their guests a warm welcome next August and they certainly are preparing to give the bowling contingents a hot time. At the rate of improvement which the players are showing in their practice games they will, by convention time, be able to put an all-star team in the field. Last week's score:

Name.	1st.	2d.	3d.	Av.
Holznagle	158	189	144	164
Ferguson	150	179	119	149
Watson	132	139	157	143

ROCHESTER, MINN.—Arthur Williams has purchased the establishment of Mrs. J. Hyde.

WOONSOCKET, R. I.—William O'Connor, of the O'Connor Brothers, of Providence, was a recent visitor here.

Chicago.

A GOOD WEEK.—WHOLESALERS HUNTING FOR STOCK.—HEAVY CALL FOR FUNERAL FLOWERS.—ROSES VERY SHORT.—CARNATIONS OF GOOD QUALITY AND SELLING WELL.—VIOLETS TOO PLENTIFUL.—HORTICULTURAL SOCIETY'S ANNUAL MEETING. — OFFICERS RE-ELECTED. — RUDD GETS A RING.—DEATH OF E. J. PRINCE.—SOME BIG BUILDING OPERATIONS IN SIGHT. —COMMENT.

This has been a good week in Chicago and night after night the wholesalers have had nothing but ice left in their cold rooms. White stock has been in great demand because of the unusual altitude of the death rate and other flowers have in a measure felt the stimulus of the increase in mortuary work. There has not been stock enough to supply the demand and dozens of cases have occurred which presented the distressing necessity of replying to telegraphic orders that the blooms were not to be obtained in Chicago.

Roses have been particularly scarce. The shortage began to manifest itself immediately after the holidays and has grown more acute each day until the dark days early in this week saw what approached a famine. Of course prices are stiff, particularly on good stock, but as one grower lamented, "whenever a fellow has a chance to make a dollar he hasn't got the stock to do it with."

Carnations have been much more plentiful than roses but none have been left unsold and the whites have been far short. There have been some very fine blooms on the market and 4 cents has been a common price. It is conceded that, although there may be but few more roses this year than last, there is a far greater production of carnations and they have thus far in the season been a very profitable crop.

Violets are the only line that has been overstocked recently and it has only been the best of these which have brought $1 a hundred. Harrisii, callas, tulips, daffodils, Romans, narcissi and lily of the valley have been in ample supply but have not suffered when well grown.

At its annual meeting, January 14, the Chicago Horticultural Society re-elected its former officers: President, W. H. Chadwick; first vice-president, E. G. Uihlein; second vice-president, Harry Selfridge; third vice-president, E. Wienhoeber; secretary, W. C. Egan; W. N. Rudd treasurer and assistant secretary. The directors and executive committee members were also re-elected. The treasurer's report showed expenditures for the year of $6,921.57 and a balance on hand of $1,309.09. The deficit of the fall show was $1,028.01. As an expression of appreciation of his services to the society W. N. Rudd was presented with a diamond ring, E. G. Uihlein making the address, to which the recipient responded, simply: "When I see this beautiful ornament on my finger, it will recall the many years of my pleasant association with this society." The project of securing the Auditorium for next fall's show was discussed and the executive committee was authorized to hold a spring exhibit next year if their judgment so dictated.

A. G. Prince was summoned to South Randolph, Vt., January 13, by the death of his father, E. J. Prince, who, at the age of 77 years, had succumbed to an attack of the grip. Mr. Prince, Sr., had, until a few months ago, made his home with his sons here. A large family of boys survive him. A. G. Prince expects to remain in the east for about three weeks.

Ambrose Martell, a nurseryman from Peoria, Ill., has been a visitor here this week and was given lodgings at the Harrison street police station because of actions which led Manager Cobb, of the Leland hotel, and the police to doubt his sanity. He had $2,232 in his pocket.

The Risch-Wieland Floral Company at South Evanston is preparing to erect nine houses each 25x150 for roses and carnations. The range will be thoroughly modern throughout and will be equipped with Evans' Challenge Ventilator.

Contrary to the experience of the South Park Floral Company at New Castle, Ind., Wietor Brothers find that so splendidly are their carnation houses paying them that they are more profitable than an average rose house.

Archie Spencer, manager for Reinberg Bros., welcomed a baby daughter into his home on Wednesday evening.

The Art Floral Company, H. & R. Hilmers, 3911 Cottage Grove, are showing some azaleas which would serve as a pattern for most growers.

The site of the great Manufactures building of the World's Fair is to be filled in and made into tennis courts this spring.

The Chicago Florists' Club held a well attended business session last evening.

Out at Evanston A. E. Hunt, 2123 Ashland avenue, is erecting two greenhouses at an expense of $1200.

Visitors in town: Geo. A. Kuhl, Pekin, Ill.; W. C. Hill, Streater, Ill.; F. Ostertag, St. Louis, Mo.; John A. Evans, Richmond, Ind.; A. B. Silliman, Ardmore, I. T.; Ernst J. Asmus, West Hoboken; Paul Dailledouze, Flatbush; T. C. Joy, Nashville.

San Francisco.

TRADE IS BRISK AND GOOD ROSES ARE IN GREAT DEMAND. — AMERICAN BEAUTY IS PARTICULARLY SHORT. — VIOLETS INJURED BY DROUGHT AND ARE SCARCE. —CARNATIONS ARE POPULAR.—PERSONAL DOINGS OF INTEREST.

Trade is still good in this city, and likely to continue so. Roses are very short and are bringing very fair prices. Beauties, particularly, are scarce and in much demand. Brides and Bridesmaids continue to sell for about $1 per dozen wholesale, and Kaiserins, Perles and Meteors are about the same, as also is Testout. Violets have never been at such a premium as they are this season. The doubles did not seem to suffer as much from the drought as the singles, but are of very poor quality. They are now selling for $2.50 per dozen bunches and continue scarce. Carnations are another scarce article. They readily brought $4 per 100 during the holidays, but with the exception of Flora Hill are now down to $3 per 100. Portia and Scott are about the only available sorts at present. Some Mayor Pingree and Mrs. Bradt are to be had, but the quantity is very limited.

Harry C. Sim is here in the interest of Henry A. Dreer, of Philadelphia.

Jos. Carbone, manager of the Puget Sound Nursery and Seed Company, is here on a business trip. He reports trade as booming in the northwest, and says prospects are fine for a good season's trade.

A. B. Westland is now head gardener to Prince Piontioski at Burlingame.

A. Thompson is now with M. Lynch at Menlo Park.

Tony Rossi is not only an artistic designer and decorator, but has developed into a well known foot ball player.

Thomas Thompson, of Santa Cruz, was up a few days ago showing us some of his carnations. He is growing the new sorts to perfection. METEOR.

TRADE IS GOOD AND FLOWERS FAIR.—MEETINGS OF THE HORTICULTURAL SOCIETY.—BRIGHT PROSPECTS FOR THE NEW YEAR.—TESTIMONIAL FOR MILLS AND MANTON.—OFFICERS ELECTED.

Although the florists are feeling the usual rebound after the holiday rush, yet trade continues fairly good. We have had more than our usual quantity of dull weather for this season of the year but the flowers are of good quality and plentiful.

The last monthly meeting of the Toronto Horticultural Society for the season was held on January 10, and the meeting was the liveliest and most jovial one of the year. The annual meeting was held the following evening and was fairly well attended. The secretary's report was considered a satisfactory one as it showed a much larger sum received than during 1897, and a larger balance was carried forward for the new year. The president's and directors' report stated that the meetings for the year had been well attended, a number of instructive and interesting essays had been delivered and some very good collections of plants and flowers shown. Although the society started with a much smaller number of subscribers for 1899 than in the previous years of its existence it was considered that the prospects were good for an increased membership later on. Great praise was given, and deservedly so, to Messrs. Mills and Manton for their exertions in connection with the distribution of chrysanthemum plants among the school children, who, for a first attempt, had been very successful in growing them. It was decided (although much against the expressed wishes of both gentlemen) that a sum of money should be set aside to purchase a testimonial for Messrs. Manton and Mills.

The following officers were elected for 1899: President, Henry Lucas; first vice-president, E. E. Tyrrell; second vice president, Thomas McQueen; directors, Dr. Orr, Geo. D. Manton, Arthur G. Chambers, Ernest F. Collins, J. McP. Ross, Geo. H. Mills, Edwin Utley, Hermann Simmers and Geo. R. Copping; auditors, W. H. Hall and T. F. Hire; secretary, Chas. E. Chambers; representatives on industrial exhibition board, Dr. J. Orr and Hermann Simmers. S. P.

Lincoln, Neb.

The Nebraska State Horticultural Society was in session here last week and the florists of the state took a leading part in all that transpired.

F. C. Chapin, of Lincoln, opened the programme of discussions with an excellent paper on floriculture at the Trans-Mississippi Exposition and was followed by Louis Henderson, of Omaha, with an original poem. Flowers, Palms and Ferns was the topic discussed by W. J. Hesser, of Plattsmouth, and J. F. Wilcox, of Council Bluffs, Iowa, who is a Nebraskan to all intents and purposes, read a short but interesting paper entitled Practical Floriculture.

J. H. Hadkinson, G. N. Titus and W. J. Hesser were appointed a committee to revise the recommended lists of hardy shrubs and roses.

SPRINGFIELD, Mass.—Charles R. Miller has severed his connection with the Chapell-Miller Company, which will hereafter be conducted by Mr. Chapell, with Arthur Knox, formerly with Mark Aiken, in charge of the store.

Grafted Roses...

MAKE MONEY BY STARTING RIGHT

Grafted Roses will produce from 25 to 50 per cent more extra and first grade blooms than own root Roses. To accomplish this, however, you have to start right with gilt edged Rose Scions, properly grafted on the best Manetti stock. Before placing your order for Grafted Roses we would invite an inspection of our Roses at Sharon Hill. We use the best selected Manetti Stock from Messrs. Alexander Dickson & Sons, of Belfast—our grafting is done by men of experience and the wood of the different varieties of Roses is selected personally from exceptionally well grown and well ripened Rose Plants. The varieties are **AUGUSTA VICTORIA, BRIDE, BRIDESMAID, SOUV. OU PRESIDENT CARNOT, MRS. PIERPONT MORGAN & MME. HOSTE.** To secure our best stock **order at once,** *as we fill in rotation and March is the last grafting month.*

PRICES—From 2½-inch pots, $10 per 100; $90 per 1000. We guarantee our plants to be as represented, and at these low prices you can more than pay for the plants on the first cut of flowers.

ROBERT SCOTT & SON, - - - Sharon Hill, Del. Co., Pa.

Please Mention American Florist.

Rooted CARNATION Cuttings

We have a fine lot of clean and well rooted Carnation Cuttings to offer; will be thoroughly rooted when sent out.

	Per 100	Per 1000

J. J. LAMPERT, . King St., XENIA, O.

Worcester, Mass.

The first entertainment of the combined Market Gardener's and Florists' Clubs consisted of an interesting lecture on plant diseases by Prof. G. E. Stone of the Agricultural College at Amherst who will be followed during the winter by other specialists.

John H. Hemmingway has been elected superintendent of parks by the park commission and will have charge of developing the unfinished parks, of which Worcester has a great many. Mr. Hemmingway has had charge of the Simpson estate in Saxonville.

Trade has not changed to any appreciable extent, and the supply of blooms is fully up to the demand, but there is no surplus, with prices steady at the usual mark. Weather variable, subject to change without notice. A. H. L.

LOWELL, MASS.—The local Gardeners' Association held a meeting on the evening of January 7 at which were representatives of Dracut, Tewkesbury, Andover and other neighboring towns. A number of interesting subjects were discussed and an outing later in the season was proposed.

... Announcement ...

TO THE TRADE:

Replying to the many inquiries regarding the newspaper reports of the past few days, I would simply state, they are entirely misleading and in some cases ABSOLUTELY FALSE.

There has been no change in my original plans to introduce the stock of the MRS. THOS. W. LAWSON CARNATION to the trade during the spring of 1900, and such is my present intention.

JANUARY 17, 1899. PETER FISHER, Ellis, Mass.

NEW CARNATION

Gov. Griggs

SEEDLING OF VAN LEEUWEN ON DAYBREAK.

Strong, healthy grower, free from disease of all kinds, continuous free bloomer with flowers very erect on a stiff stem, 18 to 20 in.; flowers similar in color to DAYBREAK, but much brighter, edge beautifully fimbriated, good shape and with full center, and does not burst; commands the highest prices in New York for novelties. Having been grown by us for the past 4 years we can with confidence recommend it to the florists of America as one of the best if not the best light pink carnation ever sent out. Orders are now being booked for rooted cuttings to be delivered February 1 1899. Price, $75.00 per 1000; 500 at 1000 rates; $10.00 per 100; $2.00 per dozen. All orders filled strictly in rotation.

Cash with order from unknown correspondents. A personal inspection invited.

FOUR GRAND
CARNATIONS

AMERICA. The largest and most perfect shaped scarlet carnation produced thus far, producing immense quantities of its soft scarlet flowers. Of extra robust growth, free in the production of bloom. A good commercial variety. Preliminary certificate A. C. S. at Chicago.

G. H. CRANE. (Dorner). A long stemmed bright scarlet free, profuse and constant bloomer. It comes into bloom early and yields both quality and quantity. Stem long and stiff from the beginning to end of season. Tested 3 years and proved all right as a commercial variety. Certificate A. C. S.

MELBA. (May and Craig). A grand combination of good qualities, free bloomer, early and continuous. In point of color the finest pink carnation yet introduced; large and perfect in form, very fragrant and with a long stiff stem.

MAUD ADAMS. (Niquet). Deep clear cerise of a very pleasing shade under any light. Most attractive color of its class. A large bold handsome flower with extra long stem, 18 to 24 inches high, with good calyx and exceedingly free flowering.

PRICE for the above 4 varieties $10.00 per 100; $75.00 per 1000.

E. G. HILL & CO., Richmond, Ind.

Address CHAS. CHADWICK,
Lock Box 11, Grand Rapids, Mich.

Helena, Mont.

Mrs. Wells has leased her greenhouses to William Majors, who is an industrious young man and promises to make a success of the venture. It is rumored that Mr. Rustler, of the Sixth avenue greenhouses will go into partnership with Mr. Majors. If this combination is effected it will make a strong "team."

Charles Horn reports business rather better than last year, although net results are not as good as they could or should be.

The property of Mrs. Mattie Miller at the Broadwater greenhouses had a narrow escape from being entirely consumed by fire recently. Fortunately, however, Mr. Miller was on the spot with the hose and soon succeeded in extinguishing the fire.

Mr. Dinsmore, of the Bitter Root Valley, was a visitor at the State Nursery Company's recently. Mr. Dinsmore has a very fine orchard, probably one of the largest in the country, having over 47,000 winter apple trees in a flourishing condition. Several big commission houses in the east have offered to take all the fruit he can produce within the next five years at a price much above the average.

The State Nursery Company finds business a little ahead of previous years. They think they are justified in putting up the two buildings they now have underway, one rose house 17x130 and one smilax house 16x50. A. J.

New Bedford, Mass.

At the annual meeting of the New Bedford Gardeners' and Florists' Club, January 9, the following officers were elected for the ensuing year:

President, A. J. Fish; vice-president, Thomas White; secretary, Peter Murray; treasurer, T. H. Dahl; assistant secretary, S. S. Peckham; executive committee, James Garthley, William Keith, August Jahn.

The club voted not to hold its annual fall chrysanthemum and floral exhibition, owing to the light patronage and lack of financial support from the public.

GROW YOUR OWN CINNAMON VINES

At a Big Profit.

Why not plant liberally of this beautiful vine, one of the most popular and best sellers among climbers. It is a strong, hardy grower; thrives everywhere. Its many clusters of delicate white flowers send out an amount of fragrance that is as truly wonderful as it is indescribable. Your customers will want it. Be prepared.

Read These Testimonials.

L. and M. J. Clarkson, authors of "Art Studies," write: "No vine ever gave us so much continued pleasure. The growth is truly phenomenal. Its handsome foliage and fragrant blossoms commend it to every lover of flowers. If its merits were more widely known you would be overwhelmed with orders."

From Bessie L. Putnam in "Epitomist": "The Cinnamon Vine rivalled in growth the famous bean stalk and when in bloom, as ours was for weeks last season, one might almost believe that the spice laden odors of its native Philippines were transported with it, so aromatic is its fragrance.

Price of Choice Bulbs, Extra Large Selected 500 for $3, 1000 for $5, 3000 or more, $4 per M. Cash with order. Colored Plates free with Bulbs.

A. T. COOK, SEEDSMAN, Hyde Park, N. Y.

New Sensational Geranium

"KENTUCKY BELLE."

This grand new variety is the finest of many seedlings we have introduced for many years, being on the style of Souv. de Mirande, which has been one of the best sellers in many years. The color is intensely brilliant and entirely different from any Geranium in existence. A free bloomer, stands the sun well, of a dwarf habit; should be in every collection.

Strong plants, 2½-in. pots, $3.50 per dozen, $25.00 per 100. Address

STOCK AND THE MARKET.—ROSES SCARCE.—MANY VIOLETS ON A CASKET.—THE CLUB IS PROSPERING.—JOTTINGS OF INTEREST.

Cloudy weather is keeping stock back but there are both carnations and violets enough to supply the demand. Roses are rather scarce. We are consuming a great quantity of violets, one dealer using 17,000 on a single casket last week.

The Florists' Club is prospering, four new members being admitted at the last meeting. G. A. Rackham reported that many applications for space in the exhibition hall are being received and the indications are that our convention will see the best trade display on record.

Among recent visitors were Arnold Ringier, of W. W. Barnard & Co., Chicago, and E. H. Giesy, of the Lockland Lumber Company. R. F.

Columbus, O.

Trade has kept up well ever since Christmas. There was none of the usual dullness before the holidays and every one is satisfied with the business thus far in the new year. There are numerous weddings and social events but it is funerals which are using up the stock. At the present flowers are a little more plentiful but they were very scarce a week ago and we had to send out of town for a large portion of our wares. Qualities are pretty fair. F. D.

GREEN BAY, WIS.—Raymaker & Sons are meeting with great success in growing onions, lettuce and radishes in a house 20x100 and heated by coal stoves.

The Model Extension Carnation Support.

Read what some of our best growers have to say concerning it: QUEENS, N. Y., Feb. 16, '97.

MR. THERON PARKER, Brooklyn, N. Y.,

Dear Sir:—I have tested your latest model Carnation Support and am free to say that I consider it the best wire carnation support that I have ever seen. It is quickly and easily applied, and I think will prove very durable, and you certainly deserve great credit for the invention. Very truly yours, C. W. WARD.

A good adv. in a good paper will bring good returns.

Los Angeles.

FLORISTS ENJOY A PROSPEROUS EARLY WINTER.—CHRYSANTHEMUMS AND CARNATIONS FINE FOR THE HOLIDAYS.—A SUCCESSFUL BUG HUNTER.—JOTTINGS OF PERSONAL DOINGS.

The florists and plantsmen in this vicinity are very much happier this holiday season than they were over that one year ago. There was no rain or even fog to injure chrysanthemums and the demand was good. Carnations are very fine where irrigating was properly attended to and the principal growers report no surplus so far at any time and no one had enough to fill orders for the Christmas trade.

George Compere, the entomologist who was sent to the Hawaiian Islands to search for parasites that would destroy the various scales and other plant lice, has already succeeded in obtaining some valuable species which have done wonderful work in the ridding plantations on the islands of these injurious insects. He has been successful in breeding these parasites and is now forwarding colonies of "lady bugs" by every steamer leaving Honolulu, which are being liberated in the orchards in Los Angeles county. This is the most valuable work so far accomplished by our horticultural commissioners.

There is scarcely a meeting of horticultural people anywhere in central or southern California to which Mrs. Theodosia Shepherd, of Ventura, is not invited to deliver an address. Next week she appears before the wealthy and cultured citizens of Redlands.

Alvin R. Meserve, one of the veteran nurserymen of this county, has been elected horticultural commissioner.

Jacob Dietrich is preparing plans for a large show-house for palms and other ornamentals.

Fred. Rafferty, of Santa Anna, is sending in the finest Swanley White and Farquhar violets ever seen in this city.

Alfred Roedder, of Shorb Station, reports the best holiday trade for five years.

Ernest A. Asmus, who spent some weeks here, has returned east.

The recent dry years have caused much search for additional water. The latest estimate of water development for 1898 is 20,000 miner's inches, a quantity sufficient to irrigate 80,000 acres of land.

D. R. W.

Providence, R. I.

At a regular meeting of the Florists' and Gardeners' Club of Rhode Island held January 12 the following officers were installed for the year: President, W. E. Chappell; vice-president, James Hockey; secretary, Alex. M. Rennie; treasurer, F. Macrae; librarian, J. Macrae; executive committee, Walter S. Nichol, William Hill, R. W. Greene; essays and discussions, James B. Canning, Charles Forbes, James Hockey; on investigation, Wm. B. Hazard, William Appleton, Jr., I. Z. Dodge; on entertainment, N. D. Pierce, Jr., Alex. M. Rennie, T. J. Johnston; awards on exhibits of new varieties of merit, M. Sweeney, J. Macrae, J. F. Schellinger.

Notes and Comments.

The question of storing flowers is most interesting, not alone to the retail florist and commission man but to the grower. There have been great changes in the methods employed during the last twenty-five years in caring for flowers and especially does this apply among retailers in the cities. A cellar, a vault or a cave was employed some years ago among the fraternity in general, and is the one mostly in use by the grower to-day, and with few exceptions, so far as can be learned, with satisfactory results.

If some grower would only discover a method whereby he could hold flowers until the retailer needed them, to be delivered in large or small quantities as his trade demanded, he would be "right in it," so to speak; but the operative process must secure the same freshness to the flower as though just cut from the plant. No briney appearance would go. These thoughts are engendered because some retailers sometimes become very impatient if the grower does not deliver all the flowers ordered for Christmas and other festive occasions, and if the color is not quite up to the desired shade a vigorous kick is inevitable.

There seems to be more trouble with cellars or vaults in cities than is the case in the country. This would seem to be because sewer gas, which prevails altogether in cities and is not known in the country, is at the root of the trouble. So far as I am aware carbonic acid gas, which is mentioned as deleterious by "Pro Bono Publico" in a recent number, should be quite as plentiful in the country as it is in cities. Sewer gas may be a specified kind, but the probabilities are it is a combination of a number of deleterious gases which escape into the sewer and permeate the whole subsoil and eventually find their way into many cellars in the built up portions of the cities.

I have in mind one of the leading firms of Philadelphia who experimented considerably, in years gone by, in trying to get rid of deleterious gases from their flower vault, which is located under the sidewalk, but now is abandoned altogether, I believe, a fine ice chest in the store being used for keeping their flowers. Pennock Brothers is the firm to which I refer and if they would they could, I know, give some information along these lines that would be a benefit to commission merchants, retailers, and growers alike.

Reference books tell us that "plants absorb carbonic acid gas by the leaves and therefrom obtain the carbon necessary for the formation of wood; they remove it as fast as it is produced and thereby keep the atmosphere in a state suitable for animal life.

"There is also a popular prejudice against plants in a bedroom during the night time. This is based on the fact that plants give off carbonic acid gas in the dark while they absorb it during the day. Plants also liberate carbonic acid gas during the flowering season, but the total amount from these two sources is so very small that a single gas burner will vitiate the air of a room more rapidly than a large collection of plants."

THE NEW ROSE LIBERTY.

The new rose Liberty is creating a good deal of talk these days. I have seen it growing at the establishments of both Ernst Asmus, West Hoboken, N. J., and Robert Scott & Son, Sharon Hill, Pa., who, it is understood, own the stock jointly. Generally speaking, it creates a favorable impression; a bright, rich color, fine shape, and exquisite fragrance are among its strong points. Its free blooming qualities, however, have not yet been determined to the satisfaction of all the growers. When seen a few days ago at Sharon Hill it did not show up to the best advantage in that respect, owing to the fact that much of the wood had been taken for propagation. At West Hoboken in the latter part of November it presented a much better appearance, being full of buds, every shoot apparently, having a bud thereon, which speaks well for it in that respect.

A new rose likely to prove valuable nearly always is at a disadvantage for the first few years of its existence, on account of the natural desire of the proprietor or proprietors thereof to get up a large stock. Enough plants for next year it is to be hoped will be propagated so that a line on its freedom may be obtained, for a bright colored, sweet scented crimson rose is always in demand, and if the growers are reasonably sure of adequate compensation for the outlay made they will not be slow to invest liberally in this new comer. Mr. Cartledge, of Pennock Bros., declares that it is a rose with excellent keeping qualities, which is another good point in its favor.

BEGONIAS.

Since the advent of the new Begonia Gloire de Lorraine as a winter bloomer, begonias in general are becoming more popular. The semperflorens type, of which Vernon is an excellent example, are yearly becoming more popular as bedding plants. There are varieties with yellow leaves now to be had, but they are not very

well fixed as yet, not coming true to the description from the seed, and this would be serious where any set designs for summer decorations are attempted. The description has it that the color of the flowers are red or similar to those produced by Vernon, but out of one hundred plants or so secured from seed sown not one came true to that description; one-third, possibly, came with white flowers, the remaining two-thirds being white edged with pink similar in markings to Sutton's Duchess of Edinburgh. Nevertheless all are pretty and both, after careful selection to type and coloring, especially the variety with white flowers, ought to be excellent for edging. The nomenclature committee of the S. A. F. will have lots to do in the next few years in straightening out the names of the several varieties.

I have in mind the old B. incarnata from Mexico. I have a plant here which a tourist brought from our neighbors across the border and it is the same which I knew under that name a very long time ago, but there have been some improvements raised from the original and disseminated under various names, as robusta, gigantea, et al.; another which was raised by Charles Sander, Brookline, Mass., which his friends desire to call Charles Sander, but which he calls simply Incarnata Improved, declining the honor of having it named after himself. Some of these improved varieties are still labeled in some establishments as plain B. incarnata. This is confusing, and if the S. A. F. nomenclature committee decides to try to straighten out the begonia names, John Coulson could and would, no doubt, render valuable assistance along these lines, as he has made a study of begonias for a number of years, consequently his knowledge is of a high order. There are too many synonyms to some varieties; all but one, when the correct one is decided upon authoritatively, should be dropped.

BEGONIA INCARNATA—IMPROVED. REPRODUCED FROM NO 457.

Efforts are sure to be made with more or less well directed purpose to improve upon Gloire de Lorraine, but how well success will crown these efforts is problematical. Victor Lemoine, France, was the fortunate raiser of Gloire de Lorraine, and although the parents are believed to be known, it is doubtful if the results obtained by that successful hybridist would be duplicated. Mr. Orpet in a recent number of the AMERICAN FLORIST, records two distinct varieties as being grown as Gloire de Lorraine. Is one a sport or may the two have originated at the same time, coming from the same seed pod? B. Socotrana and B. Dregii are said to be the parents of Gloire de Lorraine. Dregii I do not know, but Weltoniensis was well known twenty-five years ago, and it is said to claim Dregii as one of its parents. The color of the flowers of the pink Weltoniensis are similar to those of Gloire de Lorraine and Socotrana, but in habit the plants are very dissimilar. It is stated that some years ago both the pink and white varieties of Weltoniensis were used quite largely in Vienna as bedding plants. In this climate they do not flower sufficiently free to be used for that purpose, blooming not until the fall and early winter months and showing the effects of environment in changing the character of some plants.

To again refer to B. Socotrana, seed seems to set freely on that species, but it germinates somewhat erratically. For instance, from four capsules of seed sown in March last year only one plant was the result, whereas, seed from one pod ripening about same time and not sown until August germinated quite satisfactorily. The length of time from fertilizing the flowers until the ripening of the seed varied from forty-eight to fifty-one days. In my own experience, recently, the capsules have apparently ripened in less than thirty days. There are evidences, however, of premature ripening with me. The seed harvested looks plump and good, but whether it will germinate or not will not be known until the summer months, as I intend to hold it until that time. Socotrana goes to rest soon after this time and remains dormant until July, when it will show signs of life, and should be encouraged to grow. I think we may look forward in the near future to several hybrids being raised with Socotrana as one of the parents, and it is to be hoped that something valuable will be the result.

And now we are to have double flowering varieties of the semperflorens (Vernon) types, to be introduced this year for the coming summer's bedding, also some dwarf compact varieties of the same types, all of which ought to prove useful. The double flowering forms may with confidence be expected to be good for the conservatory and home decoration, in addition to their value for summer.

E. L.

Begonia Gloire de Lorraine Nana Compacta.

This dwarf flowering form of this popular begonia appeared among a lot of plants imported by R. & J. Farquhar & Co. last season, and has been propagated by them. As shown in the illustration the habit is very compact and the abundant blooms almost completely hide the foliage. As a table plant there can be

BEGONIA SOCOTRANA AND B. INCARNATA. REPRODUCED FROM NO. 501.

nothing more elegant. The plant illustrated was exhibited before the Massachussets Horticultural Society on January 14, and received a first class certificate of merit.

ROSES.

LIGHT GREEN FOLIAGE.

ED. AM. FLORIST:—Some rose grower will oblige by advising with regard to my plants. The soil is a sandy loam to which one quarter of cow manure was added when the plants were set. The growth was fair until the darker days set in, but since then many of the plants have been clothed with foliage of a very light green color. About half the plants on one bench are in this condition, while the others have good foliage. Soil, watering and mulching the same in both cases. E. V. C.

Everything indicates, so far as the description goes, that the plants are badly affected with club root. Of course I cannot say for certain that such is the case without an opportunity to examine the roots, but if he will take up one of his badly affected plants and wash the soil off very carefully, I think "E. V. C." will find many small knots on the roots. It is so easily detected that there can be no doubt about it if he examines them closely. The knots will run all the way from the size of an ordinary pin head to three or four times that size, and if carefully dissected and examined under a microscope worms will be found to be very abundant in them. I cannot see any other reason for his plants behaving as he says they are doing. JOHN N. MAY.

BRIDE, BRIDESMAID AND PERLE.

ED. AM. FLORIST:—I am growing Bride, Bridesmaid and Perle on benches six inches deep and six feet wide in a house by themselves, but they are not doing well. The soil is clay composted with rotted manure. The roses were planted July 20 and produced an abundance of good blooms and foliage in September and October, but very weak stems. Liquid fertilizer, prepared from horse and cow manure, was applied fairly strong October 22 and November 15. The plants are not growing as they should and produce only a small amount of bloom with weak stems, and they are also dropping their foliage. I have watered and sprayed as freely as cloudy weather would permit. Night temperature 50° to 56°. Please advise as to the course to pursue in order to get the best results from these plants. H. J. S.

From the description I should imagine that "H. J. S." is overfeeding his roses. If they were planted in six inches of soil on July 20 they certainly cannot have occupied all that soil in time to have been fed with liquid manure by October 22 or November 15 as stated above. From the character of the compost employed, they certainly have an abundance of food, providing they get sufficient water, to have lasted them up to the middle or end of January before any additional stimulant should be given to them. I think it would be advisable for "H. J. S." to withhold stimulant in every form and simply water his plants carefully when they need it, giving an abundance of air during all favorable opportunities. The aim should be to get the plants to produce, strong, sturdy growth; when once they do this they will then produce better stems. Of course there may be other reasons why the flowers do not have good stems; nematodes working at the roots may have something to do with it, but of this I cannot say without examining the plants. With a night temperature ranging between 50° and 56° there is no reason why the plants should not make vigorous growth and good stems, providing their attendance is in accordance. JOHN N. MAY.

ROSE MRS. MORGAN SHORT STEMMED.

ED. AM. FLORIST:—I have been growing the Morgan rose several years and can not get it with stems long enough to suit me. Mr. John N. May has had fine samples on exhibition from time to time. How does he do it? Is the Morgan better if carried over two or three years, or does it need a very heavy clay soil? Does it make longer stems if grown warmer, say 60° at night? J. V. C.

My experience with this variety is that it requires a little more water than almost any other rose grown for winter forcing. It would not improve his stock to plant them in a heavy clay soil; in fact, the best soil for them is a medium class of loam with plenty of manure mixed through it and a night temperature of about 55° or 56°; then they can get the full size of the flower with a good many of them producing stems from fifteen to twenty inches long. Of course there are always some short-stemmed flowers on a variety that produces as freely as this one does. It can be carried over a second year just as any other forcing rose, but requires careful handling

BEGONIA GLOIRE DE LORRAINE NANA COMPACTA.

in the summer to prevent the stems shriveling, otherwise the plants would suffer badly and probably a good many of them would die, as it is a variety produces soft, pithy wood and would not stand the kind of drying off that producing harder wood. Otherwise it can be grown just as well the second year as the first. JOHN N. MAY.

WITH THE GROWERS.

DAILLEDOUZE BROS., FLATBUSH, N. Y.

Possibly there may be somewhere else such carnation excellence as is to be found at the establishment of Dailledouze Brothers at Flatbush in the outskirts of Brooklyn, but if so it has not been my pleasure elsewhere to see stock in such perfect condition. Such health, such strength, such perfection of culture shows the master hand, and the result of years of experience is reflected on every side in the wonderful standard to which everything has been brought. It will pay any man who is interested commercially in carnation culture to visit this perfect home of the divine flower and see its possibilities.

If the American Carnation Society was to have met there on the day of my visit nothing could have been done to make the place more inviting. There was not a speck of rubbish or dead leaves anywhere in sight. Even the ash walks had been freshly raked and felt as soft as carpet to the feet. This condition of affairs, I am told, though not by the proprietors, is usual. Such neatness would put to blush many a city retail establishment. There are twenty-seven houses in all. Their last range of five structures 200 feet in length have side lights thirty inches in height with no sill at the eaves, the glass of the roof simply overlapping the sides. This makes the interior practically as light as outside and insures the best possible results. The ventilators are alike on both sides of the houses, with screw lifts every fifty feet. The heating is by means of hot water under pressure, and the system is considered much superior to steam. Various supports are used for the plants, the plain way of stretching wires the length of the beds with strings across between the rows being considered as good as any and much less expensive, although the plants are not quite as easy of access.

The variety most noticeable was Mrs. Bradt, with its tremendous 4-inch flowers and good quantities of bloom. Next most striking was White Cloud, Mr. Dorner's new white, which, with its enormous quantity of bloom, was, indeed, a veritable snow cloud. Plants standing side by side bore from three to five open flowers each. It certainly looks a winner. Mrs. Joost also looked well and was blooming away like Scott, with a larger flower and almost the same color. Victor was also fine and has done splendidly all fall. Scott was probably the most extensively grown and was in great perfection as was also Daybreak and Flora Hill, the latter having done splendidly all the season, though at this time a little off crop. Hector is grown in quantity for red, Eldorado for yellow and Mayor Pingree for fancy.

There were a number of new kinds—in fact all the promising ones were on trial—and, while a few looked as if cuttings were being taken, the majority were failures. Several seedlings of their own were noticed, one a fine large deep pink, and a white sport of Mrs. Bradt, which, if it continues to hold the color, should prove valuable.

At the time of my visit, the week before Christmas, every house seemed right for a full holiday crop of flowers that would grade very high. Their cold room for keeping stock over night is above ground and is built at the rear of the wagon shed so that boxes are loaded without any risk. The room is kept at about 45° by admitting air from outside, no ice being used.

The houses are kept under culture the entire year with only a few days rest during the summer, when the old plants are renewed and the soil changed. Painting of the sides up to the first pane of glass above the eaves is done each year at this time and the entire houses are similarly treated every two years. The benches are whitewashed as soon as cleared of soil and everything done to the other parts of the house, under tables and elsewhere, to sweeten it and render it as clean as possible. ROBERT KIFT.

JAMES HARTSHORNE.

A Successful Grower.

It is doubtful if any man, and certainly none of his age, has done more for the carnation than has James Hartshorne, to whom must be credited the superior quality of the product of the Chicago Carnation Company.

Mr. Hartshorne was born in Shropshire, England, thirty years ago. He came to America in 1888, locating at Boston, but going shortly to Exeter, N. H., to become gardener to the late Charles Burley. In 1892 Mr. Hartshorne came to Chicago with a view of participating in the floricultural work at the World's Fair but he was tendered an excellent offer by John C. Ure at Argyle Park, where his success with carnations did much to enhance the already excellent reputation of that establishment. Two years ago Mr. Hartshorne became head gardener to H. N. Higinbotham, who has a fine residence on Michigan avenue in Chicago and an estate of 1500 acres just outside of Joliet. It was Mr. Hartshorne's recognized proficiency as a carnation grower which lead to the organization of the Chicago Carnation Company and the construction of its model range of houses upon the Higinbotham property.

Mr. Hartshorne is a member of the Society of American Florists, the American Carnation Society, the Chicago Horticultural Society and the Chicago Florists' Club and takes an active interest in the work of each.

Plants Versus Holiday Cut Flowers.

There are, no doubt, many readers of the AMERICAN FLORIST who, like myself, have been accustomed to regard Mr. Herr as a floricultural oracle, and who were greatly surprised at his views expressed in the issue of this journal for January 7.

The storemen have to buy and sell cut flowers more or less every day in the year and, while they try at all times to obtain a fair price for their goods, they cannot afford, at Christmas, Easter or any other time, to make their prices so high as to divert custom to other florists or, as often happens, to altogether other channels. It is a well known fact that a very large proportion of the plants and flowers sold at Christmas are purchased as presents and it is often easy to dissuade the buyer and cause him to decide upon some article purely utilitarian.

Very few retailers of experience would attempt to push the sale of cut flowers at Christmas for the reason that they have already been pushed to the limit and at this season there is not enough difference between the wholesale and retail prices to leave a fair margin of profit. On the other hand a retailer can procure a holiday assortment of palms, ferns and flowering plants at prices but little above the usual figure for such stock and can, by reason of quick sales, afford to dispose of them at about the every day figures, thus giving the customer full value for his money and insuring satisfaction.

Whether or not the retailers have put plants to the front, there has for the past two years been a rapidly increasing call at Christmas for well grown specimens. The tide is running that way and the retailer who wishes to keep up with the procession must not attempt to stem the stream, but ride upon its crest. Roman hyacinths and Paper White narcissi sold well in pots and pans at Christmas and brought good prices, while as cut flowers there was scarcely any sale for them.

Mr. Herr tells us of carnations bought for $1 a hundred and sold at that rate per dozen. There is quite a large number of storekeepers who would like to locate where that can be done and if Mr. Herr will point out the spot I will warrant that some more liberal fellows will embark in business there and pay him the share of the proceeds which he thinks is rightfully his due I have often seen carnations which cost $1 a hundred retailed at 15 cents per dozen, but for 75 cents or $1 never. J. T. ANTHONY.

Helpful Reminders.

As many florists have not had experience with acacias a few hints as to their value will be acceptable. The color of flower is a most desirable yellow, and it is a plant that will grow to perfection in a house of moderate temperature and bear bloom in abundance that you can cut during a period of four weeks. In a large house A. pubescens can easily be grown with branches ten feet long for decorations or in smaller houses A. Riceana can be grown. The more shrubby varieties are best for pot plants. They want plenty of water, rich but porous soil, and a temperature from 40° to 50° from now until spring.

PRIMULA FORBESI.

One of the most satisfactory plants for Christmas, either for cutting or pot plants, is the old fashioned Begonia incarnata, with its large clusters of pink flowers. This is the time to propagate for next December.

A very attractive blooming plant just now is Euphorbia Jacquiniæflora with its long slender shoots with bright orange scarlet flowers along the upper side and delicate foliage interspersed. It is practicable to put in cuttings now which will root and yield a top cutting by June. This will give you one single shoot and one branching plant.

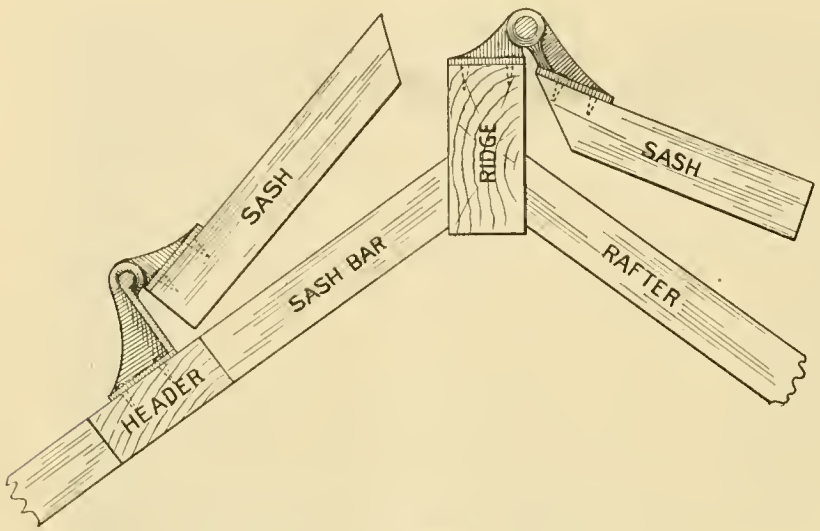
This season's experience with Cypripedium insigne has again proven it to be one of the most profitable plants for a florist to grow. Shifting or separating is best done now before spring growth begins. Ordinary 6-inch pots are considered most desirable and those that are well filled now separate into two or three parts; fill the pots half full of broken crocks with a little sphagnum moss on top; then add a good garden loam with peat and some decomposed horse manure. Be careful to get the soil well in between the roots and keep the foliage well above the soil; cover the pots with sphagnum to prevent rapid evaporation.

The young growth of leaves which is now starting beside the flower buds of azaleas should be pulled off as they rob the Easter bloom of substance and depreciate the value as a blooming plant. After flowering this growth should be encouraged. C. B. W.

SOUTH HANOVER, MASS.—Geo. F. Sylvester has been appointed postmaster.

Primula Forbesi.

The American name for this is baby primrose, which describes it exactly, as it is a minature primula not unlike P. obconica, belonging apparently to the same group. It is a much more free bloomer, however, and the smallest plants commence to send up flowers as soon as they are large enough for a 2-inch pot. When fit for a 4 or 5-inch pot they carry from one to two dozen flower spikes with one or two tiers containing from twelve to twenty florets each. The color is pale lavender to lilac. The foliage is delicate and graceful, somewhat fern-like in appearance and the flower spikes grow quite straight from six to twelve inches above the pot and well above the foliage. The plant, which, by the way, had lost most of its foliage from frost the day the photograph was taken, as the illustration shows, makes a very pretty table ornament and wherever offered for sale has immediately entered into favor with the public. As a cut flower it also finds a ready sale and arranges well with cattleyas, the pale lavender of the orchid being almost the exact color of the primrose. K.



Bouvardia Humboldtii Grandiflora.

This novelty was introduced two years ago, but did not receive a dissemination in proportion to its worth. The flowers are twice as large as those of the original form; in fact almost as large as those of Stephanotis floribunda. The flower tube is especially stout, by which the breaking down, so common with B. Humboldtii corymbiflora, is reduced. The foliage, also, is of double the size of that of B. Humboldtii corymbiflora, leathery, and resembles lilac leaves. The habit is uncommonly vigorous. The plants produce their numerous, strongly scented flowers from the beginning of October to the end of December and that fact admits this new plant to the ranks of the most valuable of recent introductions. It was awarded a certificate of merit by the Royal Horticultural Society of London in 1897.—*Die Gartenwelt.*

Calanthes at Whitinsville, Mass.

Last week there was a very fine display of calanthes at the establishment of Mr. Edward Whitins, and much credit is due his gardener, Peter B. Robb, for the excellent way in which he grows them. Mr. Robb generally grows about sixty pots of C. Veitchii and a few each of C. vestita lutea and C. vestita rubro-oculata. When they come into flower the pots are stood among a lot of ferns, principally adiantums, and they make a fine sight, their beautiful long, curved spikes showing well above the dark green ferns. This year the spikes are not just as large as formerly, but they are a very even lot, and at the time of my visit carried mainly from thirty-five to forty flowers each.

I think these deciduous calanthes do not yet receive the attention they deserve, as there are few, if any, plants more suitable for decorative work during the Christmas and New Year holidays, and they make a welcome change. The gardener who has to supply a large quantity of flowers at this season would do well to have a few pots of these plants.

THE NEW STANDARD VENTILATOR HINGE.

By attending to one or two cardinal points of cultivation, there is nothing to prevent any one from growing them satisfactorily. Full cultural details have appeared frequently in these columns.

THOMAS HOWDEN.

The New Standard Ventilator Hinge.

E. Hippard, Youngstown, Ohio, has perfected a ventilator hinge which he is offering to the trade with assurances that it will give the best of results and last a lifetime. The hinge can be adjusted to any greenhouse without the aid of a mechanic. They are of malleable iron or brass and are made "right and left" and by removing one part of the hinge on the sash the sash can be removed. The hinge is so constructed that in opening and closing the ventilators it cuts the ice instead of crushing it, thereby preventing the drawing of the screws or breaking the hinge.

New York.

SPIRITED DEMAND FOR ROSES.—SUPPLY SHORT.—CARNATIONS ALSO SELLING WELL.—ADIANTUMS SCARCE.—ORCHIDS ABUNDANT.—FORCED SHRUBS COMING IN.—ANNUAL FLORISTS' CLUB DINNER.—SUPT. HENSHAW GOES TO PORTO RICO.—OTHER TOURISTS AND VISITORS.

The feature of the market for the past few days has been the light supply of roses. On certain varieties at special times it has amounted to almost a famine, yet even under such conditions inferior stock has been disposed of with difficulty. Choice material has realized good figures and the prospects are favorable for a continuance of the same. The weather has been exceptionally fine. The warm sunlight has made it possible to dispense with artificial heat during a good part of each day, has dried and warmed up the cold soil in the benches and started the roses into healthy growth and the crop of buds in sight promises an abundance of fine blooms in the near future but it is not likely that there will be any more of the right quality than the market can easily take care of for the next four weeks at least. The Greeks have been obliged to turn their attention to violets and lily of the valley almost exclusively and are promptly ordered away from the rose boxes before they can get their paws into them. Carnations, if good, also find a ready market and if of extra fancy grade sell at sight for prices that sound thriving. Orchids are in sufficient supply for all demands and at times accumulate somewhat, with values tending downwards. Adiantums are decidedly scarce. The quality averages inferior but everything goes without trouble. A bunch of orange and brown wall flowers is one florist's window attraction and among the especially pleasing things seen frequently during the past week have been branches of forced spiræas, forsythias, quinces, etc.

The dinner committee of the New York Florists' Club announces that the twelfth annual dinner will take place at Morello's, 4 W. Twenty-ninth street, on Thursday, February 9, at 7 p. m. Special attention is called to the price of tickets which, contrary to the custom in the past, has been fixed at three dollars and it is hoped that this will ensure a large attendance of members. All donations of flowers should be sent early in the day to the committee, in care of Secretary John Young, 51 West Twenty-eighth street.

B. Suzuki who has been away on a visit to Japan since last July is expected back this week, via San Francisco. He is accompanied by Takagi Shintaro, of Tokio, one of the founders of the Yokohama Nurseries who now visits America for the first time.

Samuel Henshaw, superintendent of the New York Botanical Gardens will start for Porto Rico about February 1, to inspect the flora of that island. He will be absent two months.

H. A. Siebrecht, Jr., has just returned from a two weeks trip to the far west.

Julius Roehrs, Jr., who has been for some time finishing his floricultural education in F. Sander's nurseries and elsewhere in Europe is expected home next month.

Ernst Asmus and Paul Dailledouze have been making a business trip west.

Visitors in town: B. F. Dorrance, Dorranceton, Pa.; Peter Crowe, Utica, N. Y.; H. Weber, Oakland, Md.

DANVILLE, ILL.—Frank B. Smith is making arrangements to enlarge and improve his greenhouses. They will be moved back from their present location and the ground now occupied will be laid off in town lots. A large packing house will be erected.

Philadelphia.

TRADE IS BRISK AND STOCK IS SCARCE.—FINE ROSES BRING HIGH PRICES.—CARNATIONS SELLING WELL.—PROSPECT FOR MUCH BUILDING.—INTERESTING JOTTINGS FROM DREER'S NURSERY AT RIVERTON.

Business is keeping up very well and most of the stores the past week appeared to have that hustle and bustle that is so enjoyable to all concerned, except, perhaps, to the fellow who has to stay and help when it should be his night off. Flowers are scarce; that is, good ones are. Fine Brides and Bridesmaids are bringing $12, and there are not near enough of them. Beauties are in demand, particularly the middle size, which bring from $3 to $4 per dozen. There are a few Brunners about at from $3 to $5 per dozen, but the flowers are not first class.

Carnations are selling very well, the prices being well maintained and ranging from $1.50 for Scott to $4 for Victor and other fancy sorts. Violets are much more plentiful and Princess of Wales are now very fine. Bulbous stock is getting abundant. J. W. Young's Von Sions are now coming in good shape and readily command $6.

Some growers seem to persistently smoke their houses in the late afternoon and pick flowers for shipment the next morning, a good plan if they want to be disappointed in their returns, for such stock should always find its way to the waste barrel.

Robert Craig's new house is filled with lilies, which are looking fine. Scarcely any are grown except longiflorums and there is no disease apparent as yet. The Chadbourne automatic ventilator power with a weather vane attachment to open or close the windows according to the direction of the wind, works splendidly and is, Mr. Craig thinks, a great acquisition.

We hear the remark frequently among growers that they are sadly in want of room and would not be surprised if some important additions were made to some of the larger places the coming summer. A large range will soon be added, or rather take the place of a lot of smaller houses, at the Dreer nursery in Riverton. There is an immense quantity of ferns coming on here, several houses being filled with seed pans. These are given sterilized water. Many rapid growing varieties come up in pans where entirely different kinds were sown and these are pulled out as soon as large enough, until finally the right variety makes its appearance. If this plan was not pursued the stronger sorts would have crowded out the others and they would not have grown at all. A new adiantum, Charlotæ by name, promises to be a good thing. It is what might be called a divided cuneatum, having the same size and form of frond, with one or two more divisions in the leaves. It is very pretty and graceful.

Mr. Eisele says that most of the so-called A. cuneatum grown for cutting is not cuneatum, but Raunbecki, which appears to be a stronger grower. Pteris nobilis variegata is a promising new variety, resembling a strong P. Mayi. Mr. Eisele finds no remedy so good for insects on palms as prevention and gives plenty of room and frequent syringing. Still hand washing has to be resorted to with sulpho-tobacco and other mixtures. An interesting note about kentias was that they seldom if ever attain more than seven or eight leaves; each new leaf may be larger than its predecessor, but the number to the plant does not increase. Dracæna Godseffiana is thought to be a coming useful plant as it propagates

easily and will soon be found in quantity. Livistonia rotundifolia has sold very well the past season and will be grown largely in the future. Adiantum Farleyense, a house full, looked to be growing as well as any other kind and is found to do much better in a good loam with the addition of well rotted cow manure and entirely without peat, which at one time was considered very essential. K.

Boston.

LIVELY DEMAND AND GOOD PRICES FOR ROSES.—FINAL ACT IN THE LAWSON CARNATION COMEDY.—THE "LAWTON" ALSO PLAYING TO CROWDED HOUSES.—FUNNY NEWSPAPER YARNS.—DEATH OF W. J. GALVIN.

Business is good. Not for several years has the market price of roses been maintained with such steadiness for a period of equal length as during the past month. In fact prices are very near the Christmas mark to-day and there are no signs of any immediate abatement. Brides lead the list, as was the case last week, and the heavy call for flowers for funeral use continues. Were it not for the bulbous flowers such as freesias, hyacinths, Paper White narcissi and lily of the valley, which are to be had in any quantity, there would be some old-fashioned soaring done. Carnations are in the same good fortune as the roses, and ferns are getting scarce, but violets are still in purgatory.

The rather nauseating controversy over the Lawson carnation seems now to have been brought to an issue that ought to be satisfactory to those directly interested and eminently gratifying to the public, who have been surfeited with the overdone sensation. An agreement was reached on Monday between Messrs. Fisher, Galvin and Lawson, as grower, promoter and "angel" respectively, whereby it is announced that Mr. Lawson has, "in consideration of $30,000" had transferred to him all of the stock of plants and all of the flowers of the Mrs. Thos. W. Lawson carnation, the disposition of which is to be exclusively Mr. Lawson's hereafter. "In consideration of $30,000" may mean many things or nothing, but that is probably all we shall ever find out. The congratulatory articles in the daily papers over the statement that the wonder is not to be permitted to go outside of Boston make amusing reading. The title is to be "defended against the threatened attack of Mr. Higinbotham" and the carnation is to be a prominent feature in the public garden next summer. A bed of carnations will make a good companion attraction for the "bulbul" which one reporter advises be added to Supt. Doogue's collection of pets. While all this is going on, one of our shrewd florists of Hebrew lineage, with characteristic enterprise, has fixed up his window with pink carnations labeled "The New Lawton Pink," and things are coming his way fast. One newspaper correspondent who ought to know better romances about high cost flowers in general and tells of the rose Her Majesty, which was renamed the Bennett and from which not a single flower was ever sold! Verily there is plenty of civilizing work yet ahead for the Massachusetts Horticultural Society, the Gardeners' and Florists' Club and the newly formed horticultural club to do.

On Saturday W. C. Coburn made a fine display of Chinese primroses at Horticultural Hall. J. E. Rothwell exhibited two hybrid cypripediums, C. Lucienianum and C. signatum. Mrs. Gill showed seedling carnations and C. E. Richardson a plant of Azalea Mattapan.

News has been received of the death at Havana, on January 7, of Wm. J. Galvin, youngest son of John Galvin and brother of Thos. F. Galvin. Deceased was 36 years of age. His body will be brought home.

Mrs. Wm. Love died at her home in Dorchester on January 20.

Chicago.

A WEEK OF BRISK BUSINESS.—A GENERAL SCARCITY OF STOCK.—VIOLETS PLENTIFUL.—PROSPECT OF A FAILURE OF THE FERN SUPPLY. — PROMINENT FIRMS TO REMOVE.—PERSONAL JOTTINGS OF INTEREST TO THE TRADE.

This has been another week of large demand, short supply and stiff prices. There has been a particular scarcity of Bride and Bridesmaid roses and of white flowers generally. The shortage of roses has thrown the bulk of the buying on carnations, so that a very large cut has been absorbed and a scarcity is apparent in this line, prices having ranged from $1.50 to $5. Bulbous stock has sold very well and the only over supply has been of violets, which now retail at 25 cents per bunch, with street men disposing of the remnants of each day's stocks at any figure procurable.

Ferns will be $2 per thousand next week and a further advance will not be unexpected. It has developed that the large quantities in cold storage in the east are not keeping and a considerable shortage is to be the result. Chicago's principal source of supply during the winter is Hinsdale, Mass.

At the last club meeting F. Hills showed some fine mignonette and a vase of Argyle. Wieland's Evanston was shown and so was Pink Beauty, grown by Jacob Russler. It is a fine seedling from Tidal Wave and Daybreak and was awarded a certificate. Mr. Russler also exhibited La France violet, of which he thinks highly.

Because of the expiration of the lease under which the French & Potter Company sublet space at 88 and 90 Wabash avenue three leading firms, Bassett & Washburn, Kennicott Bros. Co. and A. G. Prince & Co., must on May 1 remove to other quarters.

During their stay in Chicago Messrs. Asmus, Dailledouze, Joy and Kuhl visited, among other places, the establishments of Bassett & Washburn, at Hinsdale, Reinberg Brothers, at Bowmanville, and the Chicago Carnation Company, at Joliet, to which latter place they were escorted by President W. N. Rudd and P. J. Hauswirth.

A. C. Spencer has this week been deluged with catalogues of cradles and baby carriages, much to the merriment of his friends, but not in the least to his discomfiture. He's very proud of that daughter.

Wm. Dittman, whose services were in demand in Chicago and elsewhere, has concluded to remain in charge of the houses of the South Park Floral Company at New Castle, Ind.

Mary L. Price, of Chicago, has been given a patent upon a flower pot with a deep, covered saucer which holds both soil and water and provides a form of sub-irrigation.

White lilacs are selling well at Vaughan, McKellar & Winterson's at $1.50 per dozen. They are also handling some very fair white violets.

Mrs. W. E. Lynch and two children have been on the sick list for two weeks, but are not dangerously ill.

Paul Redieske has been elected superintendent of Lincoln Park at a salary of $3,000 a year.

John Degan is making a western trip in the interest of Vaughan's Seed Store.

Mr. and Mrs. Walter Kreitling celebrated their fourteenth wedding anniversary one day last week.

Blanche Ferry sweet peas made their appearance at Hunt's this week.

St. Louis.

STOCK MORE PLENTIFUL AND VIOLETS ARE A GLUT.—CARNATIONS AND ROSES FIRM. —FLORISTS PLAY EUCHRE.

Several bright days have had quite an effect on the market as far as cut stock is concerned. The predicted glut of violets has materialized and despite the enormous quantity sold every day at the reduced price at which they are offered, quantities are lost at the commission houses and by the growers. To add to the quantity of home grown stock we have also to reckon on the southern shippers, who are sending in large shipments, of both single and California.

Carnations have become a little lower in price, but scarcely enough to say they have fallen. Roses are still firm and sell up quite clean. Bulb stock has become more plentiful and is not moving as well as could be wished. Von Sions, and the single narcissi from the south are the latest stocks to make an appearance at the commission houses.

The progressive euchre contest held last Friday evening under the auspices of the St. Louis Florists' Club for the benefit of the parties winning prizes at the Flower Show, was a decided success, although at present the exact amount realized is not known. A most enjoyable time was the result and the prizes awarded were, in many instances, very handsome. Many of them were donated by the leading flower dealers and growers. R. F. T.

Cincinnati.

BUSINESS HAS IMPROVED AND STOCK DOES NOT EXCEED THE DEMAND.—ROSES ARE SCARCE.—A SPORT OF SCOTT.—CLARA BARTON NOW THE MAID OF HONOR.—VISITORS.

Business has improved, and with the exception of violets and bulbous stock the demand equals the supply. Roses are rather scarce, good Brides and Bridesmaids having sold as high as $10 to $12 per 100. Harrisii lilies are good stock and readily fetch 15 cents, but callas seem to move slowly. Tulips are commencing, George & Allen having the first in. This firm is cutting some fine new crop lily of the valley with stems eight inches long. Carnations have not been in over supply.

Sunderbruch's Sons recently had on exhibition at the Cincinnati Cut Flower Company's place a vase of a new crimson carnation, flower and stem identical with that of its parent, Wm. Scott. It originated with them last year and they claim it to be a good thing. Scott seems to be a sporty sort of a fellow.

Messrs. Ernst Asmus, Paul Dailledouze and E. G. Hill were in this city the past week. They examined Hoffmeister's new rose, Miss Clara Barton, which has been re-christened Maid of Honor.

Robert Betz, gardener at the city water works greenhouses, reports an increase in his family; it's a boy. Ben George became a happy father the same day, January 23; a girl.

Mrs. C. C. Murphy is seriously ill with pneumonia. H. SCHWARZ.

THE AMERICAN FLORIST

Subscription, $1.00 a year. To Europe, $2 00. Subscriptions accepted only from those in the trade.

Advertisements on all except cover pages, 10 Cents a Line, Agate, $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at $1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

PROF. D. T. MACDOUGALL, of the University of Minnesota, has been chosen director of the laboratory of the New York Botanic Garden.

THERE seems to be an unusual demand for white violets (flowers) in certain sections this season. Those who have them for sale should advertise the fact.

VERY attractive calendars have reached us during the past week from the American Rose Company, Washington, D. C., and Mrs. E. A. Williams, Pittsburg, Pa.

THE death rate in the trade continues painfully large, and complaint of the raids made upon health by the grip comes to us from many widely separated sections. The sufferers have our heartfelt sympathy.

THE stockholders of the Vance Boiler Works, Geneva, N. Y., re-elected their officers, who in 1898 tripled the business of the company and declared a six per cent dividend. J. R. Vance is president and E. M. Winnie secretary and manager.

I. E. COBURN, of Everett, Mass., sends us some blooms of Primula Sinensis, which for size, variety and richness of coloring would be hard to improve upon. If the flowers are freely produced well above the foliage, the strain is certainly a good one.

CATTLEYA BOWRINGIANA LADY WIGAN has recently received an award of merit from the Royal Horticultural Society of England. It is in color alone that this variety differs from the type. The sepals and petals are lilac with a rose suffusion; the lip is reddish lilac on the front lobe, velvety crimson in the center, with a pale primrose throat.

MR. J. D. THOMPSON, of the Chicago Carnation Company, Joliet, Ill., assures us that during the present week he tendered $5,000 for half the stock of Peter Fisher's carnation, Mrs. Thos. W. Lawson, but that Mr. Lawson offered a sufficiently larger amount to enable him (Mr. Lawson) to retain the stock and thus take it out of the market altogether.

The 1899 Directory.

The new edition of the American Florist Company's Directory of florists, nurserymen and seedsmen is now ready. As in last year's issue, the names are first arranged by states and post offices, and a second list contains all the names in their alphabetical order. The various lists have been thoroughly revised, and the names and addresses of 1336 new firms appear in its pages for the first time. Price $2.

Fires.

BATAVIA, N. Y.—Eugene Ruhlman's barn and greenhouses burned January 20, causing a heavy loss.

BURLINGTON, VT.—The explosion of an oil heater in the greenhouses of C. P. Jones did considerable damage to stock January 21.

Greenhouse for Growing Cut Flowers.

ED. AM. FLORIST:—Please give the cost of a greenhouse 20x60 feet. The ground is level on which I expect to build and I intend to heat by means of hot water. As I expect to grow cut flowers mostly, you would also oblige by stating whether a three-quarter or even span would be best for my purpose. R. C. F. K.

The cost of the greenhouses 20x60 feet, will depend largely upon the materials used and the care taken in the construction. A well built house, constructed of cypress and with double strength glass and heated with hot water, complete with wooden benches, will cost not far from $700 for labor and materials. If only one house is to be constructed, I would recommend an even span, as this can be used for growing almost any of the crops. It answers well for roses, although many growers prefer a three-quarter span. L. R. TAFT.

Diseased Callas.

ED AM. FLORIST:—Please state through your columns how to treat calla tubers attacked by disease or rot at the ground line? Our tubers were from California and looked fine, large roots. But they commenced to rot at the ground line and the disease has spread so that we have lost at least 300 of them. We have them planted in pots and solid bed. We were never bothered before with this disease. M. S. V.

The callas are affected with a rot that develops in the crown, where the leaves join the corm. The germs of the disease are doubtless inside when the plants are set out, and came from the region where they were last grown. The disease is known to occur in California, but does not seem to have become established east of the Rocky Mountains. No remedy has yet been suggested. Every plant with the soil about it should be removed as soon as the disease shows, and thus keep healthy plants from contracting the disease. J. C. ARTHUR.

Steam Boiler for Hot Water.

ED. AM. FLORIST:—Can a steam boiler with flues be used economically as a hot water heater? Will a steam boiler used as a hot water boiler heat the water just as fast or faster than a cast iron boiler? E. S.

Fairly good results can be obtained with steam boilers for hot water heating, especially if the tubes are of medium or large size. No general comparison can be made between steam boilers and cast iron boilers as to the rapidity with which they will heat water, as this will vary with the construction of the boilers, but as a rule, fully as good or better results can be secured from the former, so far as the actual heating is concerned, but cast iron boilers are rather more desirable than those of wrought iron, especially when the latter are constructed of gas pipe with screwed joints. Ordinary steam boilers with heavy tubes riveted into the boiler heads will be found quite desirable. L. R. TAFT.

Greenhouse Building.

Charleston, Ill.—Miss Etta Nott, one greenhouse.

Philadelphia, Pa.—Geo. Kufler, greenhouse 22x45.

Wantagh, N. Y.—P. W. Behrens, smilax house 23x101.

Dracut, Mass.—J. McManmon, one greenhouse 20x100.

South Portland, Me.—Niles Nelson, two commercial houses.

Middlefield, Conn.—Angus Bros., one greenhouse.

Carlisle Pa.—F. C. Bosler, range of conservatories.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

The Hoffmeister Floral Co., Cincinnati, O., registers new rose Maid of Honor, a sport from Bridesmaid, deeper pink in color.

This is the variety which the Hoffmeister Floral Company has been advertising for introduction this season under the name of Miss Clara Barton, but having been apprised of the fact that another firm had previously registered a rose under this name they, out of deference to the rules of the S. A. F. regarding the registration of new plants, and with the best interests of the trade at heart, decided to adopt the new name, as above indicated, for their rose. It is but justice to the Hoffmeister Floral Company to call attention to the fact that they had already advertised and catalogued the rose as Miss Clara Barton and that the change is made by them at considerable expense and embarrassment. Their courteous act is entitled to especial recognition by the trade and particularly by the members of the S. A. F., in whose estimation the name Maid of Honor should stand, under these circumstances, as singularly appropriate.

WM. J. STEWART, Secretary.

Toronto.

MEETING OF AGRICULTURAL SOCIETY CALLS OUT MANY GARDENERS AND FLORISTS.—OFFICERS ELECTED.

The City of Toronto Electoral District Agricultural Society held its annual meeting, for the election of officers for 1899, on January 18. The gardeners, florists and seedsmen were well represented.

The treasurer's statement for the year showed the total receipts to have been $646.50, and the expenditure $512.40, leaving a balance on hand of $134.10.

At the chrysanthemum show of the Toronto Gardeners' and Florists' Association held in November, 1898, the society awarded prizes as follows: For plants, $67; cut blooms, $17; floral designs, $16.

The following officers were elected: President, Geo. Vair; first vice-president, P. G. Close; second vice-president, B Saunders; solicitor, W. G. McWilliams; secretary and treasurer, J. P. Edwards. Directors, Jno. Withrow, Robert Davies, Walter S. Lee, R. J. Score, S. E. Briggs, Wm. Christie, Jas. Croker, Capt. W. F. McMaster, John Chambers. Auditors, Jno. Gouinlock and Thos. McQueen.

The Toronto Horticultural Society held a directors meeting the same evening which was attended by nearly all the officers, and a number of valuable suggestions were enunciated for improving the society and increasing its popularity and membership for 1899.

The weather is very changeable, and business quiet. S. P.

Grand Rapids.

FOURTH ANNUAL BANQUET OF THE FLORISTS' CLUB.—VIOLETS AND IMPORTANT BUSINESS FOR THE FEBRUARY MEETING. —MUCH ILLNESS. — BUSINESS GOOD. — STOCK SHORT.

The Florists' Club held its fourth annual banquet Tuesday evening, January 24 at the Eagle hotel. There were about fifty present, as sickness prevented the attendance of many. The tables were nicely decorated with carnations and roses and a dinner worthy of the occasion was served at 8:30. After dinner, J. A. Creelman, who served as toastmaster, called upon President Stover, who responded with a few appropriate remarks, after which came a delightful programme of music and recitations.

The festivities closed with the president announcing that the next meeting will be an important one as there will be interesting business on hand. The meeting will be held the first Tuesday in February and violets will be the subject for discussion.

Geo. Hancock & Son, of Grand Haven, have tendered the club an invitation to hold its carnation meeting at their place and will undoubtedly be accepted at the next meeting.

Geo. F. Crabb and Eli Cross, with Crabb & Hunter, are ill with pneumonia and were unable to attend the banquet.

Nearly all of the florists report trade very good since the holidays and some of them do not have enough carnations and roses to supply their trade.

CHADWICK.

Lenox, Mass.

At the meeting of the Lenox Horticultural Society on January 21 there was an interesting discussion on vegetables, opened by Chas. R. Russell. The exhibition tables contained some good things, among them being John N. May's new carnation, Melba, which pleased the members very much and received a certificate of merit, and a vase of twenty-five long, handsome spikes of Eucharis Amazonica from Wm. Griffin, which received a similar award. Mr. Griffin also got a diploma for a fine collection of carnations.

CAMBRIDGE, MASS.—Shaw Brothers have sold their business to John Husband, a florist of long experience, who already has an extensive establishment at Payson Park, Belmont.

OBITUARY.

G. A. MILLS.

George Augustin Mills who organized the Melrose Amateur Gardeners' Society and to whose efforts its success has been mainly due, died on January 2, at Melrose, Mass., aged 37 years.

VALENTINE BURGEVIN.

An octogenarian florist of Kingston, N. Y., died January 21 after a long illness. Valentine Burgevin was born in Mayence, Germany, New Year's day 1819. He came to America a young man and had resided at Kingston for more than half a century. It was forty years ago that he built his first greenhouse. Besides his wife Mr. Burgevin leaves a daughter and four sons, Paul, of Portchester, N. Y.; George and David, who have been in charge of his business for some time, and Julius, the Broadway florist.

Milwaukee.

Klokner's window looks quite ruddy with the display of carnations. To have the best carnations in town seems to be more of hit than the best violets now.

Mr. Adam Zender, one of the largest growers who supply this market, spent a day here last week exchanging compliments with the several florists who have become quite familiar with his stock.

Every scrap of bouquet green has been gathered and made use of. A large number of cycas leaves have been used lately.

C. B. W.

B. F. ALLEN and A. E. Hirschfelder have been elected directors of the Hawks Nursery Co., Rochester.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1899 is entitled to a five-line WANT ADV. (situations only) free to be used at any time during the year.

SITUATION WANTED—By a strictly sober florist; capable and willing, and the best of recommendations. Address E J C, care American Florist.

SITUATION WANTED—By single man age 40 years; 25 years' experience, roses and general greenhouse work. Address G G, 401 Girard Ave., Philadelphia.

SITUATION WANTED—As salesman for nursery stock, thoroughly understand the business; best references; state terms. J T, BOX 66, Shoustown, Pa.

WANTED—A practical florist single, to take charge of 8 houses. Must be a good grower of carnations, chrysanthemums and violets and propagator. State lowest wages accepted with room and board at hotel Must be sober and reliable and have best of references. Address NICHOLAS AMOS, Crestline, Ohio.

FOR SALE—At a bargain if taken at once, 34 boxes of 12x14 glass. Add ess DAN NELSON, Butte, Mont.

FOR SALE OR RENT—A well established florists business. Address GOOD OPPORTUNITY, care American Florist.

FOR SALE—Five greenhouses, house, barns, etc.; five miles from Denver Further particulars Address BARNES, 1621 Wilton St., Denver, Col.

FOR SALE—Five greenhouses, five building lots and barn, 25 miles from New York in growing city. Good retail and wholesale stand; cheap. E L, care Am. Florist.

FOR SALE—Four greenhouses nearly new. Splendid retail stand in residence district on paved street leading to cemetery, easy terms; must retire account of health. A. CLAUS, 501 N. 4th St., Springfield, Ill.

FOR SALE—Located in a live city of 8,000 population, an up-to-date greenhouse establishment of nine houses in first-class shape and in full crop. Address or apply to J. C VAUGHAN, Box 688, Chicago.

FOR SALE VERY CHEAP—A fine greenhouse establishment of 10,000 sq. feet of glass in a booming city of 18,000. Very little competition Everything in fine condition. A well paying investment. Good reasons for selling Address BARGAIN, care American Florist.

FOR SALE—Public sale of real estate, greenhouses and well established florist's business, Thursday, February 9, 1899. I will sell out my entire greenhouse plant including dwelling. Sale to commence at 2 o'clock p. m. Address W. R. SHELMIRE, Avondale, Chester Co., Pa.

For Sale at a Sacrifice.

On account of death of proprietor, 1¼ acres of land, 25,000 feet of glass in good repair, fully stocked with the best varieties of Roses, Carnations and Violets. One mile from city of 80,000, where there is quick sale for all stock grown. Trolleys pass the door. For particulars address

S. E. H, 113 S. 5th St, Reading, Pa.

FOR SALE: A first-class, modern greenhouse property that has netted 25 per cent on price asked and can be made to double that: in a city of 10,000 people No opposition and only 20 miles from a city that will have the best World's Fair in 1903 that has ever been held in America. If you mean business write at once for a description of same. Positively no better greenhouse property has ever been offered for sale. Address

Mo., Care American Florist.

FOR SALE.

Two greenhouses 4000 ft. of glass with stock and tools. Will rent or sell ground; 20 minutes from Philadelphia. Particulars at H. F. MICHELL, Seedsman, 1018 Market St, Philadelphia, Pa.

Buffalo.

FINE TRADE BUT A SHORT SUPPLY OF FLOWERS.—TULIPS AND ALL BULBOUS STOCK QUITE USEFUL.—HARRISII BULBS DISEASED.—NOTES.

Trade for the past week has been rather brisk, especially in funeral work. Carnations are rather scarce and prices rather high. Narcissi and Romans are in abundance and are found very useful in design work. Roses are only fair and the supply very limited. American Beauties are coming in quite plentifully, but have not very long stems. Tulips are becoming more plentiful and help to take away that vacant look noticeable in the store windows since Christmas. As customary, the trade demands Harrisii lilies, but every one growing them around here has diseased bulbs, and the supply is very small.

Palmer & Son are cutting some very fine Flora Hill that find ready sale and retail at good prices.

S. A. Anderson has been in line with the grip, the only florist who has had it.

Recent visitors were: H. J. Wise, East Aurora, N. Y.; A. Ringier, Chicago; Edward Fry, of Rochester, N. Y.; Charles A. Hart, of Cleveland, Ohio; Max Beattus, of Dayton, Ohio, and "Billy" Boas, from Philadelphia. W. A.

NEWPORT, R. I.—The Newport Horticultural Society is arranging for a ball, to take place on February 1 at Masonic hall.

BLUE POINT, N. Y.—George T. Schuneman has sold out his range of 50,000 feet of glass devoted to violets and will enjoy a three months' tour of Italy and Germany. Upon his return to Long Island he is planning to establish at Irving Place, Jamaica, a thoroughly modern range of not less thau 100,000 feet to be devoted entirely to Marie Louise violets.

ALL Nurserymen, Seedsmen and Florists wishing to do business with Europe should send for the

CARNATIONS.

FLORA HILL MORE PROLIFIC.

In our notes last week on the establishment of the Chicago Carnation Co., page 728, through a clerical error it was stated that 1575 plants of Flora Hill gave 1300 flowers between October 1 and December 25 when the yield of blooms was 13,000 (thirteen thousand).

CARNATION MELBA.

In the front rank of novelties seeking favor this season stands Melba, one of the productions of John N. May, Summit, N. J. Melba possesses many excellent qualities, among which are a free flowering habit, the bloomscoming early and without cessation throughout the season; a flower large and perfect in form, with good calyx and very fragrant; and a long, boldly erect stem. It is said to have been very profitable in the eastern markets last winter, and was awarded many certificates at recent exhibitions, also the silver medal of the Chicago Horticultural Society and the Craig cup.

AGAIN THE RUST.

ED. AM. FLORIST:—Enclosed please find sample of diseased carnation. You will oblige by giving name of trouble and remedy. SUBSCRIBER.

The sample is affected by rust and I am sorry to say that there is, to the best of my knowledge, no cure. However, carnation growers are beginning to appreciate that while the rust is not desirable, yet it is not really a serious fault, for, with good culture, just as fine flowers can be produced on a plant affected with the rust as on one not so affected, except in very bad cases. It also seems that some of our very best varieties are affected to a greater or less extent.

Some growers have firm belief in air slaked lime as a preventative and remedy for rust, others use the copper compound so often recommended and yet others use a solution known as Fowler's solution, using one ounce to eight gallons of water and spraying the plants with it after the flowers have been pulled. I have tried them all and have yet to find a remedy that really did any good. The only thing I can do is to grow the plants in as good health as possible and in this way I find that rust need not be feared. Another thing I have found is that a variety may be affected one season and be entirely free another and that in many instances rooted cuttings which I have received full of rust were entirely clean when we came to plant them into the houses in the fall. ALBERT M. HERR.

CULTURAL NOTES.

January 28.—That there are new methods of culture, keeping pace with the new and improved varieties, no one can doubt. The question with carnation growers, who keep a careful eye on both sides of their ledger, is whether or not these new methods of culture can be made to pay.

One of the most striking innovations of late years is the sub-watering system, the advantages of which were so ably demonstrated to us by Prof. Arthur at the meeting of the American Carnation Society in Chicago. How many growers are trying this method I do not know, but I presume from the expression of opinion at that meeting, fully two-thirds of those present are trying sub-watering on a more or less extensive scale. At the Cottage Gardens, I am told, there is a house fitted up according to Prof. Arthur's instructions, and the results are so gratifying that more are to be equipped in the same manner.

On account of the severe drought of the past summer my plants did not warrant me in going to the expense of fitting up a house as suggested by Prof. Arthur, but a tile man struck the place about planting in time with such a cheap method of sub-watering that I concluded to risk the small outlay and we fitted up one house, laying the tile on the subsoil of a solid bed and cementing the joints, but evidently the job was not done carefully enough for several leaks made the experiment worthless. The tile used was in lengths of about eighteen inches and made of a soft, porous clay through which the water was supposed to soak and keep the soil in proper shape.

I then coated an old bench sixteen feet long and three feet wide, with a thin layer of cement, running it up the side boards about three inches, and laid a set of these tiles in the cement, slipping the joints together but not cementing them or attempting to tighten them in any way. For the three-foot bed a double run of tile was put in; that is, about six inches from the side a run was made down to the end and with elbow connections it was returned along the other side of the bench, and an elbow put into the end of each run. One of these elbows is used to insert the hose and water is allowed to run until it shows in the other elbow. After the tiles were laid we put in the soil, planted the bench and are watering as above stated. By the time the water shows in the second elbow enough has soaked out the joints to saturate the soil in the bench and such a watering about every two weeks has kept the plants in excellent condition and the results will, I think, pay for the slight cost.

I shall the coming summer fit up one of my solid bed houses with this tile, putting a layer of cinders in the bottom, over this cement and on the cement the tiles arranged as described. I figure that I can do the job on a solid bed 100x8 feet for $50 and I fully believe that I can get $50 more out of a house so treated than from the same sized house watered on the surface. ALBERT M. HERR.

CARNATION MELBA.

To It.

Oh, Pink!
At you I gaze and think—
And likewise wink.
Your worth I do not know,
But you're a three-ring show—
A calyx-bursting glow.
If you cost thirty thou-
Sand dollars, as they vow,
I cannot tell you how
My heart to you goes out.
You are, surpassing fine—
A floral copper mine,
Of flaws you show no sign—
But still the awful doubt!
Didst cost what people say?
Did Lawson really pay
Three tens, and still look gay?
In Nature's crown you shine,
And, by your right divine,
Evade the rates per line.
But still I gaze and think,
Are you a hinky dink,
Oh, Pink?

—*Boston Journal.*

Greenhouses of the Chicago Carnation Company, Joliet, Ill.

...INTRODUCTION...

In presenting this list to the trade we beg to call attention to the fact that we have the model Carnation establishment of America and that we grow Carnations only. Not another plant of any description has ever been seen in our houses; consequently all our time and energy are devoted to the Divine Flower, which makes, as you know, a great difference in the quality of stock that can be produced, as compared with what can be turned out where a hundred and one things are grown. One thing well done is better than a dozen but half done.

We reproduce upon the following pages photographs of some of the varieties we grow, and ask you to note that we give our plants an abundance of room, in some cases over a foot to a plant. This is to give sunlight and air all through the plants and right into the softest parts, the axils of the leaves, where we expect our next growth to push up. All the photographs, except that of the house of Victor, were taken January 1, 1899, just after we had cut every flower that was fit for our New Year's orders. The pictures, therefore, do not do our plants full justice, but our readers, being practical growers, can tell at a glance what kind of stock we produce from such healthful growth.

We take as great pride in growing good rooted cuttings as we do in producing high-grade blooms. All our cuttings are thoroughly ripe, being taken from stems of developed flowers; they take longer to form roots, being so hard, but when once rooted they grow about twice as fast as the weak, soft cuttings taken at random with apparently little object other than to fill up the propagating bed with a lot of fungous, which, distributed all over the country at ridiculously low figures, are dear at any price.

A trial order will convince you of the superiority of our stock. We can supply any quantity.

Every order will receive our careful attention and will be shipped promptly as our facilities are of the best. Five railroads pass through Joliet—the Chicago & Alton, Chicago, Rock Island & Pacific, Atchison, Topeka & Santa Fe, Michigan Central and Elgin, Joliet & Eastern, with seventy-four passenger trains in and out each day. We can make shipments at any hour by one of the following express companies: United States, American, Wells Fargo and Pacific.

CHICAGO CARNATION COMPANY,

Greenhouses and Address, JOLIET, ILL.

HOUSE OF CARNATION MRS. GEO. M. BRADT.

Delivered to us from sand May 1, field grown and benched Sept. 10, photographed Jan. 1, 1899.

MRS. GEO. M. BRADT.

VARIEGATED. Introduced 1897.

This is pre-eminently the most satisfactory carnation to date. It produces the largest flowers and, with us, stiffer stems than any variety in commerce. The cut shows that the flowering stems have no support whatever. Mrs. Bradt commands the highest price of all the varieties we grow and gives as many flowers per square foot of bench room as many sorts which bring but half the price; plant close. The flowers have retailed at from $2.00 to $3.00 per dozen. We have an abundance of stock of this scarce variety.

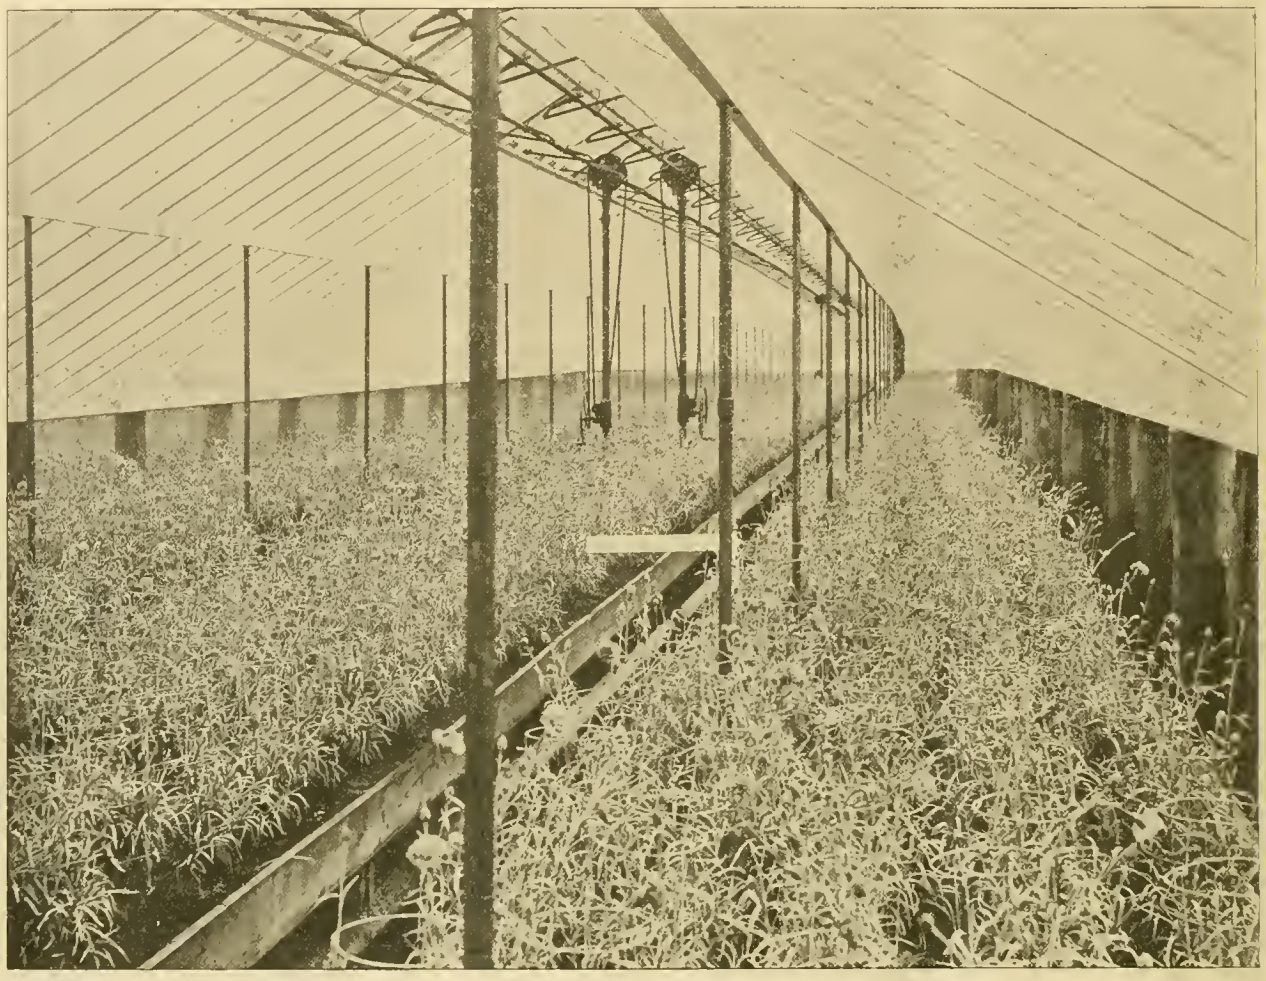
Rooted Cuttings, $5 per 100; $40 per 1000; 250 at 1000 rate.

CHICAGO CARNATION COMPANY,
JOLIET, ILL.

HOUSE OF CARNATION GOLD NUGGET.

Delivered to us from sand May 1, benched Sept. 15, photographed Jan. 1, 1899.

Gold Nugget.



YELLOW. Introduced 1898.

It goes without saying that Gold Nugget stands at the head of the list of yellow carnations. As a strong grower and prolific bloomer it will be hard to displace.

Rooted Cuttings, $5.00 per 100; $40.00 per 1000; 250 at 1000 rate.

Allow us to figure on your wants. We know we can please you both as to quality and price, particularly on large orders.

CHICAGO CARNATION COMPANY,
JOLIET, ILL.

HOUSE OF CARNATION VICTOR.

Delivered to us in last week of April, benched Sept. 14, photographed Dec. 8.

VICTOR.

SALMON PINK.

This variety stands well to the front among the pinks and has a host of friends. It certainly deserves all that has been said in its favor; flowers large, long stiff stems, grand color and a very profitable variety to grow.

Rooted Cuttings, $3.00 per 100; $20.00 per 1000; 250 at 1000 rate.

Bear in mind that on large orders we can figure to the lowest price at which good stock can be rooted.

CHICAGO CARNATION COMPANY,
JOLIET, ILL.

HOUSE OF CARNATION EVELINA.

Delivered to us in May, benched Sept. 18, 1898, photographed Jan. 1, 1899.

EVELINA.

WHITE. Introduced 1898.

This has been termed the "cut and come again" carnation. The profusion of bloom invariably attracts the attention of the visitor the moment he enters the Evelina house, for the benches are very like a snow drift. It is a beautiful flower when well done, and at Cincinnati in 1897 took first prize for white over Flora Hill.

Rooted Cuttings, $4.00 per 100; $30.00 per 1000; 250 at 1000 rate.

ARMAZINDY.

VARIEGATED. Introduced 1896.

A bench of this most useful variety is shown to the right in the house of Evelina. It has a fine flower on extremely long, stiff stems, is very prolific and a quick seller.

Rooted Cuttings, $2.00 per 100; $15.00 per 1000; 500 at 1000 rate.

CHICAGO CARNATION COMPANY,
JOLIET, ILL.

HOUSE OF CARNATION JUBILEE.
Photographed Jan. 1, 1899.

JUBILEE.

GRAND SCARLET. Introduced 1896.

This variety is still at the head of all the scarlet sorts in commerce. When grown indoors during summer it is a phenomenal money maker. Its long, stiff stems and large, bright flowers make it irresistible to the buyers of choice stock.

Rooted Cuttings, $2 per 100; $15 per 1000.

☞ Let us give an estimate on whatever varieties you need. We can figure very close on large quantities.

CHICAGO CARNATION COMPANY,
JOLIET, ILL.

Other New and Excellent Varieties.

MRS. JAS. DEAN.

LIGHT SILVERY PINK. Introduced 1898.

This is the greatest surprise of all the 1898 novelties and is causing a furore among Chicago's leading retail florists. Society ladies delight in its exquisite color and fineness of petal. It is the most beautiful shade of all the light pinks, and produces the largest flowers, averaging three inches in diameter, on stiff stems from 20 to 30 inches long. It sells at sight at from 5 to 6 cents while its competitors go begging at from 2 to 4 cents. It is a very free and healthy variety, and the strongest grower we have. The flowers should not be picked until the color reaches its most charming shade. It is a splendid keeper.

Rooted Cuttings, $5 per 100; $40 per 1000.

250 at 1000 rate.

G. H. CRANE.

SCARLET. Introduced 1899.

Dorner's long stemmed, bright scarlet, free, profuse and constant bloomer. It comes into bloom early and yields both quality and quantity. Stem long and stiff from beginning to end of season. Tested three years and proved all right as a commercial variety.

Rooted Cuttings, $10 per 100; $75 per 1000.

NEW YORK.

CERISE PINK. Introduced 1898.

This is a splendid sort, a very free bloomer said to produce seven flowers to a plant more than does Scott. We know it brings us just about three times the price that Scott sells for.

Rooted Cuttings, $5 per 100; $40 per 1000.

FLORA HILL.

LARGE WHITE. Introduced 1897.

When well grown this sort is very hard to beat and it is too well known to require description here.

Rooted Cuttings, $2 per 100; $10 per 500; $15 per 1000.

EMPRESS.

CRIMSON. Introduced 1898.

This sort is well named for it is certainly a queen as we have seen it. Late bloomer.

Rooted Cuttings, $4 per 100; $30 per 1000.

MRS. FRANCES JOOST.

PINK. Introduced 1898.

Its better color, longer and stiffer stems, more prolific blooming and superior habit of growth will cause this variety to displace that grand old stand-by, Wm. Scott. Returns are more than twice as much as from Scott; you can afford to plant this in very large quantities.

Rooted Cuttings, $5 per 100; $35 per 1000.

500 at 1000 rate.

ARGYLE.

BRIGHT CARMINE PINK. Introduced 1898.

This is a grand, free and continuous bloomer, producing very large flowers on long, strong stems. The plants are extremely healthy and on account of its bright color the cut blooms are among the very best sellers in the market.

Rooted Cuttings, $5 per 100; $40 per 1000.

250 at 1000 rate.

MELBA.

PINK. Introduced 1899.

May and Craig's grand combination of good qualities, free bloomer, early and continuous. In point of color the finest pink carnation yet introduced; large and perfect in form, very fragrant and with a long stiff stem.

Rooted Cuttings, $10 per 100; $75 per 1000.

BON TON.

FIREY SCARLET. Introduced 1898.

Produces a large, beautifully fringed flower, supported upon a very stiff stem; grows bushy and needs no support. Said to average eighteen flowers to a plant.

Rooted Cuttings, $4 per 100; $30 per 1000.

DAYBREAK.

LIGHT PINK. Introduced 1891.

Our stock of this universal favorite has been grown cool with the view of getting prime cuttings and we have them.

Rooted Cuttings, $2 per 100; $15 per 1000.

JOHN YOUNG.

WHITE. Introduced 1898.

This is the most satisfactory white we grow.

Rooted Cuttings, $5 per 100; $40 per 1000.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

EVERETT B. CLARK, Pres.; JOS. A. BOLGIANO, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ON account of the scarcity of Harrisii bulbs an activity in the European demand for Japanese longiflorums is already noted, much earlier than usual.

BAY CITY, MICH.—Harry N. Hammond, the Decatur seedsman, will grow vegetable and flower seeds upon the Mundy & Fifield farm south of this city.

THE contract prices asked for peas and beans of crop of 1899 are somewhat higher than last season and yet no more so than can reasonably be expected in view of the scarcity of seed stocks and the inclination of farmers to try other crops promising a better profit.

VAN ZANTEN BROTHERS, Hillegom, Holland, have purchased the export bulb business of Van Der Horst & Dames, Lisse, who on January 1 dissolved partnership, each gentleman continuing upon his own account in the bulb growing branch of their industry. Van Zanten Brothers are well known to the American trade as very large producers of first-class Holland bulbs.

Rocky Ford Musk Melon.

I have always claimed that a good musk melon is nothing but condensed sunshine combined with proper soil and climatic influence. Too much moisture will spoil the quality of melons, while the lack of sufficient moisture is equally as damaging.

Colorado has no lack of sunshine and, as I understand the moisture at Rocky Ford can be regulated by irrigation, the very acme of climatic influences are therefore brought to bear towards reaching the perfection that has brought the Colorado melons into prominence. This, with a system of selection and inspection that probably surpasses anything that has ever been attempted before in its far reaching exactness, gives the public only the cream of the crops and makes this melon superior to the usual product of even expert growers who cannot so nearly control the conditions surrounding their output.

There is no question of doubt in my own mind that nearly all good melon districts will produce just as good quality when conditions are favorable as it is possible to produce at Rocky Ford, seed, selection and inspection being equal. This I have proven to my own satisfaction here at home, and it is also proven by the variation in quality certain seasons in the Rocky Ford output.

About six years ago I received a sample of seed of the so-called Rocky Ford melon. This was carefully planted in complete isolation and proved to be a fair strain of Burpee's Netted Gem, in no way superior to many acres I was growing for seed purposes; it was therefore dropped as being a distinct variety. Since then the melon has apparently been selected for the oval type, although the manager of the Rocky Ford Association tells me there is no objection to the more nearly round type.

That the selection of seed for quality, texture and thickness of flesh, has contributed largely to the success of the Rocky Ford growers is without question. This has been discussed by your different correspondents in a much more effective manner than I can present it.

January 19, 1899. J. C. ROBINSON.

Cleveland.

SALES FAIR AND STOCK BECOMING MORE PLENTIFUL. — ROSES IN CROP AGAIN. — VIOLETS LITTLE GROWN.—SMALL PARTY FOR CARNATION MEETING.

Business during the past two weeks has not been noteworthy. There has been a fairly steady demand for good stock, and sales have been up to the average, or a little better, for this season of the year. But the scarcity that had so long been apparent has entirely disappeared, owing partly to increased supply and partly to decrease in the volume of business. Roses, that with many growers went off crop just at the close of the holidays, are beginning to come in again in sufficient supply to rather weaken the rates.

Carnations are more plentiful and somewhat improved in quality. Tulips are coming in with fair stems, although they are not by any means first class in that respect. Proserpine usually shows up the best of the lot.

Violets are little grown about Cleveland, they never seeming to have done well for any length of time with any grower. A few very good ones are now coming from Bedford, quite up to the grades shipped in. A few very early double and single Von Sion narcissi have appeared and sell well.

We have had quite a lengthy season of warm and generally sunshiny weather, so that it has been possible to air the houses quite freely, much to the benefit of stock.

There was some discussion at the last club meeting as to attending the meeting of the American Carnation Society. Several members spoke of going, but nothing definite was decided upon at the time, so that those intending to go will be obliged to make arrangements individually. A.

Nashville, Tenn.

Trade has been quite good for the past week and flowers have been none too plentiful. The rose stock is sold out daily. Particularly are the white roses scarce, but there seems to be a sufficiency of Beauty. Carnations, hyacinths and narcissi are coming in well, and violets are more plentiful.

One of the most important changes of the week was the dissolution of the partnership heretofore exisiting between R. B. Curry and Mrs. M. C. Dorris under the firm name of Curry & Co., Mrs. Dorris retiring. Mr. Curry will continue at the old stand where for twenty-five years, first by the elder Currys and since by the younger members of the family, a fine business has been conducted. M. C. D.

Providence, R. I.

There has recently been an immense amount of funeral work and the supply of white flowers has not been equal to the demand. Weddings, too, and other social events have kept pace with the solemn affairs of life and have absorbed large quantities of colored stock and made trade good for every one. Roses and carnations are, however, equal to the call and are of good quality. Violets are very plentiful. Tulips and other bulbous stock is coming in more freely.

There is a very great call for flowering plants with no extra supply to meet the increased demand.

At the last meeting of the Gardeners Club F. Macrae and W. B. King exhibited some very fine seedling carnations.

Wm. Appleton, Jr., has recovered from an illness. LITTLE RHODY.

Belmont, Cal.

The McLellan Company reports trade as very satisfactory. Last season they put in a new hot water boiler and at present contemplate new additions for the coming summer. Meteor, Bride and Bridesmaid are grown. Mrs. Robert Garrett is being tried but thus far has been found wanting. Of the two certainly Testout is the better. They have something, however, which is destined to cut a wide swath in the field where Bridesmaid now reigns supreme. It is a sport from that variety, of a beautiful deep, glowing pink, almost scarlet. The plant sported two years ago and produced red flowers only from half a bush. VIVIDIS.

Kingston, Pa.

The genial G. W. Carr reports the best trade he has had in years. The holiday trade surpassed his most sanguine expectations, while funeral and decorative work of one sort or another has kept him busy all along. A sport of Victor, a beautiful pink penciled specimen, borne on a long, stiff stem, fragrant and otherwise meritorious, is being watched with much interest by Mr. Carr. He has but a few plants, but a year hence, it may make its debut. HOMO.

MARSHALL, Mo.—The Marshall Floral Company has been incorporated by T. H. Harvey, R. E. Holloway and Carl Stamm with a capital of $3,000.

FIRST QUALITY. LOW PRICES.

Tuberous Begonia Bulbs

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
A. L. BROOKE, Pres.; E. ALBERTSON, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.

TEXAS nurserymen report a large demand for apple trees.

PATTERSON'S NURSERIES, Stewartstown, Pa., are in search of Kieffer pear trees.

A BILL pending before the Illinois legislature places $5,000 in the hands of the state entomologist for the work of combating San Jose scale.

THE pecan is indigenous to the soil of Texas, Louisiana and other southern states. It bears the richest and most delicate of nuts and is being extensively planted for commercial purposes.

ARCHIE AUGUSTINE, of Augustine & Co., Normal, Ill., reports a decided advance in all lines of nursery stock, particularly apple, cherry and small fruits, due to short supply and increased demand.

Non-Berried Holly.

ED. AM. FLORIST:—Would some competent person kindly throw light on the following question, to-wit: What are the various causes of holly not bearing fruit, and how must it be propagated (if one cause lies back so far as that) to insure good berry-bearing trees? Gray's "Botany" gives me a suspicion in the statement: "Flowers more or less dioeciously polygamous"; but I have no work giving instructions as to selection and treatment in propagation and culture. I have been repeatedly asked to diagnose and make fruitful trees some of which were said to bear about once in four years, others never. A full treatment of this subject, I feel assured, will be highly appreciated by many other florists of the west, who also lack the advantage of professional books in public libraries. I. S.

Portland, Ore.

I have never closely examined the flowers of many holly trees, but some of those that I have proved to possess entirely male flowers. Botanists are well agreed that there are male and female trees There are so many instances of isolated trees bearing berries that there seems no room to doubt the existence also of trees with perfect flowers. As there is no way to determine in advance to which of the three a certain tree belongs one must either get a seedling which has already borne or one raised in some other way from a seed-bearing sort.

Propagation is effected by cuttings, grafting or budding. The variegated and golden-leaved ones common in Europe are mostly grafted, the work being done in early spring. Nicholson says budding with a pushing bud in spring or a dormant one in the fall may be done with success. I have not tried cuttings of our native sorts, but have assisted in the propagation of the English in that way, and with good results. Cuttings are best put in in early winter in slight bottom heat. There will be a few roots by spring, but it may be just as well not to disturb them for a year. The growth is slow for a year or two, but when fairly started this holly grows faster than our native one.

There would seem to be a good field for some one to get up a stock of berry-bearing hollies in pots. Would there not be a great sale for them about Christmas time? They would be beautiful ornaments in small pots, and even large plants would be perhaps as much in demand as are Portugal laurels and similar broad-leaved evergreens.

The English holly and varieties are hardy in this part of Pennsylvania. The foliage being prettier than the native it is the preferred kind where its merits in the way of hardiness are known.

Philadelphia. JOSEPH MEEHAN.

West Michigan Nurseries.

The stockholders of the West Michigan Nurseries, having 913 acres at Benton Harbor, have elected the following directors:

John W. Bedford, Cushing; Arthur J. Dean, Eau Claire; H. A. Rackliffe, Benton Harbor; O. E. Fifield, Benton Harbor; C. W. Schriver, Benton Harbor; Frank M. Kelley, Benton Harbor; Milton Preston, Eau Claire; W. B. Moshier, Eau Claire; H. L. Bird, Benton Harbor.

The directors have, in turn, chosen these officers to administer the affairs of this successful concern:

President, John W. Bedford; vice-president, Frank M. Keller; secretary and treasurer, H. L. Bird; general manager, Charles W. Schriver; superintendent of farm, W. B. Moshier.

DORNER'S NEW SCARLET CARNATION!

G. H. Crane.

Photographed December 6th, 1898; Planted September 1st., 1898.

THE COMING SCARLET CARNATION. No other will equal it. Tested three years and will stand as one of the most profitable commercial Carnations. Wonderfully productive, and an early, continuous, all-season bloomer. Easy so lift and quickly established, strong growing, robust, clean, well formed, bushy plants, producing full, rounded, deep, clear, brilliant scarlet average three-inch blooms, on 16 to 18-inch stiff stems that NEVER have a failing to weakness. The calyx is one of its strongest points, as they never show any bursted flowers. Good substance and excellent keeper. We recommend it to every grower. Received American Carnation Society Certificate, scoring 92 points, at Chicago, February, 1898. Certificate and Silver Medal at Chicago and Certificate at Indianapolis, November, 1898.

Rooted Cuttings, $2.00 per dozen, $10.00 per hundred, $75.00 per thousand.

GEN'L MACEO (Ward). Deep, brilliant scarlet, heavily overlaid with maroon. One of the darkest and richest shades in Carnations. Large bloom on long, stiff, wiry stems. Habit similar to McGowan, but much improved. The most profitable dark Carnation grown. **$2.00 per dozen, $10.00 per hundred, $75.00 per thousand.**

GEN'L GOMEZ (Ward). Brilliant cardinal maroon, 2½ to 2¾-inch bloom on long, stiff stems. Habit similar to Scott and as free as Portia. A vivid brilliant shade of color. **Stock limited; $2.00 per dozen, $10.00 per hundred.**

GLACIER (Ward). Pure snow white, 2½ to 3-inch blooms on strong stems. Dwarf habit and early, prolific bloomer. Valuable for side benches, where a low grower is required. **Stock limited; $2.00 per dozen, $10.00 per hundred.**

Send for complete price list of **CARNATION NOVELTIES and STANDARD VARIETIES.**

MARY WOOD, a large white Carnation, originating with us, has on its merits become a avorite with many. We have a fine lot of rooted cuttings now ready. Also of **WHITE CLOUD, GOLD NUGGET, MRS. BRADT** and all the leading fancy and most profitable varieties to grow. Send at once for our price list.

Swanson	55	85	97	89	73	80
Rose	87	102	55	66	84	79

FELIX.

Fun at Flatbush.

The Bowling Club was honored with a visit last Thursday evening from John H. Taylor. Much enthusiasm prevailed and the exciting sport was kept up until an unusually late hour. J. H. Troy took the first pot with a score of 148 but on the second game scores mounted skyward and it took 184 to send the coin jingling into W. A. Prosser's pocket. This is the same figure that won the Thanksgiving turkey.

Bowling at St. Louis.

A well attended meeting of the Bowling Club was held last Monday evening, the interest centering in the contest between Beyer and Finlayson. So far Beyer is leading.

Name.	1st.	2d.	3d.	4th.	Av.
C. A. Kuehn	211	162	149	134	164
D. Finlayson	115	158	165	178	154

F. J. Fillmore	125	161	117	135	134

R. F. T.

Banquet at Lenox, Mass.

The Lenox Horticultural Society's annual banquet on a recent evening was attended by about seventy members and guests and was such a glorious success that everyone wants it repeated in the course of a few weeks. The tables were finely decorated with potted plants and music was furnished by the Lenox orchestra. President Wingett acted as toastmaster and responses were made as follows: The Lenox Horticultural Society, E. J. Norman; The Town of Lenox, John Cooney; Past Officers, A. MacConnachie; New York Florists' Club, C. B. Weathered; The Commercial Florist, Martin Finaghty; The Society of American Florists, W. A. Manda; Our Out of Town Members, C. R. Russell and Frank Howard. Songs were rendered by A. MacConnachie, C. R. Russell and R. A. Schmid and the entertainment was closed by all joining in the chorus of "Auld Lang Syne."

With Chicago Bowlers.

Following the last meeting of the Chicago Florists' Club the bowlers repaired to the alleys for a merry hour. Ernst Asmus, of West Hoboken, N. J., was a participant, as was O. P. Bassett, who has not visited the alleys in months. Mr. Bassett offered to roll the man from Jersey for $1,000 a game but as neither gentleman had any small change with him they bowled two games for friendship's sake, Mr. Bassett making 72 and 89 to 89 and 83 by Mr. Asmus. J. Austin Shaw was also present and succeeded in accumulating 92 points in one game. The scores made by the club members were as follows:

Name.	1st.	2d.	Av.
J. S. Wilson	157		157
E. F. Winterson	176	105	141
C. W. McKellar	121	158	140
August Lange	107	161	134
Alex. Henderson	113	134	124
John Degnan	111	129	120
Walter Kreitling	119	121	120
G. L. Grant	119		119
Charles Swigart	92		92

Recreations at Philadelphia.

The gunners are covering themselves with glory these days. George Anderson won a diamond of considerable value in an individual contest with some of the best shots in the city. He also obtained first place in the inter-club shooting tournament of this city for the year just closed. Another feather in the cap of the Florists' Gun Club was the selection of John Burton as one of a team of five men to represent Philadelphia in a contest against a like team of gunners representing Greater New York. Mr. Burton won his place in a competitive shoot against the best shots of the city. In the tournament Philadelphia won, defeating New York by only two targets, not much of a margin, but enough.

The bowlers have lots of fun when they get together, and there is considerable rivalry in the contest for a place on the Detroit team. The leaders, with their averages, are: Brown 153, Kift 145, Westcott 145, Smith 143, Longinotte 142 and Connor 142. Anderson is pegging away and has gained considerably the past month and there are several others, Captain Habermehl among them, who will be heard from when the winter rush is over. Baker has been taking a long vacation, and when he comes in off the grass a new string of two hundreds may be looked for. K.

Cleveland Bowling.

The bowlers showed up in goodly numbers at the last meeting and there was much excitement as a result of some good scores and close competition in the averages. A. Graham seemed to have the individual score badge safely won when Sam. Pentecost went him thirteen better, winning the badge on a score of 200. Mr. Graham, however, walked off with the high average badge with a score of 163.

Name.	1st.	2d.	3d.	Av.
A. Graham	158	187	145	163
E. H. Cushmao	164	133	154	150
James Eadie	133	181	132	149

Pittsburg.

BULK OF BUSINESS IS FUNERAL WORK.—HARRISII LILIES SHORT.—LILACS ARE IN.—NOTES.

Business has been only fair with much the greater part of it in funeral work. Stock has been sufficiently plentiful for all demands, except for white.

Harrisii lilies are not obtainable in anything like the quantities of recent years, growers fighting shy of them this year.

Theodore F. Beckert, Glenfield, sent in very fine lilacs last week, the first of the season.

Chas. Hoffmeyer, Carnegie, furnished some extra fine single violets this week.

S. S. Skidelsky and Mr. Dykes, the latter representing Jansen, of New York, were visitors this week. REGIA.

SACRAMENTO, CAL.—Frank Kunz was driving on Second street on January 12, when a stray bullet clipped the tip of his nose. It was a narrow escape for his life.

AZALEAS
FOR EASTER.

We have a large stock of all best commercial varieties in fine shape for immediate shipment. Will pack much better now than later on when the buds are developed.

10 to 12-inch crowns, $35 per 100; 12 to 13-inch crowns, $45 per 100; 13 to 15-inch crowns, $55 per 100.

Asparagus Sprengeri, 2½-inch pots, $5; 3-inch pots, $8 per 100 **Asparagus Plumosus**, 2½-inch pots, $6 per 100.

Canna President Cleveland, the best of all the bright scarlet cannas for massing, $10 per 100. **Cannas**—an immense stock of all the leading sorts. Let us know your wants and we will quote you bargain prices.

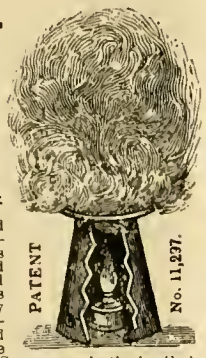
Dahlias, fine assortment of up to date varieties, strong individual roots, $7 per 100; $60 per 1000.

Lilium Auratum, 7 to 9 inches, $4 per 100; 9 to 11 inches, $6 per 100.
Lily of the Valley, Berlin pips, $10 per 1000. Case of 2500 for $23.

ROSES—FIELD GROWN—STRONG TWO YEAR.

Hybrid Perpetual in leading varieties, $10 per 100. Crimson Rambler, $15 per 100.

For New Geraniums, Carnations, Chrysanthemums, Etc., see our Florist's Price List.



THE STORRS & HARRISON CO., - - PAINESVILLE, OHIO.

.. RICHARDS ..

XL

All Vaporizing

FUMIGATOR.

I have imported from London a sample invoice of this apparatus and would recommend same for trial. It is strongly endorsed by the leading horticulturists abroad and those who have used it in the U. S. are emphatic in their approval.

THE FUMIGATOR

is made in two sizes and will last for years. It consists of three parts—the copper cup, the cylinder and the lamp.

Small size, for 2000 cubic ft., $0.90.
Large " " 5000 " 1.00.

When the lamp is lit and the compound poured into the cup, the person should leave the house and need not re-enter it, as the lamp will die out soon after the compound is all evaporated.

THE COMPOUND.

is supplied in stoppered bottles, capsuled over, as follows:

5000 cubic ft., $1.25; 10,000, $2.50; 20,000, $5.00; 40,000, $8.50.

RICHARDS XL ALL MILDEW WASH (for syringing), a clear wash which does not stain foliage, flowers or fruit. Easier to apply and more effectual than sulphur. **$1.25 per bottle.**

RICHARDS XL ALL LIQUID INSECTICIDE (for syringing), claimed to be the safest and most effectual insecticide yet discovered. Full directions on each bottle. **$1.00 per bottle.**

A SPECIALITY

60, Vesey Street,
New York City,

October 25, 1898.

Mr. G. C. Watson,

Philadelphia.

My dear Sir:-

Re XL ALL, I could not give you much more information than that I told you the other evening. We use it extensively, and it annihilates the minutest thrips and bugs of all descriptions and after burning does not leave an unpleasant odor in the houses, like one experiences after the use of a tobacco fumigator.

The plants apparently do not suffer in any way, and in England its use is very extensive for many economic reasons; being easy to handle, and a rapid destructor of insect life. Excuse brevity. In haste,

Yours very truly,

A. DIMMOCK.

WILLIAM PLUMB,
THE HOMESTEAD,
WESTCHESTER, N. Y.

January 4, 1899.

Mr. G. C. Watson,

Philadelphia, Pa.

My dear Sir:

I received the Fumigator all right, and the only fault (if any at all) is the size of it. I am very favorably impressed with it. It is certainly far ahead of Tobacco in any form used, and I am writing to ask you to please send me three of the large size, and the largest bottle of Compound that you have. I want to give it a fair trial. I certainly believe it is all right.

We have a small white insect, something like a flying thrip, that "laughed" at the strongest kind of Nicotine, but this little bit of a Fumigator you send killed millions of them. They are still on the tomatoes in clouds.

Please let me have three at your earliest convenience, and greatly oblige,

Yours very truly,
William Plumb

Columbus.

MORTALITY GREAT IN THE OHIO CAPITAL.—TRADE FAIR AND PRICES BETTER THAN LAST YEAR.—PLANTS IN DEMAND.

Business is not very rushing and society seems to have the grip. Most flowers are used for funeral work, of which there is a good deal and prices are at a higher level than for the same week last year.

Mr. Wolf, who started a flower store at the Union depot some weeks ago, has disappeared, to the sorrow of some collectors.

G. Drobish has just published a very neat catalogue for his mailing trade.

Growers at Lancaster and Logan report a much increased call for plants at the holidays.

A florist down in the Hocking valley has Daybreak, Flora Hill, Jubilee and Scott in old, low houses, which are very good and long stemmed, but the same stock, with the same soil and care, planted in a high three-quarter-span new house are short stemmed and very brittle. What is the cause? It would interest that grower to know. FRANK DANZER.

HERR'S CARNATIONS.

YOU RUN NO RISK.

ALL Carnation Cuttings are sent out with the privilege of returning them at my expense if they are not found satisfactory on receipt, and your money returned you in full. I have from one to five thousand stock plants of each of the leading varieties, and offer cuttings at very reasonable prices.

Nine Good Novelties!

Twenty-Five Standard Sorts!

UNCLE WALTER. This is another one of Tidal Wave's many sports and I presume it is the same and just as good as any of its other ones. I can vouch for its goodness and that it is a scarlet sport from Tidal Wave. Rooted cuttings can be had at $5.00 per 100 or $40.00 per 1000 either from John Murchie, Sharon, Pa.; or

Send for list before you place your orders.....

AMERICAN ROSE CO.
WASHINGTON, D. C.

The MODEL Extension Carnation Support.

Read what some of our best growers say concerning it:

BUFFALO, N. Y., Jan. 13, 1899.

THERON PARKER, ESQ :—
Dear Sir:—Your "Model" Carnation Support is the best thing I have yet tried In fact, it is about ideal I used it this winter on SCOTT, FLORA HILL, MRS. BRADT and GENESEE. The principle is perfect, but experience may teach us that to some varieties, for instance Daybreak, the lower ring might with advantage be 2 in. lower
If I could afford the first cost at once I would not think of using anything but the "Model."
Very Resp'y, WM. SCOTT.

Other testimonials will appear weekly. Write for prices

THE MODEL PLANT STAKE CO.,
22 Morton Street, - - Brooklyn, N. Y.

A good adv. in a good paper will bring good returns.

NEW CARNATION

Gov. Griggs

SEEDLING OF VAN LEEUWEN ON DAYBREAK.

Strong, healthy grower, free from disease of all kinds, continuous free bloomer with flowers very erect on a stiff stem, 18 to 20 in.; flowers similar in color to DAYBREAK, but much brighter, edge beautifully fimbriated, good shape and with full center, and does not burst; commands the highest prices in New York for novelties. Having been grown by us for the past 4 years we can with confidence recommend it to the florists of America as one of the best if not the best light pink carnation ever sent out. Orders are now being booked for rooted cuttings to be delivered February 1 1899. Price, $75.00 per 1000; 500 at 1000 rates; $10.00 per 100; $2.00 per dozen. All orders filled strictly in rotation.

Cash with order from unknown correspondents. A personal inspection invited.

JOSEPH TOWELL, Paterson, N. J.
Haledon Ave. Nursery.

It Will Pay You

To correspond with me regarding Carnation Cuttings. I can supply all the standards and novelties at the lowest market price. Also Asparagus Plumosus Nanus, strong 2 inch stock ready for a shift, $4.00 per 100; $35.00 per 1000.

Address S. S. SKIDELSKY,
1653 N. 7th St. PHILADELPHIA.

New Sensational Geranium

"KENTUCKY BELLE."

This grand new variety is the finest of many seedlings we have introduced for many years, being on the style of Souv. de Mirande, which has been one of the best sellers in many years. The color is intensely brilliant and entirely different from any Geranium in existence. A free bloomer, stands the sun well, of a dwarf habit; should be in every collection.

Strong plants, 2½-in. pots, **$3.50 per dozen, $25.00 per 100.** Address

Grafted Roses...

MAKE MONEY BY STARTING RIGHT

Grafted Roses will produce from 25 to 50 per cent more extra and first grade blooms than own root Roses. To accomplish this, however, you have to start right with gilt edged Rose Scions, properly grafted on the best Manetti stock. Before placing your order for Grafted Roses we would invite an inspection of our Roses at Sharon Hill. We use the best selected Manetti Stock from Messrs. Alexander Dickson & Sons, of Belfast—our grafting is done by men of experience and the wood of the different varieties of Roses is selected personally from exceptionally well grown and well ripened Rose Plants. The varieties are **AUGUSTA VICTORIA, BRIDE, BRIDESMAID, SOUV DU PRESIDENT CARNOT, MRS. PIERPONT MORGAN & MME. HOSTE.** To secure our best stock **order at once,** *as we fill in rotation and March is the last grafting month.*

PRICES—From 2½-inch pots, $10 per 100; $90 per 1000. We guarantee our plants to be as represented, and at these low prices you can more than pay for the plants on the first cut of flowers.

ROBERT SCOTT & SON, - - - Sharon Hill, Del. Co., Pa.
